For 5 months I was dragged to conversations, instructions, had to take oaths and received promises from the highest ranks, the generals of the KGB. In September 1981 Lieutenant General Zvigun personally talked with me about working for the KGB abroad. The telefon number of the main agent, conducting this campaign, Juri Semenovitsch, Major for special services, is 2-23-00-23.

Their friendly talks were mixed with threats to persecute my relatives in the USSR and to follow me abroad. I could not stand this devilish scheme and refused any cooperation. Once more I lost my job. I received an order from a psychiatrist and was declared mentally ill. My situation is desperate. These are the conditions here and such is our life in the USSR.

TELEPHONE ACCOUNT FROM MR. P. S., MOSCOW, JULY 1982

Because of my criticism of the government I was released from my position at the Institute of Mining in Moscow. There was no one in the entire city who was prepared to employ me. The KGB man said to me: "You can always volunteer to work on the pipeline, before we send you there anyway. You still have the chance to volunteer".

So I travelled to Tyumen, where I was told to register as an electrician at the distributor station at Urengoy. I worked there for a year. Urengoy is a small, dirty town with hastily built, barrack like buildings. I shared a room in a hostel with three other workers. On my first day at work I was officially informed that camp inmates were also at work on the pipeline. Unless I wanted to join them I was not to speak to them or speak about them at all. For eleven months I was able to observe how badly and injustly the prisoners were treated. They were subordinate to the volunteer workers, who of course only had to do the easier work. If the work was dangerous, then again the prisoners were made to do it. However they were then promised a reduction of their sentences.

In those eleven months I witnessed many fatal accidents, caused by exploding gas or toxic fumes. During the summer concrete was delivered in open lorries. It often became so hard en route that the prisoners received lacerated hands as they attempted to remove it. Even the heavy equipment delivered from abroad was unloaded by unaided prisoners.

There were always accidents during the test runs. Poor servicing led to many breakdowns and the prisoners were made, with inadequate equipment, to put the damage right. They had to move the heavy pipes. It often happened that weak ropes broke and killed someone. I often tried to raise the matter with the trade union but always received the answer that: "You shouldn't feel sorry for them—they should have been killed long ago. They are happy to be given the chance to 'improve' themselves".

The camp itself was not in Urengoy, but a few kilometers out in the Tundra, so that the inhabitants of the town remained unaware of their existence. But I had plenty of opportunity to speak with their guards, young soldiers serving there. They told me of the high rate of mortality of the prisoners and also of the frequent suicides among the young soldiers who could not stand the sight of so much misery. Young soldiers were known to turn their own weapons against themselves in their watch-towers.

The worst sight to bear was that of the many female prisoners, who were obliged to perform the same work as the men. Every evening they returned filthy and soaked to their barracks, and had no chance to change or to wash their clothes.

In winter the MWD guards warmed their hands around a fire, clad in sheepskin jackets. The prisoners worked on, in their working trousers and scarcely padded jackets.

SUMMARY OF PRIVATE LETTERS OF V. TITOV SENT TO JU. BELOW, OCTOBER 1982

In 1963 I have been working on the construction line Buchara-Ural (gas supply pipes) as manager of a sector for mounting and installing controlling and measuring devices as well as automatic machines. Here, as nearly everywhere, prisoners are doing the hardest work. From 1980 to 1981 I have been working in the district of Jjumen on gas pipes installing controlling and measuring devices as well as automatic machines.

Here as well prisoners did work coming of the concentration camps of Surgut, Nadym and Urengoj. These camps are situated in impassable marshland. In summer they (the prisoners) will be transported in helicopters of the type MI-6 and MI-10 to the constructing line, squeezed together like "herrings", in winter with vehicles and helicopters.

Among the prisoners there are many specialists with higher education, they are working as chief operators and brigadiers. Working with prisoners requires a special permit of the militia for those finding themselves in free working conditions. Unrestrained violence is the rule. Economic benefit is obvious.

When I have been for the last time on a reception on Dzershinski place with high-ranking people of the KGB, they insulted me for some time because of my refusal to work for them abroad, and they told me: "We shall let you putrefy. We shall let you putrefy for a long time. Nobody will declare the war because of you, all will be running down from us like water.

Within a short time they will arrest me. In what kind of torturechamber they will bring me—I don't know.

On 11th November 1982 news came by telephone out of dissident circles at Moscow, that V. Titov has been arrested at the end of October and sent into the psychiatric clinic at Kaluga, department 7, where he will be subject to a forced treatment.

WRITTEN REPORT BY MRS. A. P. FROM MOSCOW (JULY 1982)

My family and I, that is to say, my husband, my children and I have been trying for 5 years to acquire permission to leave Russia. Our applications are always rejected, because my uncle is an officer serving in the north in a department of the Hanty-Manssiiskii-Rayon.

My uncle is officially merely a simple engineer in a pioneer unit. Even so the authorities declare that he is party to military secrets and so even 20 years after his period of service is terminated, we will still not be issued with emigration papers.

Towards the end of last year, my uncle appeared unexpectedly in Moscow, saying that he had been releasd from the army owing to illness: In the course of the conversation I learned the following facts:

My uncle had in fact worked as an engineer on various projects, ranging from the new harbour on the Yamal Peninsula to Perm in the Urals. The officers and men were openly told that the construction of the gas pipeline from Siberia to Europe would strengthen the defensive capacity of the north of the Soviet Union. In the first place the size of the work force would be increased, and then the pipeline would considerably ease the difficulties of supplying fuel to the military installations in the far north. We don't even need to do anything ourselves. The first stage of the work would be completed by prison camp inmates and work brigades would only need to continue the work.

My uncle was astounded at Western naivité. He could not understand how the other side would wish to contribute to the military programme of the Soviet Union by delivery of their latest technology. The Russian defence ministry had been saved millions through this.

In my uncles opinion, along the entire pipeline there are branch lines for supplying military installations with gas. There are basis, launching pads for rockets and even weapons factories, as well as their grid network.

I am not harming my uncle by disclosing this information. He was transferred to a nuclear missile base and suffered a severe exposure to radiation. He is now dying. Nor is he an isolated case—there are hundreds like him.

TELEPHONE ACCOUNT OF MR. I. P. FROM TYUMEN, JUNE 1982

On the 15th of June, Mr. I. P. telephoned a friend in the West and related the following account:

Ever when I was in the camp, I had heard about the possibility of working on the gas pipeline to Europe.

Because of the hard conditions in the camps, many inmates are prepared to exchange camp life for the relatively "freer" life of a prisoner under limited supervision, who can be sent to work on special projects.

I did this and travelled with 50 other prisoners under limited supervision to Tyumen. Together with prisoners from other camps we waited in the transit camp for 10 days, whilst the militia and MWD arranged the areas of work. I with several others, formed part of "Special Group 7" and was taken to Kirpitschnii, a small place near Tyumen. As a prisoner under limited supervision I came under the authority of the Area Commander. There I lived with 4 others in a railway wagon, with just enough room for 4 cots. We had electricity but no water. Others lived in barracks, dating from the Stalin era, while others again lived in rapidly erected hostels, usually two storied buildings with no comforts.

Such places rarely have names. They are mostly known as "Special Group No . . ." with an indication of the camp authorities for the respective areas.

Such prisoners as we had to accept any work which was detailed to us. Prisoners under limited supervision work together with banished or "parasites". There are about 6000 in Kirpitschnii.

Our work consisted mostly of producing glass wool, wrapping the pipes, digging the trenches, transporting the armatures and pipe bearers, laying electricity or telephone cables and various tasks in the petro-chemical sector.

Armed solders and dogs guard specific areas, which are also fenced and wired off, where the perma frost is worked or rocks blasted. Inmates of camp No. 34/2 "x" are transported here in closed railway wagons. These areas are laid out to correspond with the progress of the project.

Food is poor, there is no medical attention, the barracks and wagons are cold and there are frequent cases of drunkeness amongst the workers.

There are also frequent cases of prisoners under limited supervision receiving fresh sentences and being taken back to camps, to continue working behind barbed wire.

At this moment there are 14 prison camps which belong to the complex of Tyumenlag: Nishnaya Tavda, Ussetsk, Jalutorovsk, Savodoukovsk Ipim, Malitza, two camps in Tobolsk and two more in Tyumen itself.

All related tasks, such as digging trenches, laying railway tracks, mixing concrete and preparing grids for the frames are not only done by men, but by women and minors, It is estimated that about 100,000 forced labourers are employed on various tasks asso-

ciated with the gas pipeline from Siberia to Europe.

One related task is the manufacture of work clothes. Women, or the inmates of psychological institutions are used for this. Even so work clothes are still scarce. For example protective gloves are only distributed every six months. Most prisoners wrap rags around their hands, but there are still frequent injuries or eczemas occured by working with barbed wire, concrete, glass wool or asbestas. Accidents are a part of life. However when the medical orderlies are called, they demand to know who is injured, whether the victim is a volunteer or an ZEK (the name for prisoners, prisoners under limited supervision, banished persons). Where an ZEK is concerned, the orderlies never bother to hurry.

STATEMENT

(The following is the statement of Dr. Richard Gnauch, Chairman of the International Society for Human Rights and the principal organizer of the International Commission on Human Rights which met in Bonn, Bad Godesberg, in November, 1982.)

In recent months, reports gathered from telephone calls and letters arriving from the Soviet Union have confirmed that large numbers of prisoners are being employes as cheap labor on the construction of the Trans-Siberian gas pipeline to Europe, There are civil rights campaigners, prisoners of conscience, victims of religious persecution and even women to be found amongst these prisoners.

As in the case of other large construction projects in the USSR the work is performed under inhuman conditions: with poor food, clothing and accommodation, and severe punishments for failure to achieve the desired output.

The reports on the human dimension of the pipeline are at first hand. They are a sign from the prisoners themselves, a call for help!

For this reason the ISHR (IGFM) released the information to the press and thereby to the public. The ISHR (IGFM) also appealed to the German Chancellor Schmidt to drop the projects on humanitarian grounds, in an open letter reproduced on page 32. The response surprised us all. From the public at large the reaction was one of overwhelming support. The proofs are increasing each day. However, whilst the Ministry of Foreign Affairs is still looking into the matter, Chancellor Schmidt has a already informed concerned members of the public that these reports are "not true". The Soviet news agency, Tass, even speaks of "filthy lies". (8th August 1982)

The ISHR (IGFM) therefore has provided a documentary file so that the reader may reach his own decision. We should like to suggest to the governments of Western Europe, that they have the working conditions on the pipeline investigated by an international committee of trades unionists. We feel that this is also in the best interest of the Soviet Union.

We hope that our efforts will lead to renewed reflection about this pipeline project.

Should we share the guilt of exploiting forced labourers? The Nuremberg processes condemned the use of concentration camp prisoners as forced labour. So too, does the United Nations regularly condemn the use of forced labour as slavery. We too can play our part. We as the ISHR (IGFM) should like to ask all concerned people to stand up and be counted—send a parcel to a prisoner or to his family. We can assist you to do so.

HISTORY OF INTERNATIONAL SOCIETY FOR HUMAN RIGHTS (ISHR)

The ISHR was founded in 1972 in Federal Republic of Germany and changed into an international organization in February 1981. In October 1982 the British section of ISHR established itself. ISHR has 2500 members in several countries.

The activities of ISHR are based primarily on the Universal Declaration of Human Rights, proclaimed by the General Assembly of the United Nations on 10 December 1948. The International Society for Human Rights is a humanitarian organization. Consequently, our activities are as follows:

Assistance to all those isolated individuals or groups who are striving for the realisation of human rights; to those doing it in their country without the use of violence; to those who are persecuted for "exercising" these rights. Our help is not limited to political prisoners alone. We also intervene in cases of separated families, for example.

Active support of requests drawn to our attention, whether in general or in particular cases. Public disclosure and denunciation of all violations of human rights. Development of projects and suggestions for politicians and state institutions. Collaboration with international organizations. Improvement of international tolerance and understanding. Setting a personal example to motivate citizens to fight for human rights. We are acting individually and do not wait for the State to intervene.

Anyone over the age of 16 can become a member of the Society.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. EXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTERNATIONAL TRADING CONFERENCE

Mr. EXON. Mr. President, the just concluded International Trading Conference in Geneva, flying under the banner of General Agreement on Tariffs and Trade, GATT, folded a few hours ago. A better phrase would be that it collapsed. Oh, here were the face-saving communiques and nonbinding so-called agreements. They are all a sham and must be so recognized.

I call upon the administration, the President's chief trade nonnegotiator, Bill Brock, and the other participants to face reality and honestly dub their trip a disaster as measured in terms of any meaningful positive result for free world trade, especially American agriculture.

This is necessary, Mr. President, because until all understand the disturbing facts that confront us in trade, there is no chance for corrective action. Enough, I say, of the rhetoric which has temporarily salved the economic wounds of many in the agricultural sector, particularly that we will sell our way out of our horrendous food surpluses if we stay the course.

The agriculture course was wrong in the first place—to stay it any longer will surely ruin any semblance of our family-size farm operations.

It is long past time for the administration to ignore the plight of this Nation's food producers. The GATT failure was just the latest stark testimonial that the interests of our efficient food producers are being savaged by unfair competition around the globe. A Nebraska farmer does not balk at competition from a European or Japanese farmer. But he cannot compete with both foreign farmers and their governments cahoots. Our obligation, it seems to me, is to insist that our so-called trading partners—a partnership where they get 40 percent of the goodies and we get 10 percent—and our so-called military partners—a partnership where we pay the costs at 75 percent and they 25 percent—get in balance, the sooner the better.

We have been taken for a "trade ride" for far too long, and Uncle Sam can no longer afford to play Santa Claus, even if he has enjoyed starring in that role for so long. As the song says, "The Party's Over."

Mr. President, I wish to call the attention of my colleagues in the Senate to a speech on this subject that I gave nearly 2 years ago, December 12, 1980, appearing in the CONGRESSIONAL RECORD at page S16355.

In those remarks of 2 years ago, I warned very clearly that there was no free trade, and I think we can all agree now that certainly after the last 2 years of experience we are no closer to any more of a free trade than we had then.

During that 2-year period, the economic distress that has faced our farmers and that they are now in is one of the great tragedies of our time. It is indeed proper, Mr. President, that we begin to recognize the serious unemployment situation that we have in America today.

This Senator can say that I undoubtedly will be supporting some of the measures that I anticipate will come before this body in this lameduck session. Yet for far too long we have not paid heed to the farmer. He is not unemployed; he is simply going broke. If we do not begin to do something about it, I will be standing on this floor a year from now reminding that it is well that we help the unemployed, but it is also necessary that we do more than we have done thus far to recognize the serious financial plight of the American food producer.

Mr. President, what I said 2 years ago is so true. Without being too repetitious, I want to quote from just three paragraphs of that talk that I gave on December 12, 1980.

But when we talk of free trade, Mr. President, we should recognize that there is no free trade. There is no free trade. And I think that those who have talked time and time again about free trade are following an unrealistic myth.

Let us take our friends the Japanese, who are important importers of something that is produced in my State—food products. But the facts of the matter are there is no free trade with the Japanese on agricultural products. In fact, I had a chance, Mr. President, to just do a recent study on some of the practices that are carried on by the Japanese to protect—I emphasize, Mr. President, protect—their domestic producers of agriculture.

And I do not criticize them for one moment in protecting their domestic producers of agriculture, because they know how important food is.

Certainly with regard to pork, for example, the agriculture director of the Japanese, by the push of a button, can let pork come in or not come into that country.

That is not free trade.

Mr. President, the total failure of the GATT conference just recently concluded in Geneva brings home even further the fact that we are selling short the interests of the food producers of America. I say, Mr. President, that the administration and this Congress should send the message very clear around the world and begin to do something at home to make sure that our farmers, in their efforts to sell their products around the world—and they are doing a good job of that through their farm organizations. We have to make sure that they are assisted in some manner and not be unfairly treated, as they obviously have been for the past several years.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

BLAME FOR OUR CURRENT RECESSION

Mr. THURMOND. Mr. President, I am not an economist, but my 28 years of service in the U.S. Senate have given me a reasonable perspective on economic and political events of the last quarter century.

It is for that reason that I rise today to take issue with the claims of editorial writers, political pundits, and critics of the current administration who insist—among other things—that President Reagan has singlehandedly embroiled this Nation in its worst economic crisis since the Great Depression.

Like many people, I lived through that tragic period in our history, and I want to state categorically that our economic troubles are not nearly as bad as they were in the early and mid-1930's when banks and lending organizations faltered and failed at an alarming rate and our stock market collapsed.

I feel compelled to remind my colleagues that financial failures of banks were so bad that special legislation was needed to protect peoples' savings and restore their confidence in those institutions.

Mr. President, I do not want to take up the Senate's time with a lengthy recitation of events as they were almost 50 years ago. However, I do want to make a point about where blame should be assigned for our current recession.

As I have stated often, our troubles stem from decades of fiscal irresponsibility on the Federal level and a pattern of switch hitting economic philosophies that transcends any one political party or administration. During our debate on the balanced budget amendment, the distinguished Senator from Utah (Mr. HATCH), and I pointed out that our budget has been balanced but once in the last 21 years, twice in the last 25 years, and that our cumulative national debt now tops $1 trillion.

Mr. President, I wager that none of us here has ever seen what a billion dollars looks like, let alone a trillion dollars. Quite simply, that is more money than the mind can imagine, and yet we deal so casually with those figures every day that our sensitivities about big spending and taxation have become dulled.

For too long, we preached a ruinous philosphy of spend, spend, spend and tax, tax, tax—as if there were no tomorrow. Well, as football coach George Allen once said, "The future is now," and the sins of our past have caught up with us. Against a backdrop of fiscal irresponsibility, two other things have occurred which directly affect our economic condition.

First, beginning in the early 1970's, the American economy began a slow and almost imperceptible shift from heavy to light industry. We began to move away from the labor-intensive production lines that characterized our rise to industrial preeminence, and we entered a new era of computer and electronics production.

That shift is still taking place, and as American industries continue to catch up with foreign producers that began the changeover faster than the United States, production in our Nation's factories and businesses will continue to lag.

Second, this country has a long history of changing economic policies almost as fast as the average American household changes tires on the family car. We try them out, and if substantial progress is not seen quickly enough, we cast them aside and move on to something new.

We are impatient people, Mr. President, with a quick-fix mentality that places tremendous strains on our political system and its officials—particularly the President of the United States.

This mentality has contributed to a rapid turnaround in national economic policies—oftentimes as soon as a President enters the midpoint of his first term in office. The idea, of course, is that the President is expected to make so-called midcourse corrections if his policies do not yield immediate and tangible results.

It is interesting, I think, that the economic reporting of late has all but ignored the really good news about interest rates, inflation, and housing starts. Just 20 months ago, Americans were suffering under outrageous interest rates and rampant inflation, and they were clamoring for relief.

Ronald Reagan came into office committed to providing that relief. But also dedicated himself to a much more long-range goal: That of charting a new and bold course for this country, one that would return us to the economic principles which made us the undisputed industrial giant of the world.

We began that journey with some trepidation, and an admonition from the President that change would not occur overnight. Now, 2 years later, a great deal has been accomplished, but—admittedly—much remains to be done, especially in our battle to bring down unemployment.

Despite that progress, we once again face the old choice of whether we should plot a new economic course, or make, what the media has called, midcourse corrections. The President has indicated that he intends to stay the course, and that he does not consider our most recent elections to be a mandate from the people to abandon his plan.

I am relieved to hear that because I remain convinced that Ronald Reagan is this country's best hope for a brighter and more prosperous tomorrow.

A recent editorial in the Rock Hill Evening Herald, written by guest columnist Joe Rivera, makes a convincing case for exactly who is to blame for our economic ills, and I want to commend it to my colleagues. This article sheds some light on the question of what people expect from their President and their Congress. I ask unanimous consent that the editorial, from the October 20, 1982, edition of the Evening Herald, be included in the RECORD at the conclusion of my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Rock Hill Evening Herald, Oct. 20, 1982]

"IS REAGAN REALLY TO BLAME?"

(By Joe Rivera)

"I hate that man!"

"He got us in the worst mess we've ever been in!"

"He made me lose my job!"

"He don't care what happens to us!"

'All he cares about is them people over there!"

"He just wants to build up the military and throw money away on nuke power!"

We hear these statements more and more every day. The mood of the country is one of despair, frustration and anger.

This is understandable considering the high rate of unemployment and the continuing shut down of factories and business, and the curtailing or elimination of various government programs.

But is Reagan really the person to blame? Let's look at the above statements:

"I hate that man!"—To hate him seems to be a natural reaction by most. This is conceivable when it is expressed as a personal emotion with which to vent our anger, but to continue hating when there is unsufficient evidence is not only objectionable, it's unchristian.

"He got us in the worst mess we've ever been in!"—Every goal in life is not attainable. Frustration results when we use conflicting approaches toward these goals.

Previous administrations chose to attain and reject these goals at the same time, thereby getting us into a quandary. This was Reagan's legacy when he took over.

Remember trying to unravel a large ball of twine tangled up with a bunch of knots? It becomes a worse mess, but if we have to get it untangled and we're persistent, we will eventually get it straightened out.

This is what Reagan is doing. He's caught in the middle of this mess, but he was elected to do it and he is persistent enough to get us out of it.

"He made me lose my job!"—Now really, did he come down personally and fire you, or lay you off? No, any stupid person will know he didn't do that! It was thanks to his policies that I lost my job. Letting all those imports in the country . . .", you might say.

Reagan did not personally let all those imports in. This trade imbalance was allowed to continue unchecked by other administrations before him.

Goods from overseas with better quality, more efficiency, and reasonably priced became available. The public rushed to grab these goods and they saturated the country. The "Buy American" slogan went unheeded. When our products were not being bought, the manufacturers closed shops, moved overseas, produced them at a lower cost, and sold them back to us, with a foreign-made label on them, but subsidized with American capital.

Thus, our own personal greed caused your job to be lost.

Reagan advocates a more balanced trade with other nations. He can not simply cut out foreign imports all together. Do you think that other nations will allow our goods into their countries if we kept theirs out of ours?

A more balanced trade policy and a sensible approach by the American consumer to buy American-made products is a possible solution.

"He don't care what happens to us!"—Do you honestly believe that? He is doing what previous administrations refused to do. He too got tired of so many fraudulent recipients of food stamps and welfare, so much abuse of public funds and duplicated government programs. He is trying to get us out of this quagmire precisely because he cares about us, but nobody likes it.

"All he cares about is them people over there!"—This couldn't be farther from the truth. There are too may considerations involving foreign relations which we are not familiar with that precludes him from ignoring "those people over there." A return to isolationism is a relatively simple matter, maintaining it can be quite difficult.

This is what happened prior to and following WWI. Thus, in retrospect, it is inconceivable that a world power, which the United States has become, can withdraw from world affairs.

"He just wants to build up the military and throw money away on nuke power!"—If we look just a few years back, we'll see how one administration after the other persisted in whittling down defense spending to a point were our national defense is hanging precariously on a balance.

We have been operating without a recognizable foreign policy and a weakened defense posture. This image has undermined the confidence of our allies, lessened our credibility with the nonaligned nations and encouraged our adversaries.

The Soviet Union has continued its stubborn build-up without one word of protest from our pacifists at home. It has moved with impunity in almost all spheres of influence around the world.

Now we have a man in the White House who is not afraid to expose their bluff and who is determined to regain the stature and international respect which we had previously accepted as our birthright, and almost everyone is down on him.

His determination to rebuild our deterrent strength and military flexibility should receive the backing of every person who is proud to call himself and herself an American.

It is sad to see or hear men and women making so much noise about our development of nuclear power and yet they say nothing about the Soviet Union. They demand that we stop nuclear proliferation immediately but they make no such demand to the Soviets.

They know that if they tried to voice such opposition over there they would end up in Siberia or else, being thrown out of the country at once.

The President has repeatedly stated that we'll be willing to negotiate disarmament with the Soviets if they would do so in good faith. However, the fact is that they, and our own pacifists believe that this is a unilateral burden to be accomplished by us and not by the Soviets.

It is urgent that we back the President in this matter. It won't be easy and it will demand sacrifice. If we don't do it now, tomorrow might be too late. If Reagan reneged on his obligation to serve and preserve the nation, then he would be remiss in his duties. He is only doing what others before him refused to do. He needs our prayers and support.

When the time comes that America and our way of life is not worth protecting, then we as Americans, have already lost.

Mr. THURMOND. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

A TRIBUTE TO JAMES E. O'MEARA, JR.

Mr. METZENBAUM. Mr. President, it is with great pride that I take this opportunity to salute a fellow native of Cleveland, James E. O'Meara, Jr., for his outstanding accomplishments in the fields of education, law, and labor, and for his 48 years of dedicated service to the Cleveland community. On Saturday, December 4, 1982, he will be honored by his many friends and admirers at a tribute hosted by the Cleveland Teachers Union. I am sure my colleagues will join me in extending our congratulations and best wishes to Mr. O'Meara on the occasion of this well-deserved testimonial to his lifetime of distinguished service.

James O'Meara was born and raised in Cleveland. He is a product of the Cleveland public schools, and received his Ph. B. and M.A. degrees from John Carroll University. In 1933, he began a 40-year career in the Cleveland public schools, teaching history and law at John Hay, South, and Glenville High Schools. He has also been an instructor at John Carroll University and the Rabinical College of Telshe Yeshiva.

In June 1935, he married his lovely wife, Margaret Riester O'Meara. They have four childern and seven grandchildren.

Admitted to the bar in 1941, Mr. O'Meara specialized in education law. Subsequently, he earned his J.D. in 1968 from Marshall Law School. In addition, Sioux Empire College has honored him with a doctor of humane letters degree.

Mr. O'Meara has had a lifelong commitment to the labor movement. He was a charter member of the Cleveland Teachers Union, and served as its president for 11 years and its executive secretary for 8 years. He was also president of the Ohio Federation of Teachers and vice president of the American Federation of Teachers. As an AFT delegate to the International Federation of Free Teachers Unions, he received worldwide recognition as vice president of IFFTU and one of its eight-member executive board.

Among his high-ranking offices in the Cleveland AFL–CIO Federation of Labor were recording secretary, vice president, and chairman of the COPE scanning committee. In addition, Mr. O'Meara chaired the education com-

mittee at many conventions of the Ohio Federation of Labor. He received the United Labor Agency plaque for his contribution to labor in Cleveland.

As a longtime civil rights activist, he served on the Civil Rights Committee of the Cleveland AFL-CIO Federation of Labor, Ohio Civil Rights Commission, and United Negro College Fund Committee. A member of the Urban League, he served on both the nominations committee and the employment committee.

In addition to his career in education, law, and labor, Mr. O'Meara devoted countless hours to community service. He was a trustee of Cuyahoga Community College for 14 years, a member of the Cleveland State Advisory Committee on Labor Education, the industry, commerce and schools committee of the United Appeal, and the education committee of the American Cancer Society. He also served as a member of the board of directors of the City Club of Cleveland. In 1980, he was appointed to the Cleveland Board of Education to fill an unexpired term and served until the 1981 election. He continues to be a lecturer on school law at colleges, high schools, and teacher meetings in the Cleveland area and at colleges in several States.

Mr. President, it is a very real pleasure to have a small part in honoring one of the outstanding citizens of my own home community of Cleveland. I salute James O'Meara for his distinguished career and for his many years of unselfish and untiring service to the people of Cleveland and the Nation.

RULES COMMITTEE ACTIONS AFFECTING OPERATING EXPENSES OF SENATE OFFICES

Mr. MATHIAS. Mr. President, I wish to announce actions taken by the Committee on Rules and Administration which have impact on various operating expenses of Senate offices.

The first is a revision of Senate training regulations for professional staff of Senate committees. Effective September 22, 1982, the limit for conference, registration, seminar or attendance fees which can be paid from committee funds without prior approval of the Rules Committee has been increased from $100 to $500.

Next is a revision of the Senate regulations concerning the rental of automobiles by Senators and staff while on Senate business. For a 6-month period beginning October 1, 1982, Senators and Washington-based staff will be allowed to rent vehicles in the Washington metropolitan area only for official business conducted outside the Washington metropolitan area.

Also, effective on October 1, 1982, the Sergeant at Arms of the Senate will no longer make payment for telegraph charges of Senate committees.

Mr. President, I ask unanimous consent that three letters dated October 1, 1982, that I sent to Senators and committee chairmen be inserted in the RECORD at this point.

There being no objection, the letters were ordered to be printed in the RECORD as follows:

U.S. SENATE,
COMMITTEE ON RULES AND ADMINISTRATION,
Washington, D.C., October 1, 1982.

DEAR MR. CHAIRMAN: This letter is to serve as notification of a recent change in the Senate regulations governing the training of professional staff of Senate committees. A brief restatement of these regulations is included for your information and guidance.

Section 202(j) of the Legislative Reorganization Act of 1946 provides for the expenditure of funds available to standing committees of the Senate for the training of professional staff personnel under certain conditions. It is the responsibility of each committee to set aside funds within its annual funding resolution to cover the expenses of such training. These funds may be used subject to Rules Committee approval of specific training requests made on an individual basis. Training requests should be received sufficiently in advance of the training to permit appropriate consideration by the Rules Committee.

Prior approval for attendance by professional staff at seminars, briefings, conferences, etc., as well as committee funds earmarked for training, will not be required when all of the following conditions are met:

1.The sponsoring organization has been asked to waive or reduce the fee for Government participation.

2. The fee involved (actual for reduced) is not in excess of $500. (Please note that this was increased from $100 by action of the Rules Committee on September 22, 1982.)

3. The duration of the meeting does not exceed five (5) days.

If the fee or time duration for meetings is in excess of the aforementioned, advance approval by the Rules Committee must be sought. At that time the Committee will determine the classification of the proposed charges as either "training", which requires compliance with all the provisions of section 202(j), or "non-training".

Further information on the Rules Committee regulations for training of professional staff of Senate committees can be found in the Committee print entitled "Expenditure Authorizations and Requirements for Senate Committees". Questions can be directed to Dennis Doherty (x40284) or Chris Shunk (x40277) of the Rules Committee staff.

I hope that this letter has been helpful and informative.

With best wishes.

Sincerely,

CHARLES MCC. MATHIAS, JR.,
Chairman.

U.S. SENATE, COMMITTEE ON RULES AND ADMINISTRATION,
Washington, D.C., October 1, 1982.

DEAR SENATOR: The Committee on Rules and Administration has approved, on a trial basis, a revision of the Senate Travel Regulations in regard to the hiring of automobiles in Washington, D.C. for the conduct of official business. The first paragraph under section D on page 11 of the Senate Travel Regulations shall be revised to read as follows:

"The hire of boat, automobile, aircraft, or other conveyance will be allowed if authorized or approved as advantageous to the Senate whenever the Member or employee is engaged on official business outside his designated post of duty. In no case may automobiles be hired *for use* in the metropolitan area of Washington, D.C., by anyone whose duty station is Washington, D.C." (Inserted language emphasized.)

This change clearly indicates that vehicles which are rented by Senators or staff whose duty station is Washington, D.C. could only be used for travel which takes them outside the Washington metropolitan area. The rental of vehicles for travel in and around Washington, D.C. is prohibited. The use of such vehicles shall be limited to departing directly from the Washington metropolitan area until turning the vehicle back to the lessor immediately upon return.

Please be advised that this revision has been approved on a six-month trial basis effective immediately. An evaluation by the Rules Committee for extending this approval shall be made at the conclusion of the trial period.

Please direct any questions concerning this matter to Dennis Doherty (x40284) or Chris Shunk (x40277) of the Rules Committee staff.

Sincerely,

CHARLES MCC. MATHIAS, JR.,
Chairman.

U.S. SENATE, COMMITTEE ON RULES AND ADMINISTRATION,
Washington, D.C., October 1, 1982.

DEAR MR. CHAIRMAN: During the 96th Congress, the Rules Committee developed and the Senate adopted a package of reforms to the committee budgeting system. The theme of these reforms was to bring all spending of committees within the annual funding resolution reported by each committee and adopted by the Senate prior to March 1 of each year.

Those reforms have been successful in consolidating committee spending. However, the Sergeant at Arms has traditionally included funds in his budget request for payment of committee telegraph expenses. This practice has continued after the adoption of the committee reforms. Payment of these expenses has been at odds with the goal of consolidating committee spending.

This letter is to advise you that the Sergeant at Arms, effective October 1, 1982, will no longer make payment for telegraph charges of committees. The Committee on Appropriations has eliminated all funds requested for fiscal year 1983 by the Sergeant at Arms for payment of these charges. According to the Committee's report on S. 2939 (Report 97-573), the Legislative Branch Appropriation bill for FY 83, funds provided the Sergeant at Arms for telegraph charges are "to be used solely for needed telegraph services of the Senate leadership and officers. Consistent with Senate committee reform of the 96th Congress, committees are to pay for telegraph costs through their own authorized funds."

Please be advised that the Sergeant at Arms has arranged for each committee to be billed directly for telegraph expenses charged as of October 1, 1982, on the current committee account number.

If you have any questions concerning this matter, please contact Dennis Doherty

(x40284) or Chris Shunk (x40277) of the Rules Committee staff.

Sincerely,

CHARLES MCC. MATHIAS, Jr.,
Chairman.

U.S.S. "GEORGIA," A FITTING TRIBUTE

Mr. MATTINGLY. Mr. President, during the just completed recess, I had the pleasure and privilege of attending in Connecticut the christening and launching ceremonies of the U.S.S. *Georgia,* our Nation's newest *Ohio* class, ballistic missile submarine.

This ship, a marvel of technology and a testament to America's commitment to peace, will join those already serving in the sea-based leg of our strategic, deterrent nuclear Triad force.

Adm. James D. Watkins, Chief of Naval Operations—and a submariner—in his remarks at the ceremony, captured the essence of the need for and the purpose of this vessel. He noted the "* * * paradox of deterrence—the awesome weapons which will sail aboard this ship are best employed by never being launched" and he cogently summed up the philosophy behind its construction, "* * * the entire Trident program is centered around maintaining a credible world peace through national strength."

National strength, Mr. President, comes from national will. Admiral Watkins correctly applauds the sacrifices that are made daily by Navy men and women in the performance of their missions. His, and our, "sailors of peace" deserve the thanks of all free peoples.

I am proud that the people of Georgia, their commitment to freedom, and the sacrifices that many of their numbers have made for our country, will be memorialized in the name of this mighty vessel. It is a fitting and deserved tribute not only to the people of Georgia but also to their great Nation.

I am pleased to bring the comments of Admiral Watkins to the attention of my colleagues and ask unanimous consent that they be printed immediately following my comments.

There being no objection, the comments were ordered to be printed in the RECORD, as follows:

REMARKS BY ADM. JAMES D. WATKINS

Thank you, Senator Mattingly. Distinguished platform guests, men and women of Electric Boat, wonderful *Georgia* crew members, friends of the Navy:

It is both a professional and personal honor for me to be here on this special day. I am pleased to participate in this historic event—the christening and launching of another Ohio class submarine—engineered and built to help our Nation maintain a credible, survivable deterrent to nuclear war—today and into the future.

On a personal level, this is a special day for several reasons. One is because my wife, Sheila, has the great honor of being this submarine's sponsor. And another is because my grandfather, Edward Lancaster Watkins, was born in Macon, Georgia.

Naming this submarine for the great State of Georgia is most appropriate because Georgians have a heritage of strong support for our national defense.

Senator Mattingly serves on the vital Appropriations Committee which supports a strong Navy.

Similarly, Senator Nunn has been an active supporter of the Navy and was instrumental in getting military compensation back on track. He is the great nephew of another famous Georgian known for his deep love of the Navy—a man well admired—the late Congressman Carl Vinson. Today as we speak, his legacy, the nuclear powered carrier U.S.S. *Carl Vinson,* is a vital part of the Atlantic Fleet. In his fifty years on Capitol Hill, Carl Vinson's wide-ranging and intricate self-mastered knowledge of naval affairs made him one of our Nation's most influential figures in maritime matters.

He led a wide-ranging battle defending the buildup of the 1930 skeleton-of-a-navy which parallels, in many respects, today's congressional debates centering around our goal of achieving a 600 ship Navy before the end of the decade. It was Carl Vinson who sponsored and fought for legislation which authorized crucial increases in our naval strength prior to the Second World War.

A strong opponent of naval disarmament, he realized we had to deal from a position of strength during the international naval limitation conferences of the day, knowing the alternative to preparedness was almost certain defeat.

That lesson still stands today. The entire Trident program is centered around maintaining a credible world peace through national strength. This program's operational successes have put muscle behind these words. To date, these ships have met or exceeded all technical requirements.

These submarines are the most effective warships of their kind in the world. And when the Trident II missile comes on line in the late 1980s, our most invulnerable leg of the strategic Triad will possess a missile with greatly improved accuracy that could be applied against hardened military targets—providing new options to our national command authority.

Georgia will sail the steady track of her sister ships—and she will sail as an instrument of peace, not war. Some critics yell "foul" and say that this position smacks of naivete'. They complain we do not realize the potential destruction capability aboard this submarine. But that is wrong—it is exactly this knowledge that brought her to life.

That's deterrence—preserving peace through strength. This policy is founded on a determination to avoid use of nuclear weapons. Since evidence is accumulating that Soviet strategic thinking holds that situations exist in which nuclear war is winnable and preferable to the alternative—it is necessary to keep the level of deterrence extremely high. *Georgia*—and the rest of her class—will do just that. We must look at this submarine—and its potential—in that light. I want it to be written by future historians that tomorrow's battle which was not fought was the most important battle we fought in the twentieth century.

This is the paradox of deterrence—the awesome weapons which will sail aboard this ship are best employed by never being launched. You help insure peace by their presence, avoid war by their existence.

Today, the temptation is strong to reduce American opinion on the nuclear issue to simple propositions—such as "X" on a ballot means immediate freeze.

The tough question is how to transform good intentions into practical results, a much harder job than writing ballot propositions.

We are all concerned about nuclear weapons. American's everywhere would like to see steps taken to curtail their proliferation. This commitment isn't new. American opinion on nuclear weapons and war has changed scarcely at all over nearly four decades. But, as appalled as the public is about nuclear weaponry, it has historically accepted a strong strategic posture because of no realistic alternative to heavy reliance on such weapons in the country's defense. The main reason for this is that the public considers the Soviet Union an untrustworthy adversary that would unhesitatingly use nuclear superiority—or any other military advantage—as political leverage to allow an uncontested pursuit of hegemonic policies.

A recent article by Everett Ladd in "Public Opinion" said it best. Quote. People don't like the bomb, but they consider it a necessary part of the Nation's military deterrence. They want to restrict its development and deployment, and to minimize the chance of its use, but they don't want to do so at the cost of a Soviet military advantage or in a manner that requires the United States to take the Soviets at their word. Unquote.

Just a couple of weeks ago Dr. Teller told a national press club audience that "Brezhnev applauds when 750,000 people march in Europe in support of a freeze, but when a handful do so in Moscow, they are arrested before anything could be done." You recall that when seven people in Moscow dared to unfurl a banner calling for "bread, life and disarmament", they were immediately arrested. We in the United States should be thankful we can freely debate such controversial and complex issues.

The problem is that our strategic deterrent forces—our ICBM force, B-52 bombers, Poseidon submarines—are '60's vintage weapons. In the '70's we reduced our strategic program substantially. In effect, we did freeze our force levels at that time and in return the Soviet Union increased its nuclear programs dramatically.

While we stayed with our third generation of ICBM's, they drove ahead to their fifth generation, and are now working on their sixth. From 1967 until *Ohio's* deployment last month, we did not build and deploy a single new ballistic missile submarine. In that same period, they built 60 progressively larger and more capable submarines, culminating in their new "Typhoon" class of ballistic missile submarines.

The result of *our* restraint is that over three quarters of our warheads are carried on launchers that are fifteen years old or older—while three quarters of the Soviet warheads—are on launchers that are five years old or less.

As a consequence, the Soviet Union applauds a nuclear freeze. Soviet incentives to negotiate any reductions, unfortunately, can now only be forced by the kind of U.S. strategic modernization effort of which *Georgia* is a part.

Wishing away nuclear weapons won't make them disappear. The reality is that they do exist—and although we are working for their removal from the arsenals of the world—for the time being they are with us. There are no easy, cheap, "quick fix" reme-

dies—we must proceed cautiously, step by step, during the nuclear arms reduction process.

The administration's "START" initiative has as its basis the goal of achieving world peace and reduction of nuclear armaments. Contrary to what critics imply, we are committed to achieving significant reductions in nuclear arms.

I advocate peace through strength, not because I want to see nuclear weapons used, but precisely because I do not. The fact is—every sensible human being is opposed to nuclear warfare—and the public interest which has recently arisen after a period of dormancy is probably best described as a disagreement about the best way to prevent such a war.

We in the Navy are moral men and women, willing to sacrifice for a lasting peace. The blue and gold crews of *Georgia* are of this caliber. They know that maintaining peace is a substantially harder task than going out into the streets and waving placards. For when their careers are successfully completed, they will have sacrificed upwards of five years—undersea, away from home and family—for this goal.

Today, over twenty-one hundred patrols have been completed by our ballistic missile submarine force in the name of peace. These patrols, in combination with the deterrence provided by their land and air Triad counterparts, constitute a proven working system of deterrence that some ask us to now discard.

We are sailors of peace and put our record of performance forward as proof. I am very proud of my people—and the missions they perform around the world.

Today, on this special occasion, let's all pledge our unwavering support to insure our deterrent strength remains alive, well and underway until an equitable nuclear arms reduction can be reached through bilateral negotiation—not unilateral.

We cannot ignore the complexities of nuclear deterrence or the realities of international relations. Simplistic solutions only arouse false hopes leading to disillusion. We must chart a practical course.

We can do better than a freeze. Patience is not too much to ask. Resolve is not too much to show. Until that time, men of *Georgia* will continue to sail the practical course for peace. God bless and protect them in their task.

MESSAGES FROM THE PRESIDENT RECEIVED DURING THE ADJOURNMENT

Under the authority of the order of the Senate of October 2, 1982, the Secretary of the Senate, on October 20, October 22, October 26, November 5, November 15, November 19, November 22, November 23, and November 24, 1982, received messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(The nominations received on October 20, October 22, October 26, November 5, November 15, November 19, November 22, November 23, and November 24, 1982, are printed at the end of the Senate proceedings.)

ANNUAL REPORT OF THE RAILROAD RETIREMENT BOARD—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE ADJOURNMENT—PM 185

Under the authority of the order of the Senate of October 2, 1982, the Secretary of the Senate, on October 25, received the following message from the President of the United States; which was referred to the Committee on Labor and Human Resources:

To the Congress of the United States:

I hereby submit to the Congress the Annual Report of the Railroad Retirement Board for fiscal year 1981, pursuant to provisions of Section 7(b)6 of the Railroad Retirement Act, enacted October 16, 1974, and Section 12(1) of the Railroad Unemployment Insurance Act, enacted June 25, 1938.

The Chairman of the Railroad Retirement Board informs me that despite changes in railroad retirement negotiated by rail labor and management and enacted in the Omnibus Budget Reconciliation Act of 1981, the railroad retirement system faces severe financial difficulty. With the railroad industry's strong tradition of collective bargaining, it is my belief that the parties should be free to negotiate and implement changes in the railroad retirement system as part of their normal collective bargaining. Restoring the rail industry's pension to the private sector as proposed would free rail labor and management from inappropriate Federal intrusion in their affairs. The rights and benefits of active and retired rail workers would be unaffected by this reorganization, with the Federal Government continuing to provide social security to retired rail workers, their families and dependents.

RONALD REAGAN.

THE WHITE HOUSE, *October 25, 1982.*

ADJUSTMENTS TO FEDERAL STATUTORY PAY SYSTEMS—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE ADJOURNMENT—PM 186

Under the authority of the order of the Senate of October 2, 1982, the Secretary of the Senate, on October 25, 1982, received the following message from the President of the United States; together with accompanying papers; which was referred to the Committee on Governmental Affairs:

To the Congress of the United States:

In accordance with the provisions of section 5305 of Title 5 of the United States Code, I hereby report on the pay adjustments I ordered for the Federal statutory pay systems in October 1982.

The Secretary of Labor, the Director of the Office of Managment and Budget, and the Director of the Office of Personnel Management, who serve jointly as my Pay Agent, found that an overall increase of about 18.47 percent in General Schedule rates of pay would be required to achieve comparability with private sector pay as that concept is defined in the Federal Pay Comparability Act of 1970. The Advisory Committee on Federal Pay agreed with that finding.

The Comparability Act gives me authority to propose an alternative adjustment in lieu of comparability, if such action is appropriate because of economic conditions. The Budget Resolution adopted by the Congress last June, which I supported, anticipated an increase of 4 percent this October in support of our economic recovery program. Accordingly, on August 26, 1982 I sent to the Congress an alternative plan which called for an increase of 4 percent at each grade. Neither House of Congress disapproved this alternative plan, so on October 8, 1982 I signed Executive Order No. 12387 implementing it.

Under that Executive Order:

—The scheduled rates of pay under the statutory pay systems (the General Schedule, the Foreign Service Schedule, and the schedules for the Department of Medicine and Surgery of the Veterans Administration) were increased by 4 percent in accordance with the alternative plan.

—The scheduled rates of pay for the Vice President and the Executive Schedule and Congressional and Judicial salaries were increased, under the provisions of Public Law 94-82, and the overall 4 percent in rates of pay under the General Schedule.

—The scheduled rates of pay for the Senior Executive Service were increased under the provisions of section 5382 of Title 5 of the United States Code based on the new rate of pay for GS-16, step 1, of the General Schedule and the new rate of pay for level IV of the Executive Schedule.

—The scheduled rates of pay and allowances for members of the Uniformed Services were increased, in accordance with the provisions of section 1009 of Title 37 of the United States Code, by the overall 4 percent in rates of pay under the General Schedule.

The Order also reflects the effects of section 140 of Public Law 97-92 (the continuing resolution approved December 15, 1981) and section 101(e) of Public Law 97-276 (the continuing resolution approved October 2, 1982), which contain limitations on payable salaries for certain top level Government positions.

I am transmitting herewith copies of the reports of my Pay Agent and the Advisory Committee on Federal Pay, my alternative plan, and the Executive

Order I promulgated to put these pay adjustments into effect.

RONALD REAGAN.
THE WHITE HOUSE, *October 25, 1982.*

ADMINISTRATION OF CERTAIN HIGHWAY ACTS—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE RECESS—PM 187

Under the authority of the order of the Senate of October 2, 1982, the Secretary of the Senate, on October 25, received the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Commerce, Science, and Transportation:

To the Congress of the United States:

The Highway Safety Act and the National Traffic and Motor Vehicle Safety Act, both enacted in 1966, initiated a national effort to reduce traffic deaths and injuries and require annual reports on the administration of the acts. This is the 14th year that these reports have been prepared for your review.

The report on motor vehicle safety includes the annual reporting requirement in Title I of the Motor Vehicle Information and Cost Savings Act of 1972 (bumper standards). An annual report also is required by the Energy Policy and Conservation Act of 1975 which amended the Motor Vehicle Information and Cost Savings Act and directed the Secretary of Transportation to set, adjust and enforce motor vehicle fuel economy standards. Similar reporting requirements are contained in the Department of Energy Act of 1978 with respect to the use of advanced technology by the automobile industry. These requirements have been met in the Fifth Annual Fuel Economy Report, the highlights of which are summarized in the motor vehicle safety report.

In the Highway Safety Acts of 1973, 1976, and 1978, the Congress expressed its special interest in certain aspects of traffic safety which are addressed in the volume on highway safety.

Despite large increases in drivers, vehicles and traffic, there has been a significant reduction in the fatality rate per 100 million miles of travel. The rate has decreased by 38 percent, from 5.5 in the mid-60's to the present level of 3.4. This means that motorists can drive more miles today with less risk. Had the rate remained at the 1966 level, nearly 280,000 more people would have been killed since then.

Although we can be proud of this accomplishment, the actual number of fatalities each year remains unnecessarily high. In 1980, 51,077 people met violent deaths in traffic accidents—an average of 140 lives lost every day. Compounding the tragedy is the fact that most of the victims were young people, killed at a time when they had the most to contribute to society and the most to gain from life.

Given the magnitude of the problem, protecting motorists and pedestrians from the kinds of dangers they face as a result of motor vehicle travel continues to be an important national priority.

The overall regulatory framework established since 1966 has contributed to motor vehicle safety in this country. Federal motor vehicle safety standards have encouraged the introduction of safety improvements. In the future, new regulations will be issued when there is no practical alternative and when we are certain that they will result in a clear and beneficial payoff. We are convinced that these reforms can be accomplished without jeopardizing the safety and consumer goals and policies that you have established.

In the highway safety area, we will continue to work closely with the States on priorities such as alcohol safety, motorcycle safety, police traffic enforcement, traffic records and emergency medical services. Highway safety grant programs will be simplified and Federal aid directed only to activities that achieve verifiable results in terms of reduced deaths and injuries, and to ones that are truly national in scope.

Reducing the annual traffic death toll will not be easy. Motorists today are better informed and are driving in safer vehicles and on safer roads. But they are still victims of habit and of human nature. They choose not to wear a safety belt because they do not expect to be in an accident. They drink and drive because alcohol is part of our social mores. And they sometimes speed and take unnecessary chances because being in a hurry is an unfortunate fact of modern life. Changing these driving behaviors is the traditional and most challenging obstacle to improving traffic safety.

The answer lies in widespread public education efforts and a national traffic safety commitment that involves government, industry, and the public. We are convinced that significant progress can be made and that American motorists and pedestrians will ultimately enjoy a greater level of personal safety as a result.

RONALD REAGAN.
THE WHITE HOUSE, *October 25, 1982.*

REPORT UNDER THE INTERNATIONAL EMERGENCY ECONOMIC POWERS ACT ON IRAN—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE ADJOURNMENT—PM 188

Under the authority of the order of the Senate of October 2, 1982, the Secretary of the Senate on November 1, 1982, received the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Banking, Housing, and Urban Affairs:

To the Congress of the United States:

Pursuant to Section 204(c) of the International Emergency Economic Powers Act (IEEPA), 50 U.S.C. Section 1703(c), I hereby report to the Congress with respect to developments between my last report of May 6 and mid-October 1982, concerning the national emergency with respect to Iran that was declared in Executive Order No. 12170 of November 14, 1979.

1. The Iran-United States Claims Tribunal established at the Hague pursuant to the Claims Settlement Agreement of January 19, 1981, is now actively engaged in the process of arbitrating the several thousand claims filed before it by the January 19, 1982 deadline. Although it has only recently begun to schedule significant numbers of prehearing conferences and hearings on the merits, the Tribunal has rendered decisions on twelve claims of U.S. nationals against Iran. Eight of those decisions approved settlements reached by the parties directly concerned; two more represented adjudications in favor of the U.S. claimants. The remaining two resulted in the dismissal of claims for lack of jurisdiction. In total, the Tribunal has made awards of more than $7.6 million in favor of U.S. claimants. The Department of State, with the assistance of the Departments of the Treasury and Justice and other concerned government agencies, continues to coordinate the presentation of U.S. claims against Iran as well as the U.S. response to claims brought by Iran, and also assists U.S. nationals in the presentation of their claims against Iran.

2. The Tribunal rendered its decision on the four issues concerning the $1 billion security account held by the N.V. Settlement Bank of the Netherlands to pay Tribunal awards against Iran. As indicated in the last report, those issues, which had not been resolved in the negotiations leading to the establishment of the security account in August 1981, involved (1) the disposition of the interest accruing on the funds in the account; (2) indemnification of the Settlement Bank and its parent, the Netherlands Central Bank, against any claims relating to the management of the security account; (3) payment of the administrative fees of the Settlement Bank; and (4) payment of settlements reached directly between U.S. claimants and Iran.

The Tribunal decided the last question first, ruling on May 14 that such settlements may be paid from the security account if the Tribunal deter-

mines that it has jurisdiction over the underlying claims and accepts the terms of the settlement agreements as the basis for rendering an award on agreed terms.

The decision on the other three issues was rendered August 3, 1982. The Tribunal decided that interest earned on the security account should continue to be credited to a separate suspense account established pursuant to the interim arrangements under which the security account had been managed since it was established. The Tribunal further decided that any such interest may be used by Iran to fulfill its obligation to replenish the security account whenever the payment of awards causes the balance to fall below $500 million. The decision thus prevents the diversion of the interest to any purpose other than payment of awards in favor of U.S. claimants, without the agreement of both the United States and Iran, until all claims are decided and all awards paid.

On the questions of management fees and indemnification, the Tribunal decided that fee payments should be shared equally by the two Governments and that indemnification should be joint and several, leaving open until an actual case arises the question of how ultimate responsibility for indemnification should be allocated between the United States and Iran.

3. The January 19, 1981 agreements with Iran also provided for direct negotiations between U.S. banks and Bank Markazi Iran concerning the repayment of non-syndicated loans and disputed interest from the $1.418 billion escrow account presently held by the Bank of England. The U.S. banks and Bank Markazi Iran continue to negotiate concerning payments out of this account.

4. Since my last semiannual report submitted to the Congress in May, there have been no transfers of assets to Iran by or through the U.S. Government under the January 19, 1981 agreements with Iran. However, I attach herewith five excerpts from the *Federal Register* that deal with the Iranian Assets Control Regulations. The first, published on May 24, 1982, is a requirement that holders of tangible property in which Iran had or asserted any interest report on such property to the Office of Foreign Assets Control. The purpose was to obtain information for use in promoting the resolution of disputes with Iran, preparing submissions for the Iran-United States Claims Tribunal, and formulating policies to deal with the tangible properties. The second, published on June 8, 1982, contains additional information with respect to the tangible property reports. The third was published on June 10, 1982. It is a directive license to the New York Federal Reserve Bank to deduct two percent of award amounts it receives from the security account for payment to U.S. claimants who have received awards from the Iran-United States Claims Tribunal. That two percent is for deposit in the U.S. Treasury to reimburse the U.S. Government for costs incurred for the benefit of U.S. nationals with claims against Iran. On September 14, 1982, the Administration submitted to the Congress a bill that deals with this deduction and also gives authority to the Foreign Claims Settlement Commission of the United States to receive and determine the validity and amounts of certain claims of U.S. nationals against Iran. Also, the bill authorizes the Secretary of the Treasury to reimburse the Federal Reserve Bank of New York for expenses incurred by the Bank in the performance of fiscal agency agreements relating to the settlement or arbitration of claims pursuant to the January 1981 agreements with Iran. The fourth *Federal Register* item revoked any authorizations for the permanent disposition, by means of a final judicial judgment or order, of interests of Iran in any standby letter of credit or similar instrument. The purpose was to preserve the status quo to permit resolution of claims involving those interests through either the Claims Tribunal or negotiations with Iran. Iran has filed more than 200 such claims with the Tribunal, and U.S. nationals also have filed a large number of claims concerning the same issues or related undertakings. U.S. account parties are still able to prevent payments to Iran by obtaining preliminary injunctions or other temporary relief, short of final dispositions, or by using procedures set forth in the Iranian Assets Control Regulations. Finally, on July 22, 1982, the Office of Foreign Assets Control published a new provision of the Iranian Assets Control Regulations that sets forth a licensing procedure for the sale and disposition of tangible property that is currently blocked because of an interest of Iran in the property. The purpose is to conserve the value of the assets and to permit the satisfaction of certain claims against the property. Licenses for such sales may be issued after a case-by-case review of license applications.

5. Several financial and diplomatic aspects of the crisis with Iran have not yet been resolved and continue to present an unusual challenge to the national security and foreign policy of the United States. By separate action, I am extending the emergency with respect to Iran beyond the November 14, 1982 anniversary. I shall continue to exercise the powers at my disposal to deal with these problems and will continue to report periodically to the Congress on significant developments.

RONALD REAGAN.

THE WHITE HOUSE, *November 1, 1982.*

ANNUAL REPORT ON HAZARDOUS MATERIALS TRANSPORTATION—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE ADJOURNMENT—PM 189

Under the authority of the order of the Senate of October 2, 1982, the Secretary of the Senate on November 5, 1982, received the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Commerce, Science, and Transportation:

To the Congress of the United States:

In accordance with the requirements of Section 109(e) of the Hazardous Materials Transportation Act (P.L. 93-633), I hereby transmit the Twelfth Annual Report on Hazardous Materials Transportation for calendar year 1981.

THE WHITE HOUSE, *November 5, 1982.*

EXTENSION OF NATIONAL EMERGENCY WITH REGARD TO IRAN—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE ADJOURNMENT—PM 190

Under the authority of the order of the Senate of October 2, 1982, the Secretary of the Senate on November 8, 1982, received the following message from the President of the United States, together with accompanying papers; which was referred to the Committee on Banking, Housing, and Urban Affairs:

To the Congress of the United States:

Section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)) provides for the automatic termination on the anniversary date of a declaration of emergency, unless prior to the anniversary date the President publishes in the *Federal Register* and transmits to Congress a notice stating that the emergency is to continue in effect beyond the anniversary date. I have sent to the *Federal Register* for publication the enclosed notice stating that the Iran emergency is to continue in effect beyond the November 14, 1982 anniversary date. Similar notices were sent to the Congress and the *Federal Register* on November 12, 1980 and November 12, 1981.

The crisis between the United States and Iran, which began in 1979, has eased, but it has not been fully resolved. The internal situation in Iran remains uncertain. The war between Iran and Iraq continues, and the Soviet Union still occupies Afghanistan. The international arbitral tribunal established for the adjudication of claims of United States nationals against Iran and by Iranian nationals against the United States continues to function. Full normalization of commercial and diplomatic relations be-

tween the United States and Iran will require more time. In these circumstances, I have determined that it is necessary to maintain in force the broad authorities that may be needed to respond to the process of implementation of the January 1981 agreements with Iran and the eventual normalization of relations.

FINAL REPORT OF THE NATIONAL ADVISORY COUNCIL ON ECONOMIC OPPORTUNITY—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE ADJOURNMENT—PM-192

Under the authority of the order of the Senate of October 2, 1982, the Secretary of the Senate on November 15, 1982, received the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Labor and Human Resources:

To the Congress of the United States:

In accordance with Title VI, Section 605 of the Economic Opportunity Act of 1964, I hereby transmit the Thirteenth and Final Report of the National Advisory Council on Economic Opportunity.

The report reflects the Council's views in its role of examining programs authorized by the Economic Opportunity Act of 1964.

STATUTORY AUTHORITY FOR RESPONDING TO SEVERE ENERGY SUPPLY DISRUPTIONS OR REDUCTIONS—MESSAGE FROM THE PRESIDENT RECEIVED DURING ADJOURNMENT—PM-193

Under the authority of the order of the Senate of October 2, 1982, the Secretary of the Senate on November 15, 1982, received the following message from the President of the United States, together with accompanying papers; which was referred to the Committee on Energy and Natural Resources:

To the Congress of the United States:

Pursuant to Section 3 of the Energy Emergency Preparedness Act of 1982 (42 U.S.C. Section 6282), I hereby submit a memorandum of law, prepared by the Attorney General in consultation with the Secretary of Energy, describing the nature and extent of the authorities available to the President under existing law to respond to a severe energy supply interruption or other substantial reduction in the amount of petroleum products available to the United States.

REPORT ON THE TRADE AGREEMENTS PROGRAM—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE ADJOURNMENT—PM-195

Under the authority of the order of the Senate of October 2, 1982, the Secretary of the Senate, on November 18, 1982, received the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Finance:

To the Congress of the United States:

In accordance with Section 163(a) of the Trade Act of 1974, I hereby transmit the Twenty-Sixth Annual Report on the Trade Agreements Program 1981-1982. The Statement of U.S. Trade Policy, which is the first part of this report, examines the inter-relationship of key trade policy issues in the 1980s to the Ministerial meeting of the General Agreement on Tariffs and Trade and a subsequent policy and research agenda. The second part of the report on Major Activities in 1981-1982 covers the array of multilateral, bilateral, and sectoral events of last year. The appendices of this report cover specified trade-related programs.

THE WHITE HOUSE, *November 18, 1982.*

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC 4312. A communication from the Secretary of the Senate, transmitting, pursuant to law, a full and complete statement of the receipts and expenditures of the Senate, showing in detail the items of expense under proper appropriations, the aggregate thereof, and exhibiting the exact condition of all public moneys received, paid out, and remaining in my possession from April 1, 1982, through September 30, 1982, in compliance with section 105 of Public Law 88-454, approved August 20, 1964, as amended.

REPORTS OF COMMITTEES SUBMITTED DURING THE ADJOURNMENT

Under the authority of the order of the Senate of October 2, 1982, the following reports of committees were submitted on October 18, 1982, during the adjournment of the Senate:

By Mr. ROTH, from the Committee on Governmental Affairs:

Report to accompany the bill (S. 1562) to provide comprehensive national policy dealing with national needs and objectives in the Arctic (Rept. No. 97-660).

By Mr. HEINZ, from the Committee on Banking, Housing, and Urban Affairs, without amendment:

S. Res. 458. A resolution to express the sense of the Senate that the Export-Import Bank of the United States shall be given sufficient authority and shall provide competitive financing for American exports (Rept. No. 97-661).

By Mr. DOLE, from the Committee on Finance, with an amendment in the nature of a substitute and an amendment to the title:

H.R. 7094. An act to amend the Internal Revenue Code of 1954 to impose a tax on failures to adhere to conditions of existing determination letters relating to independent management of the assets of multiemployer plans (Rept. No. 97-662).

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs:

Special Report on Monetary Policy for 1982 (Rept. No. 97-663).

Under the authority of the order of the Senate of October 2, 1982, the fol-

lowing reports of committees were submitted on November 15, 1982, during the adjournment of the Senate:

By Mr. ROTH, from the Committee on Governmental Affairs:

Special Report on transfer of United States high technology to the Soviet Union and Soviet Bloc nations (Rept. No. 97-664).

Report to accompany the bill (S. 2127) to revise the procedures for soliciting and evaluating bids for Government contracts and awarding such contracts, and for other purposes (Rept. No. 97-665).

By Mr. STAFFORD, from the Committee on Environment and Public Works, without amendment:

S. 3041. An original bill to amend the Clean Air Act (with additional, minority, and supplemental views) (Rept. No. 97-666).

By Mr. DOLE, from the Committee on Finance, with amendments and an amendment to the title:

H.R. 4577. An act to provide that the provisions of section 252 of the Economic Recovery Tax Act of 1981 (relating to transfers of property to employees subject to certain restrictions) shall apply to certain transfers occurring during 1973 (Rept. No. 97-667).

By Mr. McCLURE, from the Committee on Energy and Natural Resources, with amendments:

S. 1908. A bill to provide for the reinstatement and validation of United States oil and gas lease NM-A26947 (Oklahoma) (Rept. No. 97-668).

EXECUTIVE REPORT OF COMMITTEE SUBMITTED DURING THE ADJOURNMENT

Under the authority of the order of the Senate of October 2, 1982, the following report of the Committee on Banking, Housing, and Urban Affairs was filed on November 15, 1982, during the adjournment of the Senate:

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs:

Martin S. Feldstein, to be a Member of the Council of Economic Advisors (with minority views) (Exec. Rept. No. 97-65).

SENATE RESOLUTION 495—ORIGINAL RESOLUTION REPORTED DURING ADJOURNMENT WAIVING CONGRESSIONAL BUDGET ACT

Under the authority of the order of the Senate of October 2, 1982, Mr. STAFFORD, from the Committee on Environment and Public Works, on November 15, 1982, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 495

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 3041. Such waiver is necessary because S. 3041 authorizes the enactment of new budget authority which would first become available in fiscal year 1983, and such bill was not reported on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

The waiver of section 402(a) is necessary to permit congressional consideration of amendments to the Clean Air Act. The amendments are needed in order to extend for certain areas of the country the December 31, 1982, deadline for attainment of air quality standards and to make other needed improvements in the Nation's air pollution control program.

The comprehensive and complex provisions of the Clean Air Act required extensive time to review, making it impossible to report amendments prior to May 15, 1982.

Department of Housing and Urban Development-Independent Agencies Appropriations Act of 1983, which appropriates funds to carry out the provisions of the Clean Air Act, has already been signed by the President. Thus congressional consideration of S. 3041 will not interfere with or delay the appropriations process.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. EXON (for himself and Mr. HEFLIN):

S. 3042. A bill to establish the annual rate of pay for Members of Congress at the rate of pay paid for Members on September 30, 1982, and for other purposes; to the Committee on Governmental Affairs.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. PRESSLER:

S. Res. 496. A resolution to promote long-term grain sales agreements with the Soviet Union; to the Committee on Finance.

By Mr. STAFFORD (for himself, Mr. SYMMS, Mr. ABDNOR, Mr. GORTON, Mr. RANDOLPH, and Mr. HEINZ):

S. 3043. A bill to authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, and for other purposes; to the Committee on Environment and Public Works.

By Mr. BAKER (for himself, Mr. DOLE, Mr. STAFFORD, Mr. GARN, Mr. PACKWOOD, Mr. DOMENICI, and Mr. HATFIELD):

S. 3044. A bill entitled the "Surface Transportation Act of 1982"; to the Committee on Finance.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. EXON (for himself and Mr. HEFLIN):

S. 3042. A bill to establish the annual rate of pay for Members of Congress at the rate of pay paid for Members on September 30, 1982, and for other purposes; to the Committee on Governmental Affairs.

PAY INCREASES FOR MEMBERS OF CONGRESS

Mr. EXON. Mr. President, today I am introducing legislation to keep the salaries of Members of Congress at their current levels, and to prohibit future pay increases without an affirmative recorded vote thereon.

I know I am not alone in hearing protests from across the country against automatic pay increases for Senators and Congressmen from a permanent appropriation. Many Nebraskans, I know, feel that an automatic pay raise mechanism, as exists in current law, is inappropriate even during the best of times, and it is certainly most inappropriate at a time when we have double-digit unemployment and low farm prices.

There are some who suggest that the way to remedy this problem is to put a cap on congressional salaries for the next fiscal period. I will certainly support such action, but the legislation I am introducing goes one step further. I believe we need changes in the laws which currently set up the situation whereby a cap must be put in place in order to prevent an increase. The current system is exactly backward, in my opinion, from what it should be. Congress should increase salaries for its own Members only through an undisguised record vote, not the way the law is currently written.

If passed, the bill I am introducing will essentially repeal the law which ties congressional pay increases to the recommendations of the President, and repeal the permanent and perpetual appropriation which was established over my strong objections in 1981. As you will all recall, the permanent appropriation was established in October of last year by an amendment to a continuing appropriations resolution. This amendment was pushed by the Senate majority leadership, and it passed the Senate on a close 48 to 44 vote, over the strong objections of many of us.

In drawing up this legislation, I have addressed only the matter of congressional pay.

Finally, I urge my colleagues to look carefully at my bill as an alternative to the present system, and also as an alternative to a temporary cap on salaries.

By Mr. STAFFORD (for himself, Mr. SYMMS, Mr. ABDNOR, Mr. GORTON, Mr. HEINZ, and Mr. RANDOLPH):

S. 3043. A bill to authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, and for other purposes; to the Committee on Environment and Public Works.

FEDERAL-AID HIGHWAY IMPROVEMENT ACT OF 1982

Mr. STAFFORD. Mr. President, I am introducing legislation today which will be a major step forward in repairing the highways and bridges in this country. I am pleased to join with the distinguished chairman of the Subcommittee on Transportation, Senator SYMMS, and my distinguished col-

leagues, Senators ABDNOR, GORTON, HEINZ, and the distinguished ranking minority member of the committee, Senator RANDOLPH, in cosponsoring this legislation.

I am pleased to cosponsor the legislation introduced by Senator BAKER, the Surface Transportation Act of 1982, and will be happy to closely examine this legislation as the Senate Environment and Public Works Committee considers highway legislation very shortly.

Mr. President, I am also introducing today the Federal-Aid Highway Improvement Act of 1982. This second bill essentially reflects the legislation reported by the Environment and Public Works Committee earlier this year. When S. 2574 was reported last May 26, the committee agreed to review the authorization levels for the program if additional revenues became available. The President recently endorsed an equivalent 5-cent increase in the highway user fees. I believe this is an appropriate response to the decaying condition of this Nation's transportation system. The authorization levels in both bills being introduced today reflect the additional revenues which would be available if the user fees are increased.

There are several differences between the two bills. I want to briefly emphasize two of them. First, the Federal-Aid Highway Improvement Act of 1982 continues the one-half percent minimum apportionment for the interstate construction program while the other bill would end it. I believe very strongly that those States which made an early commitment to complete the Interstate System on a timely basis, often at the expense of the rest of their highway network, should not be penalized. The Congressional Budget Office recently completed a study, "The Interstate Highway System: Issues and Options," which points out that many of the uncompleted segments are of local and regional, rather than national, benefit.

Second, the Surface Transportation Act of 1982 contains a provision which would increase truck size and weight. The Federal highway cost allocation study recently completed by the Department of Transportation shows that the heaviest trucks have not been paying their fair share of highway costs in proportion to the damage they cause to the roads. I believe it is absolutely essential that these costs be recovered through user fees from each class of vehicle using the highway. I also believe that the trucks now using the highway are big enough. Any increase at this time will create further safety problems as the population of smaller, lighter cars increases, and will cause even more deterioration of the highway system.

Mr. President, there are over 248,000 deficient and obsolete bridges which need repair or replacement. This represents 45 percent of the bridges in this country. A bridge's average design life span is 50 years. Almost half of our bridges were built before 1940. The Interstate System is still not complete, and many of the completed segments are in need of major repair. The primary, secondary and urban systems will need major attention just to maintain the current level of serviceability.

The leglislation being introduced today will provide $12 billion for the Federal-aid highway program in fiscal year 1983. This amount will increase to $14.9 billion by 1987, for a total 5-year program of $67.8 billion. This bill provides the multiyear funding so necessary for the long-term planning required in this program. New authorizations are provided for fiscal year 1983 through 1987.

Funds available for those categories addressing the repair needs of the highway system will increase substantially. For example, the interstate 4R program will increase from a current level of $800 million per year to $1.8 billion in fiscal 1983 and up to $3.4 billion in fiscal 1987. The bridge replacement and rehabilitation program will increase from a current level of $900 million to $1.7 billion in fiscal 1983 and up to $2 billion in fiscal 1987.

Mr. President, this legislation is urgently needed if we are to protect our Nation's enormous investment in its road and bridge network. America has developed, and grown to depend on, an extensive transportation system; that system is now beginning to crumble due to age, poor maintenance, and heavy use. Since the bulk of our passenger travel and freight movement occurs on highways, highway users—which includes almost all Americans—are understandably concerned.

An important way to help restore this country's economic health is through a sound, Federal public works policy—particularly where our highways and bridges are concerned. Their replacement value runs into the trillions of dollars. The Interstate System has revolutionized the movement of both people and goods in this country. We dare not let an investment of this order decline.

Almost from the beginning, a variety of highway user taxes have supported the Federal-aid highway program. This has been an ambitious and yet responsible program, operating on a pay-as-you-go basis. The major revenue source has always been users of the highway facilities. Because this program is financed by user fees, the substantial increase in spending being recommended for it will not add to the budget deficit.

The highway trust fund was established in 1956 as a mechanism for financing the Federal highway program. The tax rates set in the late 1950's have remained unchanged since 1961. Meanwhile, inflation has pushed highway construction costs up three times what they were then. During the last 20 years, motor traffic has soared far beyond the early estimates of highway planners, and truck sizes and weights have exceeded the expectations of highway engineers. These unanticipated demands have created very serious problems in terms of road capacity and road damage.

The uncertainty of energy supplies has also been a contributing factor. As cars have become smaller and more energy efficient, their drivers are buying less motor fuel and consequently paying a reduced amount of tax on gasoline and diesel fuels. The overall result is that the costs of maintaining our highway system skyrocket while available revenues and road conditions continue their downward slide.

There are many examples of the financing difficulties currently facing Federal and State transportation agencies. Perhaps the most visible tax—although the highway excise tax structure contains other important use fees—is the motor fuel tax. That tax, which provides almost 60 percent of highway trust fund revenues, was last raised in 1959 from 3 cents to 4 cents. Today those 4 cents are worth less than 1 cent. Even with the 5-cent increase under consideration, the total 9-cent tax is still worth less in current dollars than the 4-cent tax was in 1959. Many States have passed user fee increases during the last 2 years to meet this crisis, and similar Federal action is now needed.

Last week President Reagan recognized what he termed the "necessity" for boosting highway excise taxes. The President and Transportation Secretary Drew Lewis called attention to the tradition of user financing in the highway program and the large backlog of repair needs.

The American Association of State Highway and Transportation Officials is in the process of surveying State departments of highways and transportation to determine their capability for using increased funding. Forty-six States have responded to date, with estimates totaling $15.3 billion and $16.7 billion for fiscal years 1983 and 1984, respectively. AASHTO in noting the large volume of on-the-shelf, ready-to-go projects observed:

> The large totals . . . indicate the significant unmet needs in our Federal-Aid Highway program, and result in part from our inability to adequately fund the program in recent years.

The Subcommittee on Transportation, ably chaired by Senator SYMMS, has held a series of hearings this Congress on highway needs, revenues, and cost allocation. Among those testifying have been representatives from construction, trucking, rail, auto, environmental, and manufacturing groups as

well as officials from Federal, State, and local governments.

The president of the Associated General Contractors testified:

Needed capital investments in highways and bridges cannot be deferred. Unless the work is done as needed, we as a nation will not be faced with the modest costs of repair or rehabilitation, but with the much higher costs of replacement and reconstruction. For instance, a two or three year deferral of highway resurfacing work requires subsequent total reconstruction at triple the cost, plus inflation.

Testimony was offered on behalf of the Environmental Policy Center and other environmental groups, who concluded:

We agree with the Department of Transportation that changes in the present tax structure are needed to correct for present subsidies to heavy trucks by other classes of highway users and with DOT's statements that such tax changes will have little negative impact on highway users and will result in tax equity and improved efficiency in the total transportation system. We urge you to take action on this important issue and to restructure the highway user charge system.

Mr. President, there are those that have referred to this legislation as a jobs bill. While it is true that repairing highways does provide jobs, most of them will be in the construction industry which is experiencing an unemployment rate of 23 percent. The primary purpose of this bill, however, is not jobs.

The purpose of this bill is to preserve and protect the enormous investment the Federal Government has made in the most extensive network of roads and bridges in the world. These funds are not intended for major new construction. These funds are intended to be used to repair and rehabilitate the existing system. I believe it is extremely important to take care of our existing resources before any thought is given to major new construction.

Mr. President, I look forward to working with my distinguished colleagues in passing this legislation.

Mr. President, I ask unanimous consent that the bill and a section-by-section analysis be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 3043

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal-Aid Highway Improvement Act of 1982".

REVISION OF AUTHORIZATION FOR APPROPRIATIONS FOR THE INTERSTATE SYSTEM

SEC. 102. Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is amended by striking out "the additional sum of $3,225,000,000 for the fiscal year ending September 30, 1984", and all that follows through the period at the end of the sentence and by inserting in lieu thereof the following: "The additional sum of $3,625,000,000 for the fiscal year ending September 30, 1984, the additional sum of $3,800,000,000 for the fiscal year ending September 30, 1985, the additional sum of $3,800,000,000 for the fiscal year ending September 30, 1986, the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1987, the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1988, the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1989, and the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1990.".

HIGHWAY AUTHORIZATIONS

SEC. 103. (a) For the purpose of carrying out the following provisions of title 23, United States Code, the following sums are authorized to be appropriated out of the Highway Trust Fund:

(1) For the Federal-aid primary program not to exceed $1,700,000,000 for the fiscal year ending September 30, 1983, and $2,100,000,000 for the fiscal year ending September 30, 1984, $2,400,000,000 for the fiscal year ending September 30, 1985, and $2,400,000,000 for the fiscal year ending September 30, 1986 and $2,600,000,000 for the fiscal year ending September 30, 1987.

(2) For the Federal-aid rural program not to exceed $614,520,548 for the fiscal year ending September 30, 1983, and $700,000,000 for the fiscal year ending September 30, 1984, $700,000,000 for the fiscal year ending September 30, 1985, $700,000,000 for the fiscal year ending September 30, 1986 and $700,000,000 for the fiscal year ending September 30, 1987.

(3) For the Federal-aid urban program not to exceed $629,041,096 for the fiscal year ending September 30, 1983, and $800,000,000 for the fiscal year ending September 30, 1984, $800,000,000 for the fiscal year ending September 30, 1985, $800,000,000 for the fiscal year ending September 30, 1986, and $800,000,000 for the fiscal year ending September 30, 1987.

(4) For forest highways not to exceed $50,000,000 for the fiscal year ending September 30, 1983, and $50,000,000 for the fiscal year ending September 30, 1984, $50,000,000 for the fiscal year ending September 30, 1985, $50,000,000 for the fiscal year ending September 30, 1986 and $50,000,000 for the fiscal year ending September 30, 1987.

(5) For public lands highways not to exceed $50,000,000 for the fiscal year ending September 30, 1983, and $50,000,000 for the fiscal year ending September 30, 1984, $50,000,000 for the fiscal year ending September 30, 1985, $50,000,000 for the fiscal year ending September 30, 1986, and $50,000,000 for the fiscal year ending September 30, 1987.

(6) For bridge replacement and rehabilitation under section 144 of title 23, United States Code, not to exceed $1,700,000,000 for the fiscal year ending September 30, 1983, $1,700,000,000 for the fiscal year ending September 30, 1984, $1,800,000,000 for the fiscal year ending September 30, 1985, $2,000,000,000 for the fiscal year ending September 30, 1986, and $2,000,000,000 for the fiscal year ending September 30, 1987.

(7) For the highway safety improvement program not to exceed $316,657,534 for the fiscal year ending September 30, 1983, $400,000,000 for the fiscal year ending September 30, 1984, $400,000,000 for the fiscal year ending September 30, 1985, $400,000,000 for the fiscal year ending September 30, 1986 and $400,000,000 for the fiscal year ending September 30, 1987.

(b) For Indian reservation roads, there are authorized to be appropriated not to exceed $83,000,000 for the fiscal year ending September 30, 1983, $83,000,000 for the fiscal year ending September 30, 1984, $83,000,000 for the fiscal year ending September 30, 1985, $83,000,000 for the fiscal year ending September 30, 1986, and $83,000,000 for the fiscal year ending September 30, 1987.

(c) The unapportioned or unallocated balance of sums authorized by sections 4 and 5 of the Federal-Aid Highway Act of 1982 is rescinded.

(d) (1) For each of the fiscal years 1984, 1985, 1986, 1987, and 1988 no State, including the State of Alaska, shall receive less than one-half of 1 per centum of the total apportionment for the Interstate System under section 104(b)(5)(A) of title 23, United States Code. Whenever amounts made available under this subsection for the Interstate System in any State exceed the estimated cost of completing that State's portion of the Interstate System, and exceed the estimated cost of necessary resurfacing, restoration, rehabilitation, and reconstruction of the Interstate System within such State, the excess amount shall be eligible for expenditure for those purposes for which funds apportioned under paragraphs (1), (2), and (6) of such section 104(b) may be expended.

(2) Subsection (g) of section 144 of title 23, United States Code, is amended as follows:

"(g) Of the amount authorized per fiscal year, for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, September 30, 1986, and September 30, 1987, all but $300,000,000 for fiscal years 1983, 1984, 1985, 1986, and 1987 shall be apportioned as provided in subsection (e) of this section; $300,000,000 for fiscal years 1983, 1984, 1985, 1986, and 1987 of the amount authorized shall be available for obligation on the date of each such apportionment in the same manner and to the same extent as the sums apportioned on such date except that the obligation of such sums shall be at the discretion of the Secretary and shall be only for projects for those highway bridges the replacement and rehabilitation cost of each of which is more than $10,000,000 and for any project for a highway bridge replacement or rehabilitation cost of which is less than $10,000,000 if such cost is at least twice the amount apportioned to the State in which such bridge is located under subsection (e) of this section for the fiscal year in which application is made for a grant for such bridge. Not less than 15 per centum of the amount apportioned to each State in a fiscal year shall be expended for projects to replace or rehabilitate bridges located on public roads other than those on public roads functionally classified as arterials or major collectors. The Secretary after consultation with State and local officials may, with respect to a State, reduce the requirement for expenditure for bridges not on public roads functionally classified as arterials or major collectors when he determines that such State has inadequate needs to justify such expenditure.".

(e) Of the sums apportioned to each State under each of the subsections (a)(1), (a)(2), and (a)(3) of this section, beginning with fiscal year 1984, not less than 60 per centum of such program funds shall be expended by the States on projects for resurfacing, restoring, and rehabilitating roads unless the State certifies to the Secretary that such percentage of sums are in excess of other resurfacing, restoring, and rehabilitating needs of such State and the Secretary accepts such certification.

DISCRETIONARY BRIDGE CRITERIA

SEC. 104. The Secretary of Transportation shall develop a selection process for discretionary bridges authorized to be funded under section 144(g) of title 23, United States Code, and shall propose and issue a final regulation no later than six months after the date of enactment of this Act, including a formula resulting in a rating factor based on the following criteria for such process. Such criteria shall give funding priority to those discretionary bridges already eligible under section 144(g) of title 23, United States Code. Eligible bridges after the issuance of a final regulation shall only include those with a rating factor of one hundred or less, based on a scale of zero to infinity. The criteria for such additional bridges which the Secretary shall consider are:

(1) sufficiency rating computed as illustrated in appendix A of the Recording and Coding Guide for the Structure Inventory and Appraisal of the Nation's Bridges, USDOT/FHWA (latest edition);

(2) average daily traffic using the most current value from the national bridge inventory data;

(3) average daily truck traffic;

(4) defense highway system status;

(5) the State's unobligated balance of funds received under section 144 of title 23, United States Code, and the total funds received under section 144 of title 23, United States Code;

(6) total project cost; and

(7) special consideration should be given to bridges closed to all traffic or restricted to loads less than ten tons. Other unique considerations and the need to administer the program from a balanced national perspective should also be considered.

INTERSTATE SYSTEM RESURFACING APPORTIONMENT

SEC. 105. (a) Section 104(b)(5)(B) of title 23, United States Code, is amended (1) by striking the number "55" and inserting in lieu thereof "60" and (2) by striking the number "45" and inserting in lieu thereof "40".

(b)(1) The Secretary of Transportation shall make a full and complete study regarding the procedures for distributing Federal financial assistance for resurfacing, restoring, rehabilitating, and reconstructing routes on the Interstate System in order to maintain a high level of transportation service. The study shall analyze current conditions and factors including, but not limited to, volume and mix of traffic, weight and size of vehicles, environmental, geographical, and meteorological conditions in various States, and other pertinent factors that can be utilized to determine the most equitable and efficient method of apportioning available Interstate 4R funds to the several States. In conducting the study the Secretary shall consider such criteria as need, national importance, impact on individual State highway programs, structural and operational integrity, and any other relevant criteria, to determine the most equitable method of distribution.

(2) In conducting this study the Secretary shall consult with other agencies of the Federal Government, the States and their political subdivisions, and other interested private organizations, groups, and individuals.

(3) The Secretary shall report to Congress not later than six months after the date of enactment of this section the results of such study together with recommendations for necessary legislation.

INTERSTATE SYSTEM RESURFACING AUTHORIZATION

SEC. 106. Section 105 of the Federal-Aid Highway Act of 1978 is amended to read as follows: "In addition to any funds authorized to be appropriated, there is authorized to be appropriated out of the Highway Trust Fund, not to exceed $175,000,000 per fiscal year for each of the fiscal years ending September 30, 1980, and September 30, 1981, not to exceed $275,000,000 for the fiscal year ending September 30, 1982, not to exceed $800,000,000 for the fiscal year ending September 30, 1983, not to exceed $1,800,000,000 for the fiscal year ending September 30, 1984, not to exceed $2,400,000,000 for the fiscal year ending September 30, 1985, not to exceed $2,800,000,000 for the fiscal year ending September 30, 1986, not to exceed $3,200,000,000 for the fiscal year ending September 30, 1987, and not to exceed $3,400,000,000 for the fiscal year ending September 30, 1988. Such sums shall be obligated for projects for resurfacing, restoring, rehabilitating, and reconstructing routes of the Interstate System designated under sections 103 and 139(c) of title 23, United States Code (other than those on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978), except that where a State certifies to the Secretary that any part of such sums are in excess of the needs of such State for resurfacing, restoring, rehabilitating, and reconstructing the Interstate System and the Secretary accepts such certification, such State may transfer sums apportioned to it under section 104(b)(5)(B) to its apportionment under section 104(b)(1) of title 23, United States Code. Such sums may also be obligated for projects for resurfacing, restoring, rehabilitating and reconstructing a toll road which has been designated as a part of the Interstate System if an agreement satisfactory to the Secretary of Transportation has been reached with the State highway department and any public authority with jurisdiction over such toll road prior to the approval of such project that the toll road will become free to the public upon the collection of tolls sufficient to liquidate the cost of the toll road or any bonds outstanding at the time constituting a valid lien against it, and the cost of maintenance and operation and debt service during the period of toll collections. The agreement referred to in the preceding sentence shall contain a provision requiring that if, for any reason, a toll road receiving Federal assistance under this section does not become free to the public upon collection of sufficient tolls, as specified in the preceding sentence, Federal funds used for projects on such toll road pursuant to this section shall be repaid to the Federal Treasury.".

INTERSTATE SUBSTITUTION AUTHORIZATION

SEC. 107. (a) In addition to any funds authorized to be appropriated out of the general fund, there is authorized to be appropriated, out of the Highway Trust Fund, for substitute highway projects under section 103(e)(4) of title 23, United States Code, $500,000,000 for the fiscal year ending September 30, 1983, $600,000,000 for the fiscal year ending September 30, 1984, $600,000,000 for the fiscal year ending September 30, 1985, and $650,000,000 for the fiscal year ending September 30, 1986, and $650,000,000 for the fiscal year ending September 30, 1987. Funds authorized to carry out this section shall be available for obligation in the same manner and to the same extent as if such sums were apportioned under chapter 1 of title 23, United States Code.

(b)(1) The first sentence of section 103(e)(4) of title 23, United States Code is amended by striking "which is within an urbanized area or which passes through and connects urbanized areas within a State and".

(2) The second sentence of section 103(e)(4) of title 23, United States Code is amended by striking "which will serve the urbanized area and the connecting nonurbanized area corridor from which the interstate route or portion thereof was withdrawn, which are selected by the responsible local officials of the urbanized area or area to be served, and which are submitted by the Governor of the State in which the withdrawn route was located." and inserting in lieu thereof, "which will serve the area or areas from which the interstate route or portion thereof was withdrawn, which are selected by the responsible local officials of the area or areas to be served, and which are selected by the Governor or the Governors of the State or the States in which the withdrawn route was located if the withdrawn route was not within an urbanized area or did not pass through and connect urbanized areas, and which are submitted by the Governors of the States in which the withdrawn route was located.".

(c)(1) The second sentence of section 103(e)(4) of title 23, United States Code, is amended by inserting in the second sentence after the words "approved by Congress," the words "or up to and including the 1983 interstate cost estimate, whichever is earlier,".

(2) The second sentence of section 103(e)(4) of title 23, United States Code, is amended by striking in the second sentence the phrases "the date of enactment of the Federal-Aid Highway Act of 1976 or" and "whichever is later, and in accordance with the design of the route or portion thereof that is the basis of the latest cost estimate".

(3) The second sentence of section 103(e)(4) of title 23, United States Code, is amended by inserting in the second sentence after the words "approval of each substitute project under this paragraph," the words "or the date of approval of the 1983 interstate cost estimate, whichever is earlier,".

(d) Section 103(e)(4) of title 23, United States Code, is amended by adding at the end of such subsection the following: "Any route or segment thereof added to the Interstate System after March 7, 1978, pursuant to specific legislation will not be eligible for withdrawal and substitution under this subsection.".

(e) The first sentence of section 120(d) of title 23, United States Code, is amended by inserting after the words "traffic control signalization," the following: "including traffic control signalization projects under section 103(e)(4) of this title, notwithstanding the provisions of the fifth sentence of section 103(e)(4),".

FEDERAL-AID PRIMARY PROGRAM

SEC. 108. (a) Section 104(b)(1) of title 23, United States Code, is amended by (1) striking out "and priority primary routes" in the first sentence, and by (2) striking out "(other than the District of Columbia)" in the second sentence.

(b) Section 147 of title 23, United States Code, is repealed.

(c) Effective on October 1, 1982, any unobligated amount authorized under subsection

(c) of section 104 of the Federal-Aid Highway Act of 1978 shall be apportioned by the Secretary of Transportation in the same manner as funds apportioned under section 104(b)(1) of title 23, United States Code, for the Federal-aid primary system, and shall thereafter remain available for obligation for the same period as such apportionment.

(d) The analysis of chapter 1 of title 23 is amended by deleting

"147. Priority Primary Routes."

and inserting in lieu thereof

"147. Repealed.".

FEDERAL-AID URBAN PROGRAM

SEC. 109. Section 103 of title 23, United States Code, is amended by deleting subsection (d) and inserting in lieu thereof the following:

"(d) The Secretary may approve Federal-aid urban programs in urban areas which programs shall be selected by the appropriate local officials so as to serve the goals and objectives of the community, with the concurrence of the State highway department, as provided in section 105 of this title. The programs shall facilitate transportation in the urban area and include projects to: reduce congestion and improve the flow of traffic on arterial and collector routes, aid integration of different transportation modes to and from airports and other terminals and business districts, support clean air and energy conservation objectives, make highway capital improvements, improve highway safety, eliminate safety hazards and roadside obstacles, implement transportation systems management activities and serve other national goals and objectives. All public roads in urban areas are eligible except those on the primary system and the Interstate System. The applicable provisions of chapters 1 and 3 of this title, including provisions applicable to Federal-aid systems, shall apply to urban programs, except those provisions determined by the Secretary to be inconsistent with this subsection. The Secretary shall not waive the applicability of the planning requirements of section 134 of this title.".

FEDERAL-AID RURAL PROGRAM

SEC. 110. Section 103 of title 23, United States Code, is amended by deleting subsection (c) and inserting in lieu thereof:

"(c) The Federal-aid rural program shall be selected by the State highway agencies and the appropriate local road officials in cooperation with each other, subject to approval by the Secretary as provided in subsection (f) of this section and section 105 of this title. In making such selections, the needs of agriculture roads, rural mail routes, public school bus routes, local rural roads, airport and water port access roads, and goods movement shall be considered. All public roads, except those on the primary system, the Interstate System, and those in urban areas are eligible. Projects to improve highway safety and nonurbanized public transportation projects, including facilities and technical assistance, are also eligible for assistance under this section. The applicable provisions of chapters 1 and 3 of this title, including provisions applicable to Federal-aid systems, shall apply to rural programs, except those provisions determined by the Secretary to be inconsistent with this subsection.".

TRANSFERABILITY

SEC. 111. Paragraphs (1) and (2) of subsection (d) of section 104 of title 23, United States Code, are amended by striking out "50" each place it appears and inserting in lieu thereof at each such place "100".

HIGHWAY SAFETY IMPROVEMENT PROGRAM

SEC. 112. (a) Section 151 of title 23, United States Code, is amended to read as follows:

"§151. Highway safety improvement program

"(a) The Secretary, in cooperation with the States, shall establish a highway safety improvement program for projects on any public road or street in rural or urban areas. Assistance shall be available under this program for highway safety improvement projects, as defined in subsection (a) of section 101 of this title; for railway-highway crossing projects as provided for in section 130 of this title; for the implementation of highway-related safety requirements and guidelines issued by the Secretary under section 402 of this title; and for the development, implementation, and evaluation of the highway safety improvement program required under subsection (b) of this section.

"(b) Each State shall develop and implement on a continuing basis a highway safety improvement program including procedures for the planning, implementation, and evaluation of highway safety improvement projects on all highways, with the specific objective of reducing the number and severity of highway traffic accidents. Each State shall have a process for collecting, maintaining, and analyzing accident, traffic, and highway data; for conducting engineering studies of hazardous locations, sections and elements, for assigning priorities to the various types of hazards identified; for implementing safety improvement projects in accordance with the priorities developed; and for the evaluation of the safety benefits obtained.

"(c) Of the funds authorized to carry out this section each State shall expend 35 per centum of the sums apportioned for projects under section 203 of the Highway Safety Act of 1973 unless the State requests the Secretary to waive this minimum and the Secretary finds other safety projects are of a higher priority.

"(d)(1) Funds authorized to carry out this section shall be available for expenditure for projects on any public road (other than the Interstate System).

"(2) The Federal share payable on any project under this section shall not exceed 90 per centum of the cost thereof except that the Federal share of safety improvement projects for the elimination of hazards of rail-highway crossings shall not exceed that as provided in section 120(d) of this title.

"(3) The unobligated balance of contract authority established prior to enactment of this section for carrying out section 402 by the Federal Highway Administration shall remain available for obligation as provided prior to enactment of this section and shall lapse not later than September 30, 1984.

"(e) Funds authorized to be appropriated to carry out this section shall be apportioned to the States as follows: 60 per centum in the ratio which the population of each State bears to the total population of all States, and 40 per centum in the ratio which the public road mileage in each State bears to the total public road mileage in all States. The annual apportionment for each State shall not be less than one-half of 1 per centum of the total apportionment. Such sums shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under section 104(b)(1), except that the Secretary is authorized to waive such provisions of this title that he deems inconsistent with the purposes of this section.

"(f) In any State wherein the State is without legal authority to construct or maintain a project under this section, such State shall enter into a formal agreement for such construction or maintenance with the appropriate local officials of the county or municipality in which such project is located.

"(g) One-half of 1 per centum of funds authorized for carrying out this section shall be made available to the Secretary of the Interior, who shall exercise the responsibilities assigned to States under subsection (b) of this section in carrying out this section on Indian reservations. Such funds shall be subject to a deduction of not to exceed 5 per centum for the necessary costs of administering the provisions of this section.

"(h) Each State shall report to the Secretary of Transportation not later than December 30 of each year, on the progress being made to implement the highway safety improvement program and the effectiveness of safety improvements in reducing the number and severity of accidents. The Secretary of Transportation shall submit a report to the Congress not later than April 1 of each year on the progress being made by the States in implementing the highway safety improvement program.".

(b) Section 152 of title 23, United States Code, is repealed.

(c) The analysis of chapter 1 of title 23, United States Code, is amended by deleting

"151. Pavement marking demonstration program.", and

"152. Hazard elimination program.",

and inserting in lieu thereof

"151. Highway safety improvement program.", and

"152. Repealed.".

(d) Section 203(e) of the Highway Safety Act of 1973 (Public Law 93-87), as amended by the Congressional Reports Elimination Act of 1980 (Public Law 96-470), is repealed.

HIGHWAY BRIDGE REPLACEMENT AND REHABILITATION PROGRAM APPORTIONED FUNDS

SEC. 113. (a) Subsection (e) of section 144 of title 23, United States Code, is amended to read as follows:

"(e) Funds authorized to carry out this section shall be apportioned among the several States on October 1 of the fiscal year for which authorized according to the following formula: All deficient bridges will be divided into four categories: (1) Federal-aid system bridges, and bridges on public roads functionally classified as arterials or major collectors, eligible for replacement, (2) Federal-aid system bridges, and bridges on public roads functionally classified as arterials or major collectors, eligible for rehabilitation, (3) off-system bridges, and bridges on public roads not functionally classified as arterials or major collectors eligible for replacement, and (4) off-system bridges and bridges on public roads not functionally classified as arterials or major collectors eligible for rehabilitation. The square footage of deficient Federal-aid system bridges, or bridges on public roads functionally classified as arterials or major collectors, both those eligible for replacement and those eligible for rehabilitation, shall be multiplied by a factor of two. The square footage of deficient bridges in each category shall be multiplied by the average national unit cost,

on a State-by-State basis, as determined by the Secretary; and the total cost of each State divided by the total cost of the Nation's deficient bridges shall yield the apportionment factors. No State shall receive more than 8 per centum or less than 0.25 per centum of the total apportionment for any one fiscal year. The Secretary shall make these determinations based upon the latest available data, which shall be updated annually. Funds authorized to carry out this section which are apportioned under this section shall be available for expenditure for three years after the close of the fiscal year for which they are authorized.".

(b) Notwithstanding any other provision of law or Federal regulation, any new bridge which is to be constructed pursuant to section 144 of title 23, United States Code, in tandem with any existing major structure built after June 28, 1969, with no more than 2.7 miles of highway between them need not carry a roadway width in excess of 69 feet.

FEDERAL LANDS HIGHWAYS PROGRAM

SEC. 114. (a) Section 202 of title 23, United States Code, is amended to read as follows:

"SEC. 202. ALLOCATIONS.—(a) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for forest highways according to the relative needs of the various elements of the national forest system as determined by the Secretary, taking into consideration the need for access as identified by the Secretary of Agriculture through renewable resource and land use planning, and the impact of such planning on existing transportation facilities.

"(b) On October 1 of each fiscal year, the Secretary of Agriculture shall allocate the sums authorized to be appropriated for such fiscal year for forest development roads and trails according to the relative needs of the various national forests. Such allocation shall be consistent with the renewable resource and land use planning for the various national forests.

"(c) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for public lands highways among those States having unappropriated or unreserved public lands, nontaxable Indian lands or other Federal reservations, on the basis of need in such States, respectively, as determined by the Secretary upon application of the State highway departments of the respective States. The Secretary shall give preference to those projects which are significantly impacted by Federal land and resource management activities.

"(d) On October 1 of each fiscal year, the Secretary of the Interior shall allocate the sums authorized to be appropriated for such fiscal year for park roads and parkways each according to the relative needs of the various elements of the national park system, taking into consideration the need for access as identified through land use planning and the impact of such planning on existing transportation facilities.

"(e) On October 1 of each fiscal year, the Secretary of the Interior shall allocate the sums authorized to be appropriated for such fiscal year for Indian reservation roads according to the relative needs of the various reservations as jointly identified by the Secretary and the Secretary of the Interior.".

(b) Section 204 of title 23, United States Code, is amended to read as follows:

"SEC. 204. FEDERAL LANDS HIGHWAYS PROGRAM.—(a) Recognizing the need for all Federal roads which are public roads to be treated under the same uniform policies as roads which are on the Federal-aid systems, there is established a coordinated Federal lands highways program which shall consist of the forest highways, public lands highways, park roads, parkways, and Indian reservation roads as defined in section 101 of title 23, United States Code.

"(b) Funds available for forest highways and public lands highways shall be used by the Secretary to pay for the cost of construction and improvement thereof. Funds available for park roads, parkways, and Indian reservation roads shall be used by the Secretary of the Interior to pay for the cost of construction and improvement thereof. In connection therewith, the Secretary and the Secretary of the Interior, as appropriate, may enter into construction contracts and such other contracts with a State, or civil subdivision thereof as deemed advisable. In the case of Indian reservation roads, Indian labor may be employed in such construction and improvement under such rules and regulations as may be prescribed by the Secretary of the Interior.

"(c) Cooperation of States, counties, or other local subdivisions may be accepted in construction and improvement, and any funds received from a State, county, or local subdivision shall be credited to appropriations available for the class of Federal lands highways to which such funds were contributed.

"(d) Construction of each project shall be performed by contract awarded by competitive bidding, unless the Secretary or the Secretary of the Interior shall affirmatively find that, under the circumstances relating to such project, some other method is in the public interest.

"(e) All appropriations for the construction and improvement of each class of Federal lands highways shall be administered in conformity with regulations and agreements jointly approved by the Secretary and the Secretary of the appropriate Federal land managing agency.

"(f) The Secretary shall transfer to the Secretary of Agriculture from appropriations for forest highways such amounts as may be needed to cover necessary administrative expenses of the Forest Service in connection with forest highways.

"(g) Funds available for each class of Federal lands highways shall be available for adjacent vehicular parking areas and scenic easements.".

(c)(1) The definition of "park roads and trails" in section 101(a) of title 23, United States Code, is amended to read as follows: "The term 'park road' means a public road that is located within or provides access to an area in the national park system.".

(2) The term "Indian reservation roads and bridges" in section 101(a) of title 23, United States Code, is amended to read as "Indian reservation roads"; and the definition of such term is amended by deleting the words "and bridges" each place they appear and by inserting the word "public" before "roads" the first place it appears.

(3) Section 101(a) of title 23, United States Code, is amended by adding after the definition of the term "forest development roads and trails" the following new definition: "The term 'Federal lands highways' in accordance with section 204 of this title means forest highways, public lands highways, park roads, parkways, and Indian reservation roads.".

(d) Sections 206, 207, 208, 209, and 214(c) of title 23, United States Code, are repealed.

(e) The analysis of chapter 2 of title 23, United States Code, is amended by deleting the following headings:

"202. Apportionment or allocation.";
"204. Forest highways.";
"206. Park roads and trails.";
"207. Parkways.";
"208. Indian reservation roads."; and
"209. Public lands highways."

and inserting in lieu thereof:

"202. Allocations.";
"204. Federal Lands Highways Program.";
"206. Repealed.";
"207. Repealed.";
"208. Repealed."; and
"209. Repealed.".

(f) Section 203 of title 23, United States Code, is amended by striking out the term "park roads and trails" wherever it appears and inserting in lieu thereof the term "park road".

PROGRAM CONSOLIDATION

SEC. 115. (a)(1) Sections 143, 148, 155, and 156 of title 23, United States Code, are repealed.

(2) Section 163 of the Federal-Aid Highway Act of 1973, as amended, is repealed.

(b)(1) Any unobligated balance of contract authority established by any Act prior to enactment of subsection (a) of this section for carrying out sections 143 and 148 of title 23, United States Code, shall remain available for obligation under the conditions applicable prior to such enactment.

(2) The unexpended balance of sums appropriated prior to enactment of subsection (a) of this section for carrying out sections 155 and 156 of title 23, United States Code, and section 163 of the Federal-Aid Highway Act of 1973, as amended, shall remain available for expenditure under the conditions applicable prior to such enactment.

(3) The unappropriated balance of sums authorized prior to enactment of subsection (a) of this section for carrying out sections 148, 155, and 156 of title 23, United States Code, is rescinded.

(c) The analysis of chapter 1, United States Code, is amended by striking

"143. Economic growth center development highways."

and inserting in lieu thereof

"143. Repealed.";

by striking

"148. Development of a national scenic and recreational highway."

and inserting in lieu thereof

"148. Repealed.";

by striking

"155. Access highways to public recreation areas on certain lakes."

and inserting in lieu thereof

"155. Repealed.";

and by striking

"156. Highways crossing Federal projects."

and inserting in lieu thereof

"156. Repealed.".

CARPOOL AND VANPOOL PROJECTS

SEC. 116. (a) Section 120(d) of title 23, United States Code, is amended by inserting before the words "may amount to 100 per centum" the words "or commuter carpooling and vanpooling,".

(b) The Secretary of Transportation is authorized and directed to expend such sums as are necessary out of the administrative funds authorized by subsection (a) of section 104, title 23, United States Code, to carry out the provisions of subsection (d) of section 126 of the Federal-Aid Highway Act of 1978.

PUBLIC TRANSPORTATION

SEC. 117. Section 142 of title 23, United States Code, is amended as follows:

(1) In subsection (a)(1) delete in the first sentence the words "bus lanes" and insert in lieu thereof the following: "high occupancy vehicle lanes" and delete the words "bus and other" and insert in lieu thereof the following: "high occupancy vehicle and".

(2) In subsection (b) delete the word "bus" and insert in lieu thereof "high occupancy vehicle".

(3) In subsection (f) delete the words "public mass transportation systems" and insert in lieu thereof "high occupancy vehicles".

FRINGE AND CORRIDOR PARKING

SEC. 118. Section 137 of title 23, United States Code, is amended by inserting the following new subsection (f):

"(f)(1) The Secretary may approve for Federal financial assistance from funds apportioned under section 104(b)(5)(B) of this title, projects for designating existing facilities, or for acquisition of rights of way or construction of new facilities, for use as preferential parking for carpools, provided that such facilities (1) are located outside of a central business district and within an interstate highway corridor, and (2) have as their primary purpose the reduction of vehicular traffic on the interstate highway.

"(2) Nothing in this subsection, or in any rule or regulation issued under this subsection, or in any agreement required by this subsection, shall prohibit (1) any State, political subdivision, or agency or instrumentality thereof, from contracting with any person to operate any parking facility designated or constructed under this subsection, or (2) any such person from so operating such facility. Any fees charged for the use of any such facility in connection with the purpose of this subsection shall not be in excess of the amount required for operation and maintenance, including compensation to any person for operating the facility.

"(3) For the purposes of this subsection, the terms 'facilities' and 'parking facilities' are synonymous and shall have the same meaning given 'parking facilities' in subsection (c) of this section".

EMERGENCY RELIEF

SEC. 119. (a)(1) The first sentence of subsection (a) of section 125 of title 23, United States Code, is amended by striking the first sentence thereof and inserting in lieu thereof the following: "An emergency fund is authorized for expenditure by the Secretary, subject to the provisions of this section and section 120 of this title, for the repair or reconstruction of highways, roads, and trails which the Secretary shall find have suffered serious damage as the result of (1) natural disaster over a wide area such as by floods, hurricanes, tidal waves, earthquakes, severe storms, or landslides, or (2) catastrophic failures from any external cause, in any part of the United States. In no event shall funds be used pursuant to this section for the repair or reconstruction of bridges which have been permanently closed to all vehicular traffic by the State or responsible local official because of imminent danger of collapse due to structural deficiencies or physical deterioration.".

(2) Subsection (a) of section 125 of title 23, United States Code, is further amended by inserting in the second sentence, as that sentence read prior to the amendments made by paragraph (1) of this subsection, after the word "appropriated" the words "from the Highway Trust Fund".

(b) Notwithstanding any other provision of law, all expenditures made under section 125 of title 23, United States Code, prior to the fiscal year ending September 30, 1978, are authorized to have been appropriated from the Highway Trust Fund.

(c) Subsection (a) of section 125 of title 23, United States Code, is amended by inserting in the second sentence after the words "after September 30, 1976," the words "and not more than $100,000,000 is authorized to be expended in any one fiscal year commencing after September 30, 1980.".

(d) Subsection (b) of section 125 of title 23, United States Code, is amended by striking the period at the end of the first sentence, inserting a colon in lieu thereof, and by adding the following: *"Provided,* That obligations for projects under this section, including those on highways, roads, and trails mentioned in subsection (c) of this section, resulting from a single natural disaster or a single catastrophic failure shall not exceed $30,000,000 in any State.".

(e) The amendments made by subsection (d) of this section shall apply to natural disasters or catastrophic failures which the Secretary finds eligible for emergency relief subsequent to the date of enactment of this section.

(f) Subsection (f) of section 120 of title 23, United States Code, is amended to read as follows:

"(f) The Federal share payable on account of any repair or reconstruction provided for by funds made available under section 125 of this title shall not exceed 75 per centum of the cost thereof: *Provided,* That the Federal share payable on account of any repair or reconstruction of forest highways, forest development roads and trails, park roads and trails, parkways, public lands highways, public lands development roads and trails, and Indian reservation roads may amount to 100 per centum of the cost thereof. The total cost of a project may not exceed the cost of repair or reconstruction of a comparable facility. As used in this section with respect to bridges and in section 144 of this title, 'a comparable facility' shall mean a facility which meets the current geometric and construction standards required for the types and volume of traffic which such facility will carry over its design life.".

(g) All obligations for projects resulting from a natural disaster or catastrophic failure which the Secretary finds to be eligible for emergency relief subsequent to the date of enactment of this subsection shall provide for the Federal share required by subsection (f) of section 120 of title 23, United States Code, as amended by this section.

(h)(1) Subsection (b) of section 125 of title 23, United States Code, is amended by striking the words "the Federal-aid highway systems, including the Interstate System" and by inserting in lieu thereof the words "the Interstate System, the Primary System, and on any routes functionally classified as arterials or major collectors," in the two places the stricken words appear.

(2) Subsection (c) of section 125 of title 23, United States Code, is amended by striking the words "on any of the Federal-aid highway systems" and inserting in lieu thereof the words "routes functionally classified as arterials or major collectors".

BICYCLE TRANSPORTATION PROGRAM

SEC. 120. Section 217 of title 23, United States Code is amended—

(1) by striking in the first sentence of subsection (a), the words "and the multiple use of highway rights-of-way" and "on or in conjunction with highway rights-of-way";

(2) by inserting after the first sentence in subsection (a) the following: "Federal-aid highway projects may include nonconstruction programs or projects which can reasonably be expected to enhance the safety and use of bicycles.";

(3) by striking out in subsection (b) the words "that provided in section 120 of this title" and inserting in lieu thereof "100 per centum"; and

(4) by striking out subsection (e).

HIGHLAND SCENIC HIGHWAY

SEC. 121. Section 161(f) of the Federal-Aid Highway Act of 1973, as amended by section 21 of Public Law 96-106, is further amended to read as follows:

"(f) The Highland Scenic Highway as authorized by subsection (a) of this section and all associated lands and rights-of-way shall be managed as part of the Monongahela National Forest for scenic and recreational purposes. Vehicle use shall be confined to passenger cars, recreational vehicles, and limited truck traffic to the extent such use is compatible with the purpose for which the highway was constructed. Commercial use by trucks shall be limited and controlled by permit.".

ALLOCATION OF URBAN FUNDS

SEC. 122. Section 150 of title 23, United States Code, is amended by adding the following sentence at the end thereof: "Funds allocated to an urbanized area under the provisions of this section may, at the request of the Governor and upon approval of the appropriate local officials of the area and the Secretary, be transferred to the allocation of another such area in the State or to the State for use in any urban area.".

CERTIFICATION ACCEPTANCE

SEC. 123. (a) Subsection 117(a) of title 23, United States Code, is amended by striking out "projects on Federal-aid systems, except the Interstate System," and inserting in lieu thereof "Federal-aid projects on systems other than the Interstate System" and by adding at the end thereof the following new sentence: "Notwithstanding the above, the Secretary may discharge any of his responsibilities under this title relative to the physical construction phase of Interstate resurfacing, restoration, rehabilitation, and reconstruction projects using the procedures of this section.".

(b) Subsection 117(b) is amended by striking out "make a final inspection of each subject project upon its" and inserting in lieu thereof "establish procedures for the inspection of such projects upon".

(c) Subsection 117(f)(1) is amended by striking out the words "the Federal-aid secondary system," when they first appear and inserting in lieu thereof "projects, as defined by the Secretary and which are not on the Interstate System," and by striking out "all projects on the Federal-aid secondary system" and inserting in lieu thereof "such projects".

(d) Subsection 117(f)(3) is revised to read as follows:

"(3) Paragraphs (1) and (2) of this subsection shall not be construed to relieve the Secretary of his obligation to establish procedures for the inspection of such projects upon completion and to require an adequate report of the estimated and actual cost of construction as well as other information as he determines necessary.".

(e) Subsection 105(b) of title 23, United States Code, is amended by striking out "projects on the Federal-aid secondary system" and inserting in lieu thereof "projects, as defined by the Secretary and which are not on the Interstate System except for the construction phase of Inter-

state resurfacing, restoration, rehabilitation, and reconstruction projects".

(f) Subsection 106(b) of title 23, United States Code, is amended to read as follows:

"(b) In addition to the approval required under subsection (a) of this section, proposed specifications for projects for construction, as defined by the Secretary and which are not on the Interstate System except for the construction phase of Interstate resurfacing, restoration, rehabilitation and reconstruction projects, except in States where all public roads and highways are under the control and supervision of the State highway department, shall be determined by the State highway department and the appropriate local road officials in cooperation with each other.".

(g) Subsection 112(e) of title 23, United States Code, is amended by striking out "projects on the Federal-aid secondary system" and inserting in lieu thereof "projects, as defined by the Secretary and which are not on the Interstate System except for the construction phase of Interstate resurfacing, restoration, rehabilitation, and reconstruction projects,".

DEFENSE ACCESS ROAD

SEC. 124. Section 210(c) of title 23, United States Code, is amended by striking "Not exceeding $5,000,000 of any funds appropriated under the Act approved October 16, 1951 (65 Stat. 422)", and inserting in lieu thereof "Funds appropriated for defense maneuvers and exercises".

MAINTENANCE

SEC. 125. (a) Subsection (a) of section 116 of title 23, United States Code, is amended by striking the second sentence.

(b) Subsection (b) of section 116 of title 23, United States Code, is amended by striking "constructed on the Federal-aid secondary system or within a municipality,".

(c) The second sentence of subsection (c) of section 116 of title 23, United States Code, is amended to read as follows: "If, within ninety days after receipt of such notice, such project has not been put in proper condition of maintenance, the Secretary shall withhold approval of further projects of all types on one or more of the Federal-aid systems or programs in the State highway district, municipality, county, other political or administrative subdivision of the State, or the entire State, in which such project shall be located, as he deems most appropriate until such project shall have been put in proper condition of maintenance.".

(d) Section 109 of title 23, United States Code, is amended by striking subsection (m) and by relettering subsection (n) as (m).

(e) Section 116 of title 23, United States Code, is amended by adding subsection (f) as follows:

"(f) The Secretary shall issue guidelines describing the criteria applicable to the Interstate System in order to insure that the condition of these routes is maintained at the level required by the purposes for which they were designed.".

(f) Section 119 of title 23, United States Code, is amended by striking subsection (b).

(g) Section 116 of title 23, United States Code, is amended by adding subsection (g) as follows:

"(g) Not later than one year after the date of issuance of initial guidelines under subsection (f) of this section each State shall have a program for the Interstate System in accordance with such guidelines. Each State shall certify on January 1 of each year that it has such a program and the Interstate System is maintained in accordance with the program. If a State fails to certify as required or if the Secretary determines a State is not adequately maintaining the Interstate System in accordance with such program, the next apportionment of funds to such State for the Interstate System shall be reduced by amounts equal to 10 per centum of the amount which would otherwise be apportioned to such State under section 104 of this title. If, within one year from the date the apportionment for a State is reduced under this subsection, the Secretary determines that such State is maintaining the Interstate System in accordance with the guidelines the apportionment of such State shall be increased by an amount equal to the reduction. If the Secretary does not make such a determination within such one year period, the amount withheld shall be reapportioned to all other eligible States.".

CONSTRUCTION

SEC. 126. (a) Subsection (a) of section 114 of title 23, United States Code is amended to read as follows:

"(a) The construction of any highways or portions of highways located on a Federal-aid system or under a Federal-aid program shall be undertaken by the respective State highway departments or under their direct supervision. The construction work and labor in each State shall be in accordance with the laws of that State and applicable Federal laws. Except as provided in section 117 of this title, the Secretary shall establish procedures for the inspection and approval of such construction. Construction may begin as soon as funds are available pursuant to subsection (a) of section 118 of this title. The State highway department shall not erect any informational signs other than official traffic control devices conforming with standards developed by the Secretary on any project where actual construction is in progress and visible to highway users.".

(b) Subsection (c) of section 121 of title 23, United States Code is amended by striking the words "following inspections".

RESEARCH AND PLANNING

SEC. 127. (a) Subsection (c) of section 307, title 23, United States Code, is amended by adding paragraph (5) as follows:

"(5) The sums provided pursuant to paragraph (2) of this subsection shall be combined and administered by the Secretary as a single fund which shall be available for obligation for the same period as funds apportioned under section 104(b)(1) of this title.".

(b) Subsection (c)(2) of section 307, title 23, United States Code, is amended by striking "1964" and inserting in lieu thereof "1983", and by striking "section 104" and inserting in lieu thereof "sections 104 and 144".

(c) Section 120 of title 23, United States Code, is amended by adding a subsection (i) as follows:

"(i) The Federal share payable on account of any project financed under section 307(c) of this title shall be 85 per centum, except that in the case of any State containing nontaxable Indian lands, individual and tribal, and public domain lands (both reserved and unreserved) exclusive of national forests and national parks and monuments, exceeding 5 per centum of the total area of all lands therein, the Federal share shall be increased by a percentage of the remaining cost equal to the percentage that the area of all such lands in such State is of its total area, except that such Federal share payable on any project in any State shall not exceed 95 per centum of the total cost of any such project.".

NONDISCRIMINATION

SEC. 128. (a) The first and third sentences of subsection (a) of section 140 of title 23, United States Code, are amended by striking the words "or national origin" and inserting in lieu thereof the words "national origin or sex".

(b) Section 140 of title 23, United States Code, is amended by adding new subsection (c) as follows:

"(c) The Secretary, in cooperation with any other department or agency of the Government, State agency, authority, association, institution, corporation (profit or nonprofit), or any other organization or person, is authorized to develop, conduct, and administer training programs and assistance programs in connection with any program under this title in order that minority businesses may achieve proficiency to compete, on an equal basis, for contracts and subcontracts. Whenever apportionments are made under subsection 104(a) of this title, the Secretary shall deduct such sums as he may deem necessary, not to exceed $10,000,000 per fiscal year, for the administration of this subsection. The provisions of section 3709 of the Revised Statute, as amended (41 U.S.C. 5), shall not be applicable to contracts and agreements made under the authority herein granted to the Secretary notwithstanding the provisions of 41 U.S.C. 252(e).".

(c) The title of section 140 of title 23, United States Code, is amended to read:

"§140. Nondiscrimination"

and the analysis of chapter 1 of title 23, United States Code, is amended by striking out

"140. Equal employment opportunity."

and inserting in lieu thereof

"140. Nondiscrimination.".

INTERAGENCY AGREEMENTS

SEC. 129. (a) Chapter 1 of title 23, United States Code, is amended by adding after section 156 the following new section:

"§ 157. Interagency agreements

"Not later than one hundred and eighty days after the date of enactment of this section, the Secretary shall enter into agreements with the Secretaries of the Departments of Interior and Defense, the Administrator of the Environmental Protection Agency, and the heads of such other Federal departments, agencies, and instrumentalities as the Secretary determines, to minimize, to the greatest extent possible, duplication, paperwork, and delays in the development and approval of projects, with no substantial controversy, under this title and any other provision of law relating to the Federal highway programs. Notwithstanding any other provision of law, such agreements shall provide that actions on applications or requests for permits, licenses, findings, and other approvals and determinations required for such projects will be fully coordinated by the Department of Transportation with the review process established under the National Environmental Policy Act of 1969, as amended, and, to the greatest extent practicable, that a decision with respect to each such application or request will be made contemporaneously with approval of the environmental impact statement, finding of no significant impact, or categorical exclusion required for such project, but in no event later than one hun-

dred and eighty days after the date of approval of such environmental review document.".

(b) The analysis of chapter 1 of title 23, United States Code, is amended by adding at the end thereof the following:

"157. Interagency agreements.".

OBLIGATION LIMITATION AND ALLOCATION FORMULA

SEC. 130. (a) Notwithstanding any other provision of law, the total of all obligations for Federal-aid highways and highway safety construction programs for fiscal year 1983 shall not exceed $12,000,000,000, for fiscal year 1984 shall not exceed $12,800,000,000, for fiscal year 1985 shall not exceed $13,600,000,000, for fiscal year 1986 shall not exceed $14,500,000,000, and for fiscal year 1987 shall not exceed $14,900,000,000. These limitations shall not apply to obligations for emergency relief under section 125 of title 23, United States Code, section 9 of the Federal-Aid Highway Act of 1981, and section 118 of the Union Station Redevelopment Act of 1981. No obligation constraints shall be placed upon any ongoing emergency project carried out under section 125 of title 23, United States Code.

(b) For the fiscal years 1983, 1984, 1985, 1986, and 1987, the Secretary shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to all the States for such fiscal year.

(c) During the period October 1 through December 31, 1982, no State shall obligate more than 35 per centum of the amount distributed to such State under subsection (b), and the total of all State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection.

(d) Notwithstanding subsections (b) and (c), the Secretary shall—

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned or allocated to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code;

(2) after August 1, 1983, August 1, 1984, August 1, 1985, August 1, 1986, and August 1, 1987, respectively revise a distribution of the funds made available under subsection (b) if a State will not obligate the amount distributed during that fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during that fiscal year; and

(3) not distribute amounts authorized for administrative expenses and forest highways.

CERTIFICATION OF STATE PROCEDURES

SEC. 131. (a) The Secretary of Transportation in cooperation with the State of Vermont shall carry out a project to demonstrate the feasibility of reducing the time and the cost required to complete highway projects, other than projects on the Interstate System, in areas that require improved access between rapidly growing suburban areas and established urban core areas, by extending the coverage of State certifications under section 117(a) of title 23 of the United States Code, to any Federal law, regulation, or policy that applies to such projects.

(b) In implementing this section, the Secretary shall review applications for projects submitted by the State of Vermont with respect to which the State agrees to assume the responsibility of the Secretary with regard to any such Federal law, regulation, or policy. The Secretary shall be deemed to have fulfilled his responsibility under such law, regulation, or policy, provided that—

(1) the Secretary finds that the State has procedures which are sufficient to assure that the project will be carried out in accordance with the provisions of such law, regulation, or policy;

(2) the State highway department is authorized and consents to accept the jurisdiction of the Federal courts in any suit brought to enforce any such Federal law or regulation; and

(3) the State highway department certifies that the project has been carried out in accordance with the procedures specified under subsection (b)(1) of this section.

(c) In carrying out the demonstration project authorized under this section, the Secretary may continue to discharge his responsibilities directly with respect to those laws, regulations, and policies for which he finds State procedures are not sufficient.

(d) In implementing this section, the Secretary shall consider the procedures developed pursuant to section 141 of the Federal-Aid Highway Act of 1976, as amended, and shall encourage the State to carry out its responsibilities in cooperation with appropriate political subdivisions of the State.

(e) There is authorized to be appropriated out of the Highway Trust Fund to carry out the project authorized under this section a sum not to exceed $50,000,000.

(f) Funds authorized by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of any project under this section shall be 100 per centum of the total cost thereof and such funds shall remain available until expended.

(g) Not later than six months after the completion of such project, the Secretary shall submit a report to Congress which includes, but is not limited to, a description of the methods used to accomplish the project and the changes, if any, required to adopt expanded certification. The report should also contain recommendations for applying the methods to other highway projects, and any changes to existing law which may be necessary to permit more widespread use of expanded certification acceptance.

ALASKA HIGHWAY

SEC. 132. (a) Subsection (a) of section 218 of title 23, United States Code, is amended by adding after the second sentence the following: "In addition to such funds, the State of Alaska is authorized to expend on such highway any Federal-aid highway funds apportioned to the State of Alaska under this title as its Federal share. Notwithstanding any other provision of law any obligation limitation enacted for fiscal year 1983 or for any fiscal year thereafter shall not apply to projects authorized by the previous sentence.".

(b) This amendment shall be effective upon the date of the enactment of this Act.

TERRITORIAL HIGHWAY PROGRAM

SEC. 133. (a) Section 215 of title 23, United States Code, is hereby repealed.

(b)(1) The unobligated balance of sums appropriated prior to enactment of subsection (a) of this section for carrying out section 215 of title 23, United States Code, shall remain available for obligation under the conditions applicable prior to such enactment.

(2) The unappropriated balance of sums authorized prior to enactment of subsection (a) of this section for carrying out section 215 of title 23, United States Code, shall remain available until expended under the conditions applicable prior to such enactment.

(c) Section 120(i) of title 23, United States Code, repealed.

(d) Section 401 of title 23, United States Code, is amended by deleting the second sentence thereof.

(e) The sixth sentence of section 402(c) of title 23, United States Code, is amended to read as follows: "The annual apportionment to each State shall not be less than one-half of 1 per centum of the total apportionment.".

(f) The analysis of chapter 2 of title 23, United States Code, is amended by deleting:

"215. Territories highway development program."

and inserting in lieu thereof:

"215. Repealed.".

ACCELERATION OF BRIDGE PROJECTS

SEC. 134. Section 147 of the Surface Transportation Assistance Act of 1978, as amended by section 15 of Public Law 96-106 (93 Stat. 798) is repealed. Funds previously set aside in accordance with such section 147 shall be available for obligation for a period of two years from the date of enactment of this Act. Such funds may be obligated under the same conditions which existed prior to the repeal of such section 147. Funds not obligated within that period of availability shall be permanently withdrawn and such funds shall be apportioned by the Secretary to the several States in accordance with section 144(e) of title 23, United States Code.

LAKE ROAD EROSION DEMONSTRATION

SEC. 135. (a) The Secretary of Transportation is authorized to carry out demonstration projects in and around Devils Lake, North Dakota, for the purpose of demonstrating construction techniques to prevent wave erosion on closed basin lakes with grade level highway crossings.

(b) The Secretary is authorized to reimburse from funds authorized by subsection (c) the State of North Dakota for funds previously expended on projects described in subsection (a).

(c) There is authorized to be appropriated, out of the Highway Trust Fund, to carry out this section not to exceed $4,500,000 for the fiscal year ending September 30, 1983.

(d) Funds authorized by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of any project under this section shall not exceed 75 per centum of the total cost thereof and such fund shall remain available until expended.

TRUCK SAFETY DEMONSTRATION

SEC. 136. The Secretary of Transportation, in cooperation with the State of Idaho, shall conduct a project on a primary segment of highway experiencing a high incidence of truck accidents. The study shall include an

analysis of factors contributing to truck accidents such as weather conditions, sight distance, road curvature, roadway width, and gradient. The study shall also include an analysis of the benefit-cost ratio of certain safety improvements implemented to correct hazards contributing to truck accidents.

(b) There is authorized to be appropriated, out of the Highway Trust Fund, to carry out this section not to exceed $6,500,000.

(c) Funds authorized by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of any project under this subsection shall be 100 per centum of the total cost thereof and such funds shall remain available until expended.

(d) The Secretary of Transportation shall submit to Congress a report on the results of the demonstration project not later than 180 days after completion of such project.

TECHNICAL AMENDMENTS

SEC. 137. (a) Section 101(a) is amended as follows:

(1) In the tenth sentence, by inserting the words "or under one of the Federal-aid programs" immediately after the words "Federal-aid systems";

(2) In the nineteenth sentence, by striking the period at the end thereof and adding the words "or under the Federal-aid programs.";

(3) In the thirtieth sentence, by deleting the words "secondary system" and inserting in lieu thereof the words "rural program", and by deleting the word "system" and inserting in lieu thereof the word "program";

(4) In the thirty-first sentence, by deleting the word "system" each time it appears and inserting in lieu thereof the word "program"; and

(5) By adding after the twenty-eighth sentence the following sentence: "The term 'Federal-aid program' means any one of the Federal-aid highway programs described in section 103 of this title.".

(b)(1) Section 103 is amended by adding to the title the words "and programs" after the words "Federal-aid systems";

(2) Section 103(a) is amended to read as follows: "For the purpose of this title, the Federal-aid systems, which consist of the primary system and the Interstate System, along with the Federal-aid programs, which consist of the Federal-aid rural program and the Federal-aid urban program, are established and continued pursuant to the provisions of this section.";

(3) Section 103(f) is amended to read as follows: "The Secretary shall have authority to approve in whole or in part the Federal-aid primary system, the Federal-aid rural program, the Federal-aid urban program, and the Interstate System, as and when such systems and programs or portions thereof are designated, or to require modifications or revisions thereof. No Federal-aid system or program or portion thereof shall be eligible for projects in which Federal funds participate until approved by the Secretary.";

(4) Subsections (g) and (h) of section 103 are repealed; and

(5) The analysis of chapter 1 of title 23 is amended by deleting

"103. Federal-aid systems."

and inserting in lieu thereof

"103. Federal-aid systems and programs.".

(c) Section 104 is amended as follows:

(1) In subsections (a) and (b)(1), by inserting the words "and programs" immediately after the words "Federal-aid systems" each time they appear;

(2) In paragraph (2) of section 104(b), by deleting the words "secondary system" and inserting in lieu thereof the words "rural program";

(3) In paragraph (6) of section 104(b) by deleting the word "system" and inserting in lieu thereof the word "program";

(4) In subsection (c)(1), by deleting the phrase ", commencing with the apportionment of funds authorized to be appropriated under subsection (a) of section 102 of the Federal-Aid Highway Act of 1956 (70 Stat. 374),"; and

(5) In subsection (f)(1), by inserting the words "and programs" immediately after the words "Federal-aid systems".

(d) Section 105 is amended as follows:

(1) In the first sentence of subsection (a) by inserting the words "and programs" after the words "Federal-aid systems", and by deleting in the third sentence the comma and all that follows and inserting a period after the word "part"; and

(2) In subsection (d) by deleting the words "programs for", and by deleting the words "on the Federal-aid urban system" and inserting in lieu thereof the words "under the Federal-aid urban program".

(e) Section 106 is amended as follows:

(1) Section 106(b) is amended by striking the word "on" and inserting in lieu thereof the word "under," and by striking the word "system" each place it appears and inserting in lieu thereof the word "program".

(2) Section 106(d) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system".

(f)(1) Section 108(a) is amended by inserting the words "or under any of the Federal-aid highway programs," immediately after the words "Interstate System," the first time they appear, and by inserting the words "and programs" immediately after the words "Federal-aid highway systems" the second time they appear;

(2) Section 108(c)(2) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system"; and

(3) The last sentence of section 108(c)(3) is amended by inserting the words "or under the Federal-aid program" immediately after the words "Federal-aid system".

(g)(1) Section 109(a) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system";

(2) Section 109(c) is amended by deleting the words "Projects on the Federal-aid secondary system" and inserting in lieu thereof the words "Federal-aid rural program projects";

(3) Section 109(e) is amended by deleting the phrase "No funds shall be approved for expenditure on any Federal-aid highway," and inserting in lieu thereof the following phrase: "No funds shall be approved for expenditure on any highway on the Federal-aid highway system or under the Federal-aid highway program,";

(4) Section 109(h) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system";

(5) Section 109(i) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system" each time they appear in the first and second sentences, by inserting the words "or under a Federal-aid program" immediately after the words "Federal-aid system" in the third sentence, by inserting the words "or program" immediately after the words "Federal-aid system" in the fifth sentence, and by inserting the words "or under" immediately after the word "on" in such sentence; and

(6) Section 109(l)(1) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system".

(h)(1) Section 113(a) is amended by deleting the words "the primary and secondary, as well as their extensions in urban areas, and the Interstate System, authorized under the highway laws providing for the expenditure of Federal funds upon the Federal-aid systems," and inserting in lieu thereof the words "the primary as well as its extensions in urban areas, and the Interstate System, or under the Federal-aid programs, authorized under the highway laws providing for the expenditure of Federal funds upon the Federal-aid systems and programs,"; and

(2) Section 113(b) is amended by inserting the words "or under any of the Federal-aid programs" immediately after the words "Federal-aid systems".

(i) Section 115(a) is amended to read as follows:

"(a) When a State has obligated all funds for the primary system or for any of the Federal-aid programs apportioned to it under section 104 of this title, and proceeds to construct any projects without the aid of Federal funds, including one or more parts of any project, on the primary system or under any of the Federal-aid programs in such State, other than the Interstate System, as that system may be designated or any of those programs may be comprised at that time, in accordance with all procedures and all requirements applicable to projects on the primary system or under any such program, except insofar as such procedures and requirements limit a State to the construction of projects with the aid of Federal funds previously apportioned to it, the Secretary, upon application by such State and his approval of such application, is authorized to pay to such State the Federal share of the costs of construction of such project when additional funds are apportioned to such State under section 104 of this title if—

(1) prior to the construction of the project the Secretary approves the plans and specifications therefor in the same manner as other projects on the Federal-aid system or under the Federal-aid program involved, and

(2) the project conforms to the applicable standards adopted under section 109 of this title.

The Secretary may not approve an application under this section unless an authorization is in effect for the fiscal year for which the application is sought beyond the currently authorized funds for such State and that no application may be approved which will exceed the State's expected apportionment of such authorization.".

(j) Section 118(d) is amended by inserting the words "or under a Federal-aid program" immediately after the words "Federal-aid system".

(k)(1) Section 120(a) is amended by deleting in the first sentence all of the words between "(a)" and "(A)" and inserting in lieu thereof the words "Subject to the provisions of subsection (d) of this section, the Federal share payable on account of any project, financed with primary, rural, or urban funds, on the Federal-aid primary system, under

the Federal-aid rural program, and under the Federal-aid urban program shall either"; and

(2) Section 120(g) is amended by deleting the words "Federal-aid highways" and inserting in lieu thereof the words "Federal-aid projects".

(l) Section 121(c) is amended by inserting the words "or under a Federal-aid program" immediately after the words "Federal-aid system".

(m) Section 123(a) is amended by deleting the words "the Federal-aid primary or secondary systems or on the Interstate System, including extensions thereof within urban areas," and inserting in lieu thereof the words "a Federal-aid system or under a Federal-aid program,".

(n) Section 124(a) is amended by inserting the words "or under any of the Federal-aid programs," immediately after the phrase "including the Interstate System,".

(o) Section 129 is amended as follows:

(1) In subsection (c), by inserting the words "and programs" immediately after the words "Federal-aid highway systems";

(2) In subsections (f) and (g)(2), by inserting the words "or programs" immediately after the words "Federal-aid systems" each time they appear; and

(3) In subsection (i), by deleting the words "Federal-aid system, other than the Interstate System," and inserting in lieu thereof the words "Federal-aid project other than one of the Interstate System,".

(p) Section 135(b) is amended by placing a period after the word "flow" and deleting the remainder of the sentence.

(q) Section 137(a) is amended by deleting the words "project on the Federal-aid urban system" and inserting in lieu thereof the words "project under the Federal-aid urban program".

(r) Section 140(a) is amended by inserting the words "or under any of the Federal-aid programs" immediately after the words "Federal-aid systems".

(s) Section 141(b) of title 23, United States Code, is amended to read as follows:

"(b) Each State shall certify to the Secretary before January 1 of each year that it is enforcing in accordance with section 127 of this title all State laws respecting maximum vehicle size and weights permitted on all roads receiving funds under the Federal-aid program, including the primary system, the Interstate System, and is a route functionally classified as an arterial or major collector.".

(t) Section 142 is amended as follows:

(1) In subsection (a)(1) by inserting the words "and highways under the Federal-aid programs" immediately after the words "Federal-aid systems", and by deleting the words "as a project on any Federal-aid system";

(2) In subsection (a)(2) by deleting the words "project on the Federal-aid urban system" each place it appears and inserting in lieu thereof "project under the Federal-aid urban program"; and

(3) In subsection (e)(2) by deleting the words "projects on the Federal-aid urban system" and inserting in lieu thereof "projects under the urban program".

(u) Section 149 is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system".

(v) Section 150 is amended as follows:

(1) By deleting the word "system" in the title and inserting the word "program" in lieu thereof.

(2) By amending the analysis of chapter 1 of title 23, United States Code, by deleting:

"150. Allocation of urban system funds.".

and inserting in lieu thereof:

"150. Allocation of urban program funds.".

(w) Section 302(b) is amended by deleting the words "on the Federal-aid secondary system," and inserting in lieu thereof the words "under the Federal-aid rural program", and by deleting the words "secondary funds," and inserting in lieu thereof the words "rural funds,".

(x) Section 304 is amended by inserting the words "and highways under the Federal-aid programs" between the word "systems" and the comma.

(y) Section 317(d) is amended by inserting the words "or under a Federal-aid program" immediately after the words "Federal-aid system".

(z) Section 320(a) is amended by inserting the words "or programs" immediately after the words "highway systems" in the second sentence.

(aa) Section 322 is amended as follows:

(1) In subsection (c)(1) by deleting the words "any Federal-aid system," and inserting in lieu thereof the words "the Interstate System, the Primary System, or is a route functionally classified as an arterial or major collector,"; and

(2) In subsection (c)(2) by deleting the words "any Federal-aid system," and inserting in lieu thereof the words "the Interstate System, the Primary System, or is not a route functionally classified as an arterial or major collector,".

(bb) Section 402(d) is amended by inserting the words "and programs" immediately after the words "Federal-aid systems".

Section-by-Section Analysis

SHORT TITLE

Section 101. This section provides that the title may be cited as the "Federal-Aid Highway Improvement Act of 1982".

REVISION OF AUTHORIZATION FOR APPROPRIATIONS FOR THE INTERSTATE SYSTEM

Section 102. This section authorizes $3.625 billion for fiscal year 1984, $3.8 billion for fiscal years 1985 and 1986, and $4.0 billion for each of fiscal years 1987 through 1990 for the Interstate Highway System construction program.

HIGHWAY AUTHORIZATIONS

Section 103. This section authorizes the appropriation, out of the Highway Trust Fund, of the following sums for fiscal years 1983, 1984, 1985, 1986, and 1987.

For the Federal-aid primary program, $1.7 billion for fiscal year 1983, $2.1 billion for fiscal year 1984, $2.4 billion for each of fiscal years 1985 and 1986, and $2.6 billion for fiscal year 1987; for the Federal-aid rural program, $0.7 billion for each of fiscal years 1983 through 1987; for the Federal-aid urban program, $0.8 billion for each of fiscal years 1983 through 1987; for forest highways, $50 million for each of fiscal years 1983 through 1987; for public lands highways, $50 million for each of fiscal years 1983 through 1987; for bridge replacement and rehabilitation (23 U.S.C. 144), $1.7 billion for each of fiscal years 1983 and 1984, and $1.8 billion for fiscal year 1985, and $2.0 billion for each of fiscal years 1986 and 1987; and for the highway safety improvement program, $0.4 billion for each of fiscal years 1983 through 1987.

Subsection (b)(1) provides a minimum apportionment of one-half of one percent of Interstate construction funds to each State, including Alaska. Whenever this amount exceeds a State's need for Interstate construction and Interstate resurfacing, restoration, rehabilitation, and reconstruction, the State may transfer the excess amount of the Primary System, the Rural Program, or the Urban Program.

Subsection (b)(2) provides for a Discretionary Bridge Fund of $300 million for each of fiscal years 1983 through 1987. Funds are available for a period of four years. Projects eligible for the funds are those costing more than $10 million or those costing at least twice a State's annual bridge fund apportionment. A technical amendment is also made to 23 U.S.C. 144(g) to change the requirement of expenditures on bridges off the Federal-aid systems to a requirement of at least 15 per centum of expenditures on bridges on public roads not functionally classified as arterials or major collectors. Virtually all of the present Interstate, Primary, and Secondary Systems and most of the Urban System consist of roads functionally classified as arterials and major collectors. This change would permit expenditure of up to 85 per centum of the total funds on Interstate, Primary, Secondary, and Urban Systems and Off-System arterials or major collectors. The effect of the technical amendment will be to leave the law substantially unchanged. This subsection also deletes the provision of 23 U.S.C. 144(g) which prohibits the expenditure of more than 35 per centum of a State's bridge apportionments off the Federal-aid systems. This deletion will permit discretion to the States to use more of their bridge funds off-system in accord with their own priorities.

A number of categories including forest development roads and trails, public lands development roads and trails, park roads and trails, parkways, Indian reservation roads and bridges, economic growth center development highways, Great River Road, safer-off-system roads, access highways, section 402 FHWA highway safety program, section 152 elimination of hazards program, rail-highway crossings, railroad-highway crossings demonstration program, and bicycle transportation and pedestrian walkways, will not receive new separate funding levels. Most of the projects now eligible in these categories will be eligible under the primary, rural, urban, and safety programs.

DISCRETIONARY BRIDGE CRITERIA

Section 104. This section directs the Secretary to develop a selection process for discretionary bridges authorized under section 144(g). This selection process is to include a formula resulting in a rating factor which is based on criteria including the sufficiency rating, average daily traffic, average daily truck traffic, defense highway system status, and the State's unobligated balance of funds received under section 144. In addition, the Secretary is directed to give consideration to bridges that are closed to all traffic or that have a load restriction of 10 tons or less. Those bridges already eligible for discretionary bridge funds will remain eligible. After the issuance of a final regulation, eligible bridges will be limited to those with a rating factor of 100 or less, based on a scale of 0 to infinity.

INTERSTATE SYSTEM RESURFACING APPORTIONMENT

Section 105. This section establishes a new Interstate 4R apportionment formula. The new formula is based 60 percent on the ratio of the number of lane miles on Interstate routes (other than those on toll roads not subject to a Secretarial agreement) each State has of the total lane miles in all States, and 40 percent on the ratio each State has of the total vehicle miles traveled

on those lanes on Interstate routes (other than those on toll roads not subject to a Secretarial agreement). This section also establishes a minimum one-half of one percent guarantee of Interstate 4R appointments for each State.

The Secretary is directed to study the procedures for distributing Interstate 4R funds to the States. The purpose of the study is to analyze current conditions and factors including volume and mix of traffic, weight and size of vehicles, environmental, geographical, and meteorological conditions in various States, and any other factors that may contribute to the deterioration of the Interstate system. The Secretary shall consider such criteria as need, national importance, impact on individual State highway programs, structural and operational integrity, and any other relevant criteria, to determine the most equitable method of distribution. The Secretary is directed to report the results of the study together with recommendations for legislation not later than two years after the date of enactment of this section.

INTERSTATE SYSTEM RESURFACING AUTHORIZATION

Section 106. This section provides authorizations for Interstate resurfacing, restoring, rehabilitation and reconstructing (4R), out of the Highway Trust Fund, of $1.8 billion for fiscal year 1984, $2.4 billion for fiscal year 1985, $2.8 billion for fiscal year 1986, $3.2 billion for fiscal year 1987, $3.4 billion for fiscal year 1988. The requirement that Interstate 4R funds be used only on lanes in use for more than five years is discontinued. The transfer of 4R funds to primary apportionments is permitted when the 4R funds are excess to resurfacing and reconstruction needs.

INTERSTATE SUBSTITUTION AUTHORIZATION

Section 107. Subsection (a) authorizes, in addition to any funds authorized to be appropriated out of the General Fund, $500 million for fiscal year 1983, $600 million for each of fiscal years 1984 and 1985, and $650 million for each of fiscal years 1986 and 1987, out of the Highway Trust Fund, for substitute highway projects under 23 U.S.C. 103(e)(4). The effect of this authorization is to grant contract authority for substitute highway projects. Funds for mass transit substitute projects will continue to come from the General Fund of the Treasury.

Section 107(b) amends 23 U.S.C. 103(e)(4) to allow withdrawal of, and to include as eligible for the benefits of withdrawal and substitution, any Interstate routes including those in rural areas, except those routes or segments of routes added to the Interstate System by specific legislation after March 7, 1978.

Section 107(c) provides that no adjustment will be made for inflation after September 30, 1983, for any substitute project eligible for Interstate Transfer funds.

Section 107(d) prohibits withdrawal and substitution for routes or segments of routes added to the Interstate System by specific legislation after March 7, 1978.

Section 107(e) clarifies that 100 percent Federal share shall also apply to traffic control signalization projects which might be included as part of an Interstate substitution project under 23 U.S.C. 103(e)(4). Present law now permits 100 percent Federal share for projects for traffic control signalization funded from all other Federal-aid categories.

FEDERAL-AID PRIMARY PROGRAM

Section 108. This section would eliminate the priority primary program (23 U.S.C. 147). Any unobligated authority for the priority primary program, effective the date of enactment of this section, would be apportioned by the Secretary of Transportation in the same manner as primary funds and would thereafter remain available for obligation for the same period as if the funds were apportioned like primary funds. Pertinent sections of title 23, United States Code, would be amended to reflect the elimination of the priority primary program. This section would also permit the District of Columbia to receive a minimum one-half of one percent of each year's primary apportionment.

FEDERAL-AID URBAN PROGRAM

Section 109. This section would establish the Federal-aid urban program. The existing Federal-aid urban system would be abolished, allowing for a wider range of transportation programs in urban areas. The changes will facilitate the achievement of goals relating to equity of programs, energy conservation, center-city revitalization, economic development, and reindustrialization.

All public roads in urban areas would be eligible, except those on the primary system and Interstate System. Transit capital projects and transportation system management (TSM) projects would also be eligible as would projects previously categorized as safer-off-system. Consolidated safety programs incorporated by section 112 of this bill, the Highway Safety Improvement Program, are eligible for funding as part of the urban program.

The Certification Acceptance Procedures as provided by section 117(a) and the Secondary Road Plan procedures as provided by section 117(f) of title 23, United States Code, may be utilized by the States for projects under this program.

FEDERAL-AID RURAL PROGRAM

Section 110. This section amends section 103 of title 23, United States Code. It combines the secondary program and eligible projects now under the non-safety portion of the safer-off-system program, the Great River Road program, the access to lakes program, the bridges on Federal dams program and the economic growth center program. This would result in a consolidated rural program and end the secondary system designation, thus making funds available for all rural and nonurban roads, other than primary and Interstate System roads. Projects eligible for funding would be expanded to include nonurban public transportation and projects previously categorized as safer-off-system roads. Consolidated safety programs incorporated by section 112 of the bill, the Highway Safety Improvement Program, are eligible for funding as part of the Rural Program. Consolidating the funds for the above mentioned programs and terminating the secondary system designation would increase the flexibility for use of the funds as well as simplify grant and project administration and management.

The Certification Acceptance procedures as provided by section 117(a) and the Secondary Road Plan procedures as provided by section 117(f) of title 23, United States Code, may be utilized by the States for projects under this program.

TRANSFERABILITY

Section 111. This section amends 23 U.S.C. 104 to permit transfers between primary system and rural program apportionments and between primary system and urban program apportionments of up to 100 percent. Current law now permits 50 percent transfers between primary and secondary systems and between primary and urban systems.

HIGHWAY SAFETY IMPROVEMENT PROGRAM

Section 112. This section establishes a single highway safety improvement program by combining all safety categories—Hazard Elimination, Rail Highway Crossings, Rail Relocation Projects, Safer-Off-System Roads, and highway related safety activities under section 402.

Each State must develop and implement a continuous highway safety improvement program which includes procedures for planning, implementation and evaluation of highway safety improvement projects. As part of this program, each State must have a process for inventorying and analyzing accident, traffic, and highway data, for conducting engineering surveys of hazardous locations, sections, and elements; and for maintaining and implementing a prioritized schedule of projects for the improvement of the hazards identified. Any highway safety improvement project on a public road, except the Interstate, may be funded under this section. The Federal share under this section is 90 percent except for rail-highway crossing projects, in which case the Federal share is that provided in section 120(d) of title 23, United States Code. Any remaining unobligated balance of contract authority for carrying out section 402 with respect to highway-related safety programs will remain available for obligation, and will lapse not later than September 30, 1984. Highway safety funds are apportioned to the States according to a formula based on population and road mileage.

This section also provides that each State shall expend 35 percent of the funds apportioned to it for highway safety improvements for rail grade crossing projects authorized by section 203 of the 1973 Highway Safety Act. This minimum percentage of use of such funds may be waived by the Secretary of Transportation upon application of the State if the Secretary finds that the State has demonstrated that it has other safety projects of a higher priority.

One-half of one percent of the highway safety funds is made available to the Secretary of the Interior for carrying out section 151 safety activities on Indian reservations. The section 151 funds are available as if they were primary funds except where inconsistent with the purposes of this section. In addition, primary system, urban program and rural program funds are eligible for all consolidated safety projects.

The States are required to evaluate the results of the highway safety improvement program and to report annually to the Secretary. The Secretary is required to report annually to the Congress. The State's existing safety reports to the Secretary of Transportation under Section 203 of the Highway Safety Act of 1973 for rail-highway crossings, the Section 151 report on pavement markings and the Section 152 report on hazard eliminations are repealed, as the comparable reports are now included under the one consolidated report provided by subsection (a), which contains a new section 151(h) on highway safety improvement program reports.

HIGHWAY BRIDGE REPLACEMENT AND REHABILITATION PROGRAM APPORTIONED FUNDS

Section 113. This section provides for an annual apportionment starting fiscal year

1983 based upon a formula: All deficient bridges will be divided into four categories: (1) Federal-aid system bridges and bridges on public roads functionally classified as arterials or major collectors eligible for replacement, (2) Federal-aid system bridges and bridges on public roads functionally classified as arterials or major collectors eligible for rehabilitation, (3) Off-system bridges and bridges on public roads not functionally classified as arterials or major collectors eligible for replacement, and (4) Off-System bridges and bridges on public roads not functionally classified as arterials or major collectors eligible for rehabilitation. The square footage of deficient Federal-aid system bridges, and bridges on public roads functionally classified as arterials or major collectors, both those eligible for replacement and those eligible for rehabilitation, shall be multiplied by a factor of two. The square footage of deficient bridges in each category shall be multiplied by a national average unit cost on a State-by State basis and the total cost in each divided by the total cost of the nation's deficient bridges to yield the apportionment factors, except that no State shall receive less than one quarter of one percent nor more than 8 percent of the annual apportionment. These funds are available for four years.

FEDERAL LANDS HIGHWAYS

Section 114. This section would establish a Federal Lands Highway Program which would include forest highways, park roads, parkways, Indian reservation roads, and public lands highways. This section would change existing law in the following ways.

Current section 202(a) of title 23, United States Code, provides for forest highway authorizations to be apportioned for the forest highways in the several States according to the area and value of federally owned land within the national forests therein. Revised section 202(a) would replace this apportionment formula with an allocation formula based on the relative needs of the various elements of the National Forest System as determined by the Secretary of Transportation in cooperation with the Secretary of Agriculture. The existing formula is obsolete because of the policies and directions mandated by renewable resource and land use planning legislation.

Revised section 202(b) would modify the existing allocation criteria (23 U.S.C. 202(b)) for forest development roads and trails to require that allocation of such funds be consistent with the renewable resource and land use planning for the various National Forests. As with forest highways, this change to the allocation criteria for forest development roads and trails is necessary to achieve compliance with renewable resource and land use planning legislation. Forest development roads and trails are not included as part of the new Federal Lands Highways Program as such roads and trails are restricted to administrative use by appropriate agencies. The Federal Lands Highways Program would include public roads only.

Revised section 202(c) is a restatement of the existing allocations criteria (23 U.S.C. 202(c)) for public lands highways with one addition. A new provision, consistent with recent renewable resource and land use planning legislation, would provide that preference be given to those highway projects which are significantly impacted by Federal land and resource management activities.

New sections 202 (d) and (e) would establish criteria for allocation of funds authorized for park roads, parkways and Indian reservation roads. Currently, no criteria are statutorily prescribed for allocation of funds authorized for park roads, parkways and Indian reservation roads. The proposed allocation criteria for these classes of highways would require distribution of funds authorized for each such class be based on the relative needs of the various elements of each such class.

This section would eliminate the separate provisions of chapter 2 of title 23, United States Code, which provide for forest highways (section 204), park roads (section 206), parkways (section 207), Indian reservation roads (section 208), and public lands highways (section 209), and establish in lieu thereof a coordinated Federal Lands Highway Program under which each such class of Federal lands highways would be continued. The substance of the separate sections which provided for forest highways, park roads, parkways, Indian reservation roads, and public lands highways is essentially restated in the new section authorizing the Federal Lands Highways Program. The significant change that the new section would make is placing on the Secretary of Transportation the oversight and coordinating responsibility for Federal Lands Highways in order to ensure that such highways are treated under the same uniform policies as roads which are on the Federal-aid systems.

This proposal would not transfer jurisdiction of the Federal roads from the agencies that currently manage the respective Federal lands. Rather, it would involve DOT in coordination with the land managing agency, in the planning studies and program development of public Federal lands highways roads. The DOT would also provide design and construction assistance to the land managing agencies.

This section would also add to title 23, United States Code, a definition of the term Federal Lands Highways, amend the definitions of the terms Indian reservation roads and park roads to include public roads only, and make technical changes to conform affected sections of title 23, United States Code, with the new Federal Lands Highways program.

PROGRAM CONSOLIDATION

Section 115. Subsection (a) of this section repeals the Economic Growth Center Development program, National Scenic and Recreational Highway program, Access Highways to Public Recreation Areas on Certain Lakes program, Highways Crossing Federal Projects program, and the Railroad Highway Crossings Demonstration Project.

Subsection (b) provides that any unobligated balance of contract authority or unexpended balance of sums appropriated prior to enactment of subsection (a) will remain available for these programs under the conditions applicable prior to such enactment. The unappropriated balance of sums authorized prior to enactment of subsection (a) for the National Scenic and Recreational Highway program, Access Highways to Public Recreation Areas on Certain Lakes, and Highways Crossing Other Federal Projects is rescinded.

CARPOOL AND VANPOOL PROJECTS

Section 116. Subsection (a) amends section 120(d) of title 23, United States Code, to allow up to 100 percent Federal share on projects for the acquisition of vehicles for carpooling and vanpooling. The intent is to encourage more ridesharing by making it possible to acquire vehicles when local matching funds are not available.

Subsection (b) authorizes and directs the Secretary of Transportation to expend such sums as are necessary out of Federal Highway Administration administrative funds to carry out the national policy of promoting commuter modes of transportation which conserve energy, reduce pollution, and reduce traffic congestion. This is in lieu of a separate authorization as included in the Surface Transportation Assistance Act of 1978.

PUBLIC TRANSPORTATION

Section 117. This section amends section 142(a)(1), (b), and (f) of title 23, United States Code, by substituting "high occupancy vehicle lanes" for "bus lanes", "high occupancy vehicle passengers" for "bus passengers", and "high occupancy vehicles" for "public mass transportation systems". The overall effect is to expand the scope of the projects eligible for funding under section 142 to include carpool and vanpool vehicles and passengers. Also, it allows such projects to include eligible facilities for carpools and vanpools only, without the presence of buses or rail transit.

FRINGE AND CORRIDOR PARKING

Section 118. This section amends section 137 of title 23, United states Code, by adding a new subsection (f) which allows Interstate 4R funds to be used for projects providing preferential parking for carpools. It incorporates the same restrictions as other fringe parking facilities with respect to being outside the central business district and within an Interstate corridor, and the primary purpose of reducing vehicular traffic on the Interstate highway. Other standard features concerning contracting and fees charged are also included.

EMERGENCY RELIEF

Section 119. Subsection (a) of this section amends subsection (a) of section 125, title 23, United States Code, to make clear that the term "catastrophic failure" means failures which are sudden, unexpected, and result from external forces, natural catastrophes in narrow or limited areas such as localized hurricane force winds, earthquakes, landslides, and the like. "Catastrophic failure", for purposes of this section, does not mean failure which is the result of structural deficiencies or physical deterioration. Bridges which are in imminent danger of collapse as a result of structural deficiencies or physical deterioration may be eligible for Federal funding under section 144 of title 23, United States Code, The Highway Bridge Replacement and Rehabilitation Program. Section 125 is intended to establish a fund which is to be held for sudden and unexpected emergencies and is not intended to be used for maintenance costs or for deficiencies in, or the ordinary deterioration of, a structure. These latter expenses are expected to be met by the State or, to the extent a facility qualifies, with funds available under section 144 of title 23.

Subsection (a) of section 125 is also amended to delete the reference to bridges which have been closed to traffic between December 31, 1967 and December 31, 1970 inasmuch as the Committee understands that these bridges have been repaired or reconstructed and are now reopened to vehicular traffic.

Subsections (a) and (b) of this section further provide that all expenditures for emergency relief under 23 U.S.C. 125, whether past or future, shall come from the Highway Trust Fund and not from the General Fund of the Treasury. Section 125 of title 23, United States Code, now provides that

40 percent of emergency relief expenditures prior to the fiscal year ending September 30, 1978 are authorized from the General Fund of the Treasury.

Subsection (c) authorizes, from the Highway Trust Fund, $100 million per year for emergency relief projects.

Subsection (d) would amend 23 U.S.C. 125(b) to provide that expenditures for projects resulting from a single natural disaster or a single catastrophic failure shall not exceed $30 million in a State.

Subsection (e) would apply the amendment made by subsection (d) to natural disasters or catastrophic failures which the Secretary finds to be eligible for emergency relief subsequent to the enactment of this section.

Subsection (f) would amend 23 United States Code 120(f), which pertains to the Federal share for highway emergency relief projects. Under current law, the Secretary can increase the Federal share to 100 percent. Under this subsection, the Federal share would be limited to 75 percent, except for forest highways, forest development roads and trails, park roads and trails, parkways, public lands highways, public lands development roads and trails and Indian reservation roads, which would still receive 100 percent Federal funding.

Subsection (g) would apply the provisions of 23 United States Code 120(f), as amended by the bill, to all natural disasters or catastrophic failures which the Secretary finds to be eligible for emergency relief subsequent to the enactment of the bill.

Subsection (h) makes technical amendments to reflect the fact that this bill replaces the secondary and urban Federal-aid highway systems.

BICYCLE TRANSPORTATION PROGRAM

Section 120. This section broadens current authority to allow Federal-aid highway funds to participate in a greater variety of projects to encourage bicycle transportation and to provide pedestrian facilities. It would allow States greater flexibility in developing federally assisted bicycle and pedestrian projects by (1) eliminating the requirement that bicycle or pedestrian projects be "on or in conjunction with highway rights-of-way"; (2) eliminating the limitation on the expenditure of Federal-aid highway funds for bicycle or pedestrian projects; and (3) specifically allowing Federal-aid highway funds to participate in nonconstruction projects that are expected to enhance bicycle safety and use. The Federal share for bicycle projects would be increased to 100 percent.

HIGHLAND SCENIC HIGHWAY

Section 121. This section would amend section 161(f) of the Federal-aid Highway Act of 1973, as amended by section 21 of Public Law 96-106, to remove a technical problem presently preventing the State of West Virginia from maintaining the Highland Scenic Highway, located partially within and adjacent to the Monongahela National Forest in the State. It would also allow local light truck traffic and limited commercial truck traffic on a permit basis only.

The Highland Scenic Highway was originally designed and constructed as a multipurpose State highway on the Federal-aid Highway System. As such, it was maintained by the State until the passage of the Federal-aid Highway Act of 1973 which designated it as a scenic highway with portions limited solely to scenic and recreational use and passenger car use. The scenic highway designation precludes community service vehicles such as bread trucks, service trucks and farm trucks from using the highway and use of the road for National Forest management activities requiring use of trucks. This designation thus made the highway a limited service highway which precludes continued maintenance by the State as State law prohibits the expenditure of maintenance funds on limited service highways.

This amendment would correct this anomaly by modifying the vehicle limitation so that the State could maintain the road and, at the same time, protect the important recreational and scenic values of the highway.

ALLOCATION OF URBAN FUNDS

Section 122. Existing law permits transferability between urban and primary system funds. However, it does not permit transfer of funds allocated out of urban system funds attributable to urbanized areas of 200,000 or more populations from the allocations of one urbanized area to that of another urbanized area or to an urban area. This amendment to section 150 of title 23, United States Code, would permit the transfer of such attributable funds to the allocation of another urbanized area in the State or to any other urban area in the State. A transfer, requested by the State, would be subject to the approval of the Secretary and the local officials of the urbanized area from which the funds are to be transferred. The proposed transfer provisions would enhance the capability of the States and local governments by giving them more flexibility in programming projects, setting priorities, and utilizing scarce financing resources.

CERTIFICATION ACCEPTANCE

Section 123. This section amends 23 U.S.C. 117 to provide for: (1) the application of certification acceptance to the physical construction phase of Interstate 4R projects; (2) the elimination of the requirement to make a final inspection on every project under both the certification acceptance and secondary road plan programs; and (3) the extension of coverage under the secondary road plan program to: "projects, as defined by the Secretary and which are not on the Interstate System." These changes in no way would relieve the State highway departments from the requirement of entering into formal project agreements with the Secretary pursuant to section 110 of title 23. Certification acceptance would be available to Interstate restoration projects once they reach the construction phase; thus it would apply only to those work areas such as time extensions, construction contract change orders, assessment of liquidated damages, etc., which take place subsequent to the actual construction project being authorized. The amendments would make both concepts more attractive to the States because of the expanded coverage and the reduction in Federal involvement and redtape.

DEFENSE ACCESS ROADS

Section 124. Section 210(c) of title 23, United States Code, provides for the use, up to $5,000,000, of any funds appropriated under the Act approved October 16, 1951 (65 Stat. 422) for highways in military training and maneuver areas. In 1958, Public Law 85-767 (72 Stat. 885), which revised and codified prior highway legislation as title 23, United States Code, repealed other Acts and portions of Acts. In addition, the second Supplemental Appropriations Act of 1957 (including the Bureau of Public Roads under the Department of Commerce) rescinded, effective June 20, 1957, all unexpended appropriations from prior laws. (Public Law 85-855). Thus, there are no current highway appropriations from which any part of $5,000,000 could be made available for the construction, maintenance, and repair of maneuver areas.

In 1955, the Office of Management and Budget directed the Department of Defense to budget for defense access roads. Since 1957, each military department has budgeted separately for defense access roads. By direction of the Assistant Secretary of Defense (Comptroller), maintenance and repair or public highways used for maneuvers will be accomplished from funds made available by the appropriate military department; but in order to insure prompt repairs, military regulations provide that the Commander, Military Traffic Management Command, may authorize the Federal Highway Administration to temporarily use available access road funds, pending payment by the military department concerned from its operation and maintenance funds. Since funds for the repair of maneuver road damage are not available from highway appropriations acts, but are available from defense appropriations acts, the opening clause is misleading and should be amended to reflect current law and practice.

This amendment to section 210(c) of title 23, United States Code, has been coordinated with the Military Traffic Management Command.

MAINTENANCE

Section 125. Subsection 116(b) of title 23, United States Code, requires maintenance agreements between a State without authority to maintain a project constructed "on the Federal-aid secondary system, or within a municipality," and the appropriate county or municipal officials. This section would amend subsection (b) to require maintenance agreements when a State does not have authority to maintain any project.

This section would amend subsection 116(c) of title 23, United States Code, to permit the Secretary to withhold project approval for projects in specific areas on one or more of the Federal-aid Systems or programs within a State, or for the entire State, where the Secretary finds that a project is not being properly maintained. Under present law, the Secretary must withhold project approval for the entire State for all projects when a single project is not being properly maintained. Present law does not represent a practical enforcement sanction. Stopping all project approvals in an entire State could involve massive disruption of planning and considerable economic waste. The amendment provides a practical enforcement sanction which should be an effective tool in enforcing maintenance.

Subsections (b), (c), (d), (e), (f), and (g) transfer maintenance provisions from 23 U.S.C. 109 to 23 U.S.C. 116.

CONSTRUCTION

Section 126. Title 23, United States Code, now requires that the Secretary inspect each highway construction project. This amendment would remove that requirement. The Secretary would establish procedures for inspecting and approving construction but would not have to inspect each project.

RESEARCH AND PLANNING

Section 127. This section would amend 23 U.S.C. 307 to confirm the legal basis for pooling 1½ percent highway planning and research (HPR) funds into a single fund and to establish a uniform period of availability, and a standard Federal matching share.

NONDISCRIMINATION

Section 128. This section amends section 140 of title 23, United States Code, to assure that equal employment opportunity must be provided without regard to sex; to authorize the Secretary of Transportation to conduct and finance minority business enterprise training programs and assistance programs; and to authorize the use of $10 million per fiscal year from the sums apportioned under 23 U.S.C. 104(b) to conduct and finance minority business enterprise training programs and assistance programs.

INTERAGENCY AGREEMENTS

Section 129. This section adds a new section to title 23, United States Code, under which the Secretary of Transportation would be required to enter into memoranda of understanding with other Federal agencies to coordinate the various environmental compliance reviews that apply to Federal and Federal-aid highway projects. The purpose of such memoranda is to minimize, to the maximum extent practicable, duplication, needless paperwork, and delays in approval of projects under title 23, United States Code. This section is intended to reinforce the national policy on minimization of redtape set forth in section 101(e) of title 23, United States Code, by consolidating environmental compliance procedures in a single project development process to be coordinated by the Department of Transportation under the umbrella of the National Environmental Policy Act of 1969, as amended, and by providing for the rapid resolution of Federal interagency disagreements concerning the economic, social, and environmental effects of actions proposed for funding under title 23, United States Code.

OBLIGATION LIMITATION AND ALLOCATION FORMULA

Section 130. This section establishes an obligation limitation of $12 billion for fiscal year 1983, $12.8 billion for fiscal year 1984, $13.6 billion for fiscal year 1985, $14.5 billion for fiscal year 1986, and $14.9 billion for fiscal year 1987, excluding emergency relief projects, rehabilitation of a Federally-owned bridge, a highway construction project at Union Station. The obligational authority each year would be allocated to the States in the same ratio in which sums to be appropriated to the States for Federal-aid highways and highway safety construction are apportioned or allocated. Collectively, the States can obligate no more than 25 percent during the first quarter of fiscal year 1983.

CERTIFICATION OF STATE PROCEDURES

Section 131. This section authorizes the Secretary of Transportation to carry out a project, in cooperation with the State of Vermont, which will demonstrate the feasibility of extending the coverage of State certifications under section 117(a) of title 23, United States Code. The purpose of the demonstration project is to determine to what extent States are able to carry out the requirements of Federal law, both title 23 and non-title 23 requirements, and to determine what kinds of problems may be encountered under such procedures. The project shall also document those areas where savings can be made in time and paperwork without adverse impacts on public participation or the environment.

ALASKA HIGHWAY

Section 132. This section amends section 218(a) of title 23, United States Code, to allow the State of Alaska to use its apportioned Federal-aid highway funds on the continued construction of the portions of the Alaska highway located in Canada.

Since Congress authorized the construction of the Alaska highway in the Federal-aid Highway Act of 1973 (Pub. L. 93-87), appropriated funds have been obligated for the project and work is now completed or underway. However, no funds were appropriated in the 1979-1982 United States budget.

The current provisions of title 23, United States Code, do not permit a State to expend its Federal-aid funds in a foreign country. This section would permit Alaska to use its Federal-aid highway funds for the construction of the Alaska highway in Canada, as provided in section 218.

TERRITORIAL HIGHWAY PROGRAM

Section 133. Subsection (a) of this program repeals section 215 (Territorial Highway Program) of title 23, United States Code.

Subsection (b)(1) of this section provides that outstanding funds authorized or appropriated for carrying out repealed section 215 shall remain available for obligation under the conditions applicable prior to such repeal.

ACCELERATION OF BRIDGE PROJECTS

Section 134. This section repeals the acceleration of bridge project programs which provides special funding for the U.S. Grant Bridge in Kentucky and the East Huntington Bridge in West Virginia. Funds authorized for this program would remain available for obligation for two years under the same conditions which existed prior to the repeal of this section.

LAKE ROAD EROSION DEMONSTRATION

Section 135. This section authorizes the Secretary of Transportation in cooperation with the State of North Dakota to carry out projects in and around Devils Lake, North Dakota which demonstrate the use of construction techniques which will prevent wave erosion on roadways which cross closed basin lakes at grade level. Because of the emergency nature of this work the State of North Dakota has already begun work on some roads, the Secretary is authorized to reimburse for such work and to participate in future project activities.

The purpose of the demonstration project is to examine alternative construction methods which can be used in the unique situatioh of Devils Lake. The project shall also demonstrate where savings can be made by using the best possible construction techniques to prevent erosion over the longest period of time possible.

TRUCK SAFETY DEMONSTRATION

Section 136. This section authorizes the Secretary of Transportation to carry out a project in cooperation with the State of Idaho to determine what factors contribute to a high incidence of truck accidents. The factors examined should include weather conditions, sight distance, road curvature, roadway width, and gradient. A further purpose of the demonstration project is to analyze the benefit-cost ratio of certain safety improvements implemented to correct hazards contributing to truok accidents.

Mr. SYMMS. Mr. President, I am pleased to join with the distinguished chairman of the Senate Environment and Public Works Committee (Mr. STAFFORD) and my distinguished colleagues Senators ABDNOR, GORTON, HEINZ, and RANDOLPH in introducing the Federal-Aid Highway Improvement Act of 1982.

Mr. President, this legislation is the culmination of a long series of hearings the Subcommittee on Transportation has held in Washington and throughout the country on the condition of the highway system and the revenues needed to restore the integrity of that system. This bill will provide the necessary funds to repair America's decaying infrastructure and it will provide jobs for an important sector of our economy—the construction industry which is currently experiencing an unemployment rate of 23 percent.

Multiyear legislation is absolutely necessary for the long-term planning so critical for large capital construction projects. The Senate has attempted to provide the States with a long-term program for the past 2 years. I believe we now have the opportunity to provide the stability so crucial for this program.

Mr. President, this past Tuesday, November 23, President Reagan gave his approval to a plan outlined by Secretary of Transportation Drew Lewis to increase the highway user fees by an equivalent 5 cents. I am gratified that the President has recognized the importance of the Nation's highway system and the need for rehabilitating that system so that the mobility, productivity, and safety provided by the country's highway system can be preserved and enhanced.

I believe there is a broad base of support across this country for repairing the highways and bridges in this country. The user fee concept has worked very well with regard to the highway program. It has provided a stable source of funding and those who use the highways have paid the construction costs. Furthermore, this program has operated on a pay-as-you-go basis.

There has been some discussion to end the highway trust fund and to fund the highway program out of general revenue. This would be a great mistake.

Financing this program out of general revenues would not only greatly distort the fair and equitable manner by which this program is funded, but I am convinced that it would greatly distort the program itself because the revenues collected for our Nation's highway system could then easily be used for nonproductive uses such as financing the uncontrollable costs of entitlement programs.

If anything, we should be moving in a direction to take this trust fund out of the unified budget and establish trust funds for other infrastructural programs upon which our Nation's economy depends. By separating these infrastructural programs from the remainder of the budget, I believe that the Congress and the public would then be able to focus their attention

more readily to the program areas of our budget.

The 4-cent Federal gas tax has not been increased since 1959. The other excise taxes have not been increased since 1961. There has been a tremendous amount of support for some form of highway user fees from individual citizens and organizations concerned with transportation including the American Association of State Highway and Transportation Officials, the Transportation Association of America, the Associated General Contractors, the American Road and Transportation Builders Association, the National Conference of State Legislators, the Motor Vehicle Manufacturers Association, the Private Truck Council of America, the American Automobile Association, the American Farm Bureau Federation, to name just a few.

These people recognize what the subcommittee's hearings during this Congress have shown: The Nation's highway system is in immediate need of extensive repair or the capital investment made by Federal, State, and local governments will be lost and the replacement costs will be beyond our financial capabilities.

Some of these groups have raised concerns about Secretary Lewis' user fee increase proposal which I share.

First, the proposal would provide $1 billion per year for transit capital improvements. Highway user fees are collected from those using the highway, and these funds should be used for highway purposes. I will oppose any diversion of these highway user fees for other purposes.

Second, it is important that each user class pay its fair share of costs. The Department of Transportation recently completed the Federal highway cost allocation study. The study provides a basis for determining the cost responsibility of each user class.

Our first and most pressing problem is to adequately fund our highways. This may be corrected by realistic adjustments in highway user fees based on the knowledge we now have.

Once this is done and the highway infrastructure is being protected through repairs and reconstruction, we may turn to other pressing needs such as allowing for the most efficient use of our highways by those who travel them.

As I have previously mentioned, one of the most important uses of our roads and highways is the movement of interstate commerce. National highway policy must provide for the efficient and economic carriage of goods. Federal and State laws in this area offer a conflicting, counterproductive maze of rules and regulations. For the efficient interstate carriage of goods these conflicts must end and regulations which encourage the most productive transportation economies must be brought into being.

Ninety percent of our Nation's goods and services travel by road at one time or another. The vast bulk of this commerce is carried by trucks traveling interstate and intrastate. We must provide an efficient, fair and economic framework for their carrying of goods. Toward this end I have sponsored legislation introduced by Senator PACKWOOD which would mandate a 102-inch width standard, mandate a minimum 80,000 pound gross weight, provide a minimum Federal length standard of 48 feet on single trailer and 28 feet on double combinations, and a Western permit program.

Mr. President, hearings held by the Transportation Subcommittee documented this country's highway needs: First, over $38 billion is needed to complete the Interstate System; second, $20 billion is needed to repair worn out Interstate mileage; third, 4 out of 10 of the Nation's bridges need major repair at a cost of $47 billion; and fourth, the primary, secondary and urban system roads will need major rehabilitation during the next 10 years. The bill we are introducing today will increase the spending levels for the Federal-aid highway program for fiscal year 1983 from $8 billion to $12 billion. It will provide new authorizations in increasing amounts to a level of $15 billion in fiscal year 1987 for a total 5-year program of over $67 billion.

While this legislation's primary purpose is to address the long-term integrity of this country's transportation network, it will have the additional benefit of creating jobs. While I do not want to label this package as a "jobs bill," private sector jobs will result from its implementation. In 1976, the Bureau of Labor Statistics estimated that each $1 billion of contract cost generated 43,000 full-time jobs, 20,000 within the construction industry and 23,000 in other industry. Excluded from other industries are estimates of the employment generated by spending of construction workers' wages and salaries and contractors' profits. Money spent for federally aided highways generated a total of 354,000 jobs in 1976, 163,000 in construction, and 191,000 in other industries.

Today, the Bureau of Labor Statistics estimates that this package will generate an additional 325,000 jobs in the construction industry and directly related industries.

After reviewing the data, I do not believe that jobs will be lost in the energy industry as a result of a nominal increase in the cost of gasoline to the consumer at the pump.

Gasoline prices have declined this past year, and cars have generally continued to become more fuel efficient. The result has been a slow decrease in cost of motor fuel to the consumer. A nominal increase in the cost of gasoline to the consumer at the pump will not induce the consumer to decrease his consumption by traveling fewer miles. In fact, the consumer might actually realize savings in fewer road repairs because dilapidated roads are costing the average driver $200 more a year in wasted gas and extra repairs.

It is true that as a result of the new cost allocation method that is included in the gas portion of the package, truckers' operating costs will be directly increased. However, while this package implements a new cost allocation method which will more fairly distribute the costs of building and maintaining our highway system to those who use the system, the package also includes measures which will increase the truckers' shipping capacity, thereby greatly increasing the cost-effectiveness of these transporters.

Furthermore, the trucking industry's road repair costs represent a significant portion of today's shipping prices. Well-maintained roads will lead to greater operating efficiency and will eventually be reflected in a fair price for shipping goods. Jobs will not be reduced in this sector of the economy. Increased efficiency will be achieved, which will lead to a more cost-effective and productive transport system.

I have indicated the broad support among highway users for an increase in tax rates. For example, in a recent white paper the Department of Defense stated:

> Highways are essential to national defense. The United States depends not only on military strength, but economic and industrial strength to insure peace. The "backbone" of our economy is the transportation system. Highways are the transportation common denominator providing intermodal connections and an extensive collection and distribution network serving every community and home in the Nation. Highways are also the first link in the transportation chain used to deploy U.S. forces to world trouble spots. The current highway maintenance and funding problems are serious, and if left unresolved, would result in significant economic and defense impact.

Transportation Secretary Lewis in a speech last week said:

> We are reaching the point where we can no longer defer action in meeting any of these needs. The state of our transportation system affects our commerce. It affects our economy. And it affects our future. An increase in the highway user fee is an investment that must be made, and one that will benefit every motorist, every trucker, every shipper and every community.

Lewis went on to say:

> We have talked for years about the costs of our transportation system, but we talk too little about its benefits. What value do we put on our mobility? How much is it worth to us to have safe, well-maintained highways? What price do we put on bridges that are strong enough and safe enough to carry a busload of school children?

The president of the American Association of State Highway and Trans-

portation Officials testified this past August on:

The very real concerns of worried public officials in our departments of highways and transportation, who generally have long since taken all the fat and some of the muscle out of their estimates of highway needs and are still faced with large funding shortages.

In a cover story this summer, Newsweek described a road collapse in my home State of Idaho:

. . . State Highway 55 has collapsed completely near Horseshoe Bend, some 20 miles north of Boise. Ripped away as if by an earthquake, the asphalt is piled up along the mountainside, and highway crews recently slowed drivers to 3 mph over a makeshift track of raw rocks. . . . The state will spend $150,000 this summer for a quick fix of the Horseshoe Bend collapse—and next year the road may well collapse again.

The Newsweek article went on to discuss the very real human toll caused by the infrastructure crisis, noting that:

Spending an extra $4.3 billion to fix dilapidated bridges and roads could save 480,000 injuries and 17,200 lives over fifteen years.

Recently the Wall Street Journal reported on unsafe bridges:

There are thousands of deteriorating bridges that are causing nightmares for schoolchildren as the new school year begins. A check with highway officials across the nation indicates that 5,000 to 10,000 children in the U.S. . . . are walking across bridges deemed unsafe for loaded school buses. Another 500,000 or so children are being rerouted around closed or unsafe structures—sometimes adding as much as two hours to the trip.

Additional media coverage has been provided by Time, U.S. News, Nation's Business, the National Journal, the New York Times, the Washington Post, NBC, ABC, and CBS. The condition of our highway system has become one of the most important stories of the day. The needs have been documented, the record compiled; it is now time for legislative action.

The Federal-Aid Highway Improvement Act of 1982 authorizes the highway program from fiscal 1983 through fiscal 1986. In addition to emphasizing maintenance of prior year capital investments, the bill seeks to delineate areas of Federal interest and responsibility; enhance State flexibility in the use of highway dollars; direct Federal dollars to projects with the greatest need; and remove unnecessary and burdensome Federal requirements.

Authorizations for the interstate 4R program would increase by 400 percent between fiscal 1982 and fiscal 1986. This increase reflects the responsibility of the Federal Government for the Interstate System, much of which is reaching its design life.

This legislation would also consolidate many of the small highway safety programs into a single highway improvement safety program. States will have greater flexibility in setting their priorities and the several reports presently required for each program would be condensed into one.

State flexibility in the selection of projects would be enhanced by eliminating the systems designation for both the secondary and urban programs. Project eligibility under each program would be expanded to all public roads within areas meeting the definition of rural or urban. The States would be allowed to transfer up to 100 percent of their apportionments between primary and urban programs and between primary and secondary programs. These provisions maximize State and local decisionmaking authority over the repair of those roads which directly affect State and local economic development.

Mr. President, because the total dollars available for our Nation's highways and roads are limited, it is imperative that funds are allocated based on the best available needs data. Last year the interstate 4R formula was changed from 75 percent lane miles/25 percent vehicle miles traveled to a 55-percent/45-percent ratio. The bill I introduced last year, S. 1024, proposed a 60-percent/40-percent ratio. At hearings held by the Subcommittee on Transportation, witnesses from the Department of Transportation and State and local officials testified that other factors affected the deterioration of the interstate highways. The legislation I am introducing today again proposes an interstate 4R apportionment formula with a 60-to-40 ratio with the additional requirement that the Department of Transportation do a study to determine if other factors affecting deterioration can or should be included in the formula.

The substantial Federal commitment to the bridge program will continue in this legislation. The bridge apportionment formula is changed to include cost data on deficient off-system bridges as well as on-system bridges since such bridges constitute over half of the Nation's deficient bridges. However, those bridges on the Federal-aid system and on major arterials and collectors will be weighted to reflect the more obvious Federal responsibility for their condition.

Specific criteria are provided for selecting descretionary bridge projects of the greatest need. These criteria are based on factors including the bridge's sufficiency rating, average daily traffic, average daily truck traffic, and defense highway system status. These criteria are intended to direct very limited funds to projects which are in the greatest need of repair and most critical to the economic well-being of the country.

Finally, this legislation will reduce unacceptable delays and unnecessary project costs, which result from duplicative Federal requirements and redtape.

Mr. President, with the increased user fees, these proposed changes in this legislation would do much to improve the efficiency and effectiveness of the highway program. I look forward to working with the chairman of the Environment and Public Works Committee (Mr. STAFFORD), and other members of the committee on both sides of the aisle to implement these program changes in an expeditious manner.

The United States has no choice but to make the commitment to rebuild our crumbling economic foundations—and then insure that our infrastructure is maintained as a major policy concern.

By Mr. BAKER (for himself, Mr. DOLE, Mr. STAFFORD, Mr. GARN, Mr. PACKWOOD, Mr. DOMENICI, and Mr. HATFIELD):

S. 3044. A bill entitled the "Surface Transportation Act of 1982"; to the Committee on Finance.

SURFACE TRANSPORTATION ACT OF 1982

Mr. BAKER. Mr. President, over the last few weeks, I have been working with a number of our Senate committee chairmen and the administration on legislation concerning improvement of the Nation's surface transportation system. I am today introducing a bill, the Surface Transportation Act of 1982, the provisions of which closely parallel some of the ideas discussed in these sessions. It is my hope that this or similar legislation will be useful as a vehicle for consideration of this most important issue in the next few weeks of the post-election session.

I have been joined in today's introduction by the chairman of those committees with jurisdiction over these matters and they have assured me they will expedite consideration of this subject matter in their committees.

Mr. President, I ask unanimous consent that the text to the bill and a section-by-section analysis be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 3044

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—HIGHWAY REVENUE ACT OF 1982

SHORT TITLE

SEC. 101. This title may be cited as the "Highway Revenue Act of 1982".

EXTENSION OF HIGHWAY TRUST FUND

SEC. 102. (a) HIGHWAY TRUST FUND.—Subsections (c) and (f) (3), (4), (6), and (7), of section 209 of the Highway Revenue Act of 1956 (relating to the Highway Trust Fund; 23 U.S.C. 120 note) are amended as follows:

(1) by striking "October 1, 1984" each place it appears and inserting in lieu thereof "April 1, 1990", and

(2) by striking "September 30, 1984", each place it appears and inserting in lieu thereof "March 31, 1990", and

(3) by striking "July 1, 1985" each place it appears and inserting in lieu thereof "January 1, 1991".

(b)(1) MANAGEMENT OF TRUST FUND.—Subsection (e)(1) of section 209 of the Highway Revenue Act of 1956 is amended by striking "Commerce" and inserting in lieu thereof "Transportation", and by striking "up to and including the fiscal year ending September 30, 1985".

(2) EXPENDITURES FROM TRUST FUND.—Subsection (f)(1) of section 209 of the Highway Revenue Act of 1956 is amended as follows:

"(1) FEDERAL-AID HIGHWAY PROGRAM.—Amounts in the Trust Fund shall be available, as provided by appropriation acts, for making expenditures before October 1, 1991, to meet those obligations of the United States, heretofore or hereafter incurred which are authorized by law or which are attributable to Federal-aid highways (including those portions of general administrative expenses of the Federal Highway Administration payable from such appropriations)."

(c) INVESTIGATION AND REPORT TO CONGRESS.—Section 210 of the Highway Revenue Act of 1956 is repealed.

(d) CONFORMING AMENDMENTS TO LAND AND WATER CONSERVATION FUND.—Subsection (b) of section 201 of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4061-11) is amended as follows:

(1) by striking "October 1, 1984" and inserting in lieu thereof "April 1, 1990"; and

(2) by striking "July 1, 1985" each place it appears and inserting in lieu thereof "January 1, 1991".

THE TRANSIT ACCOUNT

SEC. 103. Section 209 of the Highway Revenue Act of 1956 is amended by adding subsection (h) as follows:

"(h) TRANSIT ACCOUNT.—

"(1) IN GENERAL.—There is established on the books of the Treasury of the United States a Transit Account within the Highway Trust Fund. The Transit Account shall consist of such amounts as are received in the Highway Trust Fund which are attributable to liability for tax incurred after March 31, 1983, from 1 cent per gallon of the diesel fuel, special motor fuels, and gasoline user fees under section 4041 (a) and (b) and section 4081 of the Internal Revenue Code of 1954.

"(2) RESTRICTIONS ON USE OF THE TRANSIT ACCOUNT.—Amounts in the Transit Account must be expended according to the provisions of section 22 of the Urban Mass Transportation Act of 1964, as amended, as provided by appropriation acts.

"(3) DUTIES OF THE SECRETARY OF THE TREASURY WITH RESPECT TO THE TRANSIT ACCOUNT.—It shall be the duty of the Secretary of the Treasury to manage the Transit Account and to make an annual report to the Congress as provided in subsection (e) of this section. The interest on, and the proceeds from the sale or redemption of any obligation held in the Transit Account shall be credited to and form a part of the Transit Account.

"(4) REPAYABLE ADVANCES.—There are hereby authorized to be appropriated to the Transit Account, as repayable advances, such additional sums as may be required to make the expenditures referred to in paragraph (2) of this section. Advances made pursuant to this paragraph shall be repaid and interest on such advances shall be paid to the general fund of the Treasury when the Secretary of the Treasury determines that moneys are available in the Transit Account for such purposes. Such interest shall be at rates computed in the same manner as provided in subsection (e)(2) of this section for special obligations and shall be compounded annually."

EXTENSION OF THE USER FEES WHICH ARE TRANSFERRED INTO THE HIGHWAY TRUST FUND

SEC. 104. (a) GENERAL RULE.—The following provisions of the Internal Revenue Code of 1954 are amended by striking "October 1, 1984" each place it appears and inserting in lieu thereof "April 1, 1980":

(1) Section 4041 (e) (relating to rate reduction).

(2) Section 4061 (a)(1) (relating to imposition of tax on trucks, buses, etc.).

(3) Section 4061 (b)(1) (relating to imposition of tax on parts and accessories).

(4) Section 4071 (d) (relating to imposition of tax on tires and tread rubber).

(5) Section 4081 (b) (relating to imposition of tax on gasoline).

(6) Section 4481 (e) (relating to period tax in effect).

(7) Section 4482 (c)(4) (defining taxable period).

(8) Section 6421(h) (relating to tax on gasoline used for certain nonhighway purposes or by local transit systems).

(b) AMENDMENT OF SECTION 6412(a)(1).—Section 6412(a)(1) of the Internal Revenue Code of 1954 (relating to floor stocks refunds) is amended:

(1) by striking "October 1, 1984" each place it appears and inserting in lieu thereof "April 1, 1990";

(2) by striking "January 1, 1985" each place it appears and inserting in lieu thereof "July 1, 1990"; and

(3) by striking "March 31, 1985" each place it appears and inserting in lieu thereof "September 30, 1990".

MOTOR FUEL TAX RATES

SEC. 105. (a) DIESEL FUEL.—Subsection (a) of section 4041 of the Internal Revenue Code of 1954 (relating to taxes on diesel fuel) is amended as follows:

(1) by striking "4 cents a gallon" and inserting in lieu thereof "9 cents a gallon".

(2) by striking the second and third sentences and inserting in lieu thereof the following:

"There shall be no tax under paragraph (1) or paragraph (2) of this subsection on liquid sold for use or used in a qualified business use. If a liquid on which no tax was imposed by reason of the preceding sentence is used otherwise than in a qualified business use, a tax of 9 cents a gallon shall be imposed under paragraph (2). For purposes of this subsection, the term 'qualified business use' has the meaning given to such term by section 6421(d)(2).".

(b) SPECIAL MOTOR FUELS.—Subsection (b) of section 4041 of the Internal Revenue Code of 1954 (relating to taxes on special motor fuels) is amended as follows:

(1) by striking "4 cents a gallon" and inserting in lieu thereof "9 cents a gallon".

(2) by striking the second and third sentences and inserting in lieu thereof the following:

"There shall be no tax under paragraph (1) or paragraph (2) of this subsection on liquid solid for use or used in a qualified business use. If a liquid on which no tax was imposed by reason of the preceding sentence is used otherwise than in a qualified business use, a tax of 9 cents a gallon shall be imposed under paragraph (2)."

(c) RATE REDUCTION.—Paragraph (2) of subsection (e) of section 4041 of the Internal Revenue Code of 1954 (relating to rate reduction) is repealed.

(d) GASOLINE.—Subsection (a) of section 4081 of the Internal Revenue Code of 1954 (relating to tax on gasoline) is amended by striking "4 cents a gallon" and inserting in lieu thereof "9 cents a gallon".

(e) INTERCITY, LOCAL, OR SCHOOL BUSES.—

(1) Subsection (b)(1) of section 6421 of the Internal Revenue Code of 1954 is amended by striking "the rate at which tax was imposed on such gasoline by section 4081", and substituting "the rate of 4 cents a gallon".

(2) Subsection (b)(1) of section 6427 of the Internal Revenue Code of 1954 is amended by striking "the rate at which tax was imposed on such fuel by subsection (a) or (b) of section 4041", and substituting therefor "the rate of 4 cents a gallon".

(f) USE IN CERTAIN TAXICABS.—Paragraph (1) of subsection (e) of section 6427 of the Internal Revenue Code of 1954 is amended by striking "an amount equal to the aggregate amount of the tax imposed on" and substituting "4 cents a gallon for each gallon of such."

(g) EFFECTIVE DATE.—The amendments made by this section shall apply to any diesel fuel, special motor fuels, or gasoline sold or used on or after April 1, 1983.

INCREASE IN MANUFACTURERS' EXCISE TAX AND THRESHOLD WEIGHT

SEC. 106. (a) TRUCKS, BUSES, TRACTORS, ETC.—Subsections (a)(1) and (a)(2) of section 4061 of the Internal Revenue Code of 1954 (relating to taxes on trucks, buses, tractors, etc.) are amended by striking "10" and inserting in lieu thereof "12" and by striking "10,000" each place it appears and inserting in lieu thereof "33,000".

(b) PARTS AND ACCESSORIES.—Subsections (b)(1) and (b)(2) of section 4061 of the Internal Revenue Code of 1954 (relating to tax on parts and accessories for trucks, buses, tractors, etc.) are amended by striking "8" and inserting in lieu thereof "12", and by adding the following sentence at the end of subsection (b)(2):

"The tax imposed by paragraph (1) shall not apply to any part of accessory which is suitable for use (and ordinarily used on) or in connection with a vehicle having a gross vehicle weight of 33,000 pounds or less (as determined under regulations prescribed by the Secretary).".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to any trucks, buses, tractors, etc., and to any parts and accessories sold on or after April 1, 1983.

REPEAL OF TAX ON TUBES AND AMENDMENT OF TAX ON TIRES AND TREAD RUBBER

SEC. 107. (a) TIRES, TREAD RUBBER, ETC.—Subsection (a) of section 4071 of the Internal Revenue Code of 1954 is amended as follows:

(1) Amending paragraph (1) to read "Tires of the type used on highway vehicles, 25 cents a pound.".

(2) Repealing paragraph (3).

(3) Redesignating paragraph (4) as paragraph (3) and redesignating paragraph (5) as paragraph (4) and amending new paragraph (3) to read, "Tread rubber 25 cents a pound."

(b) EXEMPTIONS.—A new subsection (d) of section 4073 (relating to exemptions) is added as follows:

"(d) TIRES THAT WEIGH 100 POUNDS OR LESS.—The tax imposed by section 4071 shall

not apply to tires weighing 100 pounds or less.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to sales on or after April 1, 1983.

REPEAL OF TAX ON LUBRICATING OIL

SEC. 108. (a) LUBRICATING OIL.—Sections 4091, 4092, 4093, and 4094 of the Internal Revenue Code of 1954 (relating to tax on lubricating oil and to lubricating oil used for certain nontaxable purposes) are repealed.

(b) EFFECTIVE DATE.—Subsection (a) shall be effective for sales on or after April 1, 1983.

HEAVY VEHICLE USE TAX

SEC. 109. (a) Subsection (a) of section 4481 of the Internal Revenue Code of 1954 is amended to read as follows:

"(a)(1) IMPOSITION OF TAX.—A tax is hereby imposed on the use of any highway motor vehicles which (together with the semitrailers and trailers which the vehicle is equipped to tow) has a taxable gross weight of more than 54,999 pounds at the rate specified in the following schedule:

Taxable gross weight	Rate of tax
55,000 pounds to 69,999 pounds.	$100 a year plus $6 per 100 pounds or fraction thereof in excess of 55,000 pounds.
70,000 pounds to 79,999 pounds.	$1,000 a year plus $17 per 100 pounds or fraction thereof in excess of 70,000 pounds.
80,000 or more pounds.	$2,700 a year.

"(2) EXEMPTION IN CERTAIN CASES.—If in any taxable period a vehicle subject to this tax is expected to be used for less than 2,500 miles on Federal-aid highways, then the person described in subsection (b) shall, pursuant to such procedures and by providing such information as the Secretary may by forms or regulations prescribe, be granted an exemption of such vehicle from the tax imposed by this section. Such exemption must be obtained for each taxable period.".

(b) Subsection (b) of section 4482 of the Internal Revenue Code of 1954 is amended as follows:

"(b) TAXABLE GROSS WEIGHT.—For purposes of this subchapter, the term 'taxable gross weight' when used with respect to any highway motor vehicle, means—

"(1) the highest gross vehicle weight declared for purposes of registering the vehicle in any State in which the vehicle is registered or is required to be registered, as defined under regulations prescribed by the Secretary, or

"(2) if the vehicle is not operated in any State which requires a declaration of gross vehicle weight, the sum of—

"(A) the actual unloaded weight of—

"(i) such highway motor vehicle fully equipped for service, and

"(ii) the semitrailers and trailers (fully equipped for service) customarily used in connection with highway motor vehicles of the same type as such highway motor vehicle, and

"(B) the weight of the maximum load customarily carried on highway motor vehicles of the same type as such highway motor vehicle and on the semitrailers and trailers referred to in subparagraph (A)(ii).".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to the use of any vehicle on or after July 1, 1983.

GASOLINE USED FOR NONHIGHWAY USES

SEC. 110. (a) NONHIGHWAY USES.—Subsection (a) of section 6421 of the Internal Revenue Code of 1954 (relating to nonhighway uses of gasoline) is amended by striking the first sentence and inserting in lieu thereof:

"Except as provided in subsection (i), if gasoline is used in a qualified business use, the Secretary shall pay (without interest) to the ultimate purchaser of such gasoline an amount equal to 4 cents for each gallon of gasoline so used on which tax was paid at the rate of 4 cents a gallon, and 5 cents for each gallon of gasoline so used on which tax was paid at the rate of 5 cents, and 9 cents for each gallon of gasoline so used on which tax was paid at the rate of 9 cents a gallon."

(b) EFFECTIVE DATE.—The amendments made by this section shall be effective April 1, 1983.

FLOOR STOCKS TAXES AND REFUNDS

SEC. 111. (a) 1983 TAX ON GASOLINE.—On gasoline subject to tax under section 4081 which, on April 1, 1983, is held by a dealer for sale, there is hereby imposed a floor stocks tax at the rate of 5 cents a gallon.

(b) 1983 TAX ON TRUCKS, BUSES, TRACTORS, ETC.—

(1) On any article which would be subject to tax under subsection (a) of section 4061 of the Internal Revenue Code of 1954 if sold by the manufacturer, producer, or importer on or after April 1, 1983, which on April 1, 1983, is held by a dealer and has not been used and is intended for sale, there shall be imposed on the sale thereof a tax of 2 percent of the price for which sold.

(2) On any article which would be subject to tax under subsection (b) of section 4061 or under section 4071 (a)(1) or (4) of the Internal Revenue Code of 1954 if sold by the manufacturer, producer or importer on or after April 1, 1983, which on April 1, 1983, is held by a dealer and has not been used and is intended for sale, there shall be imposed on the sale thereof a tax of—

(A) (in the case of an article taxable under section 4061(b)) 4 percent of the price for which sold,

(B) (in the case of an article taxable under section 4071 (a)(1)) 15.25 cents a pound, and

(C) (in the case of an article taxable under section 4071 (a)(3)) 20 cents a pound.

(3) COMPUTATION OF TAX.—If the dealer referred to in subsection (1) incurs liability for tax under this section on his sale or use of an article referred to in subsection (1), the article shall be treated as having been sold by him—

(A) at the price for which the article was sold by him (or, where the tax is on his use of the article, at the price referred to in section 4218(e)) of the Internal Revenue Code of 1954; or

(B) if he so elects and establishes such price to the satisfaction of the Secretary;

(i) at the price for which the article was sold to him; or

(ii) at the price for which the article was sold by the person who is the manufacturer, producer, or importer of such article. For purposes of this subsection, the price for which the article was sold shall be determined as provided in section 4216 of the Internal Revenue Code of 1954. For purposes of subparagraph (B) no adjustment of readjustment shall be made in such price by reason of any discount, rebate, allowance, return or repossession of a container or covering, or otherwise. An election under subparagraph (B) shall be made in the return reporting the tax applicable to the sale or use of the article, and may not be revoked.

(c) FLOOR STOCKS REFUNDS.—

(1) IN GENERAL.—Where, before April 1, 1983, any tax-repealed article (as defined in subsection (e)) has been sold by the manufacturer, producer, or importer and on such day is held by a dealer and has been used and is intended for sale, there shall be credited or refunded (without interest) to the manufacturer, producer, or importer an amount equal to the tax paid by such manufacturer, producer, or importer on his sale of the article, if—

(A) claim for such credit or refund is filed with the Secretary of the Treasury or his delegate before February 1, 1984, based upon a request submitted to the manufacturer, producer, or importer before October 1, 1983, by the dealer who held the article in respect of which the credit or refund is claimed; and

(B) on or before February 1, 1984, reimbursement has been made to the dealer by the manufacturer, producer, or importer in an amount equal to the tax paid on the article if written consent has been obtained from the dealer to allowance of the credit or refund.

(2) LIMITATION ON ELIGIBILITY FOR CREDIT OR REFUND.—No manufacturer, producer, or importer shall be entitled to credit or refund under paragraph (1) unless he has in his possession such evidence of the inventories with respect to which the credit or refund is claimed as may be required by regulations prescribed by the Secretary of the Treasury or his delegate under this subsection.

(3) OTHER LAWS APPLICABLE.—All provisions of law, including penalties, applicable with respect to the taxes imposed by section 4061(a) of the Internal Revenue Code of 1954 shall, insofar as applicable and not inconsistent with paragraphs (1) and (2) of this subsection, apply in respect of the credits and refunds provided for in paragraph (1) to the same extent as if the credits or refunds constituted overpayments of the tax.

(d) REFUNDS WITH RESPECT TO CERTAIN CONSUMER PURCHASES.—

(1) IN GENERAL.—Except as otherwise provided in paragraph (2), where after November 28, 1982, with respect to any article which was subject to the tax imposed by section 4061(a) of the Internal Revenue Code of 1954 (as in effect on March 31, 1983, and on or before April 1, 1983, a tax repealed article (as defined in subsection (e) which but for the amendment made by section 307 (a) of this Act would be subject to tax under section 4061(a) of the Internal Revenue Code of 1954) has been sold to an ultimate purchaser, there shall be credited or refunded (without interest) to the manufacturer, producer, or importer of such article an amount equal to the tax paid by such manufacturer, producer, or importer on his sale of the article.

(2) LIMITATION OF ELIGIBILITY FOR CREDIT OR REFUND.—No manufacturer, producer, or importer shall be entitled to a credit or refund under paragraph (1) with respect to an article unless—

(A) he has in his possession such evidence of the sale of the article to an ultimate purchaser and of the reimbursement of the tax to such purchaser, as may be required by regulations prescribed by the Secretary of the Treasury or his delegate under this subsection;

(B) claim for such credit or refund is filed with the Secretary of the Treasury or his

delegate before February 1, 1984, based upon information submitted to the manufacturer, producer, or importer before October 1, 1983, by the person who sold the article (in respect of which the credit or refund is claimed) to the ultimate purchaser; and

(C) on or before February 1, 1984, reimbursement has been made to the ultimate purchaser in an amount equal to the tax paid on the article.

(3) OTHER LAWS APPLICABLE.—All provisions of law, including penalties, applicable with respect to the taxes imposed by section 4061(a) of the Internal Revenue Code of 1954 shall, insofar as applicable and not inconsistent with paragraph (1) or (2) of this subsection, apply in respect of the credits and refunds provided for in paragraph (1) to the same extent as if the credits or refunds constituted overpayments of the tax.

(D) CERTAIN USES BY MANUFACTURER, ETC.—Any tax paid by reason of section 4218(a) of the Internal Revenue Code of 1954 (relating to use by manufacturer or importer considered sale) shall be deemed an overpayment of such tax with respect to—

(1) any article which was subject to the tax imposed by section 4061(a) of such Code as in effect on the day before the date of the enactment of this Act if tax was imposed on such article by reason of such section 4218(a) after November 28, 1982.

(e) DEFINITIONS.—For purposes of this section—

(1) The term "dealer" includes a wholesaler, jobber, distributor, or retailer.

(2) An article shall be considered as "held by a dealer" if title thereto has passed to such dealer (whether or not delivery to him has been made) and if for purposes of consumption title to such article or possession thereof has not at any time been transferred to any person other than a dealer.

(3) The term "tax-repealed article" means an article on which a tax was imposed by section 4061(a), 4061(b), or section 4071(a), or section 4091 of the Internal Revenue Code of 1954 as in effect on March 31, 1983, and is not imposed under sections 4061(a), 4061(b), or 4071(a), or 4091 as in effect on April 1, 1983.

SUNSET PROVISIONS

SEC. 112. (a) Subsection (g) of section 4041 of the Internal Revenue Code of 1954 is amended by adding at the end the following: "Paragraph (2) shall not apply on and after April 1, 1990.".

(b) Subsection (a) of section 4221 of the Internal Revenue Code of 1954 is amended by adding at the end the following: "Paragraph (4) shall not apply on and after April 1, 1990.".

(c) Paragraph (5) of subsection (e) of section 4221 of the Internal Revenue Code of 1954 is amended by adding at the end the following: "This paragraph shall not apply on and after April 1, 1990.".

(d) Section 4483 of the Internal Revenue Code of 1954 is amended by adding subsection (d) as follows:

"(d) SUNSET PROVISION.—Subsections (a) and (c) of this section shall not apply on and after April 1, 1990.".

(e) Subsection (b) of section 6427 of the Internal Revenue Code of 1954 is amended by adding paragraph (3) as follows:

"(3) SUNSET PROVISION.—This subsection shall not apply on and after April 1, 1990.".

STUDY OF USE TAX ALTERNATIVES AND PLAN FOR IMPROVING COLLECTION AND ENFORCEMENT OF SUCH TAXES

SEC. 113. (a) The Secretary of Transportation in consultation with the Secretary of the Treasury is authorized and directed to undertake a study of alternatives to the use fee on heavy vehicles imposed in subsection (a) of Section 4481 of the Internal Revenue Code of 1954 and to devise a plan for improving the collection and enforcement of both the use fee mandated in Section 4481 and alternatives to it.

The alternatives studied shall include, but not be limited to, taxes based either singly or in suitable combinations, on: vehicle size or configuration; vehicle weight, both registered and actual operating weight; and distance traveled. The plan for improving tax collection and enforcement shall, to the extent practical, provide for Federal and State cooperation in such activities.

The study and plan shall be prepared in consultation with State officials, motor carriers, and other affected parties.

A report on the findings and recommendations of the study on tax alternatives together with the plan for collection and enforcement shall be submitted to the Congress within 2 years of the date of enactment of this section.

(b) Under regulations prescribed by the Secretary of the Treasury, any State or States may be authorized to assist in the enforcement of the user fee imposed by section 4481 of the Internal Revenue Code of 1954. Alterations in timing and procedures for collection and enforcement, deemed necessary by the Secretary to implement this provision, are authorized.

TITLE II

SHORT TITLE

SEC. 201. This title may be cited as the "Federal-Aid Highway Reauthorization Act of 1982".

REVISION OF AUTHORIZATION OF APPROPRIATIONS FOR THE INTERSTATE SYSTEM

SEC. 202. Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is amended by striking out "the additional sum of $3,225,000,000 for the fiscal year ending September 30, 1984," and all that follows through the period at the end of the sentence and by inserting in lieu thereof: "the sum of $3,806,250,000 for the fiscal year ending September 30, 1984, the sum of $4,000,000,000 for the fiscal year ending September 30, 1985, the sum of $4,500,000,000 for the fiscal year ending September 30, 1986, the sum of $4,500,000,000 for the fiscal year ending September 30, 1987, the sum of $4,500,000,000 for the fiscal year ending September 30, 1988, the sum of $4,000,000,000 for the fiscal year ending September 30, 1989, the sum of $4,000,000,000 for the fiscal year ending September 30, 1990, and the sum of $4,000,000,000 for the fiscal year ending September 30, 1991."

AUTHORIZATION OF USE OF COST ESTIMATE FOR APPORTIONMENT OF INTERSTATE FUNDS

SEC. 203. The Secretary of Transportation shall apportion for the fiscal years ending September 30, 1985, and September 30, 1986, the sums authorized to be appropriated for such years by section 108(b) of the Federal-Aid Highway Act of 1956, as amended, for expenditures on the National System of Interstate and Defense Highways, using the apportionment factors contained in revised table of the Committee Print numbered of the Committee on Public Works and Transportation of the House of Representatives.

HIGHWAY AND HIGHWAY SAFETY AUTHORIZATIONS

SEC. 204. For the purposes of carrying out the provisions of title 23, United States Code, the following sums are hereby authorized to be appropriated out of the Highway Trust Fund:

(a) For the Federal-aid primary system in rural areas, including the extensions of the Federal-aid primary system in urban areas, not to exceed $1,875,000,000 for the fiscal year ending September 30, 1983, and $2,000,000,000 for the fiscal year ending September 30, 1984, $2,100,000,000 for the fiscal year ending September 30, 1985, $2,300,000,000 for the fiscal year ending September 30, 1986, $2,600,000,000 for the fiscal year ending September 30, 1987, and $2,600,000,000 for the fiscal year ending September 30, 1988. For the Federal-aid secondary system in rural areas not to exceed $400,000,000 for the fiscal year ending September 30, 1983, and $400,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, and September 30, 1988.

(b) For the Federal-aid urban system not to exceed $800,000,000 for the fiscal year ending September 30, 1983, and $800,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, and September 30, 1988.

(c) For carrying out the Federal Lands Highways Program:

(1) for forest highways not to exceed $64,500,000 for the fiscal year ending September 30, 1983, and $75,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, and September 30, 1988.

(2) for public lands highways, not to exceed $22,750,000 for the fiscal year ending September 30, 1983 and $25,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, and September 30, 1988.

(3) for parkways and park highways $75,000,000 for the fiscal year ending September 30, 1983 and $100,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, and September 30, 1988.

(4) for Indian reservation highways $75,000,000 for the fiscal year ending September 30, 1983 and $100,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, and September 30, 1988.

(d) for bridge replacement and rehabilitation under section 144 of title 23, United States Code, not to exceed $1,357,500,000 for the fiscal year ending September 30, 1983, and $1,510,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, and September 30, 1988.

(e) Section 144 of title 23, United States Code, is amended by striking subsection (g) and inserting in lieu thereof the following:

"(g)(1) Of the amount authorized for this section for the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, and September 30, 1988, $300,000,000 shall be withheld by the Secretary. Such withheld amounts shall be available for obligation on the date of each such apportionment in the same manner and to the same extent as the sums apportioned on such date except that the obligation of such sums shall be at the discretion of the Secretary and shall be only for projects for those

highway bridges the replacement and rehabilitation cost of each of which is more than $10,000,000 and for any project for a highway bridge the replacement or rehabilitation costs of which is less than $10,000,000 if such cost is at least twice the amount apportioned to the State in which such bridge is located under subsection (e) of this section for the fiscal year in which application is made for a grant for such bridge. Funds authorized to carry out this section and allocated by the Secretary shall be available for expenditure for the year authorized plus 1 year. Any discretionary funds not obligated at the expiration of such period shall revert back to the Secretary for reallocation at the discretion of the Secretary to the other States in accordance with this subsection.

"(g)(2) Of the amount authorized for this section for each of the fiscal years September 30, 1983, September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, and September 30, 1988, $510,000,000 shall be apportioned in each such fiscal year in accordance with subsection (e)(2) of this section for other than Federal-aid primary system bridges."

"(g)(3) Any amounts remaining out of funds authorized for this section after distribution of the amounts provided for in subsections (g)(1) and (g)(2) of this section in each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, and September 30, 1988, shall be apportioned in accordance with subsection (e)(1) of this section for Federal-aid primary system bridges."

(f) for the Highway Safety Improvement Program $307,000,000 for the fiscal year ending September 30, 1983, and $390,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, and September 30, 1988.

(g) for Substitute highway projects under section 103(e)(4) of title 23, United States Code, $650,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, and September 30, 1988.

(h) The unapportioned or unallocated balances of sums authorized by sections 4 and 5 of the Federal-Aid Highway Act of 1982 are rescinded.

INTERSTATE SYSTEM RESURFACING AUTHORIZATION

SEC. 205. The first sentence of section 105 of the Federal-Aid Highway Act of 1978, as amended, is amended by striking "and not to exceed $800,000,000 for the fiscal year ending September 30, 1984." and inserting in lieu thereof "not to exceed $2,112,500,000 for the fiscal year ending September 30, 1984, and $2,550,000,000 for the fiscal year ending September 30, 1985, $2,800,000,000 for the fiscal year ending September 30, 1986, $3,000,000,000 for the fiscal year ending September 30, 1987, $3,300,000,000 for the fiscal year ending September 30, 1988, and $3,900,000,000 for the fiscal year ending September 30, 1989. Prior to making the apportionment of such funds for the fiscal year ending September 30, 1984, the Secretary shall deduct a sum of $11,000,000 for carrying out section 9(e) of the Federal-Aid Highway Act of 1981."

DEFINITION

SEC. 206. The definition of the term "construction" in section 101(a), title 23, United States Code, is amended by striking the period at the end of the definition and adding the following: "and also includes costs incurred by the State in performing Federal-aid project related audits which directly benefit the Federal-aid highway program.".

RELOCATION OF UTILITY FACILITIES

SEC. 207. (a) Section 101(a) of title 23, United States Code, as amended by section 106 of this Act, is amended by inserting the phrase "and utility appurtenances," after the word "crossing," in the definition of "construction."

(b) Section 123 of title 23, United States Code, is amended:

(1) by striking in subsection (a) "the Federal-aid primary or secondary systems or on the Interstate System, including extensions thereof within urban areas," and inserting in lieu thereof "a Federal-aid system or under a Federal-aid program,"; and

(2) by adding a new subsection (d) at the end thereof to read as follows:

"(d) When a State relocates utilities to correct hazards to the traveling public resulting from utility appurtenances on or near the rights-of-way of Federal-aid projects, the Secretary may waive the provisions of subsection (a) of this section if the Secretary determines such waiver would serve a public purpose by facilitating the State's safety improvement program.".

INTERSTATE WITHDRAWAL AND SUBSTITUTION

SEC. 208. Section 108(e)(4) of title 23, United States Code, is amended by:

(a)(1) inserting in the second sentence after the words "approved by Congress," the words "or the 1983 Interstate Cost Estimate, whichever is earlier,";

(2) striking in the second sentence the phrases "the date of enactment of the Federal-Aid Highway Act of 1976 or" and "whichever is later, and in accordance with the design of the route or portion thereof that is the basis of the latest cost estimate";

(3) inserting in the second sentence after the words "approval of each substitute project under this paragraph," the words "or the date of approval of the 1983 Interstate Cost Estimate, whichever is earlier,";

(4) striking the remainder of the second sentence after "under section 103 of this title; or both; inserting a period, and the following:

"Such substitute projects may (A) either be located in the urbanized area from which withdrawn and selected by the responsible local officials of the urbanized area and submitted by the Governor of the State; or (B) the Governor may, with the concurrence of the local governments concerned and the responsible local officials of the urbanized area from which the route was withdrawn, submit substitute projects in another area or areas of the State, which projects have been selected by the local officials of such area or areas."

(b)(1) striking out the sixth sentence and inserting in lieu thereof the following:

"The sums available for obligation for mass transit projects shall remain available until obligated."

(2) striking the sixth sentence and inserting in lieu thereof the following: "In addition to any funds authorized to be appropriated out of the general fund for transit projects, funds are authorized beginning with fiscal year 1984, as provided by appropriations acts, out of the Highway Trust Fund for highway substitute projects pursuant to this paragraph. Funds appropriated for highway substitute projects for fiscal year 1984 and thereafter shall be apportioned to States by a formula based on relative annual highway substitution needs as determined by the Secretary and as related to each State's approved substitution concept program and outstanding entitlements under this paragraph. The sums available for obligation for projects under any highway assistance program shall remain available until expended. Any funds allocated to a State shall remain available for the fiscal year for which allocated and one year after. Any funds not obligated at the expiration of such period shall be reallocated to other States in accordance with the formula established for fiscal year 1984 and thereafter under this paragraph."

(c) inserting after the present ninth sentence the following: "An amount equal to such reduction shall remain available to the Secretary for reallocation to any other State in accordance with the Interstate Discretionary Fund provisions of section 118(b) of this title.";

(d) adding at the end of this paragraph the following: "Any route or segment thereof added to the Interstate System after March 7, 1978, pursuant to specific legislation will not be eligible for withdrawal and substitution under this subsection.".

PRIMARY PROGRAM

SEC. 209. (a) Section 104(b)(1) of title 23, United States Code, is amended by striking the words "and priority primary routes" in the first sentence.

(b) Section 147 of title 23, United States Code, is repealed.

(c) Section 151 of the Federal-Aid Highway Act of 1978 is repealed.

(d) Effective October 1, 1983, any unobligated amount set aside for priority primary routes shall be apportioned by the Secretary of Transportation in the same manner as funds apportioned under section 104(b)(1) of title 23, United States Code, for the Federal-aid primary system, and shall thereafter remain available for obligation for the same period as such initial apportionment.

(e) The analysis of chapter 1 of title 23, United States Code, is amended by deleting "147. Priority Primary Routes.", and inserting in lieu thereof: "147. Repealed.".

HOLD HARMLESS—INTERSTATE RESURFACING

SEC. 210. The amount a State, excluding any State that has no Interstate mileage designated under section 103 of title 23, United States Code, receives by apportionment for fiscal years 1984 and 1985 under section 104(b)(5)(B) of title 23, United States Code, shall be sufficient to assure that its total apportionments under section 104(b)(5) of title 23, United States Code, are not less than the apportionments which would have been made for fiscal years 1984 and 1985 to such State under section 104(b)(5) of title 23, United States Code, under the law as it is before the enactment of this Act.

REPORTS

SEC. 211. (a)(1) Section 123 of the Federal-Aid Highway Act of 1978 is amended by repealing subsections (a), (b), and (c) and by relettering subsections (d) and (e) as (a) and (b), respectively.

(2) Section 160 of the Federal-Aid Highway Act of 1978 is repealed.

(b)(1) Section 307 of title 23, United States Code, is amended by adding subsection (e) as follows:

"(e) The Secretary shall report to the Congress in January 1983, and in January of every second year thereafter, estimates of the future highway needs of the Nation.

(2) Section 3 of Pub. L. 89-139, 79 Stat. 578, August 28, 1965, and section 17 of the Federal-Aid Highway Act of 1968 are repealed.

TECHNICAL AMENDMENTS

SEC. 212. (a) Section 109(h) of title 23, United States Code, is amended—

(1) By striking "Not later than July 1, 1972, the Secretary, after consultation with appropriate Federal and State officials, shall submit to Congress, and not later than 90 days after such submission, promulgate guidelines designed to" and inserting in lieu thereof "The Secretary shall".

(2) By striking in the last sentence "Such guidelines shall" and inserting in lieu thereof "Such assurances shall".

(3) By striking in the last sentence "after the issuance of such guidelines" and inserting in lieu thereof a period.

(b) Section 119(a) of title 23, United States Code, is amended by striking the period after the word "title" and before the parenthesis in the first sentence.

(c) Section 137, title 23, United States Code, is amended to read as follows:

"SEC. 137. Fringe and corridor parking facilities. (a) The Secretary may approve as a project on any Federal-aid system the acquisition of land outside a central business district, as defined by the Secretary, and the construction of publicly owned parking facilities thereon or the designation of existing facilities including the use of air space above and below the established grade line of the highway pavement, to serve bus, other public mass transportation, or carpool/vanpool passengers, the primary purpose of which is to reduce vehicular traffic or otherwise improve traffic flow on the related Federal-aid system.

"(b) The term 'parking facilities' for purposes of this section shall include access roads, buildings, structures, equipment, improvements, and interests in land.

"(c) Projects authorized under subsection (a) of this section are eligible for the appropriate Federal-aid system funds, except that funds apportioned under section 104(b)(5)(A) of this title, shall be eligible only to the extent permitted by section 108(b) of the Federal-Aid Highway Act of 1956, as amended. The specific class of funds shall be determined by the system receiving the primary benefit from the parking. Sums apportioned under sections 104(b)(1) and 104(b)(5)(B) of this title may be used for projects authorized under subsection (a) which are intended to benefit an Interstate highway.

"(d) In the event fees are charged for the use of any such facility, the rate thereof shall not be in excess of that required for maintenance and operation (including compensation to any person for operating such facility).

"(e) Nothing in this section, or in any rule or regulation issued under this section, or in any agreement required by this section, shall prohibit (1) any State, political subdivision or agency or instrumentality thereof, from contracting with any person to operate any parking facility constructed under this section, or (2) any such person from so operating such facility.".

(d) Section 142, title 23, United States Code, is amended to read as follows:

"SEC. 142. Public Transportation. (a) To encourage the development, improvement, and use of mass transportation systems operating motor vehicles (buses, carpools and vanpools) on Federal-aid highways for the transportation of passengers, to increase the traffic capacity of the Federal-aid systems, and to facilitate the movement of persons and goods, the Secretary may approve as a project on any Federal-aid system the construction or designation of exclusive or preferential high occupancy vehicle or truck lanes, roadways, and ramps, highway traffic control devices, and passenger loading areas and facilities (including shelters).

"(b)(1) In addition to the projects under subsection (a), the Secretary may approve as a project on the Federal-aid urban system, for payment from sums apportioned under section 104(b)(6) of this title, the purchase of buses and the construction, reconstruction, and improvement of fixed rail facilities, including the purchase of rolling stock for fixed rail.

"(2) Projects authorized by subsection (b) of this section shall be subject to, and governed in accordance with, all provisions of this title applicable to projects on the Federal-aid urban system, except to the extent determined inconsistent by the Secretary.

"(c)(1) The Federal share payable on account of projects authorized by subsections (a) and (b) of this section shall be that provided in section 120 of this title. For all purposes of this title, a project authorized by this section shall be deemed to be a highway project.

"(2) The Federal share of projects on an Interstate highway for exclusive or preferential bus, truck, carpool/vanpool, or emergency routes or lanes may be financed with sums apportioned under section 104(b)(5)(A) of this title to the extent permitted by subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, or sums apportioned under section 104(b)(5)(B) of this title, or sum apportioned under section 104(b)(1) of this title.

"(d) In any case where sufficient land exists within the publicly acquired rights-of-way of any Federal-aid highway to accommodate needed rail or nonhighway public mass transit facilities and where this can be accomplished without impairing motor vehicle safety of existing or future highway improvements, the Secretary may authorize a State to make such lands and rights-of-way available without charge to a publicly owned mass transit authority for such purposes where the Secretary finds that the public interest will be served.

"(e) The provisions of assistance under subsection (b) of this section shall not be construed as bringing within the application of chapter 15 of title 5, United States Code, any nonsupervisory employee of an urban mass transportation system (or of any other agency or entity performing related functions) to whom such chapter is otherwise inapplicable.

"(f) Funds available for expenditure to carry out the purposes of subsection (b) of this section shall be supplementary to and not in substitution for funds authorized and available for obligation pursuant to the Urban Mass Transportation Act of 1964, as amended.

"(g) The provisions of section 3(e)(4) of the Urban Mass Transportation Act of 1964, as amended, shall apply in carrying out subsection (b) of this section.".

"(e) Section 146 of title 23, United States Code, is amended to read as follows:

"SEC. 146. CARPOOL AND VANPOOL PROJECTS.—(a) In order to conserve fuel, decrease traffic congestion during rush hours, improve air quality, and enhance the use of existing highways and parking facilities, the Secretary may approve for Federal financial assistance from funds apportioned under sections 104(b)(1), 104(b)(2), and 104(b)(6) of this title, projects designed to encourage the use of carpools and vanpools. (As used hereafter in this section, the term "carpool" includes a vanpool.) Such a project may include, but is not limited to, such measures as providing carpooling opportunities to the elderly and handicapped, systems for locating potential riders and informing them of convenient carpool opportunities, and acquiring vehicles appropriate for carpool use.

"(b) A project authorized by this section shall be subject to and carried out in accordance with all provisions of this title, except those provisions which the Secretary determines are inconsistent with this section.".

(f)(1) Section 149 of title 23, United States Code, is repealed.

(2) The analysis of chapter 1, of title 23, United States Code, is amended by striking "149. Truck Lanes." and inserting in lieu thereof "149. Repealed.".

CLEAN AIR

SEC. 213. Subsection (j) of section 109 of title 23, United States Code, is repealed and subsections (k), (l), and (n) are relettered as (j), (k), and (l), respectively.

VENDING MACHINES ON THE INTERSTATE SYSTEM

SEC. 214. Section 111 of title 23, United States Code, is amended by inserting (a) at the beginning and adding paragraph (b) as follows:

"(b) Paragraph (a) of this section shall not preclude the placement of vending machines in safety areas, rest and recreation areas and truck weighing areas constructed or located on the rights-of-way of the Interstate System. The vending machines permitted by the State shall dispense food, drink and other articles determined by the State highway agency to be appropriate and desirable to the traveling public. Proceeds from the operation of vending machines may be managed by the State highway agencies through concessionaires or otherwise. Costs associated with the installation, operation, and maintenance of vending machines shall not be eligible for Federal participation under this title.".

CONSTRUCTION

SEC. 215. (a) Subsection (a) of section 114 of title 23, United States Code, is amended to read as follows:

"(a) The construction of any highways or portions of highways located on a Federal-aid system shall be undertaken by the respective State transportation agencies or under their direct supervision. The construction work and labor in each State shall be performed in accordance with the laws of the State and applicable Federal laws. Except as provided in section 117 of this title, the Secretary shall establish procedures for the inspection and approval of such construction. Construction may begin as soon as funds are available pursuant to subsection (a) of section 118 of this title. The State transportation agency shall not erect any informational signs other than official traffic control devices conforming with standards approved by the Secretary on any project.".

(b) The second sentence of subsection (c) of section 121 of title 23, United States Code, is amended by striking the words "following inspections".

CONSTRUCTION BY STATES IN ADVANCE OF APPORTIONMENT

SEC. 216. (a) Section 115(a) of title 23, United States Code, is amended as follows:

"(a)(1) When a State has obligated all funds apportioned or allocated to it under sections 103(e)(4), 104, or 144, of this title,

other than Interstate funds and proceeds to construct any highway substitute, Federal-aid system or bridge project, other than in Interstate project funded under section 104(b)(5) of this title, without the aid of Federal funds in accordance with all procedures and all requirements applicable to such a project, except insofar as such procedures and requirements limit a State to the construction of projects with the aid of Federal funds previously apportioned to it, the Secretary is authorized to pay to such State the Federal share of the costs of construction of such project when additional funds are apportioned to such State under sections 103(e)(4), 104, or 144 of this title if—

"(A) prior to the construction of the project the Secretary approves the plans and specifications therefor in the same manner as other projects and

"(B) the project conforms to the applicable standards adopted under section 109 of this title.

"(2) The Secretary may not approve an application under this section unless an authorization is in effect for the fiscal year for which the application is sought beyond the currently authorized funds for such State. No application may be approved which will exceed the State's expected apportionment of such authorizations.".

(b) Section 115(c) of title 23, United States Code, is amended by striking "104" and inserting in lieu thereof "103(e)(4), 104, or 144".

PAYMENT TO STATES FOR BOND RETIREMENT

SEC. 217. Sections 115(b)(2) and 122 of title 23, United States Code, and section 115(c) of the Federal-Aid Highway Act of 1978 are repealed. The analysis of chapter 1, United States Code, is amended by striking "122. Payment to States for bond retirement." and inserting in lieu thereof "122. Repealed.".

MAINTENANCE

SEC. 218. (a) The second sentence of subsection (c) of section 116 of title 23, United States Code, is amended to read as follows: "If, within 90 days after receipt of such notice, such project has not been put in proper condition of maintenance, the Secretary shall withhold approval of further projects of all types on the Federal-aid system involved in the State highway district, municipality, county, other political or administrative subdivision of the State, or the entire State, in which such project shall be located, as the Secretary deems most appropriate until such project shall have been put in proper condition of maintenance.".

(b) Section 109 of title 23, United States Code, is amended by striking subsection (m).

(c) Section 116 of title 23, United States Code, is amended by adding subsection (f) as follows: "(f) The Secretary shall issue guidelines describing the criteria applicable to the Interstate System in order to ensure that the condition of these routes is maintained at the level required by the purposes for which they were designated.".

(d) Section 119 of title 23, United States Code, is amended by striking subsection (b) and by striking "(a)" immediately following the section number and heading.

(e) Section 116 of title 23, United States Code, is amended by adding subsection (g) as follows:

"(g) Not later than 1 year after the date of issuance of initial guidelines under subsection (f) of this section each State shall have a program for the Interstate System in accordance with such guidelines. Each State shall certify on January 1 of each year that it has such a program and the Interstate System is maintained in accordance with the program. If a State fails to certify as required or if the Secretary determines a State is not adequately maintaining the Interstate System in accordance with such program, the next apportionment of funds to such State for the Interstate System shall be reduced by amounts equal to 10 per centum of the amount which would otherwise be apportioned to such State under section 104 of this title. If within 1 year from the date the apportionment for a State is reduced under this subsection, the Secretary determines that such State is maintaining the Interstate System in accordance with the guidelines the apportionment of such State shall be increased by an amount equal to the reduction. Increases in an apportionment shall be available for expenditure by the State for the same period of time as the original apportionment. If the Secretary does not make such a determination within such 1-year period, the amount withheld shall be reapportioned to all other eligible States.".

CERTIFICATION ACCEPTANCE

SEC. 219. (a) Section 117 of title 23, United States Code, is amended by adding a new subsection (b) after subsection (a) to read as follows:

"(b)(1) A State highway department may apply to assume the responsibility of the Secretary with regard to any Federal law, regulation, or policy except title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000(d), et seq.) or title VIII of the Act of April 11, 1968 (42 U.S.C. 3601 et seq.) and with regard to projects on a Federal-aid system (except the Interstate System). A State may not assume the responsibility of the Secretary for locations and clearances for bridges and causeways for bridges over navigable waters of the United States (33 U.S.C. 401, 491 et seq., 525 et seq., and 535 et seq.) or relating generally to obstructive bridges (33 U.S.C. 511 et seq.).

"(2) The responsibility of the Secretary shall be deemed to have been fulfilled under any such laws, regulation, or policy, provided that:

"(A) a certification for those projects has been accepted for all title 23 requirements under subsection (a);

"(B) the Secretary finds that the State has procedures which are sufficient to assure that the projects will be carried out in accordance with the provisions of such law, regulation, or policy;

"(C) the State highway department certifies that the projects have been carried out in accordance with the procedures of clause (B); and

"(D) the State highway department is authorized and consents to accept the jurisdiction of the Federal courts in any suit brought to enforce any such Federal law or regulation.

"(3) Applications submitted pursuant to this section shall be deemed not to constitute proposals for major Federal action for purposes of the National Environmental Policy Act of 1969, as amended.".

(b) Existing subsection 117(b) is amended by striking out "make a final inspection of each such project upon its" and inserting in lieu thereof "establish procedures for the inspection of such projects upon".

(c) Subsection 117(e) is repealed.

(d) Subsection 117(f) is repealed.

(e) Existing subsections (b), (c), and (d) of section 117 of title 23, United States Code, are relettered (c), (d), and (e), respectively.

INTERSTATE DISCRETIONARY FUND

SEC. 220. (a) Subsection (b) of section 118 of title 23, United States Code, is amended by striking out the third sentence and inserting in lieu thereof: "Sums not obligated within such period shall be allocated by the Secretary to any State or States that has obligated all of its apportionments other than an amount which, by itself, is insufficient to pay the Federal share of the cost of a project on the Interstate System which has been submitted by such State for approval, and that is willing and able to apply such funds to a ready-to-commence project and commence construction work within ninety days of obligation. In allocating funds, the Secretary will give high priority to Interstate projects of unusually high cost in relation to a State's apportionment and to projects which directly contribute to the completion of an Interstate segment which is not open to traffic.".

(b) Beginning with the authorization for the fiscal year ending September 30, 1985, $300,000,000 per fiscal year shall be set aside from the Interstate System authorizations provided by subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, before such authorizations are apportioned pursuant to 23 U.S.C. 104(b)(5)(A). Such $300,000,000 per fiscal year shall be in addition to any other funds and shall be available to the Secretary for allocation to any State in accordance with the Interstate Construction Discretionary Fund provisions of 23 U.S.C. 118(b).

PROGRAM CONSOLIDATION

SEC. 221. (a)(1) Sections 120(i), 143, 148, 155, 156, 212, 213, 219 and 320 of title 23, United States Code, are repealed.

(2) Section 163 of the Federal-Aid Highway Act of 1973, as amended, is repealed.

(3) Sections 118 and 119 of the Federal-Aid Highway Amendments of 1974 are repealed.

(4) Subsections (a), (c), (d), (e), and (i) of section 141 and section 209 of the Surface Transportation Assistance Act of 1978 are repealed.

(b)(1) Any unobligated balance of contract authority established by any Act prior to enactment of subsection (a) of this section for carrying out sections 143 and 148 of title 23, United States Code, shall remain available for obligation under the conditions applicable prior to such enactment.

(2) The unexpended balance of sums appropriated prior to enactment of subsection (a) of this section for carrying out sections 156, 212, 213, and 219 of title 23, United States Code, section 163 of the Federal-Aid Highway Act of 1973, and section 141 of the Federal-Aid Highway Act of 1978, shall remain available for expenditure under the conditions applicable prior to such enactment.

(3) The unexpended balance of sums appropriated prior to enactment of subsection (a) of this section for carrying out section 155 of title 23, United States Code, and sections 118 and 119 of the Federal-Aid Highway Amendments of 1974 shall remain available for expenditure for two fiscal years following the fiscal year of enactment of this section.

(4) The unexpended balance of sums appropriated prior to enactment of subsection (a) of this section for carrying out section 320 of title 23, United States Code, shall remain available for expenditure for three fiscal years following the fiscal year of enactment of this section.

(5) The unappropriated balance of sums authorized prior to enactment of subsection (a) of this section for carrying out sections 148, 155, 156, 212, 213, and 219 of title 23, United States Code, section 163 of the Federal-Aid Highway Act of 1978, sections 118 and 119 of the Federal-Aid Highway Amendments of 1974, and section 141 of the Federal-Aid Highway Act of 1978, is rescinded.

(6) The unapportioned balance of sums authorized prior to enactment of this section to carry out subsection (c) of section 143 of the Federal-Aid Highway Act of 1973 is rescinded.

(c) Effective on the date of enactment of this section, the unappropriated balance of sums authorized to carry out section 131 of title 23, United States Code, is rescinded.

(d) Subsection (b) of section 141 of the Federal-Aid Highway Act of 1978 is amended by striking in the first sentence the words "subsection (c) and".

(e) Section 401 of title 23, United States Code, is amended by deleting the second sentence thereof.

(f) The sixth sentence of section 402(c) of title 23, United States Code, is amended to read as follows: "The annual apportionment to each State shall not be less than one-half of 1 per centum of the total apportionment.".

(g)(1) The analysis of chapter 1, United States Code, is amended by striking "143. Economic growth center development highways.", "148. Development of a national scenic and recreational highway.", "155. Access highways to public recreation areas on certain lakes.", and "156. Highways crossing other Federal projects.", and inserting in lieu thereof "143. Repealed.", "148. Repealed.", "155. Repealed.", and "156. Repealed.", respectively.

(2) The analysis of chapter 2 of title 23, United States Code, is amended by strking "212. Inter-American Highway.", "213. Rama Road.", and "219. Safer off-system roads." and inserting in lieu thereof "212. Repealed.", "213. Repealed.", and "219. Repealed.", respectively.

(3) The analysis of chapter 3 of title 23, United States Code, is amended by striking "320. Bridges on Federal dams." and inserting in lieu thereof "320. Repealed.".

EMERGENCY RELIEF

SEC. 222. (a) Subsection (a) of section 125 of title 23, United States Code, is amended by striking the first, second, and third sentences, and inserting in lieu thereof the following:

"An emergency fund is authorized for expenditures by the Secretary, subject to the provisions of this section and section 120 of this title, for the repair or reconstruction of highways, roads, and trails which the Secretary shall find have suffered serious damage as the result of (1) a natural disaster over a wide area such as by flood, hurricane, tidal wave, earthquake, or severe storm, or (2) a catastrophic failure from any external cause, in any part of the United States. In no event shall funds be used pursuant to this section for the repair or reconstruction of bridges which have been permanently closed to all vehicular traffic by the State because of imminent danger of collapse due to structural deficiencies or physical deterioration or for the correction of roadway failures and damages not directly caused by natural disasters and catastrophic failures as defined by this subsection. Subject to the following limitations, there is hereby authorized to be appropriated from the Highway Trust Fund such sums as may be necessary to establish the fund authorized by this section and to replenish it on an annual basis. Not more than $100,000,000 is authorized to be obligated in any one fiscal year commencing after September 30, 1982, except that, if in any fiscal year the total of all expenditures under this section is less than the amount authorized to be expended in such fiscal year, the unexpended balance of such amount shall remain available for expenditure during the next 2 succeeding fiscal years in addition to amounts otherwise available to carry out this section in such years.".

(b) Notwithstanding any other provision of law, all obligations made under section 125 of title 23, United States Code, prior to the fiscal year ending September 30, 1978, are authorized to be liquidated with funds appropriated from the Highway Trust Fund.

(c) Subsection (b) of section 125 of title 23, United States Code, is amended by striking the period at the end of the first sentence, inserting a colon in lieu thereof, and by adding the following: "Provided, that obligations for projects under this section, including those on highways, roads, and trails mentioned in subsection (c) of this section, resulting from a single disaster or a single catastrophic failure shall not exceed $30,000,000 in any State.".

(d) The amendments made by subsection (c) of this section shall apply to natural disasters or catastrophic failures which the Secretary finds eligible for emergency relief subsequent to the date of enactment of this section.

(e) Subsection (f) of section 120 of title 23, United States Code, is amended to read as follows:

"(f) The Federal share payable on account of any repair or reconstruction provided for by funds made available under section 125 of this title shall not exceed 75 per centum of the total cost thereof: Provided, that the Federal share payable on account of any repair or reconstruction of Federal lands highways may amount to 100 per centum of the cost thereof. The total cost of a project may not exceed the cost of repair or reconstruction of a comparable facility less any recoupments received from insurance proceeds or damages paid. Such recoupments shall be promptly credited to the project upon receipt. As used in this section with respect to bridges and in section 144 of this title,"a comparable facility" shall mean a facility which meets the current geometric and construction standards required for the types and volume of traffic which such facility will carry over its design life.".

(f) All obligations for projects resulting from a natural disaster or catastrophic failure which the Secretary finds to be eligible for emergency relief subsequent to the date of enactment of this subsection shall provide for the Federal share required by subsection (f) of section 120 of title 23, United States Code, as amended by this section.

COMMERCIAL MOTOR VEHICLE WEIGHT

SEC. 223. (a)(1) Section 127 of title 23, United States Code, is amended by striking the language following *"Provided"*, to the end of the first sentence and inserting the following:

"That each State shall establish a maximum gross weight of eighty-thousand pounds, a single axle weight of twenty-thousand pounds, a tandem axle weight of thirty-four thousand pounds".

TOLL ROADS

SEC. 224. (a) Section 129(a) of title 23, United States Code, is amended as follows:

"(a) Notwithstanding the provisions of section 301 of this title, the Secretary may permit Federal participation, on the same basis and in the same manner as in the construction of free highways under this chapter, in the construction of any new toll highway or any toll bridge, toll tunnel, or approach thereto, upon compliance with the conditions contained in this section. Such highway, bridge, tunnel, or approach thereto, must be publicly owned and operated. Federal funds may participate in the approaches to a new toll highway or toll bridge or toll tunnel whether such highway, bridge or tunnel is to be or has constructed, or acquired, by the State or other public authority.

"For purposes of this section the term 'new toll highway' shall mean initial construction of a highway on new location at any time before it is open to traffic and shall not include any improvements to existing highways or to such toll highway after it is open to traffic. The State transportation agency or agencies must be a party or parties to an agreement with the Secretary whereby it or they undertake performance of the following obligations:

"(1) all tolls received from the operation of such highway, bridge or tunnel, shall, less the actual cost of such operation and maintenance, be applied to the repayment to the State or other public authority of all of the costs of construction or acquisition of such highway, bridge or tunnel, except that part which was contributed by the United States;

"(2) no tolls shall be charged for the use of such highway, bridge or tunnel after the State or other public authority shall have so repaid; and

"(3) after the date of final repayment, such highway, bridge or tunnel shall be maintained or operated as a free highway, bridge or tunnel; except in the case of a bridge which connects the United States with a foreign country: *Provided*, That such tolls or charges do not exceed the amount necessary for the proper maintenance, repair, and operation of the bridge and its approaches under economical management: *And further provided*, That the entity or governmental instrumentality responsible for the operation of the portion of the bridge within the jurisdiction of the foreign country is charging tolls for the use of the bridge."

(b) Section 301 of title 23, United States Code, is amended as follows:

"SEC. 301. Freedom from tolls. Except as provided specifically by law all highways constructed under the provisions of this title shall be free from tolls of all kinds."

(c) Section 105 of the Federal-Aid Highway Act of 1978 is amended by striking the last sentence.

PRESERVATION OF PARKLANDS

SEC. 225. (a) Section 138 of title 23, United States Code, is amended by:

(1) striking from the first sentence the words "historic sites" and inserting in lieu thereof "National Historic Landmarks";

(2) striking from the third sentence the words "a historic site of national, State, or local significance as so determined by such officials" and inserting in lieu thereof "National Historic Landmark";

(3) striking from the end of the third sentence the words "historic site resulting from such use." and inserting in lieu thereof "National Historic Landmark resulting from such use.";

(4) inserting between the third and fourth sentences the following sentence: "The use

of lands is not prohibited by or otherwise subject to this section if the official having jurisdiction over such lands, after consultation with the Secretary, determines that the effect of the transportation project will not appreciably reduce the utility of the public park, recreation area, wildlife and waterfowl refuge, or National Historic Landmark for the purposes for which it is intended.".

(b) Section 4(f) of the Department of Transportation Act of 1966 is amended by:

(1) striking the words "historic sites" from the first sentence and inserting in lieu thereof "National Historic Landmarks";

(2) striking from the third sentence the words "a historic site of national, State, or local significance as so determined by such officials" and inserting in lieu thereof "a National Historic Landmark";

(3) striking from the end of the third sentence the words "historic site resulting from such use." and inserting in lieu thereof "National Historic Landmark resulting from such use.";

(4) adding the following sentence at the end of the paragraph: "The use of lands is not prohibited by or otherwise subject to this section if the official having jurisdiction over such lands, after consultation with the Secretary, determines that the effect of the transportation project will not appreciably reduce the utility of the public park, recreation area, wildlife and waterfowl refuge, or National Historic Landmark for the purposes for which it is intended."

EQUAL OPPORTUNITY

SEC. 226. (a) The first and third sentences of subsection (a) of section 140 of title 23, United States Code, are amended by striking the words "or national origin," and inserting in lieu thereof the words "national origin or sex.".

(b) Subsection (b) of section 140 of title 23, United States Code, is amended by striking the second and third sentences and inserting in lieu thereof: "Of the sums available for carrying out the provisions of section 104(a) of this title, not to exceed $10,000,000 per fiscal year as provided in annual appropriation acts shall be available for the administration of this subsection.".

(c) Section 140 of title 23, United States Code, is amended by adding a new subsection (c) as follows:

"(c) The Secretary, in cooperation with any other department or agency in the Government, State agency, authority, association, institution, corporation (profit or nonprofit), or any other organization or person, is authorized to develop, conduct, and administer training programs and assistance programs in connection with any program under this title in order that socially and economically disadvantaged individuals may achieve proficiency to compete, on an equal basis, for contracts and subcontracts. Of the sums available for carrying out the provisions of section 104(a) of this title, not to exceed $10,000,000 per fiscal year, as provided in annual appropriation acts shall be available for the administration of this subsection. The provisions of section 3709 of the Revised Statute, as amended (41 U.S.C. 5), shall not be applicable to contracts and agreements made under the authority herein granted to the Secretary notwithstanding the provisions of 41 U.S.C. 252(e).".

(d) The title of section 140 of title 23, United States Code, is amended to read: "Sec. 140. Equal Opportunity." and the analysis of chapter 1 of title 23, United States Code, is amended by striking out: "Sec. 140. Equal employment opportunity." and inserting in lieu thereof "Sec. 140. Equal opportunity.".

ENFORCEMENT OF HEAVY VEHICLE USE TAX

SEC. 227. (a) Section 141 of title 23, United States Code is amended by adding subsection (d) as follows:

"(d) No funds shall be apportioned to a State under section 104(b)(5) of this title in any fiscal year during which heavy vehicles, subject to the use tax imposed by section 4481 of the Internal Revenue Code of 1954, may be lawfully registered in the State without having presented proof of payment, in such form as may be prescribed by the Secretary of the Treasury, of the use tax imposed by section 4481 of such Code. Amounts withheld from apportionment to a State under this subsection shall be apportioned to the other States pursuant to the formulas of section 104(b)(5) of this title and shall be available in the same manner and to the same extent as other Interstate funds apportioned at the same time to other States."

(b) The amendments made by this section are effective January 1, 1985.

HIGHWAY BRIDGE REPLACEMENT AND REHABILITATION PROGRAM

SEC. 228. (a) Subsection (e) of section 144 of title 23, United States Code, is amended to read as follows:

"(e)(1) Funds authorized to carry out this section with regard to Federal-aid primary system bridges shall be apportioned among the several States on October 1 of the fiscal year for which authorized according to the following formula.

"All deficient primary system bridges will be divided into two categories:

"(1) Bridges eligible for replacement, and

"(2) Bridges eligible for rehabilitation.

"The square footage of deficient bridges in each category shall be multiplied by its respective unit price on a State-by-State basis; and the total cost in each State divided by the total cost of the Nation's deficient bridges shall yield the apportionment factors. No State shall receive more than 8 percent or less than 0.25 percent of the total apportionment for any one fiscal year. The Secretary shall make these determinations based upon the latest available data, which shall be updated annually. Funds apportioned under this section shall be available for expenditure for 1 year after the close of the fiscal year for which they are authorized. Any funds not obligated at the expiration of such period shall be reapportioned by the Secretary to the other States in accordance with the latest apportionment factors developed under this subsection.

"(e)(2) Funds authorized to carry out this section with regard to bridges other than Federal-aid primary system bridges shall be apportioned among the several States on October 1 of the fiscal year for which authorized according to the following formula:

"All deficient bridges (excluding primary) will be divided into two categories:

"(1) Bridges eligible for replacement, and

"(2) Bridges eligible for rehabilitation.

"The square footage of deficient bridges in each category shall be multiplied by its respective unit price on a State-by-State basis; and the total cost in each State divided by the total cost of the Nation's deficient bridges shall yield the apportionment factors. No State shall receive more than 8 percent or less than 0.25 percent of the total apportionment for any one fiscal year. The Secretary shall make these determinations based upon the latest available data, which shall be updated annually. Funds apportioned under this section shall be available for expenditure for 1 year after the close of the fiscal year for which they are authorized. Any funds not obligated at the expiration of such period shall be reapportioned by the Secretary to the other States in accordance with the latest apportionment factors developed under this subsection.".

"(b) Subsection (h) of section 144 of title 23, United States Code, is amended by striking "which are not subject to the ebb and flow of the tide, and".

ALLOCATION OF URBAN FUNDS

SEC. 229. Section 150 of title 23, United States Code, is amended by adding the following sentence at the end thereof: "Funds allocated to an urbanized area under the provisions of this section may, at the request of the Governor and upon the approval of the appropriate local officials of the area and the Secretary, be transferred to the allocation of another such area in the State or to the State for use in any urban area.".

SEC. 230. (a) Section 141 of title 23, United States Code, is amended to read as follows: "Sec. 151. Highway Safety Improvement Program. "(a) There is hereby established a Highway Safety Improvement Program for projects on any public road or street in rural or urban areas. Assistance shall be available under this program for highway safety improvement projects, as defined in subsection (a) of section 101 of this title; for rail-highway crossing projects as provided for in section 130 of this title; for the implementation of highway-related safety requirements and guidelines issued by the Secretary under section 402 of this title; and for the development, implementation, and evaluation of the Highway Safety Improvement Program required under subsection (b) of this section.

"(b) Each State shall develop and implement on a continuing basis a Highway Safety Improvement Program including procedures for the planning, implementation, and evaluation of highway safety improvement projects on all highways, with the specific objective of reducing the number and severity of highway traffic accidents. Each State shall have a process of collecting, maintaining, and analyzing accident, traffic, and highway data; for conducting engineering studies of hazardous locations, sections and elements; for assigning priorities to the various types of hazards identified; for implementing safety improvement projects in accordance with the priorities developed; and for the evaluation of the safety benefits obtained.

"Each State shall conduct and systematically maintain a survey of all highways to identify those railroad crossings which may require separation, relocation, or protective devices, and establish and implement a schedule of projects for this purpose. At a minimum, such a schedule shall provide signs for all railroad-highway crossings.

"(c)(1) Funds authorized to carry out this section shall be available for expenditure for projects on any public road (other than the Interstate System).

"(2) The Federal share payable on any project under this section shall not exceed 90 per centum of the cost thereof except as provided in section 120(d) of this title.

"(d) Funds authorized to be appropriated to carry out this section shall be apportioned to the States as follows: 60 per centum in the ratio which the population of each State bears to the total population of all States, and 40 per centum in the ratio

which the public road mileage in each State bears to the total public road mileage in all States. The annual apportionment for each State shall not be less than one-half of 1 per centum of the total apportionment. Such sums shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under section 104(b)(1) of this title, except that the Secretary is authorized to waive provisions of this title that the Secretary deems inconsistent with the purposes of this section.

"(e) In any State wherein the State is without legal authority to construct or maintain a project under this section, such State shall enter into a formal agreement for such construction or maintenance with the appropriate local officials of the county or municipality in which such project is located.

"(f) One-half of 1 per centum of funds of the total annual apportionment from sums authorized to be appropriated to carry out this section shall be apportioned to the Secretary of the Interior, who shall exercise the responsibilities assigned to States under subsection (b) of this section in carrying out this section on Indian reservation highways, park highways and parkways. Such apportionment shall be subject to a deduction of not to exceed 5 per centum for the necessary costs of administering the provisions of this section.

"(g) Nothing contained in this section is intended to prohibit the expenditure of funds apportioned under section 104 of this title for projects on any Federal-aid system for the purposes of upgrading or improving the safety performance of the highways on such systems consistent with current standards.".

(b) Section 152 of title 23, United States Code, is repealed.

(c) As of the date of enactment of this section all existing unobligated authorizations for carrying out section 402 of title 23, United States Code, by the Federal Highway Administration are rescinded.

(d) The analysis of chapter 1 of title 23, United States Code, is amended by deleting "151. Pavement marking demonstration program." and "152. Hazard elimination program." and inserting in lieu thereof "151. Highway safety improvement program." and "152. Repealed.".

(e) Section 203 of the Highway Safety Act of 1973 (Pub. L. 93-87), as amended, is repealed. Any obligated balance of contract authority, established by any Act prior to the enactment of this subsection for carrying out Section 203 shall remain available for obligation under the conditions applicable prior to such enactment.

INTERAGENCY ENVIRONMENTAL PROCESS REVIEW

SEC. 231. (a) Chapter 1 of title 23, United States Code, is amended by adding after section 156, the following new section: "Sec. 157. Interagency environmental process review. "Not later than 180 days after enactment of this section, the Secretary shall modify, to the extent necessary, current Federal-aid highway policy and procedures to ensure to the maximum extent possible that the environmental review and public involvement processes established under this title and the National Environmental Policy Act of 1969, as amended, provide the environmental documentation and any opportunity for a public hearings if one is necessary for all applications and requests for permits, licenses, findings, and other approvals and determinations required by any law or Executive Order for Federal-aid highway projects and actions. For projects for which the environmental documentation is prepared pursuant to procedures developed under this subsection, the agency charged with issuing or otherwise acting upon any application or request for any Federal permit, license, finding or approval, without any further environmental documentation or public hearings, shall take such action not later than 90 days after the completed request or application is made. In developing the procedures required by this section, the Secretary shall consult with the Secretaries of the Interior and Defense, the Administrator of the Environmental Protection Agency, and the heads of other Federal departments and agencies, to ensure that such procedures provide an adequate record as to environmental and all other considerations necessary upon which to issue or make the Federal permit, license, finding or approval requested or applied for.".

(b) The analysis of chapter 1 of title 23, United States Code, is amended by adding at the end thereof the following: "Sec. 157. Interagency environmental process review.".

FEDERAL LANDS HIGHWAYS PROGRAM

SEC. 232. (a) Section 202 of title 23, United States Code, is amended to read as follows: "Section 202. Allocations. (a) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for forest highways according to the relative needs of the various elements of the National Forest System as determined by the Secretary, taking into consideration the need for access as identified by the Secretary of Agriculture through renewable resource and land use planning, and the impact of such planning on existing transportation facilities.

"(b) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for public lands highways among those States having unappropriated or unreserved public lands, nontaxable Indian lands or other Federal reservations, on the basis of need in such States, respectively, as determined by the Secretary upon application of the State highway departments of the respective States. The Secretary shall give preference to those projects which are significantly impacted by Federal land and resource management activities.

"(c) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for park highways and parkways according to the relative needs of the various elements of the National Park System, taking into consideration the need for access as identified by the Secretary of the Interior through land use planning and the impact of such planning on existing transportation facilities.

"(d) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for Indian reservation highways according to the relative needs of the various reservations as jointly identified by the Secretary and the Secretary of the Interior.

"(e) Sums authorized to be appropriated for forest development roads and trails shall be allocated by the Secretary of Agriculture according to the relative needs of the various national forests taking into consideration the existing transportation facilities, value of timber or other resources served, relative fire danger and comparative difficulties of road and trail construction.

"(f) Sums authorized to be appropriated for public lands development roads and trails shall be allocated by the Secretary among those States having unappropriated or unreserved public lands, nontaxable Indian lands or other Federal reservations on the basis of need in such States, respectively, as identified by the Secretary of the Interior.

"(g) Sums authorized to be appropriated for Indian reservation development roads and trails shall be allocated according to the relative needs of the various reservations as identified by the Secretary of the Interior.

"(h) Sums authorized to be appropriated for park development roads and trails shall be allocated to the relative needs of the various elements of the National Park System, taking into consideration the needs as identified by the Secretary of the Interior through land use planning and the impact of such planning on existing transportation facilities."

"(b) Section 204 of title 23, United States Code, is amended to read as follows: "Sec. 204. Federal Lands Highways Program. (a) Federal roads which are public roads and meet criteria similar to roads on the Federal-aid systems should be treated under similar uniform policies. There is hereby established a coordinated Federal Lands Highways Program which shall consist of the forest highways, public lands highways, park highways, parkways, and Indian reservation highways.

"(b) Funds available for forest highways, public lands highways, parkways, park highways, and Indian reservation highways shall be used by the Secretary to pay for the cost of construction and improvement thereof. In connection therewith, the Secretary and the Secretary of the Interior, as appropriate, may enter into construction contracts and such other contracts with a State, or civil subdivision thereof as deemed advisable.

"(c) Cooperation of States, counties, or other local subdivisions may be accepted in construction and improvement, and any funds received from a State, county, or local subdivision shall be credited to appropriations available for the class of Federal lands highways to which such funds were contributed.

"(d) Construction of such project shall be performed by contract awarded by competitive bidding, unless the Secretary shall affirmatively find that, under the circumstances relating to such project, some other method is in the public interest.

"(e) All appropriations for the construction and improvement of each class of Federal lands highways shall be administered in conformity with regulations and agreements jointly approved by the Secretary and the Secretary of the appropriate Federal land managing agency.

"(f) The Secretary shall transfer to the Secretary of Agriculture from appropriations for forest highways such amounts as may be needed to cover necessary administrative expenses of the Forest Service in connection with forest highways.

"(g) One and one-half per centum of funds appropriated for forest highways, park highways, parkways, public lands highways and Indian reservation highways shall be available for expenditure by the Secretary for the planning of future highway programs, for engineering and economic studies and investigations, and for the development and demonstration of technology relative to the planning, design, construction, and maintenance of such highways.

"(h) Funds available for each class of Federal lands highways shall be available for

adjacent vehicular parking areas and scenic easements.

"(i) Section 138 of this title and section 4(f) of the Department of Transportation Act of 1966 shall not apply to any action taken by the Secretary under this section.".

(c)(1) The definition of "park roads and trails" in section 101(a) of title 23, United States Code, is amended to read as follows: "The term 'park highways' means a major park road which is a public road that is located within or provides access to an area in the National Park System.".

(2) The term "Indian reservation roads and bridges" in section 101(a) of title 23, United States Code, is amended to read as "Indian reservation highways"; and the definition of such term is amended by deleting the words "and bridges" each place they appear and by inserting the words "major roads which are public" before "roads" the first place it appears.

(3) Section 101(a) of title 23, United States Code, is amended by adding after the definition of the term "forest development roads and trails" the following new definition: "The term 'Federal lands highways' in accordance with section 204 of this title means forest highways, public lands highways, park highways, parkways, and Indian reservation highways.".

(4) Section 101(a) of title 23, United States Code, is amended by adding after the definition of the term "maintenance" the following new definition: "The term 'park development roads and trails' means those minor park roads or trails or nonpublic roads that are located within the National Park System.".

(5) Section 101(a) of title 23, United States Code, is amended by adding after the definition of the term "highway safety improvement project" the following definition: "The term 'Indian reservation development roads and trails' means those minor roads and trails or nonpublic roads necessary for the protection and administration of Indian lands.".

(d)(1) The title of section 206 of title 23, United States Code, is amended to read as follows: "Section 206. Park development roads and trails."

(2) Section 207 of title 23, United States Code, is repealed.

(3) Section 208 of title 23, United States Code, is amended to read as follows: "Section 208. Indian reservation development roads and trails.".

"(a) Funds available for Indian reservation development roads and trails shall be used to pay for the cost of construction and improvement thereof.

"(b) Indian labor may be employed in such construction and improvement under such rules and regulations as may be prescribed by the Secretary of the Interior.

"(c) Cooperation of States, counties, or other local subdivisions may be accepted in such construction and improvement, and any funds, received from a State, county, or local subdivision shall be credited to appropriations available for Indian reservation development roads and trails."

(e) Sections 207, 209, and 214(c) of title 23, United States Code, are repealed.

(f) The analysis of chapter 2 of title 23, United States Code, is amended by deleting the following headings: "202. Apportionment or allocation."; "204. Forest highways."; "206. Park roads and trails."; "207. Parkways."; "208. Indian reservation roads.", and "209. Public lands highways." and inserting in lieu thereof: "202. Allocations."; "204. Federal lands highways program."; "206. Park development roads and trails."; "207. Repealed."; "208. Indian reservation development roads and trails."; and "209. Repealed.".

(g) Section 201 of title 23, United States Code, is amended by deleting the words "park roads and trails," and "Indian reservation roads,"; and inserting the following after the word "parkway,": "park highways, public lands development roads and trails, Indian reservation highways, Indian reservation development roads and trails, park development roads and trails,".

(h) Section 203 of title 23, United States Code, is amended by:

(1) striking out the term "park roads and trails" wherever it appears and inserting in lieu thereof the terms "park highway and park development roads and trails"; and

(2) striking out the term "Indian reservation roads" wherever it appears and inserting in lieu thereof the terms "Indian reservation highways and Indian reservation development roads and trails".

DEFENSE ACCESS ROADS

SEC. 233. Section 210(c) of title 23, United States Code, is amended by striking "Not exceeding $5,000,000 of any funds appropriated under the Act approved October 16, 1951 (65 Stat. 422)," and inserting in lieu thereof "Funds appropriated for defense maneuvers and exercises".

RESEARCH AND PLANNING

SEC. 234. (a) Subsection (c) of section 307 of title 23, United States Code, is amended to read as follows:

"(1) Not to exceed one and one-half per centum of the sums apportioned for each fiscal year to any State under section 104 of this title shall be available for expenditure upon the request of the State highway agency, with the approval of the Secretary, only for the following purposes: Engineering and economic surveys and investigations; the planning of future highway programs and local public transportation systems and for planning for the financing thereof; studies of the economy, safety, and convenience of highway usage and the desirable regulation and equitable taxation thereof; and for research and development, necessary in connection with the planning, design, construction and maintenance of highways and highway systems, and the regulation and taxation of their use.

"(2) Effective January 1, 1983, one and one-half per centum of the sums apportioned for each fiscal year to any State under sections 104 and 144 of this title shall be available for expenditure by the State highway agency only for the purposes enumerated in paragraph (1) of this subsection.

"(3) Effective January 1, 1983, and in addition to the percentage provided in paragraph (2) of this subsection, not to exceed one per centum of the sums apportioned for each fiscal year to any State under sections 104 and 144 of this title shall be available for expenditure upon request of the State highway agency for the purposes enumerated in paragraph (1) of this subsection.

"(4) The sums provided pursuant to this subsection shall be combined and administered by the Secretary as a single fund which shall be available for obligation for the same period as funds apportioned under section 104(b)(1) of this title.

"(5) Sums made available under this subsection shall be matched by the State in accordance with section 120 of this title unless the Secretary determines that the interests of the Federal-aid highway program would be best served without such matching.".

(b) Section 120 of title 23, United States Code, is amended by adding a new subsection (i) as follows:

"(i) Effective January 1, 1983, the Federal share payable on account of any new project financed under section 307(c) of this title shall be 85 percent, except that in the case of any State containing nontaxable Indian lands, individual and tribal, and public domain lands (both reserved and unreserved) exclusive of national forests and national parks and monuments, exceeding 5 per centum of the total area of all lands therein, the Federal share shall be increased by a percentage of the remaining cost equal to the percentage that the area of all such lands in such State is of its total area, except that such Federal share payable on any project in any State shall not exceed 90 per centum of the total cost of any such project.".

COOPERATION WITH FEDERAL AND STATE AGENCIES AND FOREIGN COUNTRIES

SEC. 235. Section 308 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(c) The Secretary is authorized to carry out the provisions of this title in cooperation with State highway and transportation departments and with organizations which are principally composed of duly elected and appointed State and local officials responsible for administering transportation programs without regard to the provisions of the Federal Advisory Committee Act.".

OBLIGATION LIMITATION

SEC. 236. (a) Notwithstanding any other provision of law, the total of all obligations for Federal-aid highways and highway safety construction programs for fiscal year 1983 shall not exceed $11,000,000,000. This limitation shall not apply to obligations for emergency relief under section 125 of title 23, United States Code, or projects covered under section 147 of the Federal-Aid Highway Act of 1978, section 9 of the Federal-Aid Highway Act of 1981 and section 118 of the Union Station Redevelopment Act of 1981. No obligation constraints shall be placed upon any ongoing emergency project carried out under section 125 of title 23, United States Code, or section 147 of the Federal-Aid Highway Act of 1978.

(b) For fiscal year 1983, the Secretary of Transportation shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to all the States for such fiscal year.

(c) Notwithstanding subsection (b), the Secretary shall—

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code;

(2) after August 1, 1983, revise a distribution of the funds made available under subsection (b) if a State will not obligate the amount distributed during that fiscal year and redistribute sufficient amounts to those previously distributed during that fiscal year; and

(3) not distribute amounts authorized for administrative expenses and forest highways.

HIGHLAND SCENIC HIGHWAY

SEC. 237. Section 161(f) of the Federal-Aid Highway Act of 1973, as amended by section 21 of Public Law 96-106, is further amended to read as follows:

"(f) The Highland Scenic Highway as authorized by subsection (a) of this section and all associated lands and rights-of-way shall be managed as part of the Monongahela National Forest for scenic and recreational purposes. Vehicle use shall be confined to passenger cars, recreational vehicles and limited truck traffic to the extent such use is compatible with the purpose for which the highway was constructed as determined by the Secretary of Agriculture. Commercial use by trucks may be limited and controlled by permit.".

APPALACHIAN DEVELOPMENT HIGHWAY PROGRAM

SEC. 238. (a) There are hereby transferred to and vested in the Secretary of Transportation all functions, powers, and duties of the Appalachian Regional Commission that relate to the Appalachian Development Highway System, provided for in section 201 of the Appalachian Regional Development Act of 1965, as amended.

(b) The Director of the Office of Management and Budget shall determine what personnel, assets, liabilities, contracts, properties, records, and unexpended balances of appropriations, authorizations, allocations, and other funds employed, held, used, arising from, available or to be made available in connection with the functions, powers, and duties transferred by subsection (a) of this section shall be transferred to the Secretary of Transportation.

(c) All orders, determinations, rules, regulations, permits, contracts, certificates, licenses, and privileges which have been issued, made, granted, or allowed to become effective in the exercise of duties, powers, or functions which are transferred under this section which are in effect at the time this section takes effect, shall continue in effect according to their terms until modified, terminated, superseded, set aside, or repealed by the Secretary of Transportation or by operation of law.

(d) The provisions of this section shall not affect any proceedings pending at the time this section takes effect before the Appalachian Regional Commission; but such proceedings, to the extent that they relate to functions so transferred, shall be continued before the Department of Transportation. Such proceedings, to the extent they do not relate to functions so transferred, shall be continued where they were pending at the time of such transfer. In either case, orders shall be taken therefrom, and payments shall be made pursuant to such order, as if this section had not been enacted; and orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or repealed by the Secretary of Transportation, or by operation of law.

(e)(1) Except as provided in paragraph (2), the provisions of this section shall not affect suits commenced prior to the date this section takes effect, and in all such suits proceedings shall be had, appeals taken, and judgments rendered, in the same manner and effect as if this section had not been enacted.

(2) No suit, action, or other proceeding commenced by or against an officer of the Appalachian Regional Commission in that officer's official capacity shall abate by reason of enactment of this section. No cause of action by or against any department or agency, functions of which are transferred by this section or by or against any officer thereof in that officer's official capacity, shall abate by reason of the enactment of this section. Causes of action, suits, or other proceedings may be asserted by or against the United States or such official of the Department of Transportation as may be appropriate and, in any litigation pending when this section takes effect, the court may at any time, on its own motion or that of any party, enter an order which will give effect to the provisions of this subsection.

(3) If before the date on which this section takes effect, the Appalachian Regional Commission, or officer thereof in official capacity, is a party to a suit, then such suit shall be continued by the Secretary of Transportation (except in the case of a suit not involving functions transferred to the Secretary).

(f) With respect to any function, power, or duty transferred by this section and exercised after the effective date of this section, reference in any other Federal law to the Appalachian Regional Commission shall be deemed to mean the Secretary of Transportation.

(g) Subsection (g) of section 201 of the Appalachian Regional Development Act of 1965, as amended, is amended by adding at the end the following: "To carry out this section there is authorized to be appropriated out of the Highway Trust Fund, $80,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, and September 30, 1985, and $60,000,000 for the fiscal year ending September 30, 1986. Sums authorized herein out of the Highway Trust Fund for fiscal years 1984, 1985, and 1986 are authorized for the development of projects on the Appalachian Development Highway System subject to the approval of the Secretary of Transportation and are authorized in the place of any other authorization for such fiscal years. Sums authorized herein shall be available for obligation when appropriated.

(h) Subsection (h) of section 201 of the Appalachian Regional Development Act of 1965 is amended by striking "70 per centum" and inserting in lieu thereof "80 per centum" and by adding at the end the following: "Projects approved after March 31, 1979, may be adjusted to receive a Federal share not greater than 80 per centum.".

TOLL HEARINGS

SEC. 239. (a) Section 4 of the General Bridge Act of 1906 (34 Stat. 85, 33 U.S.C. 494), as amended, is amended by deleting the last sentence thereof.

(b) Section 17 of the Act of June 10, 1930 (46 Stat. 552, 33 U.S.C. 498a), as amended, is repealed.

(c) Section 1 of the Act of June 27, 1930 (46 Stat. 821, 33 U.S.C. 498b), as amended, is repealed.

(d) Sections 1-5 of the Act of August 21, 1935 (49 Stat. 670, 33 U.S.C. 503-507), as amended, are repealed.

(e) Sections 530 and 506 of the General Bridge Act of 1946 (60 Stat. 847, 848, 33 U.S.C. 52, 529), as amended, are repealed.

(f) Section 133 of Public Law 93-87 (87 Stat. 267, 33 U.S.C. 526a) is repealed.

(g) Section 6 of the International Bridge Act of 1972 (86 Stat. 732, 33 U.S.C. 535(d)) is repealed.

(h) Section 6(g)(4) of the Department of Transportation Act (80 Stat. 937, 49 U.S.C. 1655(g)(4)) is repealed.

WOODROW WILSON BRIDGE

SEC. 240. Section 9 of the Federal-Aid Highway Act of 1981 is amended by adding the following new subsection:

"(e) Subsequent to the obligation of funds for any project authorized by subsection (c) of this section, the Secretary is authorized to approve further projects. Such projects may include, but are not limited to, bascule spans and their operating devices, and the widening of a bridge. Sums authorized to be appropriated to carry out the provisions of this subsection shall be available for obligation until expended. Any project authorized by this subsection shall be subject to and carried out in accordance with all provisions of title 23, United States Code, except those provisions which the Secretary determines are inconsistent. Such sum shall not be deducted from funds apportioned under section 104 of title 23, United State Code, or any funds allocated by the Secretary to any State or the District of Columbia, nor shall any such sum obligated under this subsection be subject to any obligation limitation for Federal-aid highway programs. The Federal share of the costs of any project approved under this subsection shall be 90 per centum of the cost thereof. The Secretary shall not approve any project under this subsection until the two States and the District of Columbia agree to accept a conveyance of title to their respective portions of said bridge without monetary consideration."

TITLE III—AMENDMENTS TO THE URBAN MASS TRANSPORTATION ACT OF 1964

SHORT TITLE

SEC. 301. This Act may be cited as the "Transit Assistance Authorization Act of 1982".

AMENDMENTS TO SECTION 3 DISCRETIONARY CAPITAL GRANT PROGRAM

SEC. 302. (a) Section 3(a)(2)(A) of the Urban Mass Transportation Act of 1964, (49 U.S.C. 1601 et seq.) (hereinafter referred to as the "Act") is amended—

(1) by striking out "and" at the end of clause (i);

(2) by striking out the period at the end of clause (ii) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new clause:

"(iii) sufficient capability to maintain the facilities and equipment.".

(b) The second sentence of section 4(a) of the Act is amended by striking out "80 per centum of the net project cost" and inserting in lieu thereof "50 per centum of the net project cost."

(c) The first sentence of section 4(c)(3)(A) of the Act is amended by striking out "; and $1,580,000,000" and all that follows down through and including "1983" and inserting "and" immediately following "1981;".

ADMINISTRATIVE EXPENSES AND CAPITAL AUTHORIZATIONS

SEC. 303. (a) Section 4(d) of the Act is amended to read as follows:

"(d) There are authorized to be appropriated for administrative costs, including salaries and expenses necessary to carry out the functions of this Act, such sums as may be necessary.".

(b) Section 4(3) of the Act is amended to read as follows:

"(e)(1) To finance grants under sections 3, 8, 9, and 16(b)(2) of this Act and subsection (i) of this section, there are authorized to be appropriated not to exceed $1,670,000,000

for the fiscal year ending September 30, 1984; $1,955,000,000 for the fiscal year ending September 30, 1985; $2,030,000,000 for the fiscal year ending September 30, 1986; $2,125,000,000 for the fiscal year ending September 30, 1987; and $2,125,000,000 for the fiscal year ending September 30, 1988. Any amounts so appropriated shall remain available until expended.

"(2) Of the amount available under paragraph (1) for each such year, the Secretary shall make available:

"(A) 10 per cent for grants under section 3 and 16(b)(2) and for subsection (i); and

"(B) 90 per cent for grants under sections 8 and 9.

"(3) To finance grants under sections 18 and 21 of this Act there are authorized to be appropriated not to exceed $75,000,000 for the fiscal year ending September 30, 1983; $75,000,000 for the fiscal year ending September 30, 1984; $75,000,000 for the fiscal year ending September 30, 1985; $75,000,000 for the fiscal year ending September 30, 1986; $75,000,000 for the fiscal year ending September 30, 1987; and $75,000,000 for the fiscal year ending September 30, 1988, except that no funds are authorized to be appropriated for grants under section 18 after September 30, 1984. Any amounts so appropriated shall remain available until expended.".

(c) Section 4(g) of the Act is amended to read as follows:

"(g) To carry out public transportation projects substituted for Interstate segments withdrawn under section 103(e)(4) of title 23, United States Code, there are authorized to be appropriated $650,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, and September 30, 1988. Any amounts so appropriated shall remain available until expended.".

RESEARCH AND TRAINING

SEC. 304 Section 4(f) of the Act is amended to read as follows:

"(f) There are authorized to be appropriated to carry out the purposes of sections 6, 10, and 11 of this Act aggregate sums not to exceed $45,000,000 by September 30, 1983; $92,000,000 by September 30, 1984; $139,000,000 by September 30, 1985; $186,000,000 by September 30, 1986; and $223,000,000 by September 30, 1987; and $280,000,000 by September 30, 1988. Any amounts so appropriated shall remain available until expended.".

AMENDMENTS TO SECTION 5 FORMULA GRANT PROGRAM

SEC. 305. (a) Section 5(a) of the Act is amended—

(1) by striking out paragraph (1)(B) and inserting in lieu thereof the following:

"(B) There are authorized to be appropriated for the purposes of this paragraph, $440,000,000 for the fiscal year ending September 30, 1983; and $175,000,000 for the fiscal year ending September 30, 1984.";

(2) in paragraph (2)(B), by striking out "and" and all that follows down through and including the period at the end thereof and inserting in lieu thereof the following: $158,200,000 for the fiscal year ending September 30, 1982; $130,000,000 for the fiscal year ending September 30, 1983; and $65,000,000 for the fiscal year ending September 30, 1984."; and

(3) in paragraph (3)(B), by striking out "and" and all that follows down through and including the period at the end thereof and inserting in lieu thereof the following: "$86,300,000 for the fiscal year ending September 30, 1982; $70,000,000 for the fiscal year ending September 30, 1983; and $35,000,000 for the fiscal year ending September 30, 1984.".

(b) Section 5(a) of the act is amended in paragraphs (a)(1)(A)(i), (a)(2)(A)(i)(1), and (a)(2)(A)(ii)(1) by striking out "as shown by the latest available Federal census;" and inserting in lieu thereof", except that sums shall be apportioned and allocated using data from the 1970 decennial census for one-quarter of the sums appropriated and the remainder shall be apportioned and allocated on the basis of data from the 1980 decennial census;".

(c) Section 5(c)(4) of the Act is amended—

(1) by inserting "(A)" before "Sums";

(2) by designating the second sentence as subparagraph (B), and by striking out "Any" and inserting in lieu thereof "Prior to October 1, 1983, any"; and

(3) by adding at the end thereof the following new subparagraphs:

"(C) After September 30, 1983, any amounts remaining unobligated by the Secretary at the end of such period or which are deobligated by the Secretary after the end of such period shall be added to the amount available under section 4(e)(1).

"(D) Apportionments for fiscal year 1975 shall be deemed to have lapsed on September 30, 1977, and apportionments for fiscal year 1976 shall be deemed to have lapsed on September 30, 1978.".

(d) Section 5(d)(1) of the Act is amended by adding at the end thereof the following: "The Secretary shall not approve a project for the payment of operating expenses after September 30, 1984.".

(e) Section 5(g) of the Act is amended—

(1) by striking out "and" at the end of paragraph (1);

(2) by striking out the period at the end of paragraph (2) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraph:

"(3) sufficient capability to maintain the facilities and equipment.".

(f) Section 5(i)(3) of the Act is amended to read as follows: "(3) an assurance that any public mass transportation system receiving operating assistance under this section has a locally developed process to solicit and consider public comment prior to raising fares or reducing transit service.".

(g) Section 5(m) of the Act is repealed and section 5(n) is redesignated as section 5(m).

CAPITAL FORMULA PROGRAM FOR URBANIZED AREAS

SEC. 306. The Act is amended by inserting the following new section after section 8:

"CAPITAL FORMULA PROGRAM FOR URBANIZED AREAS

"SEC. 9. (a)(1) To make grants under this section, the Secretary shall apportion sums appropriated pursuant to section 4(e)(1) and made available pursuant to section 4(e)(2)(B). Such sums shall be made available for expenditure in urbanized areas or parts thereof on the basis of a formula under which urbanized areas or parts thereof will be entitled to receive an amount equal to the product of—

"(A) the total amount so apportioned, multiplied by

"(B) the ratio which the non-Federal mass transportation operating revenue of such urbanized area, or part thereof, bears to the total national non-Federal mass transportation operating revenue of all urbanized areas in all the States,

except that no urbanized area or portion thereof which is within one State shall receive in excess of 20 percent of the total amount apportioned.

"(2) As used in this subsection, the term 'non-Federal mass transportation operating revenue' shall include fares, State and local noncapital subsidies, and other non-capital transit revenues, but shall not exceed, for any urban area or part thereof, the actual annual operating expenses of such urban area or part thereof that are not paid with Federal assistance provided under this Act.

"(b)(1) Grants under this section shall be available to finance the planning, acquisition, construction, and improvement of facilities, equipment, and spare parts for transit vehicles for use, by operation or lease or otherwise, in mass transportation service. Such grants shall not be available for the construction of newly fixed-guideway systems or extensions to existing systems other than exclusive facilities for buses without the concurrence of the Secretary. For purposes of this section, new fixed guideway systems or extensions do not include those projects covered by letters of intent or full-funding contracts in effect on the effective date of this section or those projects within the federally agreed upon scope for the Washington, D.C. metropolitan area transit system.

"(2) Of the amounts available for grants under subsection (a), not less than 2.5 percent of each apportionment shall be made available to finance transportation planning activities under section 8 of this Act and the deployment of innovative demonstration results. Nothing herein shall prevent recipients from using additional funds available under section 9 for planning purposes. If the amount set aside under this paragraph exceeds local needs, the Governor or designated recipient may, with the concurrence of the metropolitan planning organization, apply to the Secretary for a waiver of all or part of this set-aside.

"(3) The Federal grant for any project under this section shall equal 80 percent of the net project cost, as determined under section 4(a). The remainder shall be provided in cash, from sources other than Federal funds.

"(c)(1) To receive a grant under this section for any fiscal year, a recipient—

"(A) shall continue to comply with Title VI of the Civil Rights Act of 1964, and subsections (e)(2), (f), and (g) of section 3 of this Act; and

"(B) shall submit a statement of activities to be funded under this section prepared pursuant to subsection (e), a description of its proposed use of funds, and the certifications required by this section.

"(2) Upon receipt of the statement, description, and certifications described in paragraph (1), after finding that a recipient is in compliance with paragraph (1)(A), and after compliance with the National Environmental Policy Act using the provisions of subsection (f) or otherwise, the secretary shall make the amounts determined pursuant to subsection (a) available to the recipient.

"(d) To receive a grant under this section, the recipient must certify that—

"(1) the recipient has or will have the legal, financial, and technical capacity to carry out the proposed project;

"(2) the recipient has the authority to apply for the grant under this section;

"(3) the recipient will carry out the project in compliance with the Uniform Relocation Assistance and Land Acquisition

Policies Act of 1970, and with section 7 and subsections (a) and (b) of Section 13 of this Act;

"(4) the recipient will have satisfactory continuing control, through operation, lease, or otherwise, over the use of the facilities or equipment assisted hereunder and will maintain such facilities and equipment in operational order;

"(5) except for bus procurements pursuant to section 12(b)(3), the recipient will use competitive procurements as defined or approved by the Secretary, will not use procurements utilizing exclusionary or discriminatory specifications, and will carry out procurements in compliance with section 401 of Public Law 95-599;

"(6) the recipient will comply with the National Flood Insurance Act of 1968;

"(7) the recipient has complied with the requirements of subsection (e); and

"(8) the recipient has available and will provide funds from other than Federal sources as required by subsection (b).

"(e) In order to permit public examination and appraisal of statements to be submitted under subsection (c), to enhance the public accountability of recipients, to stimulate private sector transportation solutions, and to facilitate coordination of activities with different levels of government, each recipient shall—

"(1) make available to the public information concerning the amount of funds available under this section and the range of activities that the recipient proposes to undertake with such funds;

"(2) develop a proposed statement concerning activities to be funded in consultation with interested parties, including private transportation providers;

"(3) publish a proposed statement in such manner to afford affected citizens, private transportation providers, or as appropriate, local elected officials an opportunity to examine its content and to submit comments on the proposed statement and on the performance of the recipient; and

"(4) hold one or more public hearings to obtain the views of citizens on mass transportation.

In preparing the final statement, the recipient shall consider any such comments and views, particularly those of private transportation providers, and shall, if deemed appropriate by the recipient, modify the proposed statement. The final statement shall be made available to the public.

"(f)(1) In order to assure that the policies of the National Environmental Policy Act of 1969, and other provisions of law which further the purposes of such Act (as specified in regulations issued by the Secretary) are most effectively implemented in connection with the expenditure of funds under this section, and to assure to the public undiminished protection of the environment, the Secretary, in lieu of the environmental protection procedures otherwise applicable, may, under regulations issued by him, provide for the release of funds to recipients who assume all of the responsibilities for environmental review, decisionmaking, and action pursuant to such Act, and such other provisions of law as the regulations of the Secretary specify, that would apply to the Secretary were he to undertake such projects as Federal projects. The Secretary shall issue regulations to carry out this subsection only after consultation with the Council on Environmental Quality.

"(2) The Secretary shall approve the release of funds in accordance with the procedures authorized by this subsection only if, at least fifteen days prior to such approval and prior to any commitment of funds, the applicant has submitted to the Secretary a request for such release accompanied by a certification which meets the requirements of paragraph (3). The Secretary's approval of any such certification shall be deemed to satisfy his responsibilities under the National Environmental Policy Act of 1969 and such other provisions of law as the regulations of the Secretary specify insofar as those responsibilities relate to the applications and releases of funds for projects to be carried out pursuant thereto which are covered by such certification.

"(3) A certification under the procedures authorized by this subsection shall—

"(A) be in a form acceptable to the Secretary;

"(B) be executed by the chief executive officer or other officers of the applicant qualified under regulations of the Secretary;

"(C) specify that the applicant has fully carried out its responsibilities as described under paragraph (1) of this subsection; and

"(D) specify that the certifying officer (i) consents to assume the status of a responsible Federal official under the National Environmental Policy Act of 1969 and each provision of law specified in regulations issued by the Secretary to the extent as the provisions of such Act or other such provisions of law apply pursuant to paragraph (1) of this subsection, and (ii) is authorized and consents on behalf of the applicant and himself to accept the jurisidiction of the Federal courts for the purpose of enforcement of his responsibilities as such an official.

"(g)(1) The Governor, responsible local officials, and publicly owned operators of mass transportation services shall designate a recipient or recipients to receive and dispense the funds apportioned under subsection (a) for urbanized areas with populations of 200,000 or more. As used in this section, the term 'designated recipient' refers to the recipient selected according to procedures required by this paragraph, or selected prior to the effective date of this paragraph in accordance with the procedures of section 5 (b)(1) of this Act.

"(2) Sums apportioned under subsection (a) for urbanized areas with populations less than 200,000 shall be made available to the Governor. These sums shall be fairly and equitably distributed by the Governor. The Governor shall submit annually a report to the Secretary concerning the allocation of funds made available under this paragraph.

"(3) Sums apportioned under this section shall be available for obligation by the Governor or designated recipient for a period of three years following the end of the fiscal year for which such sums are apportioned. Any amounts so apportioned remaining unobligated at the end of such period shall be added to the amount available for apportionment under section 4(e)(2)(B).

"(h) The Secretary shall not approve a grant for a project under this section unless he finds that such project is part of the approved program of projects required by section 8 of this Act.

"(i) As soon as practicable after receiving the submissions required in this section, the Secretary shall enter into an annual projects agreement with the Governor, his designee, or the designated recipient of the urbanized area.

"(j) Each recipient of assistance under this section shall submit to the Secretary, at a time determined by the Secretary, a statement concerning the use of funds made available under this section, together with an assessment by the recipient of how such use compares to the statement of activities identified under subsection (c). The recipient shall, at least on an annual basis, make available independently-conducted reviews and audits as may be deemed necessary or appropriate by the Secretary to determine whether:

"(1) the recipient has carried out its activities in a timely manner and has a continuing capacity to carry out those activities in a timely manner; and

"(2) the recipient has carried out those activities and its certifications in a manner which is not plainly inconsistent with the requirements of this Act and other requirements of this Act and other applicable laws.

The Secretary may make appropriate adjustments in the amount of the annual grants in accordance with the Secretary's findings under this subsection, and may reduce or withdraw such assistance or take other action as appropriate in accordance with the Secretary's review and audits under this subsection.

"(k) The provisions of section 1001 of title 18, United States Code apply to any certification or submission under this Act. In addition, if any false or fraudulent statement or related act within the meaning of section 1001 of title 18, United States Code is made in connection with a certification or submission under this Act, the Secretary may terminate and seek apppropriate reimbursement of the affected grant or grants directly or by offsetting funds available or to be available under this Act.

"(l) Any recipient may request the Secretary to approve its procurement system. If, after consultation with the Office of Federal Procurement Policy, the Secretary finds that such system provides for competitive procurements, the Secretary shall approve such system. Such approval shall be binding until withdrawn. A certification from the recipient under subsection (b)(5) is still required.

"(m) No Federal requirements under this Act other than those specified in this section shall apply to grants made under this section.".

OPERATING COSTS FOR UNIVERSITIES

SEC. 307. Section 11(b) of the Act is repealed, and section 11(a) is amended by striking out "(a)" immediately following "SECTION 11.".

FEDERAL PROCUREMENT FACTORS

SEC. 308. Section 12(b) of the Act is amended by adding at the end thereof the following new paragraph:

"(3)(A) The Secretary may, at least annually, establish a benchmark price which represents the maximum amount of Federal participation in the acquisition of buses by a recipient of funds under this Act. Such price shall be established on the basis of actual market prices over an immediately preceding period as determined by the Secretary.

"(B) Whenever the Secretary establishes a benchmark price for any type of bus pursuant to paragraph (A), any recipient of funds under this Act may elect to have such benchmark price apply to its procurement of that type of bus. If a recipient makes such an election and certifies that it has and will utilize a competitive procurement system, then the procurement of that bus shall be exempt from Federal procurement requirements, including Office of Management and Budget Circular A-102 and Life Cycle Costing provisions but not including

the provisions of section 401 of Public Law 95-599.".

LABOR STANDARDS

SEC. 309. (a) Section 13(c) of the Act is amended—

(1) by striking out "Labor" and inserting in lieu thereof "Transportation"; and

(2) by adding at the end thereof the following: "This subsection shall not extend to employees of private mass transportation companies who provide shared-ride transportation services on demand or on a flexible schedule."

(b) Upon enactment of the amendments made by this section, the Director of the Office of Management and Budget is authorized to provide for the transfer or other disposition of personnel, positions, assets, liabilities, grants, contracts, property, records, and unexpected balances of appropriations, authorizations, and other funds held, used, arising from, available to, or to be made available in connection with the transfer of functions herein required. The Director of the Office of Management and Budget may establish a reasonable transfer date other than the effective date of these amendments.

AMENDMENTS TO THE REPORTING SYSTEM

SEC. 310. Section 15(b) of the Act is amended by inserting ", 9, 21, or 22" immediately after "section 5".

AMENDMENTS TO THE SPECIAL NEEDS PROGRAM

SEC. 311. (b) Section 16(b)(2) of the Act is amended by striking out "4(c)(3) of this Act, 2 per centum" and inserting in lieu thereof "4(e)(1) and made available pursuant to section 4(e)(2)(A) of this Act, an amount".

AMENDMENTS TO FORMULA GRANTS FOR NONURBANIZED AREAS

SEC. 312. (a) The second sentence of section 18(a) of the Act is amended by striking out "as shown by the latest available Federal census" and adding in lieu thereof "except that such sums shall be apportioned and allocated using data from the 1970 decennial census for one-quarter of the sums appropriated and the remainder shall be apportioned and allocated on the basis of data from the 1980 decennial census.".

(b) The first sentence of section 18(b) of the act is amended by adding after "urbanized areas" the following: "except that the program of projects shall not include any project for the payment of subsidies for operating expenses after September 30, 1984".

(c) Section 18(c) of the Act is amended by adding after the first sentence the following: "After September 30, 1983, any amounts remaining unobligated at the end of such period or which are deobligated at the end of such period shall be added to the amount available for apportionment under section 4(e)(3).".

CAPITAL FORMULA PROGRAM FOR AREAS OTHER THAN URBANIZED AREAS

SEC. 313. Section 21 of the Act is amended to read as follows:

"CAPITAL FORMULA PROGRAM FOR AREAS OTHER THAN URBANIZED AREAS

"SEC. 21. (a) The amounts available for grants under this subsection shall be apportioned by the Secretary to the Governor of each State for use in areas other than urbanized areas. The Governor shall be entitled to receive an amount equal to the amount available under this subsection multiplied by the ratio which the population of areas other than urbanized areas in the State bears to the total population of areas other than urbanized areas in all States. The Secretary shall use the latest available Federal census to calculate these ratios.

"(b)(1) Grants under this section shall be available to finance the planning, acquisition, construction, and improvement of facilities and equipment and spare parts for transit vehicles for use, by operation or lease or otherwise, in mass transportation services.

"(2) Of the amounts available for grants under this section not less than 2.5 per cent shall be used to finance transportation planning activities. Nothing herein shall prevent recipients from using additional funds available under this section for planning purposes. If the amount set aside under this paragraph exceeds local needs, the Governor may apply to the Secretary for a waiver of all or part of this set-aside.

"(3) The Federal grant for any project under this section shall equal 80 per cent of the net project cost, as determined under section 4(a). The remainder shall be provided in cash from sources other than Federal funds.

"(c)(1) Sums apportioned under this section shall be made available to the Governor and shall be fairly and equitably distributed. The Governor shall submit annually a statement to the Secretary concerning the allocation of funds made available under this paragraph.

"(2) Sums apportioned under this section shall be available for obligation by the Governor for a period of three years following the end of the fiscal year for which such sums are apportioned. Any amounts so apportioned remaining unobligated at the end of such period shall be added to the amount available for apportionment under section 4(e)(3).

"(d)(1) Subsections (c)(1), (d), (e), (f), (i), (j), (k), (l) and (m), of section 9 of this Act shall apply to the Governor for grants awarded under this section.

"(2) Upon receipt of the statement, description, and certifications described in section 9(c)(1) of this Act, after finding that a recipient is in compliance with section 9(a)(1)(A) of this Act, and after compliance with the National Environmental Policy Act using the provisions of section 9(f) or otherwise, the Secretary shall make the amounts determined pursuant to subsection (a) available to the recipient.

"(e) The Governor may transfer an amount of the State's apportionment under this section to supplement funds apportioned to urbanized areas with populations less than 200,000 under section 9(a) of this Act. The Governor may also transfer an amount of the apportionment for urbanized areas with populations less than 200,000 under section 9(a) of this Act to supplement funds apportioned under this section.".

CAPITAL INFRASTRUCTURE DEVELOPMENT PROJECTS

SEC. 314. Section 22 is amended to read as follows:

"CAPITAL INFRASTRUCTURE DEVELOPMENT PROJECTS

"SEC. 22. (a) To finance grants under subsection (b) of this section, there are authorized to be appropriated from the Transit Account of the Highway Trust Fund not to exceed $550,000,000 for the fiscal year ending September 30, 1983, and $1,100,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, and September 30, 1988. Notwithstanding the preceding sentence, the amount authorized to be appropriated for any given fiscal year shall not exceed the amount as estimated annually by the Secretary of the Treasury to be received in the Transit Account of the Highway Trust Fund including interest thereon in each such fiscal year from subsections (a) and (b) of section 4041 of the Internal Revenue Code of 1954 (relating to taxes on diesel fuel and special motor fuel) and from section 4081(a) of such Code (relating to tax on gasoline) if that amount so estimated is greater than or less than the amounts set forth in the preceding sentence for each such fiscal year. Any amounts so appropriated shall remain available until expended.

"(b)(1)(A) Using sums available pursuant to subsection (a), the Secretary is authorized to make grants under this subsection to finance urban transit capital infrastructure development projects. Grants under this subsection shall be made available to the Governor or designated recipient in accordance with an administrative formula to be developed by the Secretary. In developing such a formula, the Secretary shall take into account factors relating to the size, age, and condition of a recipient's mass transportation system and such other factors the Secretary deems appropriate as measurements of the infrastructure rehabilitation needs of such system. Such formula shall be published annually in the Federal Register.

"(B) Grants under this subsection shall be subject to the requirements set forth in subsections (b)(3), (c)(1), (d), (e), (f), (h), (i), (j), (k), (l), and (m) of section 9 of this Act.

"(C) Upon receipt of the statement, description, and certifications described in section 9(c)(1) of this Act, after finding that a recipient is in compliance with section 9(a)(1)(A) of this Act, and after compliance with the National Environmental Policy Act using the provisions of section 9(f) or otherwise, the Secretary shall make the amounts determined pursuant to subsection (a) available to the recipient.

"(D)(i) Sums apportioned under this section for urbanized areas with populations less than 200,000 shall be made available to the Governor. These sums shall be fairly and equitably distributed by the Governor. The Governor shall submit annually a report to the Secretary concerning the allocation of funds made available under this subparagraph.

"(ii) The Governor, responsible local officials, and publicly owned operators of mass transportation services shall designate a recipient or recipients to receive and dispense the funds apportioned under this section for urbanized areas with populations of 200,000 or more, except that a publicly owned operator or planner exclusively of mass transportation services may not, after the effective date of this section, be designated as the recipient of grants for capital infrastructure development projects under this section unless such entity was selected, prior to such effective date, as a designated recipient selected according to procedures required by this subparagraph, or selected prior to the effective date of this subparagraph in accordance with the procedures of section 5(b)(1).

"(2) As used in this section, the term 'transit capital infrastructure development project' means any project in an urbanized area or portion thereof involving the rehabilitation and replacement of rolling stock, the rehabilitation and modernization of commuter rail and fixed guideway systems, and the rehabilitation and modernization of bus facilities and related equipment, and intermodal terminals.

"(3) The Governor (in the case of urbanized areas of less than 200,000 population) or designated recipient of the urbanized area (in the case of urbanized areas with a population of 200,000 or more) may request the Secretary for authority to withdraw funds made available under this subsection for use for capital infrastructure development projects and to use those funds, by way of substitution, for projects in the State (in the case of the Governor) or the urbanized area (in the case of a designated recipient) that are eligible for assistance under title 23, United States Code.

"(4) The Governor shall include in any request made by the Governor pursuant to paragraph (3) a statement that he agrees that no section 3 funds should be given to any applicant in an urbanized area of less than 200,000 population in the State for any transit capital infrastructure development project that could have been funded under this section. Prior to making such request, the Governor shall provide each such possible applicant with notice of his proposed request and an opportunity to comment thereon.

"(5) The designated recipient of an urbanized area of 200,000 or more population shall include in any request made by the designated recipient pursuant to paragraph (3) a statement that it will not apply for section 3 funds for any transit capital infrastructure development project that could have been funded under this section and that it agrees that no section 3 funds should be given to any other applicant in such urbanized area for any transit capital infrastructure project that could have been funded under this section. Prior to making such request, the designated recipient shall provide each such possible applicant with notice of its proposed request and an opportunity to comment thereon.

"(6) The Secretary shall approve a request made by a Governor under paragraph (3) if he concurs in the statement of the Governor required under paragraph (4). Any amounts approved for withdrawal by the Secretary in accordance with this request shall be transferred to and administered by the Federal Highway Administration in accordance with the provisions of title 23 of the United States Code.

"(7) The Secretary shall approve a request made by a designated recipient under paragraph (3) if he concurs in the statement from the designated recipient required under paragraph (5). Any amount approved for withdrawal by the Secretary in accordance with this request shall be transferred to and administered by the Federal Highway Administration in accordance with the provisions of title 23 of the United States Code.

"(8) Any publicly owned operator of mass transportation services that is a designated recipient of funds under this section for an urbanized area shall, as part of its public hearing under section 9(e) of this Act, consider the relative needs, for those particular funds, of transit capital infrastructure projects in such urbanized area and projects in such urbanized area that are eligible for assistance under title 23, United States Code.

"(c) The sum of the amounts apportioned under subsection (b) to the Governor and designated recipients in any State shall not be less than one-half of one percent of the annual distribution under this section.".

WATERBORNE TRANSPORTATION DEMONSTRATION PROJECT

SEC. 315. Section 320(b) of the Surface Transportation Assistance Act of 1978 (Public Law 95-599) is amended by adding at the end thereof the following: "No funds are authorized to be appropriated to carry out the provisions of subsection (a) after September 30, 1983.".

REPEAL OF SAFETY AUTHORITY

SEC. 316. Section 107 of the National Mass Transportation Assistance Act of 1974 (Public Law 93-503) is repealed.

SAVINGS PROVISION

SEC. 317. Notwithstanding the amendments made by this Act, the Federal share of the total project cost of any project covered by a full funding contract or letter of intent in effect on the effective date of this Act shall not be changed.

EFFECTIVE DATES

SEC. 318. (a) Except as provided in subsection (b) of this section, this Act shall be effective as of January 1, 1983.

(b) The provisions of sections 203 and 204 of this Act shall be effective as of October 1, 1983.

TITLE IV—HIGHWAY SAFETY AUTHORIZATION

SEC. 401. For the purposes of carrying out the provisions of title 23, United States Code, the following sums are hereby authorized to be appropriated out of the Highway Trust Fund:

(1) for carrying out sections 307(a) and 403 of title 23, United States Code (relating to highway safety research and development), by the Federal Highway Administration, $13,000,000 per fiscal year for each of the fiscal years ending September 30, 1985, September 30, 1986, September 30, 1987, and September 30, 1988;

(2) for carrying out section 402 of title 23, United States Code (relating to highway safety programs), by the National Highway Traffic Safety Administration, $100,000,000 per fiscal year for each of the fiscal years ending September 30, 1985, September 30, 1986, September 30, 1987, and September 30, 1988;

(3) for carrying out section 403 of title 23, United States Code (relating to highway safety research and development), by the National Highway Traffic Safety Administration, $31,000,000 per fiscal year for each of the fiscal years ending September 30, 1985, September 30, 1986, September 30, 1987, and September 30, 1988;

APPORTIONMENT

SEC. 402. (a) Section 401 of title 23, United States Code, is amended by deleting the second sentence thereof.

(b) The sixth sentence of section 402(c) of title 23, United States Code, is amended to read as follows: "The annual apportionment to each State shall not be less than one-half of 1 per centum of the total apportionment.".

COMMERCIAL MOTOR VEHICLE SIZE

SEC. 403. (a)(1) Section 127 of title 23, United States Code, is amended by striking the language following *"Provided"*, to the end of the first sentence and inserting the following: "and a width of 102 inches, excluding certain safety devices as designated by the States (and manufactured housing transported under authority of special permits).".

(2) Section 127 of title 23, United States Code, is amended by striking the last sentence.

(b)(1) Section 127 of title 23, United States Code, as amended by subsection (a) of this section, is further amended by adding at the end the following:

"No State shall prohibit motor vehicle combinations consisting of a truck tractor and two trailing units on any segment of the Interstate System. No State shall impose a vehicle length limit of less than 48 feet on the length of a semitrailer unit operating in a truck tractor-semitrailer combination and of less than 28 feet on the length of any semitrailer or trailer operating in a truck tractor-semitrailer-trailer combination on the Interstate System. No State shall establish, maintain, or enforce any law or regulation which imposes an overall length limitation on motor vehicles operating in a truck tractor-semitrailer or truck tractor-semitrailer-trailer combination on the Interstate System. Each State shall determine and provide for reasonable access to the Interstate System by such vehicles. State length limits for combination vehicles permitted under this subsection shall apply solely to the semitrailer or trailer, and not to the truck tractor. For purposes of this section, 'truck tractor' means the noncargo carrying power unit that operates in combination with a semitrailer or with a semitrailer and full trailer."

(2) Apportionments shall not be denied to any State conforming by October 1, 1984, to the amendments made to section 127, title 23, United States Code, by this section.

NATIONAL UNIFORM STATE REGULATION

SEC. 404. (a) There is established in the Department of Transportation a working group, composed of the Secretary or an officer of the Department appointed by the Secretary and not to exceed 51 members to be appointed by the Secretary. The Secretary shall select the Chairman of the Committee from among the Committee members. The appointed members shall be selected from among representatives of various State governments concerned with vehicle registration, fuel tax, and third structure tax requirements of States. The term of members shall not exceed 30 months.

(b)(1) The working group shall advise, consult with, and make recommendations to, the Secretary regarding uniform State regulations of interstate motor carriers. The working group is authorized to develop and recommend, to the Secretary, standards for uniform State regulation of interstate motor carriers in regard to vehicle registration, fuel tax, and third structure tax requirements. These standards shall include:

(A) standardized procedures and forms;

(B) base State certification;

(C) single State unit for filings, applications, and permits;

(D) payment to the base State of fees and taxes due other States;

(E) equitable distribution of revenues;

(F) a limit on fees paid for identification stickers, plates or other indicia.

Such standards shall not define or include the amounts of any State registration fees, fuel taxes, or third structure taxes.

(2) The working group shall also:

(A) define an approach to resolve any discrepancies in States' implementation of standards ultimately promulgated by the Secretary,

(B) identify permanent bodies to develop and recommend future modification to such standards, and

(C) consult with public and private interests contributing to, affected by, or concerned with State motor carrier require-

ments during the development of the standards.

(c) Members of the working group who are not officers or employees of the United States shall, while attending meetings or conferences of such working group or otherwise engaged in the business of such working group, be entitled to receive compensation at a rate fixed by the Secretary, but not exeeding $100 per diem, including travel time, and while away from their homes or regular places of business they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized in Section 5 of the Administrative Expenses Act of 1946 (5 U.S.C. 73b-2) for persons in the Government service employed intermittently. Payments under this section shall not render members of the working group employees or officials of the United States for any purpose.

(d) The recommendations required by subsection (b) of this section shall be submitted to the Secretary within 30 months of the date of enactment of this section.

(e) The Secretary may initiate rulemaking after receiving the working group's recommendations to implement those recommendations found acceptable and in compliance with the criteria defined in section (b)(1).

(f) If the working group fails to recommend to the Secretary such standards within 30 months of the date of enactment of this section, the Secretary may develop such standards and initiate rulemaking to promulgate regulations implementing such standards.

MINIMUM FINANCIAL RESPONSIBILITY FOR MOTOR CARRIERS

SEC. 405 Section 30 of the Motor Carrier Act of 1980 is amended as follows:

(a) Subsection (a)(2) is amended as follows:

"(2) The minimum level of financial responsibility established by the Secretary under paragraph (1) of this subsection for any vehicle shall not be less than $750,000 except that the Secretary, by regulation, may reduce such amount for any class of vehicles or operations if the Secretary finds that such reduction will not adversely affect public safety and will prevent a serious disruption in transportation service."

(b) Subsection (b)(1) is amended as follows:

"(b)(1) The Secretary shall establish regulations to require minimum levels of financial responsibility sufficient to satisfy liability amounts to be determined by the Secretary covering public liability, property damage, and environmental restoration for the transportation of hazardous materials (as defined by the Secretary), oil or hazardous substances (as defined by the Administrator of the Environmental Protection Agency), or hazardous wastes (as defined by the Administrator of the Environmental Protection Agency) by motor vehicle in interstate commerce, foreign commerce, or intrastate commerce."

(c) Subsection (b)(2) is amended as follows:

"(2) The minimum level of financial responsibility established by the Secretary under paragraph (1) of this subsection for any vehicle transporting in interstate commerce, foreign commerce, or intrastate commerce—

(A) hazardous substances (as defined by the Administrator of the Environmental Protection Agency) in cargo tanks, portable tanks, or hopper-type vehicles, with capacities in excess of 3,500 water gallons,

(B) in bulk Class A and B explosives, poison gas, liquefied compressed gas, or compressed gas, or

(C) large quantity radioactive materials, shall not be less than $5,000,000 except that the Secretary, by regulation, may reduce such amount for any class of vehicles or operations if the Secretary finds that such reduction will not adversely affect public safety and will prevent a serious disruption in transportation service."

(d) Subsection (b)(3) is amended as follows:

"(3) The minimum level of financial responsibility established by the Secretary under paragraph (1) of this subsection for any vehicles transporting in interstate, foreign, or intrastate commerce any material, oil, substance, or waste not subject to the provisions of paragraph (2) of this subsection shall not be less than $1,000,000, except that—

(A) the Secretary, by regulation, may reduce such amount for any class of vehicles or operations if the Secretary finds that such reduction will not adversely affect public safety and will prevent a serious disruption in transportation service,

(B) in the case of any class of vehicles transporting any such material, oil, substance, or waste in intrastate commerce other than in bulk, the Secretary, by regulation, may reduce such amount if the Secretary finds that such reduction will not adversely affect public safety, and

(C) in the case of any class of vehicles transporting any such material, oil, substance, or waste in interstate commerce in quantities less than those requiring placarding under the Department of Transportation's hazardous materials regulations, the Secretary, by regulation, may reduce such amount if the Secretary finds that such reduction will not adversely affect public safety."

(e) Subsection (b)(4) is amended as follows:

"(4) If, at the end of the one-year period beginning on the date of enactment of this Act, the Secretary has not established regulations to require minimum levels of financial responsibility as required by paragraph (1) of this subsection for any class of transportation of hazardous materials, oil, hazardous substances, or hazardous wastes by motor vehicle in interstate, foreign, or intrastate commerce, the levels of financial responsibility for such class of transportation shall be the $5,000,000 amount set forth in paragraph (2) of this subsection or the $1,000,000 amount set forth in paragraph (3) of this subsection, as the case may be, until such time as the Secretary, by regulation, changes such amount under this subsection."

(f) Subsection (f) is amended as follows:

"(f) This section shall not apply to motor vehicles having a gross vehicle weight rating (GVWR) less than 10,000 pounds, provided such vehicles are not used to transport any quantity of Class A or B explosives, any quantity of poison gas, or large quantity radioactive materials in interstate or foreign commerce.

FEDERAL-AID MOTOR CARRIER SAFETY PROGRAM

SEC. 406. (a) Chapter 4 of title 23, United States Code, is amended by adding after section 408 a new section as follows: "Sec. 409. Federal-aid Motor Carrier Safety Program. (a) Under the terms and conditions of this section, subject to the availability of funds, the Secretary is authorized to make grants to States for the development or implementation of programs for the enforcement of Federal rules, regulations, standards, and orders applicable to commercial motor vehicle safety and compatible State rules, regulations, standards, and orders.

"(b)(1) The Secretary shall formulate procedures for any State to submit a plan whereby the State agrees to adopt, and to assume responsibility for enforcing Federal rules, regulations, standards, and orders applicable to commercial motor vehicle safety, or compatible State rules, regulations, standards, and orders. Such plan shall be approved by the Secretary if, in the Secretary's judgment, the plan is adequate to promote the objectives of this section, and the plan—

"(A) designates the State motor vehicle safety agency responsible for administering the plan throughout the State;

"(B) contains satisfactory assurances that such agency has or will have the legal authority, resources, and qualified personnel necessary for the enforcement of such rules, regulations, standards, and orders;

"(C) gives satisfactory assurances that such State will devote adequate funds to the administration of such plan and enforcement of such rules, regulations, standards, and orders;

"(D) provides a right of entry and inspection sufficient to enforce such rules, regulations, standards, and orders;

"(E) provides that all reports required pursuant to this section be submitted to the State agency, and that such agency make available upon request to the Secretary all such reports;

"(F) provides that such State agency will adopt such uniform reporting requirements and use such uniform forms for recordkeeping, inspections, and investigations as may be established and required by the Secretary; and

"(G) requires registrants of commercial motor vehicles to make a declaration of knowledge of applicable Federal and State safety rules, regulations, standards, and orders.

"(2) If a plan submitted under paragraph (1) of this subsection is rejected, the Secretary shall provide the State a written explanation of the Secretary's action and shall permit the State to modify and resubmit its proposed plan for approval, in accordance with the procedures formulated in such paragraph.

"(c) The Secretary shall, on the basis of reports submitted by the State agency, and on the Secretary's own inspections, make a continuing evaluation of the manner in which each State with a plan approved under this section is carrying out such plan. Whenever the Secretary finds, after affording due notice and opportunity for comment, that a State plan previously approved is not being followed or that it has become inadequate to assure the enforcement of Federal rules, regulations, standards, or orders applicable to commercial motor vehicle safety or compatible State rules, regulations, standards, or orders, he shall notify the State of withdrawal of approval of such plan. Upon receipt of such notice such plan shall cease to be in effect. Any State aggrieved by a determination of the Secretary pursuant to this subsection may seek judicial review pursuant to chapter 7 of title 5, United States Code. The State may, however, retain jurisdiction in any case commenced before the withdrawal of the plan whenever the issues involved do not directly relate to the reasons for the withdrawal of approval of the plan.

"(d) The Secretary shall not approve any plan under this section which does not provide that the aggregate expenditure of funds of the State and political subdivisions thereof, exclusive of Federal funds, for commercial motor vehicle safety programs will be maintained at a level which does not fall below the average level of such expenditure for its last two full fiscal years preceding the date of enactment of this section.

"(e) The Secretary shall limit a grant to any State in an amount not to exceed 70 percent of expenditures in that fiscal year in the State in the development and implementation of programs to enforce commercial motor vehicle rules, regulations, standards, or orders adopted pursuant to this section. The funds of the State and political subdivisions thereof which are required to be expended under subsection (d) of this section shall not be considered to be part of the non-Federal share. The Secretary is authorized to allocate, among the States whose applications for grants have been approved, these amounts appropriated for grants to support such programs pursuant to such criteria as may be established.

"(f) To carry out the purposes of this section, there is authorized to be appropriated out of the Highway Trust Fund not to exceed $10,000,000 in the fiscal year ending September 30, 1984, not to exceed $20,000,000 in the fiscal year ending September 30, 1985, not to exceed $30,000,000 in the fiscal year ending September 30, 1986, not to exceed $40,000,000 in the fiscal year ending September 30, 1987, and not to exceed $50,000,000 in the fiscal year ending September 30, 1988. Appropriated funds authorized by this section shall be used to make payments to States for the Federal share of costs expended by the States for the grants awarded. Grants made pursuant to the authority of this section shall be for periods not to exceed 1 fiscal year, ending at the end of a fiscal year."

(b) The analysis of chapter 4 of title 23, United States Code, is amended by adding "Sec. 409. Federal-Aid Motor Carrier Safety Program.".

MOTOR CARRIER SAFETY: PENALTY AUTHORITY

SEC. 407. Chapter 119 of title 49, United States Code, is amended by adding a new section as follows:

"Section 11901. (a) Notwithstanding any other provisions of law, if the Secretary of Transportation finds that a violation of the rules, regulations, standards, or orders issued by the Secretary under the authority transferred to the Secretary under section 1655(e)(6) of this title has occurred, the Secretary may issue a written notice to the alleged violator. Such notice shall describe with reasonable particularity the nature of the alleged violation and the provision alleged to have been violated. The notice shall fix a reasonable time for abatement of the alleged violation, specify the appropriate civil penalty, if any, and specify the actions which the Secretary proposed to be taken in order to avoid subsequent similar violations. The notice shall indicate that the alleged violator may, within 15 days of service, notify the Secretary of his intention to contest the matter. In the event of a contested notice, the Secretary shall afford the alleged violator an opportunity for a hearing on the record, following which the Secretary shall issue an order affirming, modifying, or vacating the notice of violation. With respect to uncontested actions of the Secretary under this subsection, all findings of fact, conclusions of law, fines, penalties and orders shall be final, and not be subject to judicial review.

"(b)(1) Except as hereinafter provided, any person who is determined by the Secretary to have committed an act which is a violation of recordkeeping requirements issued by the Secretary pursuant to the authority transferred to the Secretary under section 1655(e)(6) of this title shall be liable to the United States for a civil penalty not to exceed $500 for each offense, with each day of a violation constituting a separate offense, except that the total of all civil penalties assessed against any violator for all offenses relating to any single recordkeeping violation shall not exceed $10,000.

"(2) Any person who is determined by the Secretary to have committed an act which is a violation of any rule, regulation, standard, or order established or revised pursuant to the authority transferred to the Secretary under section 1655(e)(6) of this title (other than a recordkeeping violation) shall be liable to the United States for a civil penalty not to exceed $2,500 for each offense, with each day of a violation constituting a separate offense.

"(3) If the Secretary determines that violations or combinations of violations of certain rules, regulations, standards or orders promulgated under or issued pursuant to the Interstate Commerce Act, 49 U.S.C. 304 and 11701(a), create a substantial risk to public health and safety which have resulted in, or could reasonably lead to, serious personal injury or death, the Secretary may assess a civil penalty not to exceed $10,000 for each offense, with each day of a violation constituting a separate offense: Provided, however, that if such a violation shall be committed by an employee, such employee shall be liable for a civil penalty not to exceed $5,000, with each day of a violation constituting a separate offense. No civil penalty shall be assessed against an employee except for violations referred to in the previous sentence or for recordkeeping violations.

"(4) The amount of any civil penalty, and a reasonable time for abatement of the violation, shall by written order be determined by the Secretary, who may, as appropriate, take into account the nature, circumstances, extent, and gravity of the violation committed and, with respect to the violation, the degree of culpability, history of prior offenses, ability to pay, effect on ability to continue to do business, and such other matters as justice and public safety may require. In each case, the assessment shall be calculated to induce compliance.

"(c) The Secretary may require any violator served with a notice of violation to post a copy of such notice or statement thereof in such place or places and for such duration as the Secretary may determine appropriate.

"(d) The Attorney General may obtain enforcement of any order issued or penalty imposed by the Secretary under this section by bringing an action in the District Court of the United States in the district where the violation occurred or where the cited person resides or has his principal place of business.

"(e) Any person, who after a hearing, is adversely affected by a final order issued by the Secretary under this section, may within 30 days, petition for review of the order in the United States Court of Appeals in the circuit wherein the violation is alleged to have occurred or where he has his principal place of business or residence, or in the United States Court of Appeals for the District of Columbia Circuit. The findings of fact by the Secretary, if supported by substantial evidence, shall be conclusive. No objection that has not been urged before the Secretary shall be considered by the court, unless reasonable grounds existed for failure to neglect to do so. The commencement or proceedings under this subsection shall not, unless ordered by the court, operate to stay the order of the Secretary.

"(f) All penalties collected under this section shall be deposited into the Treasury as miscellaneous receipts.

"(g) Upon the issuance of a notice of violation as provided in subsection (a) of this section, charging that any person has violated the rules, regulations, standards, or orders issued by the Secretary under the authority transferred to the Secretary under section 1655(e)(6) of this title, and that the alleged violation creates a substantial risk to public health and safety, the Attorney General may bring an action in any District Court of the United States in the district where the violation occurred, or where cited, or where the person resides or transacts business, for appropriate temporary or permanent injunctive relief or a restraining order. The court shall have jurisdiction to grant such relief as it deems just and proper.

"(h) For purposes of this section, the term "employee" means—

"(1) a driver of a commercial motor vehicle (including an independent contractor while in the course of personally operating a commercial motor vehicle);

"(2) a mechanic;

"(3) a freight handler; or

"(4) any individual who is employed by an employer and who in the course of his employment directly affects commercial motor vehicle safety, but such term does not include an employee of the United States, a State or a political subdivision of a State who is acting within the course of such employment.".

SECTION-BY-SECTION ANALYSIS: TITLE I, HIGHWAY REVENUE ACT OF 1981—SHORT TITLE

SEC. 101 states that the title may be cited as the "Highway Revenue Act of 1982".

EXTENSION OF HIGHWAY TRUST FUND

SEC. 102 extends the period for which taxes may go into the Highway Trust Fund (HTF) from taxes incurred before October 1, 1984, to taxes incurred before April 1, 1990, or 5½ years. The time during which expenditures may be made from the HTF is extended to October 1, 1991. The time for reports to be made to the Congress concerning the HTF is extended for an indefinite period. Archaic language prescribing the expenditures which may be made from the HTF is amended for clarity and to reflect current law and practice. A dated section of the Highway Revenue Act of 1956 is repealed and conforming amendments are made.

THE TRANSIT ACCOUNT

SEC. 103 creates a Transit Account (TA) in the HTF to consist of amounts received in the HTF which are attributable to liability for tax incurred after March 31, 1983, from 1 cent per gallon of the diesel fuel, special motor fuel and gasoline user fees. For example, if the gasoline user fee is 9 cents a gallon on April 1, 1983, the TA would receive ⅑th of the gasoline taxes for which liability was incurred on April 1, 1983, and that were subsequently received in the HTF. The 1 cent for transit is proposed on the assumption that there will be an increase in

highway user fees equivalent to a 5 cent per gallon increase in motor fuel user fees.

Funds in the TA could be used only as provided in section 22 of the Urban Mass Transportation Act of 1964. The Secretary of the Treasury would have the same management duties with the TA as with the HTF and interest on obligations in the TA would remain in the TA. Repayable advances to the TA from the general funds of the Treasury could be made so that section 22 programs could begin immediately without waiting for funds to build up in the TA.

EXTENSION OF THE USER FEES WHICH ARE TRANSFERRED INTO THE HIGHWAY TRUST FUND

SEC. 104 extends the user fees which go into the Highway Trust Fund for 5½ years from October 1, 1984, until April 1, 1990.

MOTOR FUEL TAX RATES

SEC. 105 increases the rate of tax on gasoline, diesel and special motor fuels from 4 cents a gallon to 9 cents a gallon and repeals the tax on diesel and special motor fuel which is used in off-highway vehicles.

INCREASES IN MANUFACTURERS EXCISE TAX AND THRESHOLD WEIGHT

SEC. 106 increases the rate of tax for the manufacturers' excise tax on trucks and trailers from 10 percent to 12 percent. The taxable threshold weight (GVW) of 10,000 pounds is increased to a GVW of 33,000 pounds. The rate of tax for the manufacturers' excise tax on truck parts and accessories is increased from 8 percent to 12 percent. The taxable threshold is provided to tax only truck parts and accessories suitable for use with a vehicle having a GVW of 33,000 pounds or more. This would eliminate the excise tax for 76 percent of the trucks and trailers and for 96 percent of the truck parts and accessories which are currently taxable.

REPEAL OF TAX ON TUBES AND AMENDMENT OF TAX ON TIRES AND TREAD RUBBER

SEC. 107 repeals the excise tax on highway tires that weigh less than 100 pounds and on inner tubes. The rate of tax for the manufacturers' excise tax on tires is increased from 9.75 cents a pound for all tires to 25 cents a pound for tires that weigh more than 100 pounds. The rate of tax for the manufacturers' excise tax on tread rubber is increased from 5 cents a pound to 25 cents a pound. These changes would eliminate the tax from 98 percent of all tires.

REPEAL OF TAX ON LUBRICATING OIL

SEC. 108 repeals the manufacturers' excise tax on lubricating oil.

CHANGE IN HEAVY VEHICLE OIL USE TAX

SEC. 109 increases the rate of tax of use tax for certain heavy motor vehicles from $3 per 1,000 pounds taxable gross weight over 26,000 pounds to a graduated rate of tax for vehicles weighing 55,000 pounds and up. The new rates would be $100 a year plus $6 per 100 pounds or fraction thereof in excess of 54,999 pounds for vehicles with a GVW of more than 54,999 and less than 70,000 pounds, $1,000 a year plus $17 per 100 pounds or fraction thereof in excess of 70,000 pounds for vehicles of more than 70,000 and less than 80,000 pounds, and $2,700 a year for heavy highway vehicles with a GVW of 80,000 pounds or more.

An exemption is provided for vehicles which travel less than 2,500 miles per year on Federal-aid highways. This would exempt vehicles such as farming and logging vehicles which normally do not use Federal-aid highways.

A section in title I of this Act provides withholding of apportionments of Interstate and Interstate 4R funds for States which do not require proof of payment of the heavy vehicle use tax before registering a heavy vehicle to use public highways.

These changes would eliminate the use tax on certain heavy vehicles and buses for more than 60 percent of the vehicles now taxable.

GASOLINE USED FOR NONHIGHWAY USES

SEC. 110 expands the present system of credits and refunds to provide a credit/refund of the new 9 cent a gallon tax on gasoline, diesel and special motor fuels if used for nonhighway purposes.

FLOOR STOCK TAXES AND TAX REFUNDS

SEC. 111 provides for taxing products which are held in inventory on April 1, 1983, and, for which the tax has been paid at a lower rate than the new rates. This section also provides a mechanism for refunding the tax paid on products held in inventory on April 1, 1983, for which the tax has been paid at a higher rate that will be in effect on or after that date. In addition, a mechanism is provided to make refunds to consumers of tax paid on trucks and trailers which are purchased between November 29, 1982, and March 31, 1983, and for which the tax will be repealed by the increase in the taxable threshold from 10,000 pounds to 33,000 pounds.

SUNSET PROVISION

SEC. 112 provides that certain existing exemptions from the user fees dedicated to the Highway Trust Fund shall expire on April 1, 1990. These exemptions include those for State and local governments, intercity buses and other private buses.

STUDY OF USE TAX ALTERNATIVES AND PLAN FOR IMPROVING COLLECTION AND ENFORCEMENT OF SUCH TAXES

SEC. 113 requires the Secretaries of Transportation and the Treasury to study alternatives to the tax on heavy vehicles and to report to the Congress. The Secretary of the Treasury is authorized to permit States to assist in the collection or enforcement of the heavy vehicle user tax.

SECTION 201—SHORT TITLE

This section provides that title II may be cited as the "Federal-Aid Highway Reauthorization Act of 1982".

SECTION 202—REVISION OF AUTHORIZATION OF APPROPRIATIONS FOR THE INTERSTATE SYSTEM

This section revises the authorizations for Interstate construction for fiscal years (FY's) 1984 through 1990 from $3.225 billion to $3.80625 billion for FY 1984 from $3.625 billion per FY to $4.0 billion for FY 1985, $4.5 billion per FY for FY's 1986, 1987, and 1988, and $4.0 billion per FY for FY's 1989 and 1990 and provides an authorization for Interstate construction for FY 1991 of $4.0 billion. The $3.80625 billion authorization for FY 1984 includes $3.225 billion apportioned pursuant to the Federal-Aid Highway Act of 1982.

SECTION 203—AUTHORIZATION OF USE OF COST ESTIMATE FOR APPORTIONMENT OF INTERSTATE FUNDS

This section approves apportionment factors to be used to apportion Interstate construction funds authorized for FY's 1985 and 1986.

SECTION 204—HIGHWAY AND HIGHWAY SAFETY AUTHORIZATIONS

This section authorizes the appropriation of sums out of the Highway Trust Fund for FY's 1983, 1984, 1985, 1986, 1987, and 1988.

Subsection (a) provides authorizations for the primary system not to exceed $1.875 billion for FY 1983, $2.0 billion for FY 1984, $2.1 billion for FY 1985, $2.3 billion for FY 1986, $2.6 billion for FY 1987, and $2.6 billion for FY 1988, and for the secondary system not to exceed $400 million for FY 1983 and $400 million per FY for each of the FY's 1984, 1985, 1986, 1987, and 1988. The FY 1983 primary and secondary authorizations include authorizations provided in the Federal-Aid Highway Act of 1982.

Subsection (b) provides authorizations for the urban system of not to exceed $800 million for FY 1983 and $800 million per FY for each of the FY's 1984, 1985, 1986, 1987, and 1988. The authorization for FY 1983 includes authorizations provided in the Federal-Aid Highway Act of 1982.

Subsection (c) provides authorizations for the Federal Lands Highways Program. Paragraph (1) provides not to exceed $64,500,000 for FY 1983 and $75 million per FY for each of the FY's 1984, 1985, 1986, 1987, and 1988 for forest highways. Paragraph (2) provides not to exceed $22,750,000 for FY 1983 and $25 million per FY for each of the FY's 1984, 1985, 1986, 1987, and 1988 for public lands highways. Paragraph (3) provides $75 million for FY 1983 and $100 million per FY for each of the FY's 1984, 1985, 1986, 1987, and 1988 for parkways and park highways. Paragraph (4) provides $75 million for FY 1983 and $100 million per FY for each of the FY's 1984, 1985, 1986, 1987, and 1988 for Indian reservation highways. The authorizations for forest highways and public lands highways for FY 1983 includes authorizations provided in the Federal-Aid Highway Act of 1982.

Subsection (d) provides an authorization for bridges of not to exceed $1.3575 billion for FY 1983 and $1.51 billion per FY for each of the FY's 1984, 1985, 1986, 1987, and 1988. The authorization for FY 1983 includes an authorization provided in the Federal-Aid Highway Act of 1982.

Subsection (e) provides a Discretionary Bridge Fund set aside of $300 million per FY for each of the FY's 1983, 1984, 1985, 1986, 1987, and 1988. The set aside for FY 1983 includes sums set aside by the Federal-Aid Highway Act of 1982. Discretionary Bridge funds shall be available for obligation for a period of 2 years. Projects eligible for the funds are those that cost more than $10 million or those that cost at least twice a State's annual fund apportionment. Discretionary bridge funds not obligated within the 2-year period shall be reallocated at the discretion of the Secretary of Transportation. An additional $510 million is set aside for bridges other than on the primary system.

Subsection (f) authorizes for the Highway Safety Improvement Program $307 million for FY 1983 and $390 million per fiscal year for each of the FY's 1984, 1985, 1986, 1987, and 1988.

Subsection (g) authorizes $650 million per FY for each of the FY's 1984, 1985, 1986, 1987, and 1988, for highway substitute projects under 23 U.S.C. 103(e)(4).

Subsection (h) rescinds the unapportioned or unallocated sums authorized by sections 4 and 5 of the Federal-Aid Highway Act of 1982. Authorizations rescinded include primary, urban, secondary, forest highways, public lands highways, economic growth center development highways, the Great River Road, bridge, hazard elimination and rail-highway crossings.

SECTION 205—INTERSTATE SYSTEM RESURFACING AUTHORIZATION

This section provides authorizations for Interstate 4R of not to exceed $2.1125 billion for FY 1984, $2.55 billion for FY 1985, $2.8 billion for FY 1986, $3.0 billion for FY 1987, $3.3 billion for FY 1988, and $3.9 billion for FY 1989. Interstate 4R apportionments not needed for 4R may be transferred to primary system apportionments. The authorization for FY 1984 includes sums previously apportioned. Eleven ($11) million of the authorization for FY 1984 is set aside for the Woodrow Wilson bridge.

SECTION 206—DEFINITION

This section changes the definition of "construction" to permit Federal participation in State highway agency audit costs incurred in performing Federal-aid project related audits which directly benefit the Federal-aid highway program. State highway agency audit costs are not now eligible. Audit costs incurred in special studies or audits and investigations performed for management purposes that could not be shown to directly benefit the Federal-aid highway program would not be eligible for reimbursement.

SECTION 207—RELOCATION OF UTILITY FACILITIES

Subsection (a) of this section would amend the definition of "construction" to make clear that the relocation of utilities for safety purposes is eligible work for Federal reimbursement under title 23 of the United States Code.

Subsection (b) amends 23 U.S.C. 123, Relocation of Utility Facilities, to permit payment for utility relocations on any Federal-aid system or under any Federal-aid program and to provide that the Secretary may waive the provisions of 23 U.S.C. 123(a) to allow Federal participation in costs incurred by the State in relocating utilities for purposes of eliminating hazards, when he determines that such a waiver facilitates the State's safety improvement program.

SECTION 208—INTERSTATE WITHDRAWAL AND SUBSTITUTION

Subsection (a)(1) of this section places a limit on existing provisions which provide that the base cost of a withdrawal is the cost as shown in the latest congressionally approved Interstate Cost Estimate. The 1983 cost estimate would be used to establish the base costs for all withdrawals approved after Congress approves the 1983 cost estimate.

Subsections (a) (2) and (3) prohibit construction cost adjustments to the sums made available by withdrawals after the date Congress approves the 1983 Interstate System Cost Estimate. Until that date cost adjustments will continue to be made to the date of approval of such substitute project.

Subsection (a)(3) permits the use of funds for substitute projects in areas, urban or rural, other than the urbanized area from which the Interstate project was withdrawn upon the agreement of all involved local officials and the Governor.

Subsection (b) clarifies and revises the funding authority for substitute projects. Funds for mass transit substitute projects will continue to come from the General Fund and will remain available until expended. Highway substitute projects will be funded from the HTF, and be available for obligation when appropriated and apportioned commencing with FY 1984. Also, commencing with FY 1984 appropriations for highway substitute projects will be apportioned to States by a formula based on relative annual highway substitution needs as determined by the Secretary. In determining annual needs, the Secretary will consider, together with other available information, each State's approved substitution concept program and its remaining funding entitlements under 23 U.S.C. 103(e)(4). Appropriated funds will be available until expended. However, funds apportioned to the States must be obligated within 2 years. If not obligated in that period, the funds will be withdrawn from the State and reapportioned to all others in accordance with the established formula.

Subsection (c) provides that sums deducted from a State's Interstate unobligated apportionments when a withdrawal is made shall be available in the Interstate Discretionary Fund for reallocation by the Secretary.

Subsection (d) provides that any route or segment added to the Interstate System after March 1, 1978, pursuant to specific legislation, will not be eligible for withdrawal and substitution.

SECTION 209—PRIMARY PROGRAM

This section would eliminate the priority primary program (23 U.S.C. 147) and the connector primary demonstration program (section 151 of the Federal-Aid Highway Act of 1978) to allow the States to set their own priorities. Effective October 1, 1983, any unobligated authority for the priority primary program would be apportioned by the Secretary of Transportation in the same manner as primary funds and would remain available for obligation for 4 years. Pertinent sections of title 23, United States Code, would be amended to reflect the elimination of the priority primary program.

SECTION 210—HOLD HARMLESS—INTERSTATE RESURFACING

This section provides that each State that has Interstate mileage designated under section 103(e) of this title shall receive sufficient Interstate 4R apportionments for FY's 1984 and 1985 to assure that its total Interstate apportionments (4R and Construction) for FY's 1984 and 1985 are not less than total Interstate apportionments would have been if this Act had not been enacted.

SECTION 211—REPORTS

Subsection (a) of this section would repeal and eliminate requirements that the Secretary of Transportation report to the Congress on the enforcement of the vehicle weight limitations program, and on an interdepartmental coordination study.

Subsection (b) of this section codifies the highway needs report submitted to the Congress every two years pursuant to section 3 of Pub. L. 89-139 and section 17 of the Federal-Aid Highway Act of 1968.

SECTION 212—TECHNICAL AMENDMENTS

Subsection (a) of this section strikes dated and unnecessary language in section 109(h) of title 23, United States Code.

Subsection (b) of this section changes a period to a comma in section 119(a) of title 23, United States Code, to correct the punctuation in the section.

Subsections (c), (d), (e), and (f) of this section rewrite 23 U.S.C. 137, 142, 146, and 149, respectively.

Subsection (c) amends 23 U.S.C. 137 to incorporate the construction or designation of carpool/vanpool parking facilities, previously authorized in 23 U.S.C. 146. This section further permits the provision of exclusive carpool/vanpool parking facilities whether or not existing mass transportation service exists and authorizes Interstate 4R funds and primary funds to participate in the cost of projects that will benefit an Interstate highway. Regular Federal-aid Interstate funds may be used for parking facilities to the extent permitted by section 108(b) of the Federal-Aid Highway Act of 1956.

Other restrictions or conditions are repealed as unnecessary and redundant.

Subsection (d) amends 23 U.S.C. 142 to incorporate projects for the construction or designation of exclusive or preferential carpool/vanpool lanes and exclusive or preferential truck lanes. These projects were previously authorized in 23 U.S.C. 145 and 23 U.S.C. 149. This subsection authorizes the use of Interstate 4R and primary funds for such projects. Federal-aid Interstate construction funds may be used only to the extent permitted by section 108(b) of the Federal-Aid Highway Act of 1956, as amended.

Other provisions setting funding ceilings for nonhighway public mass transit projects during a specified time frame have been repealed as obsolete. A provision requiring public transit routes and schedules to be used on the comprehensive planning process established under 23 U.S.C. 134 is repealed as unnecessary and burdensome. All fringe and corridor parking provisions will be included in 23 U.S.C. 137, as amended by subsection (c).

Subsection (e) amends 23 U.S.C. 146 to remove as redundant highway-related incentives such as preferential carpool lanes, traffic control devices and preferential carpool parking facilities and would permit the use of Federal-aid primary, secondary, and urban funds for projects designed to encourage the use of carpools and vanpools. Such projects can provide transportation for elderly and handicapped persons and can include the purchase of vehicles for carpool and vanpool use.

Subsection (f) repeals as redundant 23 U.S.C. 149, Truck Lanes, concerned with the construction of exclusive or preferential truck lanes as projects on the Federal-aid system. The substance of 23 U.S.C. 149 is included in 23 U.S.C. 142 as revised in subsection (d).

SECTION 213—CLEAN AIR

This section repeals 23 U.S.C. 109(j) which requires the Secretary of Transportation, after consultation with the Administrator of the Environmental Protection Agency, to develop and promulgate guidelines to assure that Federal-aid highways are consistent with approved plans to implement ambient air quality standards for air quality control regions designated under the Clean Air Act. The subsection repealed is unnecessary because it duplicates 42 U.S.C. 7506(c). Federal agencies are required (42 U.S.C. 7506(c)) to assure that their activities "conform" to air quality implementation plans.

SECTION 214—VENDING MACHINES ON THE INTERSTATE SYSTEM

This section would permit vending machines on Interstate rights-of-way for the benefit of the traveling public without cost to the Federal Government.

SECTION 215—CONSTRUCTION

Title 23, United States Code, now requires that the Secretary inspect each highway construction project. This amendment would require the Secretary to establish procedures for inspecting and approving construction but would not require a final inspection of each project. The amendment would thereby eliminate an unnecessary requirement. Current law also provides that

informational signs erected on any project where actual construction is in progress and visible to highway users must conform with standards developed by the Secretary. This amendment would permit the Secretary to approve standards developed by other parties as well as those developed by the Department of Transportation (DOT).

SECTION 216—CONSTRUCTION BY STATES IN ADVANCE OF APPORTIONMENT

This section amends the existing advance construction provision to permit construction by States of highway substitute and bridge projects in advance of apportionment of highway substitute and bridge funds apportioned under 23 U.S.C. 103(e)(4) and 144.

SECTION 217—PAYMENT TO STATES FOR BOND RETIREMENT

This section would repeal those sections which require payments to States for bond retirement and which require the payment of interest on bonds. The bond provisions of title 23, United States Code have not been utilized to a significant extent. This Department does not support the payment of interest as a cost of construction. The amounts involved in interest payments are difficult to estimate. Further, interest is a finance cost, not a construction cost, and should not be borne by the Federal Government.

The advance construction procedures of 23 U.S.C. 115 would be retained. Bond provisions of title 23 are unnecessary except to provide for the payment of interest. In all other respects, construction by the States in advance of apportioned funds can do what bond provisions do.

SECTION 218—MAINTENANCE

This subsection would amend subsection 116(c) of title 23, United States Code, to permit the Secretary to withhold project approval for projects in specific areas within a State, or for the entire State, where the Secretary finds that a project is not being properly maintained. Under present law, the Secretary must withhold project approval for the entire State for all projects when a single project is not being properly maintained. Present law does not represent a practical enforcement sanction. Stopping all project approvals in an entire State could involve massive disruption of planning and considerable economic waste. The amendment provides a practical enforcement sanction which should be an effective tool in enforcing maintenance.

Subsections (b), (c), (d), and (e) transfer maintenance provisions from 23 U.S.C. 109 and 119 to 23 U.S.C. 116. Subsection (e) makes a clarifying amendment to establish the period of availability of Interstate apportionments that are reduced and then increased. The period of availability shall be the same as if the apportionments had not been reduced.

SECTION 219—CERTIFICATION ACCEPTANCE

This section amends 23 U.S.C. 117 to provide for the elimination of the requirement to make a final inspection on every project under the certification acceptance program and the expansion of the Secretary's authority to discharge his responsibilities under the certification acceptance concept to include any Federal law, except Civil Rights and bridge clearances, provided that the Secretary can make a finding that the State has procedures which are sufficient to ensure such projects will be carried out in accordance with the provisions of such other Federal laws, regulations, and policies. This language is intended, in part, to ensure that States carrying out Federal law under this provision are subject to the jurisdiction of Federal courts. These changes in no way would relieve the State highway departments from entering into formal project agreements with the Secretary pursuant to section 110 of title 23. The amendments would make certification acceptance more attractive to the State because of the expanded coverage and the reduction in Federal involvement and redtape.

SECTION 220—INTERSTATE DISCRETIONARY FUND

This section would amend 23 U.S.C. 118(b) to make the Interstate Discretionary Fund discretionary. Presently, Interstate Discretionary Funds are allocated to the States with ready-to-go projects on a first-come, first-served basis with no discretion to the Secretary. The Secretary, in allocating the Interstate Construction Discretionary Fund, would be required to give high priority to Interstate projects of unusually high cost in relation to the State's apportionment and to projects which contribute to the completion of Interstate segments not open to traffic.

This section provides that $300 million of the amount available for apportionment for the Interstate construction program will be set aside for the Interstate Discretionary Fund beginning with the authorization for FY 1985. The $300 million will be an addition to any other available funds. The set aside will ensure that funds will be available for particularly important projects which are eligible for discretionary funds.

SECTION 221—PROGRAM CONSOLIDATION

This section would repeal the following categorical highway programs: economic growth center highways (23 U.S.C. 143); Great River Road (23 U.S.C. 148); access to lakes (23 U.S.C. 155); highways crossing Federal projects (23 U.S.C. 156); Inter-American Highway (23 U.S.C. 212); Rama Road (23 U.S.C. 213); Safer Off-System Roads (23 U.S.C. 219); Bridges on Federal Dams (23 U.S.C. 320); railroad-highway crossings—demonstration project (section 163 of the Federal-Aid Highway Act of 1973); Overseas Highway (section 118 of the Federal-Aid Highway Amendments of 1974); Bikeway Demonstration program (section 119 of the Federal-Aid Highway Amendments of 1974); Bicycle program (subsections 141 (a), (c), (d), (e), and (i) of the Surface Transportation Assistance Act of 1978); and Safety Education and Information (section 209 of the Surface Transportation Assistance Act of 1978). The outstanding balance of sums appropriated and contract authority established for such programs shall remain available for expenditure or obligation under the conditions applicable prior to their repeal except that the unexpended apropriations for access to lakes, the bikeway demonstration program, and the bicycle program shall be available for two fiscal years following the fiscal year of enactment of this section and the unexpended appropriations for bridges on Federal dams shall be available for three fiscal years following the fiscal year of enactment of this section.

The unappropriated balance of sums authorized for such programs is rescinded. Additionally, effective on the date of enactment of this section, the unappropriated balance of sums authorized to carry out the outdoor advertising program is rescinded.

SECTION 222—EMERGENCY RELIEF

Subsection (a) of this section amends subsection (a) of section 125, title 23, United States Code, to make clear that the term "catastrophic failure" means failures which are sudden, unexpected, and result from external forces either natural in narrow or limited areas, such as localized hurricane force winds, earthquakes, and the like or man made, such as collisions by ships or aircraft. "Catastrophic failure", for purposes of this section, does not mean failure which is the result of structural deficiencies or physical deterioration. Bridges which are in imminent danger of collapse as a result of structural deficiencies or physical deterioration may be eligible for Federal funding under section 144 of title 23, United States Code, the Highway Bridge Replacement and Rehabilitation Program. Section 125 is intended to establish a fund which is to be held for sudden and unexpected emergencies and is not intended to be used for maintenance costs, or for deficiencies in, or the ordinary deterioration of a structure.

Subsection (a) also amends subsection (a) of section 125 by deleting references to bridges which have been closed to traffic between December 31, 1967, and December 31, 1970, inasmuch as those bridges have been repaired and reconstructed and have been reopened to vehicular traffic.

Subsection (b) of this section provides that all past expenditures for emergency relief under 23 U.S.C. 125 shall come from the HTF and not partially from the General Fund of the Treasury. Section 125 of title 23, United States Code, now provides that 40 percent of emergency relief expenditures prior to the FY ending September 30, 1978, are authorized from the General Fund of the Treasury.

Subsection (c) would amend 23 U.S.C. 125(b) to provide that expenditures for projects resulting from a single natural disaster or a single catastrophic failure shall not exceed $30 million in a State.

Subsection (d) would apply the amendment made by subsection (c) to natural disasters or catastrophic failures which the Secretary finds to be eligible for emergency relief and subsequent to the enactment of this section.

Subsection (e) would amend 23 U.S.C. 120(f), which pertains to the Federal share for highway emergency relief, to change the Federal share payable to 75 percent, except for Federal lands highways which would still receive 100 percent Federal funding. Under current law, the Secretary is authorized to increase the Federal share for emergency relief projects to 100 percent. The proposed change is in accordance with Administration policy that the Federal share for disaster assistance should be 75 percent.

Subsection (e) also defines the total cost of a project as the cost of construction less any amounts received by the State in the way of damages or insurance proceeds. Additionally, this subsection requires that the State promptly credit the project with any such recoupments upon receipt thereof. Such recoupments could not be used to offset only the State's pro rata share of the project but must be applied to reduce the total project cost upon which the Federal pro rata share is based.

Subsection (f) would apply the Federal share provisions of 23 U.S.C. 120(f) as amended by this bill to all natural disasters or catastrophic failures which the Secretary finds to be eligible for emergency relief subsequent to the enactment of the bill.

SECTION 223—COMMERCIAL MOTOR VEHICLE WEIGHT

Subsection (a)(1) makes mandatory the previously permissive maximum weight

limits of 80,000 pounds gross, 20,000 pounds single axle and 34,000 pounds tandem axle.

SECTION 224—TOLL ROADS

Subsection (a) of this section amends 23 U.S.C. 129(a) to provide for toll financing of new highway construction projects in addition to presently eligible bridge and tunnel projects. This amendment would allow States to enter into a 23 U.S.C. 129(a) agreement even if Federal funds had already been obligated for project activities on the facility. An agreement could not be executed once the facility is open to traffic and the facility would not be eligible for Interstate 4R work or other Federal rehabilitation assistance during the period that tolls are collected.

Subsection (b) of this section amends Section 105 of the Surface Transportation Assistance Act of 1978 by eliminating the provision of payback for work done on existing Interstate toll roads with Interstate 4R funds should the toll road not become free. Subsection (c) of this section amends 23 U.S.C. 301 to provide that except as provided specifically by law, all highways (the term highways includes bridges and tunnels) shall be free from the tolls of all kinds.

SECTION 225—PRESERVATION OF PARKLANDS

This section has been amended to require section 4(f) application only in those situations where a transportation project would appreciably reduce the utility of the section 4(f) lands and eliminate most historic sites from coverage under this section.

Under this amendment, the language of the section 4(f) statute is revised to permit the officials having jurisdiction over the section 4(f) property, in consultation with the Secretary, to ascertain whether the project will appreciably reduce the utility of the public park, recreation area, wildlife and waterfowl refuge, or National Historic Landmark for the purposes for which it is intended. If the project will not appreciably reduce the utility of the site for the purposes for which it is intended, a section 4(f) evaluation will not be required. This minor change has been made to reduce paperwork burdens on State and local governments, and reduce a portion of the "redtape" involved in the current process.

Historic sites other than National Historic Landmarks have been eliminated from this section in order to simplify requirements and eliminate unnecessary duplication of effort which presently occurs when the official in charge of preparing the environmental impact statement prepares separate documents to meet the requirements of this section and section 106 of the National Historic Preservation Act. National Historic Landmarks will continue to receive consideration under section 4(f) since they are relatively few in number and have been accorded special recognition under the National Historic Preservation Act. Elimination of most historic sites from section 4(f) consideration should result in a savings of both time and money by making environmental processing for Federal-aid highway projects more efficient. This change will not reduce the protection afforded historic sites since historic sites will continue to receive full protection under section 106 of the National Historic Preservation Act. Regulations specify the formal consultation process and written agreements that are required with the President's Advisory Council on Historic Preservation, the State Historic Preservation Officer and the FHWA when an FHWA funded project is located in the vicinity of a historic property or near a property eligible for inclusion on the National Register of Historic Places.

SECTION 226—EQUAL OPPORTUNITY

Subsection (a) of this section amends 23 U.S.C. 140(a) to assure that equal employment opportunity must be provided without regard to sex.

Subsection (b) amends 23 U.S.C. 140(b) to authorize the use of $10 million per fiscal year from the sums available under 23 U.S.C. 104(a) (administrative funds) as provided in appropriation acts to conduct and finance highway construction training and skill improvement programs. 23 U.S.C. 104(b), before amendment, provides for a $10 million set aside from annual apportionments for these purposes.

Subsection (c) adds a new subsection (c) to 23 U.S.C. 140 which authorizes the Secretary of Transportation to conduct and finance training and assistance programs for socially and economically disadvantaged individuals and which authorizes the use of $10 million per fiscal year from the sums available under 23 U.S.C. 104(a) (administrative funds) as provided in appropriation acts for such purposes.

The $10 million provided in 23 U.S.C. 104(b) and the $10 million provided in 23 U.S.C. 140(c) would come from administrative funds deducted from funds available for Federal-aid highway construction. The net effect on the Federal budget is zero.

SECTION 227—ENFORCEMENT OF HEAVY VEHICLE USE TAX

This section provides that States which may lawfully register heavy vehicles in a fiscal year which have not presented proof of payment of the heavy vehicle use tax shall not receive apportionments of Interstate funds during that fiscal year. Sums withheld from apportionment under this subsection shall be apportioned to other States. This section is effective January 1, 1985, to provide States with sufficient time to comply.

SECTION 228—HIGHWAY BRIDGE REPLACEMENT AND REHABILITATION PROGRAM

This section provides for two separate apportionment formulas. One formula will be used to apportioned primary system bridge funds, the other will be used to apportion funds for all bridges excluding primary. This latter group includes Federal-aid secondary, urban, off-system bridges. Each formula takes into account both replacement and rehabilitation needs. The square footage of deficient bridges under each formula shall be multiplied by its respective unit price on a State-by-State basis and the total cost in each State divided by the total cost of the Nation's deficient bridges to yield the apportionment factors, except that no State shall receive less than one quarter of one percent nor more than 8 percent of the annual apportionment under each formula.

These apportionments are available for two years and shall be reapportioned to other States if they are not obligated within the period of availability.

Subsection (b) of this section amends section 144(h) of title 23, United States Code. Section 144 now exempts bridges rehabilitated or replaced with Federal-aid funds from the permit process required under Section 502 of the General Bridge Act of 1946 and Section 9 of the Bridge Act of March 3, 1899, if such bridges are over waters (1) which are not subject to the ebb and flow of the tide, and (2) which are not used and are not susceptible to use in their natural condition or by reasonable improvement as a means to transport interstate or foreign commerce. Many waters subject to the ebb and flow of the tide (tidal waters) cannot be used for interstate or foreign commerce. A permit should not be required for a bridge over tidal waters which cannot be reasonably improved to transport interstate or foreign commerce. This amendment would exempt bridges from the permit process except for bridges over waters which with reasonable improvement could be used to transport Interstate or foreign commerce.

SECTION 229—ALLOCATION OF URBAN FUNDS

Existing law permits transferability between urban and primary system funds. However, it does not permit transfer of funds allocated out of the urban system funds attributable to urbanized areas of 200,000 or more population from the allocation of one urbanized area to that of another urbanized area or to an urban area. This amendment to section 150 of title 23, United States Code, will permit the transfer of such attributable funds to the allocation of another urbanized area in the State or to any other urban area in the State. A transfer, requested by the State, would be subject to the approval of the Secretary and the local officials of the urbanized area from which the funds are to be transferred. The proposed transfer provision would enhance the capability of the States and local governments by giving them more flexibility in programming projects, setting priorities, and utilizing scarce financial resources.

SECTION 230—HIGHWAY SAFETY IMPROVEMENT PROGRAM

This section establishes a single Highway Safety Improvement Program (23 U.S.C. 151) by combining all or parts of four existing safety categories—Hazard Elimination, Rail-Highway Crossings, Safer Off-System Roads, and the FHWA highway-related safety programs under section 402 of this title.

Each State must develop and implement a continuous Highway Safety Improvement Program which includes procedures for planning, implementation, and evaluation of highway safety improvement projects. As a part of this program, each State must have a process for inventorying and analyzing accident, traffic and highway data; for conducting engineering surveys of hazardous locations, sections and elements; and for maintaining and implementing a prioritized schedule of projects for the improvement of the hazards identified. Each State must also continue to survey railroad crossings to identify those in need of safety improvements. The procedures and processes described are not new Federal mandates, but represent a consolidation of current requirements for the systematic selection of the most cost-effective highway projects specifically aimed at traffic accidents and injury reduction. Therefore, no new recordkeeping requirements are imposed and reporting requirements are eliminated. Any highway safety improvements project on a public road, except the Interstate, may be funded under this section. Section 203 of the Highway Safety Act of 1973 is repealed but funds authorized by that section will continue to be available until expended. The Federal share under this section is 90 percent except for rail-highway crossing projects and traffic signalization projects, in which case the Federal share is that provided in section 120(d) of title 23.

All unobligated authorizations for carrying out section 402 of title 23, United States Code, by the FHWA are rescinded. No new funds are authorized for the FHWA high-

way-related safety activities under chapter 4 since these projects may now be funded under this section. The purposes and scope of such highway-related projects and activities will be the same as under the existing section 402 program, including the results of rulemaking by FHWA and NHTSA on program effectiveness as required by the Omnibus Budget Reconciliation Act of 1981 (section 1107(d); Pub. L. 97-35). Authorizations for the State and Community Highway Safety Program carried out by NHTSA are included in separate legislation.

Highway safety funds are apportioned to the States according to a formula based on population and road mileage. The Territories are excluded from the apportionment formula. The section 151 funds are available as if they were primary funds except where inconsistent with the purposes of this section. In addition, primary, urban, and secondary system funds are eligible for all safety projects.

SECTION 231—INTERAGENCY ENVIRONMENTAL PROCESS REVIEW

This section adds a new section to title 23, United States Code, under which the Secretary of Transportation would be required to review the Federal-aid highway policies, procedures, and regulations which have been issued to implement the National Environmental Policy Act of 1969, as amended, Executive Orders and other statutes and regulations. After consultation with other Federal agencies, the Secretary shall consolidate the various environmental compliance procedures into a single project development process to be coordinated by DOT.

The purpose of such review is to minimize, to the maximum extent practicable, duplication, needless paperwork, and delays in action on projects under title 23, United States Code. This section is intended to reinforce the national policy on redtape set forth in section 101(e) of title 23, United States Code.

The Secretary would establish procedures to ensure that adequate information is developed from a public hearing, if one is held, so that the record available to Federal decisionmaking agencies provides an adequate basis for them to make the necessary determination. As an example, if a public hearing is held, information on the needs of navigation interest would be developed so the Coast Guard could issue a bridge permit.

SECTION 232—FEDERAL LANDS HIGHWAYS PROGRAM

This section would amend or eliminate the separate provisions of chapter 2 of title 23, United States Code, which provide for forest highways (sec. 204), park roads (sec. 206), parkways (sec. 207), Indian reservation roads (sec. 208), and public lands highways (sec. 209), and establish in lieu thereof a coordinated Federal Lands Highways Program under which each class of Federal lands highways would be continued. The program would confer upon the Secretary of Transportation certain oversight and coordinating responsibilities for the same uniform policies as roads which are on the Federal-aid systems. This proposal will cover the higher calss of roads, which are open to the public, as designated by the term "highway" in the titles of forest, public lands, park, and Indian reservation systems including parkways. The lower class of roads will remain under the direct administration of the responsible land management agency.

This proposal would not transfer jurisdiction of the Federal roads from the agencies that currently manage the respective Federal lands. Rather, it would involve DOT in coordination with the land managing agency, in the planning studies and program development of public Federal lands highways roads. The DOT would also provide design and construction assistance to the land managing agencies. This proposal also provides, under section 204, one and one-half per centum of funds appropriated for Federal lands highways to be made available for expenditure by the Secretary for planning, studies, and demonstration of technology relative to such highways.

Highway improvements funded and adminstered by the U.S. Park Service, U.S. Forest Service, Bureau of Indian Affairs, and other agencies (other than this Department) are not presently subject to Section 4(f) of the DOT Act. Provisions have been included in this section to preclude expansion of the Section 4(f) coverage to the Federal Lands Highway Program.

SECTION 233—DEFENSE ACCESS ROADS

This amendment to section 210(c) of title 23, United States Code, would repeal an out-of-date appropriation and replace it with general authorizing language not tied to a specific sum or time period.

Section 210(c) of title 23, United States Code, provides for the use of up to $5,000,000 of any funds appropriated under the Act approved October 16, 1951 (65 Stat. 422), for highways in military training and maneuver areas. In 1958, Pub. L. 85-767 (72 Stat. 885), which revised and codified prior highway legislation as title 23, United States Code, repealed other Acts and portions of Acts. In addition, the second Supplemental Appropriations Act of 1957 (including the Bureau of Public Roads under the Department of Commerce) rescinded, effective June 20, 1957, all unexpended appropriations from prior laws. (Pub. L. 84-855). Thus, there are no current highway appropriations from which any part of $5,000,000 could be made available for the construction, maintenance, and repair of maneuver areas.

In 1955, the Office of Management and Budget directed the Department of Defense to budget for defense access roads. Since 1957, each military department has budgeted separately for defense access roads. By direction of the Assistant Secretary of Defense (Comptroller), maintenance and repair of public highways used for maneuvers will be accomplished from funds made available by the appropriate military department; but in order to ensure prompt repairs, military regulations provide that the Commander, Military Traffic Management Command, may authorize the FHWA to temporarily use available access road funds, pending payment by the military department concerned from its operation and maintenance funds. Since funds for the repair of maneuver road damage are not available from highway appropriations acts, but are available from defense appropriations acts, the opening clause is misleading and should be amended to reflect current law and practice.

This amendment to section 210(c) of title 23, United States Code, has been coordinated with the Military Traffic Management Command.

SECTION 234—RESEARCH AND PLANNING

This section would amend 23 U.S.C. 307 to make available a percentage of funds apportioned pursuant to section 144 (Highway Bridge Replacement and Rehabilitation Program) for planning and research purposes to offset the elimination of the optional planning and research (½ percent) program. The amendments would confirm a legal basis for pooling one and one-half percent planning and research (HPR) funds into a single fund which had previously been accomplished administratively. A uniform period of availability and a standard Federal matching share are also established.

SECTION 235—COOPERATION WITH FEDERAL AND STATE AGENCIES AND FOREIGN COUNTRIES

This proposal would amend section 308 of title 23, United States Code, by authorizing the Secretary to carry out the provisions of this title in cooperation with the State highway and transportation departments and with organizations which are principally composed of duly elected and appointed State and local highway and transportation officials without regard to the provisions of the Federal Advisory Committee Act, 5 U.S.C., Appendix I. Although the formulation of Federal transportation policies and procedures is clearly a function reserved to the Secretary, the Secretary must be able to deliberate freely with State and local officials in the consideration of alternative policies and procedures and the impact of those alternatives at the State and local level. Expansive judicial interpretations of the Federal Advisory Committee Act have unnecessarily stifled government-to-government communications generally and, in particular, with respect to those grant-in-aid programs such as the Federal-aid highway program which require close coordination between State and local government officials and Federal officials to ensure effective planning and implementation. In a major decision involving the FHWA, the U.S. Court oi Appeals for the D.C. Circuit interpreted the exemption provision of the Act (section 4(c)), as not applying to contacts between Federal officials and an organization representing a national group of State officials. (*Center for Auto Safety* v. *Cox*, 580 F.2d 689, D.C. Cir. 1978).

We feel that this is not consistent with the Congressional intent which formed the basis for the 4(c) exemption, and have proposed this statutory language to resolve the difficulties created by this case. The revision would authorize the Secretary to administer Federal highway programs in cooperation with State and local officials either individually or collectively without the procedural burdens of the Federal Advisory Committee Act. The procedural requirements and safeguards which apply to the rulemaking process under the Administrative Procedure Act and related procedures of this Department would not be affected by this revision.

SECTION 236—OBLIGATION LIMITATION

This section provides an obligation limitation of $11.0 billion for FY 83 for Federal-aid highways and highway safety construction programs. The limitation does not apply to emergency relief projects, two bridge demonstration projects, the Woodrow Wilson bridge project and the Union Station project. The usual allocation formula, provision to provide sufficient authority to prevent lapse, and provision to set aside authority for administrative expenses and forest highways are included.

SECTION 237—HIGHWAY SCENIC HIGHWAY

This section would amend section 161(f) of the Federal-Aid Highway Act of 1973, as amended by section 21 of Public Law 96-106, to remove a technical problem presently preventing the State of West Virginia from maintaining the Highway Scenic Highway,

located partially within and adjacent to the Monongahela National Forest in the State. It would also allow local light truck traffic and limited commercial truck traffic on a permit basis only.

The Highland Scenic Highway was originally designed and constructed as a multipurpose State highway on the Federal-aid Highway System. As such, it was maintained by the State until the passage of the Federal-Aid Highway Act of 1973 which designated it as a scenic highway with portions limited solely to scenic and recreational use and passenger car use. The scenic highway designation precludes community service vehicles such as bread trucks, service trucks and farm trucks from using the highway and precludes use of the road for National Forest management activities requiring use of trucks. This designation thus made the highway a limited service highway which prevents maintenance by the State as State law prohibits the expenditure of maintenance funds on limited service highways.

This amendment would correct this anomaly by modifying the vehicle limitation so that the State could maintain the road and, at the same time, would protect the important recreational and scenic values of the highway.

SECTION 238—APPALACHIAN DEVELOPMENT HIGHWAY SYSTEM

Subsection (a) of this section would transfer the functions, powers, and duties of the Appalachian Regional Commission related to the Appalachian Development Highway System to the Secretary of Transportation. Subsections (b), (c), (d), (e), and (f) are technical transfer provisions and savings provisions.

Subsection (g) provides authorizations out of the HTF for the Appalachian Development Highway System of $80 million for FY 1984 and 1985, and $60 million for FY 1986. Sums authorized are available for obligation when appropriated. There is no contract authority. Sums authorized may be expended as appropriate for the repayment to States for prefinanced (advance construction) projects, for the completion of stage construction projects, and when sums are made available beyond those purposes, for the development of additional projects on the Appalachian Development Highway System. Funds will be made available to States in the Appalachian region based on their prorata share of the sums appropriated from the 4-year authorizations.

SECTION 239—TOLL HEARINGS

This section amends various Federal statutes to eliminate the authority of the Federal Highway Administrator to regulate the rate of tolls on bridges by determining the reasonableness of those tolls. States and toll authorities would be given greater flexibility in operating toll facilities. This Federal oversight of the reasonableness of tolls has proven to be administratively burdensome, legally unproductive, and has interjected the Federal Government in the role of a mediator in a dispute which could more appropriately be settled at the State and local level.

SECTION 240—WOODROW WILSON BRIDGE

This section amends section 9 of the Federal-Aid Highway Act of 1981, by adding subsection (e). Subsection (e) authorizes the Secretary of Transportation to approve projects for the reconstruction, resurfacing, restoration and rehabilitation of the Woodrow Wilson Memorial Bridge by the States of Maryland and Virginia and the District of Columbia. Eleven ($11) million from Interstate 4R apportionments for the fiscal year 1984 are set aside for purposes of this subsection. Subsection (e) projects cover the cost of future reconstruction and may include bascule spans, operating devices, and widening of the bridge. It also provides that these projects shall be carried out in accordance with the provisions of title 23, United States Code, unless the Secretary waives provisions not consistent with this section. Sums authorized under this subsection are not deducted from a State's apportionments nor included in the Federal-Aid Highway obligation limitation. The Federal share of the cost of projects shall not exceed 90 percent. The Secretary cannot approve any project under this subsection until title to the bridge is transferred and each of the three jurisdictions accepts title to their respective portions of the bridge without monetary consideration.

SECTION-BY-SECTION ANALYSIS: TITLE III

SECTION 301—SHORT TITLE

This Act may be referred to as the "Transit Assistance Authorization Act of 1982."

SECTION 302—AMENDMENTS TO SECTION 3—DISCRETIONARY CAPITAL GRANT PROGRAM

This section amends the Federal discretionary capital grant program for State and local transit systems. The section 3 program will proivde the Secretary a degree of flexibility to meet special capital needs that cannot be met through an annual formula. The discretionary program will also be available to fund existing Federal commitments for transit systems presently under construction.

Section 302(a) of the bill amends the section 3 program to require that recipients of capital grants have the technical and financial capability to maintain facilities and equipment that are purchased with Federal funds. Since operating assistance is proposed to be phased out, there is a Federal interest in ensuring that operating costs are not turned into capital costs by deferring maintenance. However, the Federal Government will not prescribe specific maintenance activities, because that is a local responsibility.

Section 302(b) of the bill revises the Federal share for section 3 capital projects. The statute currently requires the Federal Government to pay 80 percent of a project's costs. The amendment would revise the section 3 capital share to 50 percent. This amendment would reduce the demand on the discretionary resource and promote greater deliberation on the part of potential applicants and local officials with respect to local financial capacity, transit operating economics and efficiency before turning to the Federal Government for these discretionary funds.

Section 302(c) of the bill revises section 3 authorizations by discontinuing authorizations under section 4(c)(3)(A) after fiscal year 1983. Section 3 authorizations will continue under section 4(e) of the Urban Mass Transportation Act as amended by section 3 of the bill.

SECTION 203—ADMINISTRATIVE EXPENSES AND CAPITAL AUTHORIZATIONS

Section 303(a) of the bill authorizes appropriations for administrative costs to carry out the UMT Act. Current authorizations expired after fiscal year 1982. Such sums as are necessary are proposed to be authorized for administrative expenses. This section also deletes an authorization for a program to conform to the program changes made by section 207 of the bill.

Section 303(b) of the bill amends section 4(e) and provides authorizations under section 4(e)(1) for fiscal year 1984 through fiscal year 1988 for the section 3 discretionary capital grant program, the section 4(i) innovative methods and techniques grant program, the section 8 planning program, and the section 9 urbanized area capital formula program and the 16(b)(2) program to meet special needs of the elderly and the handicapped. These authorizations total approximately $9.9 billion. This amendment stipulates that, of the amounts available under section 4(e)(1), the Secretary shall make available a total of 10 percent for grants under the section 3 discretionary program, the section 4(i) innovative methods and techniques program and the section 16(b)(2) programs, and a total of 90 percent for grants under the section 9 capital formula program for urbanized areas and the section 8 planning program.

The authorization levels for the fiscal years 1984 through 1988 include amounts carried over from an adjustment to the special funding available for rail construction in the Washington, D.C. metropolitan area under P.L. 96-184. These adjustments are being proposed to avoid a duplication of construction funding sources.

Section 303(b) of the bill also provides authorizations under section 4(e)(3) for the section 18 formula grant program to other than urbanized areas and for the newly created section 21 capital formula program to other than urbanized areas. This provision authorizes $75 million for the non-urban grant programs in each fiscal year from 1983 through 1988. Section 203(b) of the bill permits concurrent funding of the sections 18 and 21 programs during fiscal years 1983 and 1984, but prohibits any new authorizations for section 18 after fiscal year 1984.

Section 303(c) of the bill also provides authorizations under section 4(f) for public transportation projects substituted for Interstate segments withdrawn under title 23. This interstate transfer authorization amount is $650 million per year for each fiscal year 1984 through 1988.

SECTION 304—RESEARCH AND TRAINING

This section authorizes and extends the programs for research, development, demonstration, and training expenses. These authorizations are expressed cumulatively. Budget authority which is not appropriated would be available to be appropriated in later years. This structure addresses the long-term nature and schedule variability of the research projects administered under the transit program.

SECTION 305—AMENDMENTS TO SECTION 5 FORMULA GRANT PROGRAM

The current section 5 formula capital and operating grant program for urbanized areas is not authorized after fiscal year 1982. The amendments proposed by this section create a phase out of operating assistance grants by fiscal year 1985. Beginning in fiscal year 1984, the section 5 formula capital grant program would be incorporated within the section 9 program created by section 6 of this bill.

Section 305(a) of the bill contains the authorizations for the first three tiers of section 5. These are sections 5(a)(1), 5(a)(2), and 5(a)(3), respectively. Operating assistance authorizations are contained in sections 5(a)(1), 5(a)(2), and 5(a)(3) and are proposed only through fiscal year 1984. The authorizations for the capital only tier of section 5, tier IV, have been added to the unitary authorization for the section 3 dis-

cretionary program, the section 4(i) innovative methods and techniques program, the section 8 planning program, the section 9 urbanized area capital formula program, and the section 16(b)(2) program to meet the special needs of the elderly and the handicapped. The operating assistance has been gradually reduced since fiscal year 1982 to give State and local governments time to adjust their programs and funding mechanisms.

Section 305(b) of the bill provides for one-fourth of the funds appropriated under tiers I and II, the two operating assistance tiers determined on the basis of population and population density, to be apportioned and allocated one-fourth on the basis of the 1970 Federal census and the other three-fourths to be allocated and apportioned on the basis of the 1980 Federal census. The Federal operating assistance program is being phased out by 1985. Retaining the use of the 1970 census for twenty-five percent of the funds appropriated for tiers I and II in fiscal year 1984 will lessen the negative impact upon current recipients of section 5 operating assistance. Moreover, Section 205(b) of the bill is similar to a Congressional instruction for tiers I and II in the Continuing Resolution for fiscal year 1982 (P.L. 97-276) and would continue this instruction through fiscal year 1984.

Section 305(c) of the bill amends the formula grant program to revise Federal lapse provisions. Since the operating assistance tiers will be phased out by fiscal year 1985, apportionments that have not been obligated by designated recipients or Governors within four years of the date of original apportionments cannot be added to these operating assistance tiers. The amendment provides that after September 30, 1983, funds that are not obligated by the Secretary with the four year period or are deobligated when a project is closed out after the end of the four year period of availability, will be added to the unitary authorization for the sections 3, 4(i), 8, 9, and 16(b)(2) programs.

The last sentence of section 305(c)(3) of the bill corrects a technical problem with the lapse of 1975 and 1976 apportionments. The Act had never been amended to reflect the change to a new Federal fiscal year in 1976 that changed the lapse of funds from June 30 to September 30. This amendment reflects that change and is consistent with the budgetary documentation that has been provided to Congress since the inception of the section 5 program.

Section 305(d) of the bill contains the amendment that ensures that no new operating assistance projects will be approved by the Secretary after the close of Federal fiscal year 1984. No new authorizations are provided for the first three tiers of section 5 after fiscal year 1984. The apportionments can, however, continue to be used for capital projects until the funds lapse.

Section 305(e) of the bill adds a maintenance requirement to section 5 that is similar to the maintenance requirement added to section 3 by section 2(a) of this bill.

Section 305(f) of the bill amends the current Federal requirement regarding public hearings prior to changes in fares or service. This requirement has been the impetus for a Federal regulation that transit operators have found burdensome. Many transit operators have mechanisms to consider public comment already and the current Federal statute reduces local flexibility.

This amendment would continue the requirement of a public comment process, but that public comment process can be locally determined. The requirement would be a condition only of operating assistance grants, and so the Federal requirement will be phased out when operating assistance is phased out.

Section 305(g) of the bill repeals the current Federal requirement that transit operators who receive Federal funds must provide off-peak service to elderly and handicapped persons at half-fare. This requirement is being repealed because it is a Federal intrusion into the non-Federal area of determining local fares. Many areas already have their own special fares for special groups of users. The timing of these fares, their level and eligibility should be locally determined and not dictated by the Federal Government.

SECTION 306—CAPITAL FORMULA PROGRAM FOR URBANIZED AREAS

This section creates a capital formula program for projects in urbanized areas. The principal benefits of the capital formula program include greater simplicity, enhanced predictability in funding, and greater flexibility for State and local governments. More specifically, the capital formula program would turn much of the control now exercised at the Federal level over to State and local governments, allow UMTA to administer more effectively its complete range of program and policy activities by reducing staffing requirements associated with a large discretionary program, and reduce the paperwork burden at all levels of government.

Capital formula program assistance for urbanized areas would be delivered on the basis of a revenue matching formula set forth in the new section 9(a). Section 9(a) provides that each urbanized area will receive an apportionment equal to its share of the total national non-Federal mass transportation operating revenue, although no urbanized area or portion thereof which is within one state can receive more than 20 percent of the total amount apportioned by formula. As used in the statute, non-Federal mass transportation operating revenue includes passenger fares; transportation revenues—special fares, school bus, freight and tariffs, charter service and auxiliary transportation revenues; non-transportation revenues; direct taxes levied by transit systems; State and local cash grants and reimbursements; State and local special fare assistance; and subsidies from other sectors of operations. Non-capital subsidies and revenues are those that are available for other than capital expenses.

The term "operating revenues" is intended in this section to refer to the funds used to pay ordinary, day-to-day costs of providing public transportation. It is intended that these terms exclude any items that are of a capital nature, such as equipment purchase or rental, repayment of earlier bond issues, land leases and any types of "creative financing" used to obtain equipment and facilities.

Section 9(b)(1) would limit the use of the capital formula program funds to mass transportation capital activities. Capital activities would include the purchase of spare parts for transit vehicles where the expected service life of the spare part exceeds one year. This would permit the purchase of items such as compressors and engine blocks that maintain the usefulness of vehicles.

The capital formula program funds cannot be used to construct new fixed-guideway systems or extensions to existing systems without the concurrence of the Secretary. Exceptions are made for exclusive busway facilities, for projects covered by existing letters of intent and full funding contracts, and for the federally agreed upon scope of the Washington, D.C. metropolitan area transit system. This section would not preclude the use of funds for the modernization of existing rail and other fixed-guideway systems.

Section 9(b)(2) would provide a funding source for section 8 planning activities and for the deployment innovative demonstration results. In order for local decisionmakers to make intelligent decisions regarding transportation projects in their communities, it is important that they be provided with adequate information. This requirement would ensure, in a non-intrusive way, that planning activities take place. Section 9(h) would apply section 8 planning requirements to the section 9 program. Section 9(b)(2) would set aside 2.5 percent of each apportionment for planning and the deployment of innovative transit techniques. Upon application by the Governor in areas under 200,000 and the designated recipient in areas of 200,000 or more, the Secretary would be able to waive the required set aside. The Governor or recipient would have to apply with the concurrence of the metropolitan planning organization.

Section 9(b)(3) would provide an 80 percent Federal share for section 9 grants.

Subsections (c), (d), (e), (f), and (h) of section 9 set forth a number of Federal requirements as a condition of assistance. Under subsection (c), UMTA would continue to enforce Title VI of the Civil Rights Act of 1964, and the private enterprise participation, charter bus and school bus provisions of the UMT Act. In addition, in order to receive a section 9 grant, a recipient would certify (1) legal, financial, and technical capacity; (2) authority to apply; (3) compliance with the Uniform Relocation Assistance and Land Acquisition Policies Act of 1970, and the relocation provision of the UMT Act; (4) compliance with the Davis-Bacon Act; (5) continuing control; (6) except as provided for bus procurements pursuant to the new section 12(b)(3), compliance with competitive procurement systems and the Buy America provision of the Surface Transportation Assistance Act of 1978; (7) compliance with the National Flood Insurance Act of 1968; (8) compliance with the public hearing requirements set forth in the new section 9(e), and (9) ability to meet the local share requirement.

Section 9(e) would require each recipient to prepare a proposed statement of activities and objectives. This statement would provide information concerning the amount of funds available to the recipient under section 9 and the range of activities that the recipient proposes to undertake under those funds. The recipient would be required to publish the statement for public examination and hold at least one public hearing to obtain the views of citizens. After considering public comments, the recipient would prepare a final statement which would also be available to the public.

Section 9(f) would permit recipients "to stand in the shoes" of the responsible Federal official with respect to the provisions of the National Environmental Policy Act of 1969 and other statutes concerning the environment. This provision is identical to an environmental provision in the Housing and Community Development Act of 1974 for the Community Development Block Grant. It enables the recipient to assume all responsibilities for environmental review deci-

sion-making and action. The subsection stipulates that the Secretary would issue regulations in consultation with the Council on Environmental Quality for the implementation of this provision.

Section 9(g)(1) provides for the selection of designated recipients to receive and dispense funds for urbanized areas of 200,000 or more. This provision differs from the section 5 designated recipient provision in that section 9(g)(1) does not include the sentence in section 5(b)(1) which requires that certain public transportation providers automatically become designated recipients. Moreover, not all designated recipients may wish to enter into annual projects agreements with UMTA, in which case UMTA will be dealing directly with the recipients of the funds. Hence the use in some cases of the word "recipient" rather than "designated recipient," makes it clear that the recipient of the funds (which in some cases may not be a designated recipient) must meet the self-certification and other requirements in section 9.

Section 9(g)(2) provides for the fair and equitable distribution by the Governor of section 9 funds for urbanized areas with populations under 200,000 and section 9(g)(3) provides for section 9 funds to remain available to the Governor or designated recipient for a period of four years. Both paragraphs (2) and (3) parallel provisions in the existing section 5 urban formula program.

As described above, section 9(h) would apply the section 8 planning requirements to section 9 grants.

Section 9(i) specifies that the Secretary would enter into an annual grant agreement as soon as practicable after receiving the submissions required under section 9.

Section 9(j) sets forth the audit requirements. The provision would require the recipient to make such reviews and audits as the Secretary deems appropriate. These reviews and audits would take place at least annually and would indicate whether the recipient has and can continue to carry out its activities in a timely manner and in a manner that is not plainly inconsistent with the requirements of the UMT Act.

Under section 9(k), any recipient which submitted a false or fraudulent statement or certification would be subject to criminal penalties under Title 18 of the United States Code. Title 18 would apply to the section 9 recipients whether or not section 9(k) were included in this bill. However, section 9(k) was included to clearly emphasize the importance which DOT places on an accurate self-certification process.

Section 9(l) is designed to provide an optional mechanism for the recipient of section 9 funds to seek DOT approval that it has a competitive procurement system. Section 9(l) ensures that a review of a recipients procurement system by the Department of Transportation is binding on the Department of Transportation until withdrawn. The recipient must still agree to follow the procurement system.

Finally, section 9(m) would ensure that no additional requirements under the UMT Act would encumber the section 9 capital forumla program.

SECTION 307—OPERATING COSTS FOR UNIVERSITIES

This Section repeals the special program to establish and operate transportation education programs at colleges and universities. This program was added to the Act in 1978 but has never received appropriations from Congress. The authorization for appropriations contained in section 4(d) of the Act is deleted by section 3 of this bill.

DOT will continue to provide grants to colleges and universities to conduct specific research and training activities under the existing section 11(a). However, in a time of dwindling transit funding, establishment of Transportation Education Centers as presently provided for by section 11(b) of the Act could commit DOT to pay for general overhead and salary costs associated with the operation of centers that would represent non-productive costs to the Department. Section 11(a) provides adequate flexibility for DOT to involve universities in the urban transportation program.

SECTION 308—FEDERAL PROCUREMENT FACTORS

This section would allow the Secretary the authority to determine benchmark prices for buses. Section 308 of the bill would give recipients the ability to include additional items or features at their own cost. Once a recipient has elected to use the benchmark price to purchase buses and certified that it has and will utilize a competitive procurement system, that recipient would no longer be required to comply with Attachment O of OMB Circular A-102, or Life Cycle Costing provisions and other Federal procurement requirements. However, the recipient would be required to comply with Buy America provisions (section 401 of Public Law 95-599).

SECTION 309—LABOR STANDARDS

Section 309(a)(1) of the bill would transfer the responsibility under section 13(c) from the Secretary of Labor to the Secretary of Transportation. This would allow greater flexibility to ensure that these labor protections are administered consistently with transportation policy. Section 209(b) of the bill would authorize the Director of OMB to provide for the transfer of personnel, and other resources required by the transfer section 13(c) responsibility from the Secretary of Labor to the Secretary of Transportation. This provision would also enable the Director to establish the date of transfer.

The implications of the section 13(c) labor protection provision of the UMT Act as it relates to paratransit services are potentially far reaching in terms of cost and applicability and have prohibited the development of paratransit services by public transit operators. Paratransit could be a useful means of providing solutions to certain transportation problems facing our nation's urban areas. Accordingly, the development of these services shoud be encouraged. Section 309(a)(2) of this bill would exempt such privately-provided service from section 13(c) and thereby encourage transit providers to develop paratransit services.

SECTION 310—AMENDMENTS TO THE REPORTING SYSTEM

This section extends the reporting requirements of section 15 of the UMT Act to the recipients of grants under sections 9, 21, and 22. Section 15 currently requires recipients of section 5 urban formula grants to provide UMTA with certain public mass transportation financial and operating information using a uniform system. This information has been helpful to Federal, State, and local governments in assessing public transportation needs.

SECTION 311—AMENDMENTS TO THE SPECIAL NEEDS PROGRAM

Section 311 of the bill is a technical amendment to ensure that the 16(b)(2) program continues to be eligible for Federal funding.

SECTION 312—AMENDMENTS TO FORMULA GRANTS FOR NONURBANIZED AREAS

Section 312(a) of the bill provides for one-forth of the funds appropriated under the section 18 formula grant program for nonurbanized areas to be apportioned and allocated on the basis of the 1970 Federal census and the remaining three-fourths to be apportioned and allocated on the basis of the 1980 Federal census. This provision parallels an amendment to section 5 to lessen the negative impact of census changes.

Section 312(b) of the bill provides that the Secretary cannot approve operating expenses for the section 18 program after September 30, 1984. This provision parallels the phase out of operating assistance in the section 5 urban formula program.

Section 312(c) of the bill is a technical change to ensure that lapsed section 18 funds recycle into the proper authorizing section.

SECTION 313—CAPITAL FORMULA PROGRAM FOR AREAS OTHER THAN URBANIZED AREAS

Section 313 of the bill repeals section 21 of the Act. Section 21 currently authorizes grants for the terminal development program. This program was created in 1978 and has never received appropriations from Congress. The terminal development program is unnecessary because it describes project activities that can be funded under broader UMTA programs. Allocation and priorities for funds should be shaped by the level of local commitment, the degree of local need, and the annual national priorities for Federal funds rather than by narrow categorical grant programs like the terminal development program.

Section 313 of the bill creates a new section 21 of the Act which embodies a separate capital formula program for capital projects in non-urbanized areas. The new section 21 is designed to be consistent with the capital formula program for urbanized areas provided for in section 9. The new section 21 program springs from an acknowledgment that the proliferation of transit programs in non-urbanized areas calls for an equal and even-handed approach in servicing the capital projects of non-urbanized, as well as urbanized, mass transportation systems.

The capital formula program for non-urbanized areas would be made available on the basis of the formula set out in the new section 21(a). Each State would be entitled to receive a portion of the total amount of funding available which corresponds to that State's share of the national non-urbanized and urual population.

The new section 21(b)(1) would limit the use of capital formula program funds, as does section 9(b)(1), to mass transportation capital activities. As under section 9, capital activities would include the purchase of spare parts for transit vehicles where the expected service life of the spare part exceeds one year.

The new section 21(b)(2) would set aside 2.5 percent of the new section 21 apportionment for planning activities. As with section 9(b)(2), this set-aside seeks to ensure rational decision-making and may be waived by the Secretary.

The new section 21(b)(3) would provide a 80 percent Federal share for section 21 grants.

The Governor must distribute the new section 21 funds in a fair and equitable manner. These funds are available for obligation by the Governor for four years and may, at the Governor's discretion, be trans-

ferred to smaller urbanized areas. The new section 21(e) would also permit the Governor to transfer funds from smaller urbanized areas to rural areas.

Most of the requirements of the section 9 capital formula program for urbanized areas would also apply to the new section 21 grants.

SECTION 314—CAPITAL INFRASTRUCTURE DEVELOPMENT PROJECTS

This section repeals section 22 of the UMT Act. Section 22 authorizes grants for intercity bus service. The program, like the section 21 terminal development program, was created in 1978 and has never received appropriations from Congress. The project activities set forth in this program can be funded under other UMTA programs. To the extent that section 22 authorizes grants for operating expenses in intercity bus service, eliminating this provision is consistent with the phase-out of operating assistance.

Section 314 of the bill also creates a new section 22 of the Act which provides for the distribution of the equivalent of one cent of the Administration's proposed increase in the highway user fee.

Section 22(a)(1) provides authorizations for appropriations from the Transit Account of the Highway Trust Fund for fiscal years 1983 through 1988 in the total amount of $6,050,000,000. Annual appropriations shall be based on the amount as estimated annually by the Secretary of the Treasury to be received in the Transit Account of the Highway Trust Fund in each such fiscal year from subsections (a) and (b) of section 4041 of the Internal Revenue Code of 1954 (relating to taxes on diesel fuel and special motor fuel) and from section 4081(a) of such code (relating to tax on gasoline) regardless of whether that amount is greater or lesser than the authorization provided for in section 22(a).

Section 22(b)(1) provides that the funds shall be available to finance urban transit capital infrastructure development projects in accordance with an administrative formula to be developed by the Secretary. The Secretary would establish the formula taking into consideration the age, size, and condition of a recipient's transit system, and other factors the Secretary deems appropriate as measurements of the infrastructure rehabilitation needs of such system. UMTA currently informally applies an administrative formula under its rail modernization program using such criteria as route miles, car miles, train miles, seat miles, number of vehicles, daily rides, and number of stations. Similar criteria will be developed for the infrastructure development formula, as well as criteria based on bus facilities and rolling stock factors. The Secretary would publish the formula annually in the Federal Register. Grants under this section would be subject to most of the requirements applicable to grants under proposed section 9 of the UMT Act.

Section 22(b)(1) also provides for the selection of designated recipients to receive and dispense funds for urbanized areas of 200,000 or more. The designation process is similar to that used for section 9 funds. However, a publicly owned operator or planner exclusively of mass transportation services may not, after the effective date of section 22, be designated as the recipient of grants under that section unless it was selected, prior to such date, as the designated recipient of other funds under the Urban Mass Transportation Act.

Section 22(b)(2) provides a definition of the term "transit capital infrastructure development project." That term means any project in an urbanized area involving the rehabilitation and replacement of rolling stock, the rehabilitation and modernization of commuter rail and fixed guideway systems and the rehabilitation and modernization of bus facilities and related equipment, and intermodal terminals. Grantees making bus procurements are encouraged to use section 9 capital formula funds for such purposes before utilizing section 22 funds for bus purchases.

Section 22(b)(3) provides that the recipient of the funds—the Governor in the case of an urbanized area with a population of less than 200,000, and the designated recipient in the case of an area of or over 200,000—may request the Secretary's approval to substitute highway projects in the State (that are eligible for assistance under Title 23 U.S.C.) for mass transportation projects.

With respect to any such request made by the Governor, section 22(b)(4) provides that the request shall include a statement that the Governor agrees that no section 3 funds should be given to any applicant in an urbanized area of less than 200,000 population in the State for any transit capital infrastructure development project that could have been funded under this section. Prior to making such a request, the Governor must notify each such possible applicant of his proposed transfer request and provide an opportunity for comment.

With respect to any such request under section 22(b)(3) made by the designated recipient, section 22(b)(5) provides that the request shall include a statement from the designated recipient that it will not apply for section 3 funds for any transit capital infrastructure development project that could have been funded under this section and that no applicant in the urbanized area should receive section 3 funds for a project that could have been funded under this section. Prior to making such request, the designated recipient must notify each such possible applicant of its proposed transfer request and provide an opportunity for comment.

Section 22(b)(6) provides that the Secretary will approve any such request made by the Governor if he concurs in the statement by the Governor required under section 22(b)(4). Upon approval by the Secretary, such sums shall be made available to the Governor for projects eligible for assistance under title 23, United States Code.

Section 22(b)(7) provides that the Secretary will approve any such request made by the designated recipient if he concurs in the statement from the designated recipient required under section 22(b)(5). Upon approval by the Secretary such funds shall be made available to the urbanized area for highway projects in the urbanized area eligible under Title 23.

Section 22(b)(8) provides that any publicly owned operator of mass transportation services that is a designated recipient of funds under section 22 for an urbanized area must, as part of its public hearing under section 9(e), consider the relative needs, for those particular funds, of transit capital infrastructure projects in such urbanized area and projects in such urbanized area that are eligible for assistance under Title 23, United States Code.

Finally, section 22(c) provides that no State shall receive less than one-half of one percent of the annual distribution under section 22.

SECTION 315—WATERBORNE TRANSPORTATION DEMONSTRATION PROJECT

This section amends section 320 of the Surface Transportation Assistance Act of 1978 (P.L. 95-599) to ensure that no funds are appropriated for the high-speed waterborne transportation demonstration project in New York after September 30, 1983. Given the present economic condition, the Department of Transportation should concentrate its resources on basic transportation services and avoid high cost, special demonstration projects.

SECTION 316—REPEAL OF SAFETY AUTHORITY

This section repeals section 107 of the National Mass Transportation Assistance Act of 1974 (Public Law 93-503). Section 107 requires DOT to investigate transit equipment, facilities, and operations funded by UMTA which create a serious hazard of injury. If the Secretary finds an unsafe condition in a bus, subway, or light rail system, grants funds can be withheld.

Section 107 currently puts UMTA in a position of being both banker and policeman for transit systems. UMTA's primary role under the UMT Act is to provide technical and financial assistance to transit systems. The section 107 safety provision diverts UMTA from its primary mission. UMTA's small staff gives it very limited capacity to undertake comprehensive safety investigations. If this investigation safety role is proper for the Federal Government, it could be done better by agencies that have more staff resources and the investigatory expertise to carry it out.

Section 107 also places transit authorities in anomalous situations because section 107 is unlike other Federal safety statutes. For instance, the Federal Railroad Safety Act (Public Law 91-458) gives the Federal Railroad Administration (FRA) comprehensive authority over commuter passenger railroads. The statute provides for due process and permits FRA to levy fines. Section 107 does not have similar provisions. Therefore, a transit authority who operates both commuter rail lines under FRA jurisdiction and subway lines under UMTA jurisdiction is subjected to two different statutes, two different standards and two different penalties.

Section 107 can be overly intrusive on local operations. Transit service that is confined to a local area should not give rise to a Federal transit safety role. The fact that the Federal Government assists local housing, for example, has never necessitated a specific statute so that a Federal grant agency would enforce elevator safety. Local transit safety should be a matter of State and local concern. UMTA will continue to offer technical assistance on safe technologies, equipment, and design and help transit authorities develop local safety programs. This is a better approach than the reactive process established in section 107 and is a better use of UMTA's limited staff resources.

SECTION 317—SAVINGS PROVISION

This provision has been added to provide that full funding contracts and letters of intent existing as of the date of enactment of this legislation will continue to be funded at the Federal share level set forth in any such full funding contract or letter of intent, notwithstanding the revised Federal share levels proposed in this legislation. This preserves the status quo with respect to such full funding contracts and letters of intent.

SECTION 318—EFFECTIVE DATES

This section specifies that most of the provisions of the Transit Assistance Act of 1982 would become effective on January 1, 1983. The provisions authorizing appropriations to finance grants under the section 3 discretionary grant program, the section 4(i) program for the development of innovative techniques and methods, the section 8 planning program, the section 9 capital formula grant program, the section 16(b)(2) program to meet special needs for the elderly and the handicapped, the research and training programs under sections 6, 10, and 11, and for administrative expenses shall become effective at the beginning of fiscal year 1984.

SECTION-BY-SECTION ANALYSIS—TITLE IV

SECTION 401—AUTHORIZATIONS

Subsection (1) authorizes for highway safety research and development by the Federal Highway Administration (FHWA) $13 million per FY for each of the FY's 1985, 1986, 1987, and 1988. Authorizations for this program for FY 1984 are in the Omnibus Reconciliation Act of 1981.

Subsection (2) authorizes $100 million per FY for each of the FY's 1985, 1986, 1987, and 1988 for highway safety programs by the National Highway Traffic Safety Administration (NHTSA). Authorizations for this program for FY 1984 are in the Omnibus Reconciliation Act of 1981.

Subsection (3) authorizes $31 million per FY for each of the FY's 1985, 1986, 1987, and 1988 for highway safety research and development by NHTSA. Authorizations for this program for FY 1984 are in the Omnibus Reconciliation Act of 1981.

SECTION 402—APPORTIONMENT

Subsection (a) strikes the definition of "State" in section 401 of title 23, United States Code.

Subsection (b) amends section 402 of title 23, United States Code, regarding the annual highway safety apportionment by striking exceptions relating to the Virgin Islands, Guam and American Samoa.

SECTION 403—COMMERCIAL MOTOR VEHICLE SIZE

Subsection (a)(1) increases the maximum width from 96 inches to 102 inches making mandatory the maximum width of 102 inches.

Subsection (a)(2) deletes a provision allowing 102 inch wide buses that is unnecessary given the 102 inch width limit for all commercial vehicles.

Subsection (b)(1) ensures that double-bottom combinations are allowed to operate on the Interstate System in every State. In addition this subsection provides that no State shall set length limits of less than 48 feet for trailers operating in a single bottom combination and 28 feet each for trailers operating in a double bottom combination on the Interstate System. No State may establish an overall length limitation for single bottom combinations or double bottom combinations on the Interstate System. This subsection also defines "truck tractor" as used in section 127, title 23, United States Code.

Subsection (b)(2) provides a grace period so that States will have an opportunity to revise their size and weight restrictions before apportionments are withheld under this section.

SECTION 404—NATIONAL UNIFORM STATE REGULATION

Section 19 of the Motor Carrier Act of 1980, Pub. L. 96-296, requires the Department of Transportation and the Interstate Commerce Commission to develop legislative or other recommendations to provide a more efficient and equitable system of State motor carrier regulations. After soliciting public comments, both written and oral, a final report detailing the various inconsistencies between State regulations in these areas has been prepared.

This section provides that a working group be established to review the various State licensing and State taxing requirements of interstate motor carriers by highway. This working group will recommend standards to the Secretary of Transportation. The Secretary may then initiate a rulemaking action to adopt or otherwise implement these standards. As a minimum such standards are to include: (1) standardized procedures and forms; (2) base State certification; (3) a single State unit for filings, applications, and permits; (4) payment of fees and taxes to the base State; (5) equitable distribution of revenues; (6) a common basis for taxation in each area of requirements; and (7) reasonable limits on fees paid for identification stickers, plates or other indicia.

Subsection (a) establishes a working group.

Subsection (b) defines the responsibilities of the working group. The working group is to develop uniform State procedural standards for vehicle registration, fuel tax, and third structural tax requirements.

Subsection (c) provides for the expenses to be paid to the members of the working group.

Subsection (d) provides that after the working group has completed its work, it must submit recommended standards to the Secretary, Department of Transportation, within 30 months of the date of enactment of this Act. It is believed that the Secretary will establish this working group within 6 months of date of enactment of this section. Therefore, the working group will have two years in which to complete its task.

Subsection (e) provides that the Secretary may initiate rulemaking to implement the recommended standards found acceptable.

Subsection (f) provides that, if the working group fails to act, the Secretary may develop such standards and initiate rulemaking.

This section envisions preemption of certain State procedures, e.g., the manner in which States collect fuel taxes; administer vehicle registration. We feel FHWA lacks persuasive, and probably sufficient, statutory authority to establish regulations to implement the national standards envisioned.

SECTION 405—MINIMUM FINANCIAL RESPONSIBILITY FOR MOTOR CARRIERS

This section amends the financial responsibility requirements contained in section 30 for motor carriers of property.

Subsection (a) would remove the limitation on the levels of financial responsibility for motor carriers of property established by the Secretary and allow the Secretary to determine appropriate levels through public rulemaking action.

Subsection (c) would do three things: (1) complement the proposed amendment to Section 30(b)(1) and subject motor vehicles transporting certain specified hazardous materials, substances, or wastes in foreign commerce to the financial responsibility provisions of Section 30; (2) change the language of subsection (c) to be consistent with the Department's hazardous materials regulations; and (3) remove the limitations on the levels of financial responsibility established by the Secretary, and allow the Secretary to determine future appropriate levels through public rulemaking action.

Subsection (d) would also do three things: (1) complement the proposed amendment to Section 30(b)(1) and subject motor vehicles transporting other hazardous materials, substances, or wastes in foreign commerce to the financial responsibility provisions of Section 30; (2) remove the limitations on the levels of financial responsibility established by the Secretary and allow the Secretary to determine future appropriate levels required through public rulemaking action; and (3) effectively exempt many more small businesses from the financial responsibility requirements of Section 30 without compromising highway safety.

Subsection (e) would also do two things: (1) complement the proposed amendment to Section 30(b)(1) and subject motor vehicles transporting any hazardous materials, substances, and wastes in foreign commerce to the financial responsibility provisions of Section 30; and (2) remove the limitation on the limits established by the Secretary and allow the Secretary to determine future appropriate levels required through public rulemaking action.

Subsection (f) amends the 10,000 pound GVWR exemption to Section 30. It would exclude from the 10,000 pound GVWR exemption those vehicles transporting any quantity of Class A or B explosives, poison gas, or large quantity radioactive materials in interstate or foreign commerce.

SECTION 406—FEDERAL-AID MOTOR CARRIER SAFETY PROGRAM

This section authorizes the Secretary to provide grants to the States, from available funds appropriated from the Highway Trust Fund, to assist them in implementing programs for the enforcement of commercial motor vehicle safety standards.

The grant program authorized by this section is designed to enhance enforcement by utilizing the State enforcement personnel already in place and available to enforce violations by intrastate operations subject to the Secretary's jurisdiction as "affecting" interstate commerce, as well as violations by interstate carriers operating in a particular State. Recent State efforts to improve motor carrier safety have shown that State enforcement can be effective. The Motor Carrier Safety Inspection and Weighing Demonstration Program has also demonstrated the effectiveness of federally funded, State-operated inspectional activity.

By authorizing $10-$50 million annually in grants for commercial motor vehicle safety at a 70 percent Federal share, this bill is expected to make employers and employees rethink the assumption that violations will go undetected. A phase-in period for Federal funding is provided so as to afford States the opportunity to adjust their programs to qualify for these grants. Ten ($10) million will be adequate for the first year of this program, as will $20 million for the second, $30 million for the third, $40 million for the fourth, $50 million for the fifth.

Federal grants for enforcement of commercial motor vehicle safety standards under this section may not be used to maintain efforts in this area already undertaken by State governments. The purposes of the grant program is to raise the level of enforcement, not to substitute Federal for State and * * *.

SECTION 407—MOTOR CARRIER SAFETY; PENALTY AUTHORITY

This section sets forth the penalties available to the Secretary in enforcing violations of motor carrier safety regulations and the procedures to be utilized in imposing those penalties. The section provides for civil penalties and injunctive relief.

The DOT has long considered that one of the most pressing legislative priorities in the motor vehicle safety area is the need to provide that, as a general rule, violations of Federal commercial motor vehicle safety regulations should be punishable by civil penalties and that civil penalty authority should allow for significant fines.

At present, FHWA has civil penalty authority only with respect to reporting and filing violations, and even this limited civil penalty authority does not reach private carriers, only common, contract, and exempt carriers. The present maximum civil penalty is $500. Substantive violations, by any type of carrier, are punishable only by criminal penalties from $100 to $500 per violation, with special provisions for criminal penalties up to $5,000 for recordkeeping violations.

Criminal penalties require the establishment, to the satisfaction of a court, that a violation was knowingly and willfully committed, thereby frustrating the imposition of penalties in cases where it is extremely difficult to show that a violator knew he was subject to the regulations and that he knew and permitted a particular action or omission to take place. Further, in many jurisdictions, cases may be several years old before they are presented to a judge because of heavy case loads. Utilization of civil penalty mechanism is a more efficient and effective system to deal with motor vehicle safety violations, while also assuring basic procedural rights. Additionally, a limitation of the present reliance on criminal penalties is that the presentation of certain types of counts, particularly those involving vehicle defects, is made very difficult because of scattered venue. A particular carrier might have 10 vehicles placed out of service over a period of time and, under criminal procedures, because of the locations at which the vehicles were inspected, it is likely that as many as 10 separate and distinct cases would have to be prepared and presented in separate courts, thereby greatly weakening the chances of successful prosecution. Also, even in the case of a criminal conviction or settlement, present levels of criminal penalties can amount to little more than a routine cost of doing business.

Subsection (a) of the proposed section provides that the Secretary may issue a notice identifying a violation of the Federal Motor Carrier Safety Regulations and setting forth a reasonable time for abatement of the violation, the amount of the civil penalty to be imposed, if any, and any further actions to be taken to avoid subsequent similar violations. An alleged violator would be afforded the opportunity for a formal administrative hearing. Orders by the Secretary shall be considered final.

Subsection (b) establishes the amounts of civil penalties which may be imposed. Civil penalties of up to $500 per each offense would be extended to private motor carriers for recordkeeping violations. Each day of a continuing offense is to be considered a separate offense and the total amount of civil penalties for any single recordkeeping violation may not exceed $10,000. The subsection also provides for a civil penalty of up to $2,500 for each substantive violation (nonrecordkeeping), with each day of a violation considered as a separate offense, and for a civil penalty of up to $10,000 for each substantive violation which the Secretary determines has led to, or could lead to, serious personal injury or death, with each day of a violation considered as a separate offense. In the case of employees, however, civil penalty authority is limited to recordkeeping violations or those substantive violations which the Secretary determines have lead to, or could lead to, serious personal injury or death, but in no instance may the penalty exceed $5,000 against an employee. The assessment of penalties in all instances is to be calculated to induce compliance.

Subsection (c) authorizes the Secretary to require a violator to post notice of the violation. This is intended to serve as an educational tool in order to avoid subsequent similar violations.

Subsection (d) provides that the Attorney General may seek enforcement in the U.S. District Court of any order issued or penalty imposed by the Secretary.

Subsection (e) provides that an aggrieved person, after a final Secretarial order, may obtain judicial review of that order in the United States Court of Appeals. It is believed that, inasmuch as each day of a continuing violation is to be considered a separate offense, some mechanism ought to be provided to an aggrieved person to obtain judicial review of an order or penalty without having to await the bringing of an enforcement action by the Attorney General.

Subsection (f) provides for depositing the penalties collected under this section into the Treasury.

Subsection (g) provides for the issuance of injunctions before the Secretary holds a hearing in those instances where the violation presents a substantial risk to public health and safety.

Subsection (h) provides the definition of "employee" for purposes of this section. Essentially, it provides that any person whose activities directly affect commercial motor safety would be covered. A definition of "person" is not provided inasmuch as that term is defined elsewhere in title 49, U.S.C., and is used in this section as so defined.

Mr. DOLE. Mr. President, I am today pleased to join my colleagues in introducing the administration's highway bill which is designed to improve our Nation's highway system.

BACKGROUND

In its 25 years of existence, the Interstate Highway System has assumed enormous importance within the Nation's transportation system. Interstate routes carry approximately 19 percent of the Nation's auto travel and an estimated 75 percent of the value of freight shipments and 65 percent of all military shipments. The Interstate System has reshaped where Americans live, work, shop, and vacation.

The Nation's economy has come to rely more and more on the efficient movement of people and freight. The highway and transit systems, which have provided the essential transportation links as well as a major source of employment for U.S. workers, now face a future of rapidly accelerating deterioration if the commitment to meet capital investment is not made soon.

Although most Americans take the Interstate Highway System for granted, its future is threatened by several emerging problems and the need for renewed investment in the highway system is critical. Four thousand miles of the Interstate System pavement, nearly 10 percent of the total system, must be resurfaced or replaced now or in the very near future. Through 1995 the entire Interstate System will need to be resurfaced. Fifty percent of the primary system will reach the end of its design life during the 1980's. Forty percent of our bridges are more than 40 years old, and the design life of most bridges is 50 years.

HIGHWAY TRUST FUND

The 1956 Highway Act created the highway trust fund to insure a stable source of funds to build the Interstate System and other highway related projects. Receipts from various highway excise taxes are deposited in the highway trust fund. These funds are earmarked for highway projects, including the Interstate System, the primary system, secondary rural roads, urban roads, and more than 30 other similarly authorized programs and projects. This earmarking insures a source of long-term funding for multiyear construction projects such as the Interstate Highway System. Once authorized, funds for highway projects are virtually assured for the entire construction period.

Mr. President, the administration's highway bill would substantially restructure the current taxes that go into the highway trust fund. In addition to increasing the tax on gasoline and diesel by 5 cents per gallon, the proposal would modify the taxes on tires, and tubes, increase the tax on new trucks and trailers, repeal the tax on lubricating oil and substantially increase the use tax on trucks of 55,000 gross weight or more. The new tax structure substantially shifts the tax burden on heavy trucks consistent with the Department of Transportation cost allocation study. I agree that heavy trucks should pay their fair share of the cost of maintaining the highway system. Nevertheless, in examining the allocation of more highway taxes to heavy trucks, we also need to consider the ability of such a depressed industry to pay more taxes and the effect steep highway tax increases would have on related service industries.

I intend to carefully review this issue and other questions I have about the administration proposal before the committee schedules any markup. It seems to this Senator that the administration's bill might be improved in several areas.

EMPLOYMENT EFFECTS

While the primary purpose of this program is to rehabilitate the Nation's highways and bridges, we can expect

substantial positive employment effects. An analysis for the Department of Transportation estimates 31,000 new jobs in onsight construction and in offsite, materials-supplying industries for every $1 billion in new expenditures. Therefore, the total impact of the $5.5 billion program will be approximately 170,000 construction-related jobs. In addition, employment in other sectors is expected to rise by 150,000 as the $5.5 billion stimulus creates a "ripple" effect throughout the remainder of the economy, making a total of 320,000 new jobs.

Others have argued that the gasoline tax will lower consumer spending, causing offsetting employment losses in other areas. However, the tax increase for the average consumer will be less than $1 per week. There is room for doubt that an amount this small will have any noticeable impact on spending habits. Further, the effective date of the tax will be delayed. The best economic evidence is that tax changes do not begin to affect output or employment until after a lag of several months. So if there is any effect of the 5-cents per gallon tax increase on demand, it would not be felt until early 1984. Meanwhile, the expenditure portion of the program would be stimulating employment in 1983, when unemployment is expected to be at its peak.

Finally better roads and bridges will have positive long-term employment consequences. An improved transportation system would lower distribution costs and stimulate increased production and jobs. Just as we believe that private capital formation is necessary to expand employment opportunties, public investment also is essential.

The administration's proposal is a needed and sound one that I hope will promptly move forward in the Congress. In an effort to speed up consideration of the legislation I have scheduled hearings on the revenue title tomorrow afternoon at 2 p.m. in the Senate Judiciary Committee hearing room, 2228 Dirksen Senate Office Building.

Mr. GARN. Mr. President, the Committee on Banking, Housing, and Urban Affairs will have jurisdiction over title III of this bill which deals with mass transit. As chairman of that committee, I am pleased to introduce, by request of the Senate leadership, title III. The committee will act in as expeditious a way as possible.

Mr. PACKWOOD. Mr. President, I am pleased to join with the majority leader in his efforts to improve the Nation's surface transportation system. As chairman of the Senate Committee on Commerce, Science, and Transportation I will review the provisions of title IV of the bill relating to truck size and highway safety as expeditiously as possible. I look forward to working with my colleagues in the Senate and the House to pass this or similar legislation.

ADDITIONAL COSPONSORS

S. 27

At the request of Mr. DOLE, the name of the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of S. 27, a bill to amend the Internal Revenue Code of 1954 to make permanent the allowance of a deduction for eliminating architectural and transportation barriers for the handicapped and to increase the amount of such deduction from $25,000 to $100,000.

S. 2631

At the request of Mr. KASTEN, the name of the Senator from Washington (Mr. GORTON) was added as a cosponsor of S. 2631, a bill to regulate interstate commerce by providing for a uniform product liability law, and for other purposes.

S. 2822

At the request of Mr. NICKLES, the names of the Senator from Wyoming (Mr. WALLOP), the Senator from California (Mr. HAYAKAWA), and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of S. 2822, a bill to amend title IV of the Higher Education Act of 1965 to provide standards for students for maintaining satisfactory progress as a condition for assistance under that title.

S. 2902

At the request of Mr. THURMOND, the name of the Senator from Wisconsin (Mr. KASTEN) was added as a cosponsor of S. 2902, a bill to define the affirmative defense of insanity and to provide a procedure for the commitment of offenders suffering from a mental disease or defect, and for other purposes.

S. 2929

At the request of Mr. NICKLES, the name of the Senator from Alabama (Mr. DENTON) was added as a cosponsor of S. 2929, a bill to amend the Davis-Bacon Act.

S. 2942

At the request of Mr. COHEN, the names of the Senator from Georgia (Mr. NUNN), and the Senator from Washington (Mr. GORTON) were added as cosponsors of S. 2942, a bill to provide that disability benefits under title II of the Social Security Act shall continue to be paid through the end of the administrative appeals process, and that periodic reviews of disability cases shall be carried out only to the extent determined to be appropriate.

S. 2948

At the request of Mr. DOLE, the names of the Senator from Pennsylvania, (Mr. HEINZ), the Senator from Iowa, (Mr. JEPSEN), the Senator from Montana (Mr. MELCHER), and the Senator from Alaska (Mr. STEVENS) were added as cosponsors of S. 2948, a bill to promote the development of nonanimal methods of research experimentation, and testing, and to insure humane care of animals used in scientific research, experimentation, and testing.

SENATE JOINT RESOLUTION 244

At the request of Mr. WARNER, the names of the Senator from Louisiana (Mr. JOHNSTON), and the Senator from Michigan (Mr. LEVIN) were added as cosponsors of Senate Joint Resolution 244, a joint resolution designating January 17, 1983, as Public Employees' Appreciation Day.

SENATE JOINT RESOLUTION 257

At the request of Mr. WEICKER, the names of the Senator from Vermont (Mr. LEAHY), the Senator from Maine (Mr. MITCHELL), and the Senator from Tennessee (Mr. SASSER) were added as cosponsors of Senate Joint Resolution 257, a joint resolution to designate the month of November 1982, as National Diabetes Month.

SENATE JOINT RESOLUTION 263

At the request of Mr. THURMOND, the names of the Senator from Hawaii (Mr. INOUYE), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Washington (Mr. JACKSON) the Senator from Arkansas (Mr. PRYOR), the Senator from Washington (Mr. GORTON), the Senator from Indiana (Mr. LUGAR), the Senator from Arizona (Mr. GOLDWATER), the Senator from Georgia (Mr. MATTINGLY), the Senator from North Carolina (Mr. EAST), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Georgia (Mr. NUNN), the Senator from Nevada (Mr. LAXALT), the Senator from North Carolina (Mr. HELMS), the Senator from Montana (Mr. MELCHER), and the Senator from Illinois (Mr. PERCY), the Senator from Florida (Mr. CHILES), and the Senator from Alaska (Mr. MURKOWSKI) were added as cosponsors of Senate Joint Resolution 263, a joint resolution to authorize the President to issue a proclamation designating the week beginning on March 13, 1983, as National Surveyors Week.

SENATE JOINT RESOLUTION 265

At the request of Mr. DENTON, the names of the Senator from Alabama (Mr. HEFLIN), the Senator from Kentucky (Mr. HUDDLESTON), and the Senator from North Carolina (Mr. EAST) were added as cosponsors of Senate Joint Resolution 265, a joint resolution to authorize and request the President to proclaim 1983 as the National Year of Voluntarism.

SENATE CONCURRENT RESOLUTION 121

At the request of Mr. DOLE, the names of the Senator from Arkansas (Mr. BUMPERS), the Senator from New York (Mr. D'AMATO), the Senator from Arizona (Mr. DECONCINI), the Senator from Georgia (Mr. NUNN), the Senator from Mississippi (Mr. STENNIS), and the Senator from Rhode Island (Mr. PELL) were added as cosponsors of Senate Concurrent Resolution 121, a

concurrent resolution expressing the sense of the Congress that the United States should maintain Federal involvement in, and support for, the child nutrition programs, and for other purposes.

SENATE CONCURRENT RESOLUTION 122

At the request of Mr. PERCY, the name of the Senator from Maryland (Mr. MATHIAS) was added as a cosponsor of Senate Concurrent Resolution 122, a concurrent resolution relating to the processed product share of U.S. agricultural exports.

AMENDMENTS SUBMITTED FOR PRINTING

CONTINUING APPROPRIATIONS FOR 1983

AMENDMENT NO. 3637

(Ordered to be printed and to lie on the table.)

Mr. JEPSEN submitted an amendment intended to be proposed by him to a joint resolution to be introduced making further continuing appropriations for fiscal year 1983.

PAY RAISE UNWARRANTED

● Mr. JEPSEN. Mr. President, prior to the election recess, the Senate and House extended the pay cap for high level Federal employees and Members of Congress. Had this not been done, Members of Congress would have received a 4-percent pay raise on October 1.

While I supported the pay cap extension, I was disappointed that we did not extend the cap for the entire fiscal year. As my colleagues know, this could have been done.

Mr. President, I believe it would be wrong for Congress to accept a pay raise, particularly at a time when so many Americans are unemployed. How do we justify a pay raise for ourselves, when millions of social security recipients, living on fixed incomes, are faced with skyrocketing utility prices? How do we explain the pay raise to farmers who have seen their prices go steadily downward?

I firmly believe the economy is beginning to turn around. If we expect this to continue then we, above all others, must show restraint. It is up to us to set an example for the rest of the country. If we accept this pay raise, I am afraid we will be sending the wrong signal to the American people.

For this reason, Mr. President, I am submitting an amendment which would extend the pay cap for the remainder of this fiscal year. I intend to call up my amendment at the earliest possible date.

Furthermore, I want to alert my colleagues that I intend to pursue this until it is resolved.

This is not a partisan issue, Mr. President. Rather, it is one of priorities. Adoption of my amendment will demonstrate that the U.S. Senate is prepared to put the welfare of the Nation above all else.●

ARCTIC RESEARCH AND POLICY ACT

AMENDMENT NO. 3638

(Ordered to be printed and lie on the table.)

Mr. MURKOWSKI submitted an amendment intended to be proposed by him to the bill (S. 1562) to provide a comprehensive national policy dealing with national needs and objectives in the Arctic:

● Mr. MURKOWSKI. Mr. President, I am submitting for printing an amendment to the committee amendment to S. 1562, the Arctic Research and Policy Act.

The Committee on Governmental Affairs has reported S. 1562, with amendments, to the full Senate with a favorable recommendation. There have been some questions raised, however, about one section of the bill proposing to exempt the Arctic Science Policy Council and the Arctic Research Commission from the requirement of filing environmental impact statements (EIS) that might be required by the National Environmental Policy Act (NEPA).

Having reviewed S. 1562 and NEPA once again, it is clear that there would not be any activities the Council or Commission might perform which would require an EIS to be filed. Therefore, the NEPA exemption is unnecessary and may only serve to confuse my colleagues in the Senate and Members of the House. Therefore, I propose this amendment which would strike section 12 of the bill.

My amendment also proposes the addition of some additional language under the "Findings and Purpose" section of the bill which recognizes importance of Arctic research to increased international cooperation in the Arctic.

I ask unanimous consent that the proposed amendment be printed in the RECORD following my remarks.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 3638

Under section 2(a), on page 13, line 15, strike the work "and" after the semicolon. On page 13, line 19, strike the period and insert a semicolon. On page 13, after line 19, insert the following:

(15) Arctic Research has significant value for expanding knowledge of the Arctic which can enhance the lives of Arctic residents, increase opportunities for international cooperation among Arctic rim countries and foster a national policy for the Arctic; and

(16) The Alaskan Arctic provides essential habitat for marine mammals, migratory water fowl and other forms of wildlife which are important to the nation and which are essential to Arctic residents.

On page 26, strike section 12.●

SENATE RESOLUTION 496—RESOLUTION RELATIVE TO GRAIN AGREEMENTS WITH THE SOVIET UNION

Mr. PRESSLER submitted the following resolution; which was referred to the Committee on Finance:

S. RES. 496

Whereas the Soviet Union has signed long-term grain supply agreements with Canada, Argentina, France and other grain-producing nations since the 1980 U.S. grain export embargo; and

Whereas the Soviet Union continues to consider the United States of America as a secondary source of grain because of supply uncertainty considerations arising from that embargo; and

Whereas the Soviet Union will continue to import large amounts of grain in the future and the United States of America has a large surplus of exportable grain; and

Whereas the Soviet Union will not be able to purchase large quantities of U.S. grain during winter months because of limited port facilities and adverse weather conditions: Now, therefore, be it

Resolved, That it is the sense of the Senate that the United States of America extend a grain export sales contract sanctity guarantee to the Soviet Union from November 30, 1982 until November 30, 1983, be it further

Resolved, That the United States of America should initiate trade discussions with the Soviet Union for the purpose of establishing a new long-term grain sales agreement with high minimum purchase requirements.

● Mr. PRESSLER. Mr. President, today I am submitting a resolution expressing the sense of Congress that negotiation of a new long-term grain agreement with the Soviet Union begin and the contract sanctity guarantee made by the President to the Soviet Union be extended beyond November 30, 1982. These actions are needed for several reasons.

The Soviet Union continues to go elsewhere for an increasing share of its grain import needs and to negotiate long-term grain agreements with other nations. The Soviets recently signed a long-term grain agreement with France and have purchased nearly 1.5-million metric tons of grain from them. The Soviets have also purchased large amounts of grain from Canada, Argentina, and Spain, while purchases from the United States have been very limited. To date, the Soviets have purchased less than 2.5-million metric tons of corn from the United States. We must reestablish the United States as a reliable supplier of grain, rather than a residual supplier. Extension of the contract sanctity guarantee would help to do this and negotiation of a new long-term grain agreement would assure us of a portion of the Soviet market in the future.

With the death of Soviet President Brezhnev, the Soviet grain purchasing policies may well be reviewed and it is important that we take advantage of every opportunity to regain our major share of the Soviet market. With the

recent improvement in United States-Soviet relations, negotiation of a new long-term grain agreement would be an effective next step in continuing to improve our relations.

The Soviet concern about the wheat scab problem in the United States has also slowed purchases. Soviet inspectors have been looking at U.S. wheat this month to see the extent of damage caused by scab. We must allow the Soviets time to make purchases after they have seen that we have high quality grain.

Domestically, we also need to regain our preembargo share of the Soviet market and increase exports to boost farm prices. Currently, the farm economy is suffering through the most depressed time since the 1930's and the United States has record grain surpluses. Meanwhile, U.S. agricultural export values declined to $39.1 billion in fiscal year 1982, down 11 percent from fiscal year 1981 and down 3 percent from fiscal year 1980. The lower export values also reduced the U.S. agricultural trade surplus by 11 percent from fiscal year 1981. If we are to boost domestic farm prices, agricultural exports must be increased, and regaining the Soviet market is important to increasing our exports.

I urge my colleagues to join me in support of this resolution in an effort to regain a share of the Soviet market, increase agricultural exports, and boost domestic farm prices.●

NOTICES OF HEARINGS

SUBCOMMITTEE ON EMPLOYMENT AND PRODUCTIVITY

Mr. QUAYLE. Mr. President, the Subcommittee on Employment and Productivity will hold hearings starting January 12, 1983, addressed to the following questions:

First. What job creation programs has the Federal Government undertaken and how successful have they been? Have they created net additional jobs; at what cost; with what time lags; with what general effects on the economy?

Second. Is it appropriate for the Federal Government to try to stimulate public or private employment through methods other than general economic policy—such as fiscal and monetary policy?

Third. What possible options—excluding fiscal and monetary policy—are there for such programs?

Persons desiring to testify should submit written requests to the Subcommittee on Employment and Productivity, 4230 Dirksen Senate Office Building, Washington, D.C. 20510. Attention: Bob Guttman, indicating the issue on which they wish to testify. Written testimony will be accepted from persons who cannot be scheduled for oral presentation. Requests to testify must be received by December 31, 1982.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Committee on Energy and Natural Resources to consider the nominations of Donald P. Hodel, of Oregon, to be Secretary of Energy; and Martha O. Hesse, of Illinois, to be an Assistant Secretary of Energy (Management and Administration).

The hearing will be held on Wednesday, December 1, beginning at 10 a.m. in room 3110 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding this hearing, you may wish to contact Mr. David Doane of the committee staff at 224-7144.

SUBCOMMITTEE ON PUBLIC LANDS AND RESERVED WATER

Mr. WALLOP. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Subcommittee on Public Lands and Reserved Water to consider the following bills: H.R. 6011, to designate certain lands in Alabama as wilderness, and for other purposes; S. 2955, to establish the Cheaha Wilderness in Talladega National Forest, Ala.; S. 1117, to designate certain lands in the Shasta Trinity National Forest, Calif., as the Mount Shasta Wilderness; and S. 2157, to provide for the establishment of the Illinois and Michigan Canal National Heritage Corridor, and for other purposes.

The hearing will be held on Tuesday, November 30, beginning at 9:30 a.m. in room 3110 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Subcommittee on Public Lands and Reserved Water, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510, or call Mr. Tony Bevinetto of the subcommittee staff at 202-224-5161.

Witnesses are requested to provide the subcommittee with 25 copies of their written testimony 24 hours before the hearing, as required by the rules of the committee. Witnesses may be arranged in panels and are requested to limit their oral testimony to 5 minutes.

For further information regarding this hearing, please contact Mr. Bevinetto.

SUBCOMMITTEE ON ENERGY AND MINERAL RESOURCES

Mr. WARNER. Mr. President, I would like to announce for the information of the Senate and the Public the scheduling of a public hearing before the Subcommittee on Energy and Mineral Resources to consider S. 2503, to authorize the Secretary of the Interior to consider a petition for reinstatement of a certain oil and gas lease; S. 2680, to provide for the reinstatement of U.S. oil and gas lease numbered U-26485; and U-26505; S. 2681, to provide for the reinstatement and validation of U.S. oil and gas lease numbered U-14654; and S. 2824, to provide for the reinstatement of oil and gas lease in Eddy County, N. Mex.

The hearing will be held on Friday, December 10, beginning at 10 a.m. in room 3110 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Subcommittee on Energy and Mineral Resources, Room 3104, Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding this hearing you may wish to contact Mr. Roger Sindelar of the subcommittee staff at 224-4236.

ADDITIONAL STATEMENTS

NATIONAL HOME HEALTH CARE WEEK

Mr. HATCH. A Presidential proclamation, based on a congressional resolution, designates November 28 through December 4 as "National Home Health Care Week." I introduced this resolution in the Senate to honor the many dedicated individuals who work to provide home care for millions of Americans.

My interest in home care and its improvement stretches well beyond the memorial week. I am the principal sponsor of S. 234, the Community Home Health Services Act. I became acutely aware of the need for these services and their benefits after a visit to a home health agency in my home State of Utah.

After seeing home care in action, I studied and reviewed the medicare statute regarding home care, and subsequently introduced S. 234. An obvious benefit of providing home care is its support of the patient's dignity and well-being. However, beyond that, home health care can, and often does, provide cost savings by avoiding unnecessary institutionalization and prolonged hospital stays.

While I have worked hard for 3 years to improve home health care services, many others deserve much credit for having pushed the delivery of these services under current law.

Further, many of these very special persons have joined me in the fight for better home health care legislation.

One such person is Elmer Cerin, who voluntarily represents the Amyotrophic Lateral Sclerosis (ALS) Society of America. He believes in home health care for much the same reasons as I have listed, but for even more personal reasons because Elmer Cerin's life has been affected by the difficulties of obtaining home health care.

In 1977, Mr. Cerin's wife was diagnosed as having ALS, the disease that killed baseball immortal Lou Gehrig. ALS is a type of motor disorder of the nervous system. Early symptoms include weakness of the muscles, and atrophy occurs as the disease progresses.

Mrs. Cerin's feet were affected first; it became difficult for her to walk without assistance. The singing she loved ended when a progressive bulbar palsy, affecting her tongue, pharynx and larynx, overtook her. During the early stages of his wife's illness, Elmer cared for her with the assistance of two nurses who stayed with her while Elmer was at work. For a year and a half, the routine continued until Elmer consented, upon the urging of his family, to place his wife in a nursing home.

Though the nursing home was a good one, Elmer was not satisifed with the care his wife received. He spent many hours caring for her during her stay in the nursing home and spent many more hours assisting other patients in the home.

Issues of lower costs for home care versus institutional care have been hotly debated in Congress. But Elmer feels the answers are clear. The costs of the nursing home care, both monetarily and emotionally, were very much higher, substantially more than what he paid for home care.

Mrs. Cerin died in the nursing home nearly 2 years after she had been diagnosed as having ALS. Elmer's story is one all too familiar to many families around the country who face the tragedy of loved ones afflicted with myriads of illnesses and who choose to care for them at home as long as they can.

Elmer feels they need our support. He feels that by expanding medicare home service benefits, the needed support would be provided and at a much reduced cost compared to that of prolonged hospital or institutional care. I agree.

Dedication and hard work have become second nature to Elmer; it showed during his wife's long illness, and now as he walks the halls of Congress representing the ALS Society. He is, and has been, a great example of volunteerism. He has become a special friend to me and my staff. To Elmer, we say, "Thank you," and dedicate Home Health Care Week to him and the many like him.

Mr. President, I would also like this statement which was written to commemorate "National Home Health Care Week" in my home State of Utah to be printed in the RECORD.

The statement follows:

STATEMENT OF SENATOR ORRIN HATCH COMMEMORATING HOME HEALTH CARE WEEK, NOVEMBER 29, 1982

It's been two years and many long legislative hours since I first introduced legislation to improve "home health care." During 1981 hearings in the Labor and Human Resources Committee, the media and public packed the hearing room to hear and see Helen Hayes, as well as home health and other well qualifed and knowledgeable experts testify on behalf of my bill, S. 234, the "Community Home Health Services Act." I've studied countless briefs and cost reports, heard hours of testimony, met with providers and patients, read letters and given speeches, all in the name of "home health."

But after the cameras stopped clicking and the speeches were memories, the real reason why I joined this crusade stuck in my mind: The people, our aged and disabled citizens who need home health services. Thousands of families care for their ailing and aged family members at home. The burdens are great, but family loyalties and the urge to care for "one's own" create the strong desire to keep them at home.

I am dedicated to continuing my work toward this end. I have seen great strides in volunteer and private efforts toward finding solutions, and it is fitting that during this week, we take time to commend those efforts.

But my interest in home care isn't prompted only by the cost-savings to the Federal Government. In 1979, I visited a home health agency in Utah and became acutely aware of the need for, and potential of, home health services. Most recently, I have become aware of home services provided in the most southerly regions of our State where elderly citizens are often geographically isolated by distance. Barbara Williams, home health coordinator for the Southern Utah District Health Department notes home health services in that area cost much less compared to more expended services. She has provided the following descriptions of home patients currently under her care.

"Mr. C. was 78 years old and in the final stages of terminal cancer when he was referred to home health. With vigilant nursing supervision and dedicated home health aides, we were able to support his wife and family and allow him to spend his last months at home among his loved ones, and die with dignity.

"Mary and Jane are 94- and 96-year-old mothers of an elderly couple, John and Alice. Both ladies need almost total care. With home health intervention, Alice, who is nearly blind and John, who is severely hard of hearing, can take care of their mothers in familiar surroundings.

Mrs. A. is 87 years old with no family and lives alone. In the fall of 1980, she suffered a severe heart attack. On discharge from the hospital with a heart pacemaker inserted, she was put on daily home health visits. Our homemaker home health aides provided personal care and homemaking assistance. With the new telephone monitoring system, our nurses were able to evaluate her response to the pacer and report regularly to her physician in Salt Lake City. She has gradually improved to the maximum of her potential and is doing quite well in her own environment, enjoying her independence.

"Mr. B. is a blind diabetic with severely compromised peripheral circulation. Home health provided insulin injections daily and dressings to an ulcer on his leg. After amputation was required, he was again placed on home health and is walking with a prosthesis, and a member of his family has been taught to give him insulin injections. Result: Semi-independence, no extended care facility.

"Henry M. is a paraplegic confined to a wheelchair. He has fought Parkinson's disease for 20 years. With assistance from the home health staff, he has been able to remain at home. He states that our assistance has allowed him to have a full life in the companionship of his wife and family."

Ms. Williams concludes, "Home health is a viable service that allows our elderly citizens to remain at home with their families and stay alert and as productive as their health will allow." It is for dedicated home health workers like Barbara Williams that Congress, at my urging, has designated this week, November 28th through December 4th, as "National Home Health Week."●

SOLIDARITY

● Mr. LEVIN. At the November 10 "Solidarity Lives" rally in Hamtramck, Mich., an important resolution was unanimously adopted by the gathering. It should be read far and wide as a statement of strong determination that Polish freedom should be restored.

I ask that that statement and my own remarks at that rally be printed in the RECORD.

The material follows:

RESOLUTION ADOPTED ON NOVEMBER 10, 1982, AT THE "SOLIDARITY LIVES" RALLY, HELD AT THE P.N.A. HALL, HAMTRAMCK, MICH.

The Polish-Americans and the Poles assembled in Hamtramck, Michigan on November 10, 1982, in support of their sisters and brothers in Poland who suffer the oppression of Soviet-imposed communist dictatorship, express their admiration to the Polish nation, the Polish religious leaders, workers, peasants, intellectuals and students, for their heroic fight for freedom and Polish ideals.

Ruthless repressions directed against those who dare to defy the Moscow-led tyranny will not result in the submission of the Polish people. Polish patriots endured the persecution on the part of the Tsarist imperialists and the Nazi henchmen, and they will not compromise with a small bunch of Soviet puppets whose rule is based on brutal force.

Unable to gain any respect or support of the population, hated by all classes of the nation, the ruling clique attempts to strengthen its grip on the country by various means, ranging from the "internment" and arrest of some of the best sons of the nation to Soviet-inspired and dictated legislation amounting to the introduction of slave labor into Poland. As in the past, such measures will not crush the Polish spirit, and when the nation will emerge from this dark period of her history, the Polish herit-

age will revive and bring inspiration to the world, as it did in the past.

In this hope we demand:

That all brutality ends;

That martial law be abolished;

That Lech Walesa and all internees and political prisoners be freed;

That independent trade union Solidarity which was legally registered two years ago today be again allowed to function;

That basic human rights and freedoms be restored;

That honest dialogue with Solidarity and the Church be initiated.

Only these measures can create conditions for rescueing economic and social life of the country from fast approaching total collapse.

We urge our government and all free nations of the world to continue and increase the economic and political sanctions against the Soviet Union which is principally responsible for the introduction and continuation of the brutal oppression of the people of Poland.

Long live Solidarity.

Long live Poland.

LONG LIVE SOLIDARITY

(Remarks of Senator Carl Levin at the "Solidarity Lives" rally, Nov. 10, 1982)

For decades, we've seen the Soviet bear's paw claw Poland. But despite this oppressive environment, we saw Poland's love of civil and political freedom come to life in the form of Solidarity. It was an extraordinary and daring political experiment *and* for a while it seemed to escape the bear's paw. We marveled at and applauded Poland's undaunted spirit in their struggle to determine their own political, social and cultural destinies. We held our breath in anxious anticipation over what the future of the fledgling Solidarity might be.

What recently unfolded is not what we had hoped for—the great bear took a vicious swipe at Solidarity, knocked it from its freedom flight, and now seeks to trap it beneath its paw. Just about one month ago, the Communist dominated Parliament in Poland tried to decree the death of Solidarity. They outlawed the 9 million member independent union federation that had for 16 months raised the hopes of Poles and friends of a free Poland and had rattled the entire Soviet network in Eastern Europe.

The Soviets may have been successful in having Solidarity banned, but they can't banish Polish determination; the Soviets may have had Solidarity's leaders jailed, but they can't put the Polish spirit behind bars.

That free spirit is what helped give birth to Solidarity and is testimony to the courage and perseverance of the Polish people. And this is only the most recent act inspired by the Poles' love of freedom. For centuries we've seen the Poles join together under the banner of self-determination and political sovereignty. In a major triumph for the cause of freedom, the modern state of Poland was born 64 years tomorrow. The Polish love of freedom helped us during our own struggle for independence here in the United States when Kosciuszko and Pulaski provided leadership in the struggle to expel the oppressors from our shores 200 years ago.

We see that very same spirit of fighting for political and civil liberties burning today in the hearts of the Polish people. We see it in people like Lech Walesa, a man driven by a desire to see his people free—free of foreign domination, free to form their destiny, free to create their own future. That spirit has endured the test of time and will not be extinguished by the Soviets' most recent blow.

And that blow cannot go unanswered by freedom-loving countries. It is the Soviets who are responsible for the deprivation of the civil and political liberties of Poles and of the legal rights of Solidarity. It is the Soviets who should pay dearly, not the Poles.

We must continue to lend unswerving support to the Polish quest for freedom. We must help keep Solidarity's flame aglow. By virtue of its very existence, what it represents, and what it achieved, Solidarity has made an indelible impact on the course Poland will follow and on the consciousness of us all.

The Archbishop of Poland recently said, "Nothing of that which is great and just will be lost of that which was born in the course of the last two years, and thanks to which, today we feel ourselves more than ever masters of this land."

I can add no more to those words than to lend my full voice to the cry heard the world over, "Niech Zyje Solidarnocs."●

DR. MARCUS WALLENBERG—A FRIEND OF THE UNITED STATES

● Mr. BRADY. Mr. President, Marcus Wallenberg passed away on September 13, 1982. Although he was the leading banker and industrialist in Sweden for many decades, and very deeply attached to his nation's land, Marcus Wallenberg was truly international in his views and deeds. With all his worldwide interests, he had a very deep and personal affection for the United States, ever since his first days in this country as a young banker in the early 1920's. Marcus Wallenberg, throughout his life, attached an enormous importance to developments in the United States, not only because he saw this country as the ultimate defender and symbol of the free world's democratic institutions, but also because of his personal affinity for and attachment to many individuals and institutions here.

Throughout his long career as a leader of a large number of Swedish corporations, he worked for the development of business relations and trade between Sweden and the United States. To support these efforts he played a key role as the force behind improved communications and contacts between the two countries. In this context his work as a founder of Scandinavian Airlines Systems, which became the first airline to operate a post-war commercial route across the North Atlantic, is just one of a number of achievements. Perhaps the most lasting and tangible evidence of his efforts is the number of large Swedish companies which, at his urging, have established important subsidiaries in the United States.

The United States held real importance to Marc. During World War II, he helped to organize the United States-Sweden Trade Delegation. On a personal note, he came to the United States to observe, really to participate in, every U.S. Presidential election from 1928 through 1980, with the exception of 1944 when World War II would not permit his travel here. During World War II, he was closely associated with a group that helped downed U.S. flyers escape from Nazi Germany.

Marcus Wallenberg's friendship for the United States was well known and recognized in this country on many occasions. He received an honorary doctorate from Georgetown University and in 1981 Babson University nominated him "Entrepreneur of the Year," the first European to receive this award.

With the death of Marcus Wallenberg, a unique man is gone. He will be remembered in this country as a prominent financier, entrepreneur, diplomat and sportsman and, above all, one of the best friends the United States ever had.●

B'NAI B'RITH WOMEN PRINCE GEORGES CHAPTER

● Mr. SARBANES. Mr. President, I am pleased to recognize and pay tribute to B'nai B'rith Women on the occasion of its 85th birthday. In this area, the outstanding programs of B'nai B'rith Women to make the world a better place to live have been well represented by B'nai B'rith Women Prince Georges Chapter, celebrating its 43d anniversary, and by Abram Simon Chapter, completing its 30th year of service.

For 85 years, B'nai B'rith Women has performed dedicated service on behalf of basic American principles—the protection of the constitutional rights of our people and the defense of basic human rights around the world. The emphasis placed by its public-spirited members on community involvement and education has strengthened communication and respect among our people.

Mr. President, the compassion of B'nai B'rith Women Prince Georges Chapter and Abram Simon Chapter has touched the people of their communities deeply, and their programs have benefited the many people they have served. I ask my colleagues to join me in congratulating the chapters for their outstanding work and in wishing their members continued success in the years ahead.●

200TH ANNIVERSARY OF PRESIDENT MARTIN VAN BUREN'S BIRTH

● Mr. D'AMATO. Mr. President, today I offer these remarks in commemoration of the 200th anniversary of the birth of Martin Van Buren, a native New Yorker, a former Member of this august body, and eighth President of the United States. Martin Van Buren,

the son of Abraham and Maria (Hoes) Van Buren, was born December 5, 1782 in the village of Kinderhook, N.Y., about 20 miles south of Albany. The late President maintained a permanent residence in Kinderhook all his life, a devotion to his home that earned him the nickname "Old Kinderhook" and which gave birth to the expression "OK". As a New Yorker, I am especially privileged to pay tribute to this truly great American and I join the residents of Kinderhook in honoring Martin Van Buren on this his 200th birthday.

From his inauspicious beginning as the son of a truck farmer and tavern keeper, Van Buren staged a meteoric climb in the world of 19th century politics. At the age of 14, having a penchant for law and politics, he entered the law firm of Francis Silvester. Here he did everything from sweeping floors to studying law. Van Buren soon began adopting the Republican sentiments that became his trademark and in 1800 he went to New York City where he campaigned for Thomas Jefferson. Following Jefferson's election to the Presidency, Van Buren returned to his law career, working for attorney William P. Van Ness, and in 1803 he began his own practice in Kinderhook.

In the years that followed, Martin Van Buren became a New York Supreme Court Counselor and a surrogate of Columbia County. In 1812, he was elected to the New York Senate. As State senator, Van Buren supported construction of the Erie Canal and the revision of the New York State Constitution. He also was one of the first legislators to sponsor a bill abolishing imprisonment for personal debt.

In 1821, Van Buren was elected to the U.S. Senate. In 1828 he became Governor of New York but soon after he was asked to be Secretary of State by President Andrew Jackson. As Secretary of State, Van Buren served as an influential link between the President and the foreign ministers with whom the United States dealt. One French minister praised him as "superior, as a man of the world, (compared) to those compatriots I have seen until now." On domestic concerns, Van Buren argued against unconstitutional intrusion by the Federal Government into State affairs. In 1832, Jackson named Van Buren his Vice Presidential running mate. Finally, in 1836, Martin Van Buren was elected 8th President of the United States, the first to have been born an American citizen. In the White House, Van Buren remained amiable and diplomatic, always believing that political opponents could be personal friends as well. Under his administration, an independent U.S. Treasury was established for the deposit of all Federal funds. Van Buren was proud that his Presidency was one of peace and economic growth for America.

President Van Buren retired to Kinderhook, in upstate Columbia County, N.Y., in 1841 where he continued his active involvement in national politics. In the last years of his life, Van Buren was greatly distressed by the eventuality of the Civil War, and he lent his strong endorsement to then Presidential candidate Abraham Lincoln. Martin Van Buren died July 29, 1862.

Martin Van Buren's exemplary service to our Nation and his devotion to strengthening our democratic processes have earned him a lasting place in American history. As U.S. Senator, Secretary of State, Vice President, and as President, he demonstrated time and again his unyielding patriotism and dedication to America. In celebration of the 200th anniversary of his birth, the town of Kinderhook and Columbia County have paid tribute throughout the year to their native son. Restoration of his beloved home, a national historic monument, continues and a portion of the house is now open to the public. On December 5, the day of his birth, there will be a formal ceremony at the site of Martin Van Buren's grave in Kinderhook. Additionally, a commemorative stamp is planned by the U.S. Postal Service in honor of the late President.

I urge my distinguished colleagues and, indeed, all citizens to reflect on the life of New York's native son on this, the 200th year of his birth. President Van Buren's commitment to democracy, justice, and freedom has been an example to all who have followed in that prestigious office.●

THE DELUSION OF CIVIL DEFENSE

● Mr. LEVIN. Mr. President, I recently read an incisive article by Arthur Vander in the fall of 1982 Michigan Quarterly Review entitled "The Delusion of Civil Defense."

I commend it to all those who look to civil defense as a deterrent or defense to nuclear war.

I ask that it be printed in the RECORD.

The article follows:

THE DELUSION OF CIVIL DEFENSE

(By Arthur J. Vander)

(Everybody's going to make it if there are enough shovels to go around. Dig a hole and cover it with a couple of doors and then throw three feet of dirt on top of it. It's that dirt that does it.—T. K. Jones, Deputy Under-Secretary of Defense for Strategic Theater Nuclear Forces.

(People who think that even with a week's warning they could evacuate two-thirds of the American people, feed them for a month in remote fallout shelters and then resume life in 300 or more devastated cities ought themselves to be evacuated from government forthwith.—New York Times editorial (April 3, 1982).)

Once again, a national debate over the role of civil defense against nuclear attack is taking place in this country. In March, 1982, President Reagan authorized a greatly expanded civil defense program to cost $4.3 billion over the next seven years. It is claimed that the existence of such a program will double the number of American survivors in the event of a nuclear war and will make the occurrence of such a war less likely by persuading the Soviet Union that it cannot destroy the United States population in a nuclear strike against our cities. The basic plan did not originate with the Reagan administration; it dates back at least to the Ford administration and was given greatly added momentum by Carter's Presidential Directive No. 41 in 1978. A great deal of highly specific planning has been completed since then. The lack of public awareness of the plan until recently is only one more testament to the anesthetic fog, now lifting, which has dulled our senses to all issues concerning nuclear war.

Unlike the earlier civil defense plans of the late 1950s and early 1960s which gave us air-raid drills and called for the building of urban shelters, the present program focuses on mass evacuation prior to an attack. Known as crisis relocation, it is designed to evacuate 80 percent of urban dwellers from about 400 high-risk areas—cities with more than 50,000 people as well as other areas with important military or economic installations. It is assumed that the other 20 percent are either non-movable (severely ill hospital patients, for example) or will refuse to evacuate. This huge mass of people, two-thirds of our entire population, is to be received by about 3000 host sites all over rural America, some as far away as 300 miles from the evacuees's cities, and all assumed to be outside the range of immediate destruction from direct hits on the target areas. In these host areas, the evacuees are to be protected from radioactive fallout, fed, and cared-for over a period of 2-4 weeks or longer should an attack actually occur. The details of the evacuation are being formulated piecemeal by state and local government officials under the guidance of the Federal Emergency Management Agency (FEMA), the civilian agency that coordinates planning and relief for both natural and military disasters.

The logic behind the evacuation plans seems, at first glance, quite straightforward. A nuclear attack against American cities by even a small fraction of the present Russian strategic arsenal would result, within minutes, in the death of or severe injury to almost all the inhabitants, and the virtual leveling of the cities' buildings. The deaths and destruction would be due almost entirely to just two of the types of energy generated by nuclear weapons—the blast wave (and its associated high winds), and heat, which directly burns exposed persons and ignites lethal fires. Because the blast and heat effects decrease with distance (deaths and injuries from these forces may extend out 20-30 miles or more from the site of explosion), it is unquestionably true that urban populations could be protected from them if they could be evacuated from the cities into far-enough-removed rural areas before the bombs land. FEMA estimates that approximately one week will be required for the full plan to be implemented—3 days for the actual evacuation and a like

Footnotes at the end of the article.

number for the evacuees to provide themselves with fallout protection.

Formulation of a plan which requires a week's notice may seem strange in an era when Soviet missiles can reach us in 5–30 minutes and when surprise preemptive first-strikes are becoming the major concern. However, proponents of the plan argue that a war is most likely to occur after a period of intense international tension during which the Soviet Union can be expected to evacuate its own citizens before risking an attack. Detection of the beginning of such an evacuation would be the signal for us also to evacuate over the same period.

I do not believe that this very questionable assumption of a week's warning time should dominate discussion of the proposal's merits. As its proponents have emphasized, no economically feasible plan could be effective against all attack scenarios, and crisis relocation should be judged on the merits of what it can achieve in this one, not completely unlikely, scenario for the start of a nuclear war.

But there is another all-important assumption, other than the availability of time, inherent in this plan, one which is not dealt with or even mentioned in any of the FEMA literature. The plan completely ignores the obvious and easily accomplished maneuvre the Soviet Union could perform if they wished to destroy our population: with a single twist of the dials, as former Defense Secretary Harold Brown pointed out, missiles can be retargeted to blanket the evacuation areas, all of which will be known in advance. The numbers are quite adequate—there are some 3000 sites, and the Russians have more than 7500 missiles pointed at us at present with a destructive power equivalent to half a million Hiroshima bombs. (The same argument, of course, applies to our arsenal and a Russian evacuation).

But, as we shall see, there really is no need to bother re-aiming one's missiles in order to destroy an unacceptably large number of the opponent's population, so let us assume that the week's grace period has been granted for the evacuation and sheltering, and that the Soviets have chosen not to re-aim their missiles at the host areas but simply to go ahead and attack with full force the relatively empty cities, and most military installations, fuel depots, refining plants, and other critical industrial sites. FEMA's estimate is that 80 percent of Americans would survive such an attack compared to 40 percent had there been no civil defense measures.[1] The estimates are always given in this euphemistic way—in terms of numbers of survivors rather than numbers killed. This calculates, of course, into 20 percent dead, and that is more than 40 million people. Twenty times more than all Americans killed in all the wars we have thus far fought, twice as many as the Russians lost in World War II, and not over 6 years but rather within minutes or hours.

Would any sane person wish to argue that holding loss of life to "only" 40 million people, along with the destruction of our cities and industrial infrastructure, "reduces the possibility that the Soviets could coerce us in time of increased tension",[2] one of the two goals of crisis relocation? Does such a number (and remember it represents FEMA's most optimistic goal) lend credence to statements like that of one of the top officials in Michigan's Civil Preparedness/Emergency Medical Services: "We want to make a nuclear attack futile. If we can protect our population, what is the other side going to gain by attacking us?" [3]

Can crisis relocation really keep the number of dead "as low as" 40 million people? The answer is, "no". The belief that crisis relocation can protect the lives of 80 percent of our population is a delusion. Such preparations are futile, the result of assumptions based on a combination of psychological denial, wishful thinking, and an ignorance of the overall medical and ecological consequences of nuclear war. We must look closely at these assumptions.

The first is that 80 percent of urban dwellers can be evacuated in the hoped-for three or more days. There is little need for spending much time on this question, since as we will see, it is perhaps the least important of the flaws in this plan. Moreover it has already received much deserved criticism in the mass media, perhaps because it is so easy to conjure up the monumental traffic jams which would result when 150 million persons try to leave the cities all at once, mainly in their own cars; under such conditions, movement could come to a total standstill. Perhaps also because insensitivity to expected human behavior is so much in evidence in many of the specifics of the evacuation process. Those of us who sat in lines for hours during the gasoline shortage a few years ago in order to "tip-up" our cars' tanks know how unlikely it is that we would be willing to do this routinely for the indefinite future (the plan requires us all to maintain our gas tanks relatively full at all times.).

To take another example, in Washington, D.C., city buses are to be used for the many residents without automobiles; drivers are to make three round trips to quite distant locations. As the congressman who elicited this information asked, can one really imagine the typical metro bus drive taking his wife and family on the first trip, then being talked into leaving them and making two more round trips back when a nuclear holocaust is coming? [4]

A key to understanding this insensitivity to the likelihood of widespread, counterproductive and frankly antisocial behavior is provided by the answer to question 31 in the FEMA booklet, "Questions and Answers on Crisis Relocation Planning": "As for the likelihood of police officers, truck drivers, and others carrying out their assigned jobs in a crisis relocation emergency, there can be no absolute certainty. But in *peacetime disasters* [italics added], most people who have a job to do get it done." Many of the suppositions underlying the predicted effectiveness of the evacuation process, per se, are based on FEMA's past experiences with evacuations in the face of localized natural disasters, situations not at all comparable to impending nationwide nuclear holocaust.

The second assumption inherent in the 80 percent survival figure is that no deaths will occur among the evacuees from radiation sickness (or other attack-related causes) during the shelter period. This is a totally unrealistic assumption given the extremely high radiation levels which will exist in many areas and the types of protection available or proposed. Unlike that for blast and heat, the lethal zone of the radioactive fallout generated by nuclear explosions is not limited to the direct target area, for the generated radioactive particles may be borne by the winds for many hundreds of miles before returning to earth as a fine dust during the first hours and days. The amount of radiation produced by the deposited fallout decreases with time as the radioactive elements "decay". Any all-out nuclear attack with hundreds or thousands of warheads, many of which will be exploded on the ground (air explosions produce less fallout), would blanket virtually the entire country with large amounts of radioactive fallout, amounts adequate to produce death or severe radiation sickness within days to weeks in unprotected persons.

The crisis relocation plan recognizes the existence of the fallout problem and calls for all the evacuees and residents of host areas to have fallout protection available. The planners acknowledge that the amount of fallout protection now existing in host areas is less than adequate even for the present residents. Therefore evacuees, upon arrival, would have to develop their own additional fallout protection, mainly by adding earth alongside and on top of existing structures. But this is no easy matter. It takes 18 inches of dirt piled against windows and exposed walls to reduce the level of radiation by 10-fold. Moving dry unfrozen earth requires considerable time and effort when done by hand (and FEMA acknowledges this will be the case); a cubic foot of earth weighs about 100 lbs, a cubic yard almost a ton and a half. And what if the attack occurs in winter when the ground is frozen? And, of course, this is all predicated upon having a building (preferably with a basement) against which to pile the dirt. In this regard it is not comforting to discover that present FEMA plans call for a contingent of 179,000 residents of Washington, D.C. to go to an area of the Shenandoah Valley 130 miles away, where the principal facilities consist of one hotel and a golf course.[5] Examples of this kind are becoming legion as specific FEMA plans come under greater scrutiny.

Shielding against radiation is not the only prerequisite for an adequate shelter. Once the attack has occurred, people must remain inside the shelters until the outside fallout decays to a safe level, a period which may exceed one month if the intensity of fallout has been great. Therefore, the shelter must have adequate ventilation and sanitation facilities, and it must be stocked with sufficient food, water, and other supplies. There seems to have been very little appreciation of these simple facts by the planners, and even if they were recognized, there is little if anything that could be done given the discrepancy between available host facilities and the huge number of evacuees.

Look, for example, at the plans for feeding the evacuees. The FEMA booklet asks, "What would people eat?" and answers:

"People will be asked to bring non-perishable food with them. This could provide several days' food supply for each family. Also there will be another several days' inventory of food in the host area retail stores. For the longer term, reliance would be on plans for food distributors to change their normal wholesale-to-retail distribution patterns . . . this plan would depend almost entirely on present commercial distributors—the people who feed 220 million Americans today." [6]

But America following a nuclear attack will not be the America of "today"! There will be no "food distribution patterns" after the cities have been destroyed and the countryside covered with radioactive fallout, certainly not for the first months, or even longer. There will be no way to bring in food from the outside once the bombs have fallen, for there will no longer be a functioning "outside".

The inescapable conclusion is that a large number of persons will be inadequately protected from radioactive fallout and will die

from radiation sickness within the first few weeks after an attack. A much larger number will have received nonlethal doses of radiation and will be already ill or severely weakened from other causes, such as lack of food, when they emerge from their shelters to face an incredibly altered world.

And this brings us to the third major assumption underlying the 80 percent survival figure, and it is the most significant illusion of all. It is the unstated assumption that the primary effects of nuclear weapons—blast and heat (to be protected against by evacuation), and radioactive fallout (to be protected against by sheltering in the host areas)—are the only ways in which nuclear warfare kills. If the crisis relocation plans represent an inadequate appreciation of the problems of the shelter period, they show an absolute failure to contemplate the fate of the evacuees beyond this period. The basic point emphasized by many scientists and physcians is that a very large fraction of those who emerge from their shelters will die within months of causes which reflect conditions in the post-attack world. This has been stated succinctly by Kevin N. Lewis (writing of the Russian evacuation plans):

"Even if the . . . evacuation plans were successful they would only defer, not prevent, the impact of the war on civilians. A nation's fixed medical, technical, and educational base would, after all, be destroyed in a nuclear war. Recovery stockpiles and facilities would also be targeted and if some food, pharmaceuticals, clothing, equipment, and spare parts did survive, there would be neither the administrative structure to allocate the goods nor the transport to ship them where they were needed. The destruction of refineries and electric-power stations could interdict resupply, and shortages could develop quickly. Perishable goods, including many foods and drugs, would be lost if electric power were cut off. The devastation of housing would make summer life difficult and winter existence intolerable. In short, civil defense might protect some people, but it could not prevent the widespread destruction of property essential to the support of life; the economic interdependence of an industrialized nation is a vulnerability that cannot be defended." [7]

Question 42 in the FEMA booklet asks: "If there ever were a nuclear attack on the United States, what kind of world would the survivors face?" And the answer: "In a word: grim". What an incredible understatement! The simple fact is that that the entire infrastructure upon which survival in a complex industrial society depends will have been largely destroyed.

Focus only on food supplies for the moment. Most livestock will have been killed by radioactive fallout. The entire year's crop may also have been destroyed, particularly if the attack occurs during the spring or at harvest time. There are almost no food surpluses stored away in the United States anymore, and almost all of the storage facilities that do exist will have been destroyed as will processing plants and transport facilities for whatever food is available. Massive food shortages and starvation would occur immediately and be prolonged for years as a result of lack of fuel, fertilizers, pesticides, and the physical agricultural infrastructure.

Infection will also be rampant, for every factor known to breed disease will be present. Malnutrition, for example, need not kill a person from outright starvation; it need only weaken his resistance to infection, and the microbes will do the rest. Add to this the fact that radiation, in much smaller doses than that which kills directly, causes a marked reduction in the body's ability to fight off infection. For example, it takes 400-500 radiation units to kill the average person outright, whereas 50 such units can significantly reduce his resistance to infection.

The public health problems which will increase the spread of infection among such persons already weakened by malnutrition and even small doses of radiation will be multiple and profound. The survivors will have already been crammed together for weeks in highly congested shelters in which adequate ventilation is precluded by the need to keep out fallout, and crowding will continue to be intense for many months. Anywhere near the bomb blasts the sewers will not be working, and a clean unpolluted water supply will not be available. There will be millions of rotting human and animal corpses fed upon by insects and bacteria, which unlike us are highly resistant to radiation and will thrive. Medical services will be hopelessly inadequate—those few rural hospitals with doctors not dead or sick themselves, will have literally millions of patients, and there will be little or no medication to treat them with. The results of such conditions are predictable: Recent medical analyses have concluded that in the post-attack period we can expect epidemics the likes of which we have not seen since the Middle Ages—cholera, tuberculosis, plague, typhoid fever, and the like. Estimates are that as many as 35 percent of the survivors will die of infection in the first year.[9]

Starvation and infection will not be the only killers during this first year—many more persons will die from exposure during the winter, for there will be little or no fuel and inadequate housing.

All this is to say nothing of the increases in leukemia, other cancers and, possibly, birth defects we can expect in subsequent years in whatever long-term survivors there are. Again it is essential to understand that doses of radiation which do not directly kill increase the incidences of these diseases. Indeed, scientists now accept that there are no safe levels of radiation as far as the effects on cancer and birth defects are concerned, and keep in mind that for many months after the attack the radiation levels will still be far higher than presently accepted as peacetime levels. Just how high depends on whether the Soviet Union chooses to target the large number of nuclear power plants in this country. Most of the radioactive elements in these plants decay much more slowly than most of the radioactive elements generated by the explosion of the weapons themselves. If a nuclear plant were blown up, these elements would be sucked into the mushroom cloud and deposited downwind as a part of the total radioactive fallout. The results would be that a very sizable proportion of the entire country would be uninhabitable for decades or even centuries.[10]

There is, unhappily, more: the potential global ecological effects of an all-out nuclear war—effects which are difficult to predict quantitatively but which may be the most destructive of all to survival, not just in the attacked countries, but in all the nations of the world. In 1975, a report[11] by the National Academy of Sciences concluded that major nuclear exchange could cause marked depletion of stratospheric ozone by nitrogen oxides generated by the explosions and injected into the stratosphere. This ozone layer protects all living organisms from the sun's ultraviolet radiation, and loss of a significant fraction of it would result, as the report pointed out, in blindness in all animals—mammals, birds, insects, and unprotected humans. It would produce irreversible injury to the land and aquatic plantlife which constitute the beginning of the food-chains for all living creatures. It would cause direct damage to human health through burns and skin cancers. The report also predicted that atmospheric effects of ozone depletion and injection of dust into the upper atmosphere could lead to major worldwide decreases in temperature. These effects, along with those of globally distributed radioactive fallout, threaten such severe disruptions of worldwide ecological systems as to call into question the very survival of many forms of life, including the human species.

The message in all this has been stated simply by Jonathan Schell:

"Nuclear weapons . . . do not only kill directly, with their tremendous violence, but also kill indirectly, by breaking down the man-made and natural systems on which individuals lives collectively depend. Human beings require constant provision and care, supplied both by their societies and by the natural environment, and if these are suddenly removed people will die just as surely as if they had been struck by a bullet.[12]

Yes, crisis relocation might very well save many persons (though certainly not 80 percent) from immediate death during a nuclear bombardment, only to have many, perhaps most, of them die later from infection, starvation, cold, cancer, and perhaps simply the lack of desire to live in such a devastated world.

My final criticism of crisis relocation is, perhaps, the most important of all—the plan is profoundly dangerous. It is medicine which is likely to bring about the very disease for which the medicine is prescribed. Why is this so crucial to understand? Because without this recognition the proponents for the plan could simply reply to the other criticisms, "Yes, perhaps there are practical problems and long-term consequences which would result in many more fatalities than we originally predicted, but surely *some* additional persons would be saved by the plan; surely this is better than doing nothing." Unreal and bizarre as it may seem to be making such comparisons when the minimum numbers of dead amount to tens of millions, there is a cold computer-like logic to this view—until one adds to the balance the strong likelihood that crisis relocation may lead to a nuclear holocaust which might otherwise not have occurred.

Creation of an American crisis relocation plan does not contribute to deterrence or stability, one of its goals. Rather it is, for two reasons, dangerously destabilizing. First, the belief, mistaken as it is, that we have an effective way of protecting our population can only encourage the irresponsible, indeed mad, idea that it is feasible to fight, survive, and win a nuclear war; and this can have pernicious effects on the way we conduct our foreign policy. Indeed, it is easy to see that the new civil defense policy is an important component of the progressive shift from the previously dominant strategy known as "mutual assured destruction" (MAD) to one which (as described in the Pentagon's recent Fiscal Year 1984-1988 Defense Guidance) emphasizes nuclear war-fighting strategies and the need to "prevail"

over the Soviet Union, even in a "protracted nuclear war."[12]

As pointed out by Dr. J. Klugman, a Yale University Pyschiatrist: ". . . to plan for nuclear war is tantamount to fostering a psychotic denial of such a war's devasation in our citizenry and our government."[13] Not only might belief in an effective civil defense plan make our foregin policy and weapons programs more provocative, the actual initiation of evacuation in a time of crisis could trigger an attack by the opposition. Consider for a moment the following scenario: It is 1985; a new crisis in Iran has led to an actual confrontation of Soviet troops and American rapid-deployment forces in the Iranian oil fields. Conventional weapons are being used and perhaps even a few battlefield nuclear weapons. As the crisis mounts, the leaders of both sides are under enormous pressure, fearing that the opponent may, in a panic, go for a pre-emptive first stike at the other's homeland. The President of the United States agonizingly decides that his duty is to protect our population by calling for an evacuation. How do you think the Soviets will interpret this? We know and announce publicly that we are doing so only because we are afraid we are about to be attacked. But they can only assume that we are evacuating so that we may then launch a first strike against them. They feel they have no choice but to beat us to the punch, and the button is pushed. Change the names and the order of events if you wish—it makes no difference.

The view that crisis relocation planning is destabilizing is, of course, precisely the opposite of that taken by the plan's proponents. Indeed, as mentioned briefly earlier, one of the two major goals of the program (the first being to enhance survivability should a nuclear war occur) is to help prevent nuclear war:

"The U.S. civil defense program should enhance deterrence and stability, and *contribute to perceptions of the overall U.S./Soviet strategic balance* and to crisis stability, and also reduce the possibility that the Soviets could coerce us in times of increased tension [italics added][14]

What exactly does this convoluted sentence really mean and how does the program achieve the stated goal? Nowhere in the questions-and-answers booklet in which it appears are these matters taken up again. Yet, inevitably, when the goal is described and elaborated upon publicly it is in the context of the Soviet civil-defense program, even though Administration officials (and the FEMA publication) deny that the justification for the American effort is based on the existence of the Soviet program. Moreover, it is difficult to interpret the reference to "U.S./Soviet Strategic Balance" in any other terms.

In brief, the proponents of the American plan contend that the Soviet Union has an extremely effective evacuation and shelter plan which must be matched; otherwise in a crisis the Soviet Union could protect its own population by evacuating them and then subject us to nuclear blackmail.

There is no question that the Russians have, indeed, directed a large effort to civil defense measures—elaborate evacuation plans and instruction manuals, shelters for most of the country's leaders and some industrial personnel, civil-defense drills and compulsory training for civilians, survival techniques, and the like. The CIA has estimated that the full-time civil defense establishment numbers more than 100,000 people and that a similar program in the United States could cost $2 billion a year.

Yet there remains a great and persistent skepticism in American foreign policy and intelligence circles about the effectiveness of the Soviet effort. (It has been reported that Administration officials have privately stated that this skepticism is a major reason for not relying on comparisons to the Soviet effort for justification of the proposed American Program.[15]) For example, two former American ambassadors to Moscow concluded that the Soviet Union did not have a program which could protect a large part of the civilian population.[16] In this regard, a crucial point has been made by William Hyland, a top official in the Nixon and Ford Administrations: "It's a mistake to confuse a program to protect leaders and key industrial personnel with effective civil defense for the population."[17] The United States also spends hundreds of millions of dollars annually to provide for protection of key officials in the case of nuclear war, but this money is not included in our civil defense budget, unlike the situation in the Soviet Union.

Even within Russia, as the most recent first hand Western study emphasizes, the civil defense program for the civilian population has serious credibility problems:

"Many Russians have apparently concluded that nothing the Kremlin has done . . . has significantly lowered the probability of annihilation if a nuclear conflict comes. . . . In practice, much of the [evacuation] effort seems to have gone into lectures and demonstrations. It is these that have given rise to much of the cynicism among ordinary people since the precautions advocated are widely regarded as inadequate to the threat. Public apathy is suggested by the nickname given to the program . . . the Russian word for coffin."[18]

This public view is well-deserved. All of the problems which make our own plan impractical and futile apply to the Soviet Union's plan, indeed more so. This was succinctly emphasized by retired Rear Admiral Eugene J. Carrol, Jr., deputy director of the Center for Defense Information, a private study group:

"Strangely, a great deal of the rationale for our relocation plan is based on the fact that the Russians have such a plan. If we can foresee major problems with our plan, how can the Soviets relocate and survive when they can scarcely feed their nation in peacetime? When their transportation system and roads are primitive and only five per cent of the population have cars?[19]

Just one example: Because of lack of transport the Soviet plan calls for the great majority of its urban masses to evacuate the cities on foot!

But, it could be agreed, public apathy and the futility of the Soviet plan are not really the issue—what really matters for stability and deterrence is the Kremlin's view. In this regard, a remarkable transition in Soviet public policy seems to be occurring:

"For years, the Kremlin hid such horrors [of the effects of nuclear war] from the population. Military writers suggested that a nuclear war with the United States was winnable and civil defense pamphlets pictured a nuclear attack in terms suggesting that it would be somewhat like the conventional bombing that Russians underwent in World War II, only more severe.

"Leonid I. Brezhnev and other leaders, seeking to refute the myth that they regard a nuclear exchange as winnable by the Soviet Union, have declared that it would be a universal disaster for mankind.

"A recent edition of the Communist Party Daily Pravda carried a stark forecast of the impact of a new war on the Soviet homeland . . . 'If during the Second World War our country sacrified 20 million lives to the god of war, now in a few hours the number of victims . . . would exceed that many times over.'"[20]

The Pravda article's author, one of the country's leading cancer specialists, went on to paint precisely the same picture of horror described by physicians in this country. Moreover, the Soviet Union has shown on its national television "The War Game," the most vivid depiction of nuclear war ever filmed—a movie never shown on the BBC, for which it was made many years ago.

I do not wish to exaggerate or indulge in wishful thinking; we of course do not really know how effective the Soviet leaders conceive their civil defense measures to be, but I deny that this should be an important consideration in our own decisions concerning civil defense. If we know such plans to be futile and dangerous, how can we possibly argue that having such a program would add to stability and deterrence? Are two hostile persons more likely to come to blows when both are deluded or when at least one maintains his grip on reality?

Futile and dangerous—the recognition of these facts is leading communities all across America—Ann Arbor, Boulder, Cambridge, Philadelphia, New York City, and others—to refuse to participate in any way in civil defense planning. This is one more step in the direction of sanity, in the resurgence of common peoples' common sense, which tells them that civil defense against nuclear war is a delusion, that the only possible defense against nuclear war is prevention.

REDUCTION IN PRICE SUPPORT PROGRAM FOR TOBACCO IS UNWARRANTED

● Mr. SASSER. Mr. President, during the recent recess, Secretary of Agriculture John Block used his discretionary authority granted under the No Net Cost Tobacco Act and lowered the price support for burley tobacco 6

cents a pound. I wrote the Secretary at that time to register my discontent with his action. This is a matter of such significance during these economically pressed times in the farming community that I feel it deserves further comment.

The tobacco industry is particularly important in my home State of Tennessee. With over 45,000 tobacco farmers, Tennessee is the Nation's fourth largest producer of tobacco. As these figures suggest, tobacco is central to Tennessee's economy. There are jobs in every one of Tennessee's 95 counties that are related to the tobacco industry. In fact, 1 out of every 32 Tennessee jobs, roughly 3 percent, exists because of tobacco. Total tobacco related income from these jobs was $614 million in 1979.

Secretary Block's action is very untimely since it came so close to the opening of the tobacco marketing season. Burley tobacco had already been harvested and prepared for market when the price support was suddenly lowered. In my letter to the Secretary I pointed out that such action at this late date would undermine plans farmers had made based on previously announced price support levels. In effect, Mr. Block pulled the rug out from underneath farmers who had calculated the income their harvest would bring. The lowered price support level could mean the loss of $30 million to burley farmers in addition to wreaking havoc on market conditions.

My fears in this regard were borne out when farmers in Johnson City, Tenn., unhappy with the prices offered for their burley crops, forced sales of their product to shut down for 2 days. The tobacco growers were expressing their outrage at being told one price existed for the price support program only to find that price changed when they came to market. Their anger was understandable and their plight serves to underscore this administration's continued insensitivity to the problems facing American farmers today.

Let me point out that I recognize the need to keep stocks from becoming excessive. However, there is little evidence to suggest that reductions in the price support level will result in significant reductions in the quantity of to stocks going under loan. Indeed, the quantities of tobacco the burley tobacco growers co-op may take under loan are not expected to exceed levels handled in previous years. Nor are additions to pool stocks expected to result in a total inventory larger than others the co-op has satisfactorily managed during 40 years of operation.

In summary, Secretary Block's actions in lowering the price support level for burley tobacco compounds an already bleak picture for many American farmers. At a time when farm prices are greatly depressed and farm income continues downward, further price reductions are unwarranted.

TEXAS RESOLUTION COMMENDING THE ELDERLY

● Mr. TOWER. Mr. President, at the request of Texas State Representative Tim Von Dohlen, I should like to have printed in the RECORD the following resolution recently adopted during the special session of the Texas State Legislature. I most firmly believe that our Nation's elderly are among our country's most valuable resources of knowledge and experience, and for this reason, we must continue our efforts to insure that the special needs of this vital segment of the population are met in a responsible and compassionate manner.

The resolution follows:

HOUSE CONCURRENT RESOLUTION

Whereas, the number of elderly persons in Texas is growing rapidly; the 1980 census reflects more than 1.9 million Texans age 60 and older, and the total is projected to increase to more than 3 million by the year 2000; and

Whereas, the quality of life of senior citizens is very important, and insofar as possible, the aging should be able to enjoy within their own families and communities a life of fulfillment, health, security, and contentment and should be appreciated as an integral part of society; and

Whereas, the great majority of these persons are able to live full and useful lives. For some, however, advancing age brings increasing dependence on their families, communities, and governments. Older people in this society should be able to participate in the full continuum of community life in order to enhance their physical and mental health; and

Whereas, complex issues require a working partnership among individuals, families, communities, volunteers, private enterprise, and government to plan for the most efficient and effective use of resources from every sector to meet the needs of our elderly population; and

Whereas, being part of the work force is conducive to better mental and physical health, and appropriate opportunities for obtaining financial stability, through employment, public or private subsidies, or other forms of assistance pension plans, should be fostered for the elderly; and

Whereas, senior citizens in Texas have undertaken to help themselves by means of a statewide network of area agencies on aging sponsored by regional councils, local governments, and private nonprofit organizations through programs administered and supported by the Texas Department on Aging; and

Whereas, improper nutrition is recognized as an acute problem among the elderly, with many older persons being unable to afford quality food for well-balanced diets or lacking mobility or incentive to prepare nutritious meals; and

Whereas, proper nutrition is an essential component of good health and is essential for people to live productive, meaningful, and independent lives; now, therefore, be it

Resolved by the Texas House of Representatives, (the Senate concurring), That the 67th Legislature, 3rd Called Session, commend all components of the Texas State Aging Network for their outstanding efforts on behalf of the elderly; and, be it further

Resolved, That the 67th Legislature recommend that meeting the needs of older persons be a continuing legislative commitment; and, be it further

Resolved, That the Texas Legislature hereby respectfully memorialize the Congress of the United States to give priority consideration to providing adequate funding to maintain and strengthen comprehensive and coordinate services for the elderly citizens of our nation, particularly those services providing adequate and proper nutrition; and, be it further

Resolved, That a copy of this resolution be prepared and forwarded to the President of the United States, the President of the Senate and the Speaker of the House of Representatives of the United States Congress, and all members of the Texas delegation to the Congress with the request that this resolution be officially entered in the Congressional Record as a memorial to the Congress of the United States of America.●

DETROIT'S JEWISH HOME FOR AGED COMMEMORATES 75TH ANNIVERSARY

● Mr. LEVIN. Mr. President, the Jewish Home for Aged of Metropolitan Detroit is celebrating 75 years of service to the Jewish community of Detroit. On Sunday evening, December 5, the yearlong celebration will conclude with a dinner for its friends and supporters.

The Jewish Home began in 1907 when a small house was purchased to shelter elderly and homeless Jews. There have been several locations over the years, and today there are two separate facilities with a combined population of 310 people.

Recently, ground was broken for still another residence which will house approximately 100 "well" elderly, a new concept in supportive living for senior citizens.

The home satisfies a great range of needs among Detroit's Jewish elderly. It is a progressive geriatric facility which offers skilled nursing care, advanced methods for rehabilitation, a day care program and sheltered workship, training for medical and social work students and many other services. The home's programs are copied and studied throughout the country.

Equally as important as the physical care is the spiritual value to the residents of living in a familiar Jewish setting. Kosher food is served, Jewish holidays are observed, there is a synagogue for daily prayer and culture and tradition are emphasized. It is a place which adds dignity and quality to the lives of the residents—a place where love radiates out from staff, family and friends to those who will spend the remainder of their lives under the care of the entire Jewish community.

I commend the Jewish Home for Aged for 75 years of devoted service and I send special congratulations to

89-059 O-86-33 (Pt. 20)

its president, Marvin Fleishman, its executive vice president, Charles Wolfe, and to its entire board of directors. I am sure that the Jewish Home for Aged will continue to be a source of strength and support to all those who reside there now and to those who will look to it as a place of shelter in the future.●

CHARLES LUCAS

● Mr. HEINZ. Mr. President, I want to recognize as a matter of public record an individual from whom all of us in the U.S. Senate can draw inspiration. Charles Lucas of Brackenridge, Pa., epitomizes the ideals of commitment to human dignity, leadership, and service which ought always to motivate us in our work as public servants.

Mr. Lucas' commitment to the dignity of each individual human being has made a profound impact on Allegheny County, Pa. In 1948, he went to work for Allegheny Ludlum Steel in Brackenridge. It was years before the Brown decision, years before the Civil Rights Act or the Voting Rights Act, years before affirmative action. This young black man had a strong sense of personal pride and worth and was deeply offended by the indignities he and other black people were forced to suffer in the workplace. On his own, he began writing letters to the president of the corporation and to local newspapers holding the corporation to account. Within 5 years, as a direct result of Mr. Lucas' courageous and unselfish efforts, the company began to change its policies. But Charles Lucas did not end his fight there. He expanded his efforts to other companies that practiced discrimination and achieved similar results.

I have related how one young man demanded the respect which is the right of every human being—regardless of color. But that is only part of the story. Charles Lucas also understood early on the limitations of working alone, and the value of banding together to get a job done. Over the last quarter century, he has worked and risen to leadership within a dozen major community service organizations: The Allegheny Valley Association for Racial Equality, the Allegheny-Kiski Valley Citizens for Peace, the Umbrella Drug Program, the YMCA, Goodwill Industries, the Allegheny County Anti-Poverty Council, the Special Educational Council to recruit minority students for Pennsylvania State University, the Highlands Community Action Committee, the Brackenridge Borough Advisory Council, the Allegheny County Community Service Advisory Board, the Chamber of Commerce, and by far the most important of all, the National Association for the Advancement of Colored People, where he served for many years as president of the Allegheny-Kiski Valley NAACP, as a member of the State board, and as chairman of the State Board's Direct Action Committee. As a leader, Charles Lucas has an extraordinary ability to convince others that there is no substitute for justice. And under his direction, these groups have helped change attitudes in virtually every institution in Allegheny County.

To those of us who know him, a third theme emerges in Charles Lucas' work: service to others. I have mentioned some of the service organizations which, through his leadership, became stronger forces in the lives of the people of Allegheny County. But more important even than these prestigious organization are Charles Lucas' goals in working through those organizations. He has sought to end discrimination wherever it is found; to secure jobs and housing for minorities; to improve services to the poor and disadvantaged; and to provide minority youth with equal access to education and other opportunities. He has made an enormous difference in each of these areas, but let us look at just one—education. Mr. Lucas, as president of the Allegheny-Kiski NAACP and working through the Education Committee, was a prime mover in a law suit to force the city of New Kensington to improve its educational system and its curriculum to benefit minority students. In addition, he aided in establishing the Martin Luther King, Jr., scholarship fund to help deserving black high school seniors go to college. My friends, that is caring, that is helping, that is service.

I hope that I have succeeded in conveying the spirit of this man—proud yet humble; humorous yet earnest, tough yet compassionate. He has devoted and is continuing to devote his life to insuring that all people are treated with dignity—regardless of race, creed, color, or economic status. He has made a total commitment to guaranteeing that all people have equal access to the benefits of our society. Our body can only gain from following his example.●

ORDER OF BUSINESS

Mr. BAKER. Mr. President, in a moment, I intend to move that the Senate stand in adjourment until 2 p.m. tomorrow, in accordance with the order previously entered.

I anticipate that on tomorrow an effort will be made to place before the Senate S. 995, which was the subject of an extensive colloquy during the day today. Senators should be on notice of that.

Mr. President, there is on order, I believe, that bills, resolutions, petitions, memorials, and statements may be received and placed in the RECORD until 5 p.m. today. Is that not correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. I am advised that the minority leader does not wish to be present at the time such a motion is made.

I inquire of the acting minority leader if he has any need for additional time for the Senate to be in session.

Mr. EXON. The majority leader is correct. We have nothing further that we know of on this side.

Mr. BAKER. I thank the Senator.

ADJOURNMENT UNTIL 2 P.M. TOMORROW

Mr. BAKER. Mr. President, I move, in accordance with the order previously entered, that the Senate stand in adjournment until 2 p.m. tomorrow.

The motion was agreed to; and at 2:03 p.m. the Senate adjourned until tomorrow, November 30, 1982, at 2 p.m.

NOMINATIONS

Executive nominations received by the Secretary of the Senate October 20, 1982, under the authority of the order of the Senate of October 2, 1982:

DEPARTMENT OF JUSTICE

Daniel F. Lopez Romo, of Puerto Rico, to be U.S. attorney for the district of Puerto Rico for the term of 4 years vice Raymond L. Acosta.

Matthew Chabal, Jr., of Pennsylvania, to be U.S. Marshal for the middle district of Pennsylvania fo. the term of 4 years, vice John L. Buck, term expired.

NATIONAL INSTITUTE OF EDUCATION

Manuel J. Justiz, of New Mexico, to be Director of the National Institute of Education, vice Edward A. Curran, resigned.

NATIONAL INSTITUTE OF HANDICAPPED RESEARCH

Douglas A. Fenderson, of Minnesota, to be Director of the National Institute of Handicapped Research, vice Margaret Joan Giannini.

U.S. COAST GUARD

The following Regular officers of the U.S. Coast Guard for promotion to the grade of captain:

Philip M. Lebet	David H. Whitten
Richard A. McBride	Lance A. Eagan
James D. Prout	Hugh L. Thomas, Jr.
James M. Seabrooke	William J. Wallace, Jr.
William E. Zimmerman, Jr.	Harold L. Bonnet
James L. Walker	Elmer Sorensen, Jr.
Robert A. Bastek	Raymond D. Bland
Ronald M. Potter	James F. Greene, Jr.
George A. Casimir	Joseph J. Smith
Thomas P. Keane	Walter M. Coburn
John G. Schmidtman	Wade M. Moncrief, Jr.
Richard A. Walsh	Glenn E. Haines
Harvey F. Orr	Peter T. Muth
Rudy K. Peschel	Michael O. Murtagh
Philip J. Kies	James A. Umberger
John W. Lockwood	Kwang P. Hsu
Harold G. Fletcher, Jr.	Albert F. Baker
Cecil W. Gray, Jr.	George E. Mason
Thomas W. Boerger	Norman H. Huff
John G. Denninger, Jr.	Thomas D. Smith
	David K. Carey

Wayne P. Stevens
Joseph R. Finelli
Scott D. McCowen
David V. V. Wood
Kent M. Ballantyne
Robert G. Bates
Kent H. Williams

The following-named Reserve officers of the Coast Guard to be permanent commissioned officers in the grades indicated:

Lieutenant

Joseph P. Drazek, II

Lieutenant (junior grade)

Michael J. Bechtel
Robert Y. Ben-Hanania
Kent D. Morris

U.S. ARMY

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 1370:

To be general

Gen. Frederick J. Kroesen, [redacted] (age 59), U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 601, to be reassigned in his current grade to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be general

Gen. Glenn K. Otis, [redacted] U.S. Army.

U.S. AIR FORCE

The following officer for appointment in the Regular Air Force in the grade indicated, under the provisions of section 531 and 716, title 10, United States Code, with date of rank to be determined by the Secretary of the Air Force.

LINE OF THE AIR FORCE

To be captain

Thunker, Robert R., [redacted]

The following officers for appointment in the Regular Air Force under the provisions of section 531, title 10, United States Code, with a view to designation under the provisions of section 8067, title 10, United States Code, to perform the duties indicated, and with grades and dates of rank to be determined by the Secretary of the Air Force in accordance with section 533, title 10, United States Code.

MEDICAL CORPS

Bogner, David F., [redacted]
Fornal, Robert E., [redacted]
Gillette, Robert K., [redacted]
Glifort, Kenneth F., [redacted]
Lohr, David C., [redacted]
Sargent, Daniel T., [redacted]

DENTAL CORPS

Ballesteros, Tomas J., [redacted]
Duckett, Mark A., [redacted]
Eschler, Bradford M., [redacted]
Floyd, Claborne L., [redacted]
Gimlin, Dennis R., [redacted]
Hartgerink, Dale V., [redacted]
Kielt, Laurence W., [redacted]
Murchison, David F., [redacted]
Satrom, Lirk D., [redacted]
Schmeltzer, Lawrence D., [redacted]
Underhill, Ronald R., [redacted]

The following persons for appointment as Reserve of the Air Force, in the grade indicated, under the provisions of section 593, title 10, United States Code, with a view to designation under the provisions of section 8067, title 10, United States Code to perform the duties indicated.

MEDICAL CORPS

To be colonel

Conrad, Larry L., [redacted]

To be lieutenant colonel

Borgesen, Paul B., [redacted]
Gahagan, Thomas G., [redacted]
Howlett, Nelson E., [redacted]
Ildefonso, Valentin T., [redacted]
Lee, Jones A., [redacted]
McLaughlin, Chester S., Jr., [redacted]

The following person for appointment as Reserve of the Air Force (ANGUS) in the grade indicated under the provisions of sections 593 and 8351, title 10, United States Code, with a view to designation under the provisions of section 8067, title 10, United States Code.

MEDICAL CORPS

To be lieutenant colonel

Hales, Robert E., [redacted]

The following officer for promotion in the Air Force Reserve, under the provisions of sections 1552 and 8367, title 10, United States Code (Non-EAD).

DENTAL CORPS

To be lieutenant colonel

Jimenez-Puig, Gabriel, [redacted]

The following officers for promotion in the Air Force Reserve, under the provisions of section 8376, title 10, United States Code (Non-EAD).

MEDICAL CORPS

To be lieutenant colonel

Osorio, Paul A., [redacted]
Palmer, Patrick M., [redacted]

The following-named officers for permanent promotion in the U.S. Air Force, in accordance with section 601, title VI, transition provisions, Defense Officer Personnel Management Act of 1980, with dates of rank to be determined by the Secretary of the Air Force.

LINE OF THE AIR FORCE

To be colonel

Jensen, Stanley F., [redacted]

To be lieutenant colonel

Cobean, John E., [redacted]

To be major

Amrhein, Philip C., Jr., [redacted]

Executive nominations received by the Secretary of the Senate October 22, 1982, under authority of the order of the Senate of October 2, 1982:

DEPARTMENT OF STATE

Edward Lionel Peck, of California, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Islamic Republic of Mauritania.

INTERNATIONAL BANKS

W. Allen Wallis, of New York, to be U.S. Alternate Governor of the International Bank for Reconstruction and Development for a term of 5 years; U.S. Alternate Governor of the Inter-American Development Bank for a term 5 years; U.S. Alternate Governor of the Asian Development Bank; and U.S. Alternate Governor of the African Development Fund, vice Myer Rashish, resigned.

ACTION AGENCY

Betty H. Brake, of Oklahoma, to be Deputy Director of the ACTION Agency, vice Winifred Ann Pizzano.

FEDERAL COUNCIL ON THE AGING

Edmund T. Dombrowski, of California, to be a Member of the Federal Council on the Aging for a term expiring June 5, 1985, vice Aaron E. Henry, term expired.

NATIONAL COUNCIL ON THE HANDICAPPED

Nanette Fabray MacDougall, of California, to be a Member of the National Council on the Handicapped for a term expiring September 17, 1984 (reappointment).

U.S. AIR FORCE

The following Air National Guard of the United States officers for promotion in the Reserve of the Air Force under the provisions of section 593(a) title 10 of the United States Code, as amended:

LINE OF THE AIR FORCE

To be lieutenant colonel

Maj. Bruce C. Bechtel, [redacted]
Maj. Jimmie D. Benton, [redacted]
Maj. Kenneth E. Brown, [redacted]
Maj. George E. Donnelly, [redacted]
Maj. James W. Glasser, [redacted]
Maj. Robert R. Hardy, [redacted]
Maj. Larry G. Harrison, [redacted]
Maj. Warren D. Krise, [redacted]
Maj. Herman W. McAllester, Jr., [redacted]
Maj. Charles J. Meitz, [redacted]
Maj. Ismael Melendez, [redacted]
Maj. Kenneth S. Peterson, [redacted]
Maj. Lloyd L. Prevett, Jr., [redacted]
Maj. James M. Reuss, [redacted]

CHAPLAIN

Maj. Johnny M. Embery, [redacted]

MEDICAL CORPS

Maj. Leonard D. Dileo, [redacted]
Maj. Wilbur F. Howard Jr., [redacted]
Maj. Birendra N. Tandan, [redacted]

NURSE CORPS

Maj. Mary A. Bechik, [redacted]

BIOMEDICAL SCIENCES CORPS

Maj. Carl L. Alden, [redacted]

U.S. NAVY

The following-named candidates in the enlisted commissioning program to be appointed permanent ensign in the line or staff corps of the U.S. Navy, subject to qualification therefor as provided by law:

Avery, Gary A.
DeJose, Edward S.
Gatewood, Darnell
Jarvis, James V.
Jones, Calvin A.
Lawson, John E.
Meloncon, Claude C.
Nelson, Gary J.
Stuart, Charlie F.
Bosserman, James L.
Galione, Richard J.
Hodges, Brian D.
Johnson, Kirk A.
Kelly, Martin G.
Logan, Michael A.
Moore, James E.
Simpson, Karen E.

The following-named Naval Reserve officers for permanent appointment in the line or staff corps of the U.S. Navy in the permanent grade of ensign, subject to qualification therefor as provided by law:

Anderson, Daniel J.
Caruso, Frank J., Jr.
Croteau, Michael G.
Deemie, Robert W.
Griffith, James G.
Hoekstra, Jerry M.
Kernen, Joel W.
Morehead, Jack R.
O'Regan, Richard M.
Preiser, Peter P., Jr.
Sult, David B.
Trupia, Joanne L.
Walpole, Joseph L., Jr.
Carlson, Carl F., II
Clements, Jerry D.
Curtiss, Dwayne H.
Foster, Martin H.
Hall, William M.
Howard, Harold H., III
Lovell, Janice S.
O'Hara, Richard A.
Poole, Philip A.
Rose, Douglas H.
Swicker, Charles C.
Venlet, Douglas J.

Commander Thaddeus R. Grant, U.S. Navy, retired, to be reappointed a permanent commander from the Temporary Dis-

ability Retired List, subject to qualification therefor as provided by law.

Kenneth G. Gross, U.S. Navy officer, to be appointed a permanent captain in the Medical Corps in the Reserve of the U.S. Navy, subject to qualification therefor as provided by law.

Clarence W. Rawson, Jr., ex-Naval Reserve officer, to be appointed a permanent captain in the Medical Corps in the Reserve of the U.S. Navy, subject to qualification therefor as provided by law.

John J. Demakas, U.S. Navy officer, to be appointed a permanent commander in the Medical Corps in the Reserve of the U.S. Navy, subject to qualification therefor as provided by law.

The following-named ex-U.S. Navy officers, to be appointed permanent commander in the Medical Corps in the Reserve of the U.S. Navy, subject to qualification therefor as provided by law:

Busch, Frederick M.
Stone, Ronald K.

The following-named medical graduates to be appointed permanent commander in the Medical Corps in the Reserve of the U.S. Navy, subject to qualification therefor as provided by law:

Carlisle, James H., IV
Liu, Paul I.

U.S. NAVY

The following-named candidates in the enlisted commissioning program to be appointed permanent ensign in the line or staff corps of the U.S. Navy, subject to qualification therefor as provided by law:

Frage, Ernst P.
Munoz, Hermogenes R.
Taylor, Kenneth R.
Hicks, James
Putman, David R.

Charles L. Hopkins, III, Navy enlisted scientific education program officer, to be appointed permanent ensign in the line of the U.S. Navy, subject to qualification therefor as provided by law.

The following-named Naval Reserve officers for permanent appointment in the line or staff corps of the U.S. Navy in the permanent grade of ensign, subject to qualification therefor as provided by law:

Bakarich, Matthew S.
Bell, Sherry S.
Curran, Stephen J.
Freeseman, Douglas D.
Glazer, Gary F.
Greni, Sterling R.
Grossman, Richard R.

HOUSE OF REPRESENTATIVES—*Monday, November 29, 1982*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Gracious God, from whom comes every good gift, bless, we pray, all those who work for righteousness and good will among people. We especially remember those who labor in this place that their efforts will give direction to the common good and confidence and security to the people of this Nation. Teach all of us to know the paths of truth and honor that ought be the standards of those who call upon You, that with diligence and resolve we will do those things that bring justice and mercy upon our land and allow us to be the people You would have us be. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

NOVEMBER 23, 1982.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, U.S. House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: I have the honor to transmit herewith a copy of the Certificate of Election for the Honorable Katie Hall, who was duly elected Representative in Congress from the 1st Congressional District of the State of Indiana in a Special Election held on November 2, 1982.

With kind regards, I am

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

SWEARING IN OF HON. KATIE HALL OF INDIANA AS A MEMBER OF THE HOUSE

The SPEAKER. Will the gentleman from Indiana (Mr. HAMILTON), the dean of the Indiana delegation, along with the members of the delegation from Indiana, escort the newly elected Member to the rostrum?

Mrs. HALL of Indiana appeared at the bar of the House and took the oath of office.

The SPEAKER. Congratulations. The gentlewoman is a Member of the Congress of the United States.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

NOVEMBER 29, 1982.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, U.S. House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in the Rules of the House of Representatives, the Clerk received, on October 4, 1982, the following messages from the Secretary of the Senate:

(1) That the Senate agree to the conference report to H.R. 6968.

(2) That the Senate agree to the House amendments to the Senate amendments Numbers 3, 5, and 8, and recede from its amendments Numbers 2, 4, 6, and 7, to H.R. 5228.

(3) That the Senate agree to the House amendment to S.J. Res. 113.

(4) That the Senate agree to the conference report to H.R. 6976.

(5) That the Senate agree to the House amendments to the Senate amendment to H.R. 4613.

(6) That the Senate agree to the conference report to H.R. 4717.

(7) That the Senate passed the following without amendment: H.R. 5879, H.R. 4476, H.R. 6170, H.R. 6865, H.R. 3451, H.R. 3592, H.R. 2340, H.R. 1481, H.R. 7292, H.R. 5941, H.R. 3171, H.R. 6273, H.R. 3278, H.R. 5658, H.J. Res. 568, H.R. 1281, H.R. 684, H.R. 6029, H.R. 6811, H.R. 825, H.R. 2193, H.R. 1826, H.R. 6276, H.R. 6142, H.R. 4490, H.R. 7115, H.R. 6156, H.J. Res. 588, H.J. Res. 486, H.R. 5662, H.R. 828, H. Con. Res. 364, H.R. 4662, H.R. 2342, H.R. 1841, H.R. 1783, H.R. 6188, H.R. 4468, H.R. 4828, H.R. 7293, H.R. 2528, and H.J. Res. 612.

(8) That the Senate agree to the House amendment to S. 2386.

(9) That the Senate agree to the House amendment to S. 478.

(10) That the Senate agree to the House amendment to S. 1698.

(11) That the Senate agree to the House amendment to S. 2574.

(12) That the Senate agree to the House amendment to S. 1573.

(13) That the Senate agree to the House amendment to S. 2375.

(14) That the Senate agree to the House amendment to the Senate amendments to the House amendments to S. 1210.

With kind regards, I am

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair desires to announce that pursuant to clause 4 of rule I, the Speaker signed the following enrolled bills on Monday, October 4, 1982:

S.J. Res. 261. Joint resolution to designate "National Housing Week"; and

S.J. Res. 262. Joint resolution to designate the month of November 1982 as "National Christmas Seal Month."

APPOINTMENT AS MEMBERS OF U.S. GROUP OF NORTH ATLANTIC ASSEMBLY

The SPEAKER. The Speaker desires to announce that, pursuant to the order of the House of October 1, 1982, empowering him to accept resignations, and to appoint commissions, boards, and committees authorized by law or by the House, he did, on November 10, pursuant to the provisions of section 1, Public Law 689, 84th Congress, as amended, appoint as members of the U.S. group of the North Atlantic Assembly to be held November 14–19, 1982, in London, England, the following Members on the part of the House:

Mr. PHILLIP BURTON of California, chairman;
Mr. HAMILTON of Indiana, vice chairman;
Mr. BROOKS of Texas;
Mr. ROSE of North Carolina;
Ms. OAKAR of Ohio;
Mr. GARCIA of New York;
Mr. ROSENTHAL of New York;
Mr. STARK of California;
Mr. BROOMFIELD of Michigan;
Mr. WHITEHURST of Virginia;
Mr. BADHAM of California; and
Mr. ROTH of Wisconsin.

CONGRESS MUST ADMIT TO GRAVITY OF NATION'S PROBLEMS AND DEMONSTRATE A SPIRIT OF COOPERATION

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, we meet in unusual circumstances. It is a time of severe economic distress unprecedented in the past 40 years. More than 13 million Americans are out of work and more than 6 million others who need full-time employment are working part time. Nearly one-third of our industrial capacity lies idle.

In the national elections earlier this month, the American people made it clear that they expect Congress to act. The time available to us in this post-election session is short. We cannot hope to do all or even most of the things necessary to stimulate a lasting recovery. But we can at least arrest the downward drift of the stagnant economy.

Our first task must be to move people off the unemployment rolls and onto productive payrolls. We can begin the renewal of our highways and bridges, and the rest of the Nation's deteriorating infrastructure. We must reassert the will of Congress to direct the Federal Reserve Board to return to a sustained and steady policy of affordable interest rates without which no lasting economic recovery will be possible.

We can make a beginning on each of these necessities in the short days that lie before us, Mr. Speaker, if we can inspire among us a spirit of cooperation sufficient to subdue the temptations to petty confrontation. We shall not agree on everything, but we owe it to the public to admit the gravity of the Nation's problems and confront them frankly. Such a spirit has predominated at times in our Nation's past. May we strive to engender that constructive spirit in the few days that remain to us this year.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

NOVEMBER 29, 1982.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, U.S. House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in the Rules of the U.S. House of Representatives, I have the honor to transmit a sealed envelope from The White House, received in the Clerk's Office at 4:00 p.m. on Friday, October 15, 1982 and said to contain H.R. 1371, an Act to amend section 12 of the Contract Disputes Act of 1978, and a veto message thereon.

With kind regards, I am

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

CONTRACT DISPUTES ACT OF 1978 AMENDMENTS—VETO MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 97-253)

The SPEAKER laid before the House the following veto message from the President of the United States:

To the House of Representatives:

I am returning without my approval H.R. 1371, a bill "To amend section 12 of the Contract Disputes Act of 1978."

H.R. 1371 would require the Federal Government to pay interest to contractors on claims in excess of $50,000 without regard to the date the claims are certified, as now required by section 6(c) of the Contract Disputes Act. The bill would also require the Secretary of the Treasury to determine interest rates to be paid contractors, taking into account the rates of interest on current commercial loans maturing in approximately 5 years.

The payment of interest by the Government on contractual claims has a long history. Traditionally, the Government's sovereign immunity has barred interest payments unless the terms of a specific statute or contract required it. Among other reforms suggested by the Commission on Government Procurement in 1972 was a recommendation that the Federal Government pay interest on contractual claims. As a result of this recommen-

dation, Congress passed the Contract Disputes Act of 1978.

I have no objection to the language in H.R. 1371 concerning the way in which interest rates on contractual claims against the Government are determined. I strongly object, however, to other language in the bill that would amend the Contract Disputes Act to require that interest on a claim run from the time a claim is submitted without regard to the date of certification of the contractor's claim. This provision is inconsistent with the purpose of the certification requirement of the Contract Disputes Act. That requirement is intended to discourage the submission of inflated claims against the Government by requiring contractors to certify that their claims are made in good faith and are accurate and complete to the best of their knowledge.

By permitting interest to run from the date a claim is submitted, instead of from the date of certification, as current law provides, H.R. 1371 could result in a large increase in Governmental obligations without any corresponding benefit to the claims resolution process so carefully established in the Contract Disputes Act. For this reason, and considering that there have been no hearings or studies conducted addressing the need for such a substantial departure from existing law, I find the bill unacceptable.

RONALD REAGAN.

THE WHITE HOUSE, *October 15, 1982.*

□ 1215

The SPEAKER pro tempore (Mr. WRIGHT). The objections of the President will be spread at large upon the Journal, and the message and bill will be printed as a House document.

Mr. SAM B. HALL, JR. Mr. Speaker, I ask unanimous consent that the veto message of the President, together with the accompanying bill, H.R. 1371, be referred to the Committee on the Judiciary.

This has been cleared with the minority.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

MORE UNEMPLOYED CITIZENS TODAY THAN TOTAL CITIZENS WHEN NATION WAS FOUNDED OVER 200 YEARS AGO

(Mr. BLANCHARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BLANCHARD. Mr. Speaker, there are more unemployed citizens in our country today than there were total citizens in America when our Nation was founded over 200 years ago.

In fact, Mr. Speaker, there are three times as many people out of work here in America than there were people at the time of the birth of our Nation.

Action to put our people back to work is long overdue. Many parts of our country have been living with a serious recession for several years. In Michigan we have more unemployed people than some States have people. We have more unemployed people than there are people in Vermont, Alaska, North Dakota, South Dakota, Delaware, and Wyoming.

And the Federal Government must act to begin to address this problem now.

One way is to promptly enact comprehensive public works and construction legislation during the remaining days of this session to begin to rebuild America's aging infrastructure and put our people back to work.

The need is clear. America's public facilities are wearing out and the cost of repairing them grows by the day, and it grows with our neglect. Failure to repair and maintain our roads, bridges, sewer and water systems, and other aging public facilities threatens our public health and safety, erodes our quality of life, and cripples our economic development.

Someday we will have to face up to this problem, why not now, when we so desperately need to put American men and women back to work?

Past testimony before the Economic Stabilization Subcommittee which I am privileged to chair, documents the erosion of America's public facilities. For example, one out of every five bridges in our country requires major rehabilitation or total reconstruction; 1 out of every 4 miles of our Interstate Highway System requires replacement.

In Michigan there is urgent need for infrastructure improvements in every corner of our State. I have in my hand a lengthy list of important projects, already on the drawing boards, but there are no funds to get these projects going. Whether it is water supply improvement in Menominee, sewer repairs in Ferndale, or bridge repairs in Wayne County, there is much work to be done. In surveying just 5 of the 13 cities I represent, we came up with 27 projects worthy of funding.

Even here in Washington, D.C., over half of the city's water mains need replacement.

The fact is that America's public works investment has dropped 28 percent in the past 15 years. Is it any wonder why we are on our way to being a second-rate economic power with such a lack of investment?

It is time for action. All the sophisticated weaponry we can develop and produce will not save us from ourselves, will not protect and preserve our country if we neglect our communities and our people in distress.

I urge my colleagues to enact a comprehensive public works and construction program that is fair, workable, and targeted where it is needed most. It is time to begin investing in our future. Let us get on with the job.

NATURAL GAS PRICE INCREASES: PEOPLE CANNOT TAKE IT ANY MORE

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, as it gets colder, more and more we will see people across the country faced with the choice of "heat or eat." Why? Because their natural gas bills are literally going through the ceiling in spite of surplus supplies. Over just the last year, rates have gone up an average of 25 percent.

This situation is intolerable, and it is one that we have to deal with quickly. To that end, I am introducing two bills today which I urge all of you to support.

My first bill would roll back gas prices to their October 1 levels and freeze them there through the end of 1984. That would give us the time we need to review the Natural Gas Policy Act and to make needed changes while protecting consumers in the meantime.

The second bill would strike down take or pay clauses now in effect and prohibit such clauses in new contracts. Take or pay provisions in contracts have locked pipelines into purchasing large amounts of costly new and decontrolled gas while lower priced old gas is left sitting in the ground. They are throwing the market way out of balance. Under the bill certain present take or pay provisions could be reinstated after FERC review if they are found to be necessary to prevent disruption of underlying financial agreements and if they would not lead to unreasonable consumer prices.

Mr. Speaker, I keep hearing this issue is too complicated for consideration in the lameduck session. How do you tell a working family whose gas bills are skyrocketing while the thermometers are plummeting that we do not have time to deal with the problem now?

THE LATE GRADY NUTT, "PRIME MINISTER OF HUMOR"

(Mr. HIGHTOWER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HIGHTOWER. Mr. Speaker, he was introduced as the "Prime Minister of Humor." Grady Nutt was an ordained Baptist minister whose unique ministry of humor made him one of the most popular of entertainers.

Grady Nutt, who appeared regularly on the "Hee Haw" television show, was killed November 23 when a plane crashed after taking off from a Vinemont, Ala., airport.

Grady Nutt was a native or Amarillo, Tex., in my district, where he lived until he was 14 years old. He attended Wayland Baptist University before graduating from Baylor University and Southern Baptist Theological Seminary.

His stories about church and preachers endeared him to the hearts of millions. "Hee Haw" cohost Buck Owens described Nutt as an original whose brand of humor cannot be replaced.

In a 1980 interview Grady Nutt said:

Only the most foolish people think that if I have faith in God I'll never face any calamity. The healthy ones realize that with God I can face any calamity.

We thank God for the life and witness of Grady Nutt. He is survived by his wife, the former Eleanor Wilson of Lyndon, Ky., and two sons, Perry, 24, and Toby, 22.

Mr. MAZZOLI. Mr. Speaker, will the gentleman yield?

Mr. HIGHTOWER. I would be happy to yield.

Mr. MAZZOLI. Mr. Speaker, I thank the gentleman for taking the time to mention our friend, Grady Nutt. He lived in my congressional district at the time of his death. He was a very fine man, and a respected ordained minister. We will miss him very much in Kentucky.

MRS. TRUMAN

The SPEAKER pro tempore (Mr. KILDEE). The Chair recognizes the gentleman from Missouri (Mr. SKELTON) who is about to speak about someone well known in this country, and well loved by everyone in this country.

Mr. SKELTON. Mr Speaker, while Congress was in recess prior to the 1982 general election, we were all saddened by the death of former First Lady Bess Truman, who passed away on Monday, October 18, 1982, in Independence, Mo., at the age of 97.

Mrs. Truman was one of the most loved and respected First Ladies in our Nation's history. A gracious lady, with a wonderful sense of humor, dignity, and a quiet pride, she embodied qualities and values treasured by all Americans.

So that our colleagues here in the House might have the chance to pay tribute to Mrs. Truman, and express their sympathies to the members of the Truman family, I have arranged for a special order to take place at the close of business on Wednesday, December 8, 1982.

Mr. Speaker, I invite all Members of the House to join me at that time in honoring this great lady, on behalf of themselves and their constituents. Mrs. Truman will be missed—but her long, full life will continue to serve as an inspiration to us all.

LET US NOT UNDERMINE AMERICA'S STRENGTH

(Mr. STRATTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STRATTON. Mr. Speaker, last week the chairman and members of the House Armed Services Committee returned from a 10-day trip to Europe designed to get a first-hand assessment of the state of our NATO Alliance, as well as the progress of the nuclear arms reductions talks in Geneva.

We met with the members of the North Atlantic Assembly in London; with members of the new West German Government and with opposition leaders in Bonn and in Berlin; and with our own nuclear arms negotiators in Geneva, Ambassadors Nitze and Rowny.

Three key points were made most forcefully to our committee, which I believe should be shared with this House as we begin work on the crucial appropriation bills for fiscal 1983.

First. Any action by this Congress to withdraw any U.S. forces from Europe, a move already underway in the other body, would seriously undermine the North Atlantic Alliance and undercut the new Federal German Government in Bonn, which has emphatically pledged itself to close cooperation with the United States and has vigorously reaffirmed its commitment to carrying forward the two-track decision of the zero option INF negotiations in Geneva, at the same time preparing for installing the U.S. Pershing II missile on its territory if those negotiations should fail.

Second. Any action of the U.S. Congress to deny or delay the planned positioning of the Pershing II in Germany in accord with the earlier NATO decision will also gravely undermine our relations with the current German Government, and seriously weaken the entire NATO Aliiance. To cut out funds now for the Pershing while months still remain to correct any current technical flaws in the weapons, would be shortsighted in the extreme.

Third. Any failure on the part of this remaining session of the 97th Congress to provide funds for the MX-Peacekeeper weapon, will, as Secretary Weinberger said yesterday on television, virtually wipe out the strategic nuclear reduction talks now underway in Geneva. If Congress, by its failure to fund MX, publicly demonstrates its unwillingness to counterbalance recent Soviet strategic missile capabilities, the Soviet negotiators would no longer have any incentive to agree to the substantial strategic reductions contained in the U.S. proposal, on which, by the way, our negotiators gave us their judgment the Soviets were currently involved in serious negotiations.

Whatever may have been the lesson of the November 2 elections, and whatever the predilections of individual Members of this House might be on the three key issues, I urge my colleagues not to cast your votes in this lameduck session without having fully pondered the long-range implications of your action on the future security and foreign policy of the United States.

THE ADMINISTRATION'S WEAK ECONOMIC POLICIES

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, during the election recess, debate among candidates focused attention on the administration's economic policies: Its hollow promises to balance the Federal budget; its reckless tax cuts; its insensitive reductions in Government programs for the needy; its reversal to raise taxes; and, its record deficits.

The American people discovered that the Reagan administration had no coherent economic policy. So, it was on November 2 that the voters said "No" to Reaganomics.

We are fortunate to have the advantage of this postelection session to begin the job of repairing the damage that this administration has done to our economy. Let us begin today to put America back to work.

THIS IS STILL THE REGULAR 2D SESSION OF THE 97TH CONGRESS

(Mr. JACOBS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JACOBS. Mr. Speaker, in this day of inexact English usage, let the record show that this is not a special session of the 97th Congress. It is not a special session called by President Reagan. It is not even in the strictest sense of the traditional vernacular the "lameduck" session of the 97th Congress. It is the regular 2d session of the 97th Congress during which the election intervened.

□ 1230

REPORT ON SOCIAL SECURITY

(Mr. CONABLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONABLE. Mr. Speaker, I would like to announce that at the

close of business today I am going to take an hour to talk about the social security situation.

It is my opinion, Mr. Speaker, that the leadership is making a mistake in not using the Commission which has now adjourned its meeting until December 10 to try to achieve a permanent solution, both short-term and long-term, to the social security dilemma now facing us.

We know that has been the subject of sensitive political rhetoric in recent months, but it seems to me that it would be very wise for the Congress to try to get this issue behind us. The Commission is a valuable tool for achieving that end.

It is obvious that the President and the Speaker must be parties to the negotiations within the Commission, but we all know what has to be done.

I would like to give a report to the Congress on the most recent meeting of the Commission and the prospects for resolution of the problem. Social security is a bad issue to give new Members of Congress to teethe on next spring. In a budget context next spring it will be very difficult to handle, but during a lameduck session—if it is not too late to change our minds about that—it could be possible to achieve the permanent solution that would make us all heroes as we go to our respective political rewards with the end of the 97th Congress.

REPEAL THE DAIRY DEDUCTION

(Mr. GUNDERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GUNDERSON. Mr. Speaker, last August Congress approved a 50-cent deduction from the price support for milk in the belief that the deduction would result in reduced Commodity Credit Corporation purchases of dairy products.

At that time, several Members, including myself, warned that a reduction in dairy price supports would increase, not decrease, milk production.

Projections recently released by the USDA confirm this prediction as the CCC is expected to purchase 13.9 billion pounds—milk equivalent—of dairy products in the current fiscal year—300 million pounds more than last year.

The only thing the 50-cent deduction will do is force some fine young and family dairy farmers out of business. While we cannot prevent the deduction from being implemented on December 1, Congress can make sure that it is short lived.

Clearly, we need to do two things. First, I am today introducing a bill that would repeal the deduction and keep the level of dairy price supports at $13.10 per hundredweight. Second, we must develop and pass a more comprehensive solution to the problems facing the dairy price support program early in the next Congress.

I urge my colleagues to cosponsor this legislation esssential to the survival of family dairy farms.

LET US RETAIN THE CAP ON CONGRESSIONAL PAY

(Mr. PETRI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PETRI. Mr. Speaker, I rise to state my complete and absolute opposition to the outrageous congressional pay raise which is scheduled to go into effect on December 18.

Certainly, I see nothing wrong with compensating Government workers for inflation, but the scheduled 27 percent, $17,000 congressional pay raise is clearly excessive.

I do not know about your districts, but in the Sixth District of Wisconsin, $17,000 is a lot of money. Many of my constituents would be happy to be earning $17,000, much less getting a $17,000 raise.

When people are hurting in Wisconsin and all across the country due to the current economic climate, it is unconscionable that Congress should seek to reward itself in this manner.

Accordingly, I intend to work to maintain the cap on congressional pay. This is not the time for feathering our own congressional nests.

FREEZE CONGRESSIONAL SALARIES

(Mr. SMITH of Oregon asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Oregon. Mr. Speaker, we all know that leadership should begin at the top.

Now it is time to put our money where our mouths are.

Today I am introducing a bill that would freeze congressional salaries at the present level.

For many months I have been advocating a total freeze on Federal spending to balance the budget. This pay freeze bill is really no different.

It simply says we will take no more, and no less than we are right now.

If we do not act by December 17, Members of Congress will get a raise between $2,426 and $16,637.

How fair is that?

How the devil can we even consider raising our own salaries at a time when millions of Americans are out of work and many more are accepting wage cuts just to stay employed.

We simply cannot. Leadership begins right here.

I for one am not going home to the unemployed in Oregon to justify a pay raise because Congress cannot put a lid on Federal spending.

That is not my idea of a Christmas present.

I urge every responsible Member to join me in supporting this pay freeze bill.

If we are really serious about restoring fiscal sanity we can start by freezing our salaries right where they are.

WADING THROUGH THE RHETORIC

(Mr. GOODLING asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GOODLING. Mr. Speaker, I am amazed and confused by the rhetoric I hear from many of my colleagues when they tell me what the people were saying in the last election.

Now, if my colleagues want to see what the people were saying in the last election, when you have a national election right after a redistricting, we have to look at the Senate. Of course, everything stayed the same in the Senate.

Now, if we must look at the House, I would suggest Members look at two of my dear friends, one a moderate Republican from New York, an incumbent, who ran against a Democrat from New York, an incumbent, who put more rhetoric in the CONGRESSIONAL RECORD the last 2 years against the President's program than any other Member of Congress.

Now, what was the public saying in that election since the moderate Republican won?

A TRIBUTE TO THE LATE CRAIG HOSMER, FORMER MEMBER OF THE HOUSE

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, it is my sad duty to announce to the House of Representatives the passing away last month of Craig Hosmer, who served 22 years of distinction as a Member of this Chamber.

At the time of his retirement from Congress in 1974, Representative Hosmer served as ranking minority member of the Interior Committee and on the Joint Committee on Atomic Energy. In addition for being known for his dry humor in the Halls of the Capitol, Representative Hosmer was considered one of the leading authorities in Congress on water resources and nuclear power. He was also one of the principal architects of the Colorado River Basin project, which allocates water to California and other Southwestern States.

A native of Orange County in California, Congressman Hosmer was first elected in 1952 and was reelected 10

times, by as much as 70 percent, to represent many of the cities from Long Beach through Huntington Beach, which I currently have the privilege of representing.

On Tuesday, December 7 I will be sponsoring a special order in Craig Hosmer's honor, and would like to invite the participation of those Members interested in commemorating Representative Hosmer's service in the Congress.

TRIBUTE TO DEPARTING MEMBERS OF ILLINOIS DELEGATION

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, I want to announce to the House that I intend later in the day to request a special order for tomorrow, hopefully to be joined in by my colleague, the gentleman from Illinois (Mr. ERLENBORN), to pay special, appropriate tribute to the four Members of our Illinois delegation who will not be back in the 98th Congress: ED DERWINSKI, BOB MCCLORY, PAUL FINDLEY, and TOM RAILSBACK.

I suspect that as the session draws to a conclusion, there will be other special orders requested for similar purposes. I would encourage Members to schedule those orders as early as possible, so that we can avoid having them pile up during the last couple of days we are in session, when the press of business is normally the greatest.

Again, that will be tomorrow for the four Members of whom we made mention.

NATIONAL POLICY FOR DISPOSAL OF NUCLEAR WASTES

(Mr. ROTH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROTH. Mr. Speaker, I rise to urge this body to carefully consider legislation that will establish a national policy for disposal of nuclear wastes.

In particular, I want to urge my colleagues to give their support to the provision that requires that both Houses of Congress vote in the affirmative before the decision of a State Governor can be overridden. Every major organization representing the States—National Governor's Association, National Conference of State Legislatures, and State Planning Council—have endorsed the two-House procedure.

This process assures that all concerned parties will have a role to play in the decisionmaking process. It establishes a system of checks and balances so that the President, Congress, Governor, and State legislature will all be fully involved. It is a good procedure, and merits our support.

PROPOSED AGENDA FOR THE LAMEDUCK SESSION

(Mr. LOTT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LOTT. Mr. Speaker, first, I would like to take this opportunity to congratulate all of my colleagues who successfully sought reelection this past month, and to offer my personal best wishes to those who will not be returning to the 98th Congress.

In the meantime, however, the so-called lameduck session of the 97th Congress has now begun.

Despite all the rhetoric which has flowed during and since the campaign season, it is my firm belief that the majority of Americans expect the Congress to exercise the kind of fiscal restraint which will be necessary to limit the growth in Federal spending and reduce future deficits. We will have that opportunity during the next 3 weeks, as the House will begin consideration of the several remaining appropriations bills.

It appears likely that the Congress will do little more, however. Nowhere on the current schedule prepared by the Democratic leadership is the regulatory reform bill. Also missing are action on the Caribbean Basin and enterprize zones initiatives, immigration reform, and a host of other legislation which has been logjammed for months by the Democratic leadership.

Without action on these important measures, and if it follows historical precedent, the current "lameduck" session could very well end up being a "turkey."

CONCERN OVER A NUCLEAR CONFRONTATION

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, a week ago when the President addressed the Nation in a speech which will be remembered for its Orwellian renaming of the MX missile, the most awesomely destructive device projected in the history of mankind as the peacekeeper, he expressed some concern at what he noted was the fear in letters and communications he received from the children of this country concerning a possible nuclear war.

In essence, he told the American people in essence that tne children should not be subjected to that kind of fear; that they need not worry because he was taking care of things.

Mr. Speaker, I have had occasion during this break to address schoolchildren of various age groups throughout my district, and, in truth the children are worried. They are worried because their parents are worried. Indeed, all of America is deeply concerned about the direction in which this administration is taking us toward increased nuclear confrontation.

Mr. Speaker, there will soon come a time for the membership of this body in the early days of the new Congress, to say no to the MX. That will be the best and most effective way to begin to erase some of the fears of the children of America.

Mr. DAN DANIEL. Mr. Speaker, this Member recently returned from an overseas mission which was the most rewarding of any I have undertaken since I have been a Member of this body. I visited with the 6th Fleet, our troops in Lebanon and Sicily, and then went on to the Pacific, with stops in Korea, Japan, the Philippines, Okinawa, and Guam.

In the Mediterranean, I was especially encouraged by the enthusiasm of our forces, and by the Navy-Marine Corps teamwork both in the landing of the Marines in Lebanon and in the continuing operation.

My optimism is somewhat dimmed by the continuing shortfalls in equipment and spare parts, and unacceptable length of time it takes to get essential items to the fleet. The men out there are doing the job they were sent to do despite these shortfalls. But, it is because of their ingenuity, their "can do" spirit, that the mission has been successful thus far.

In the Western Pacific, my purpose was to assess the state of our military readiness and observe firsthand the living conditions and quality of life programs provided our military personnel, particularly those stationed along the demilitarized zone and other remote, and isolated sites.

I want to report to the Members that the quality of the people serving in our armed services today far surpasses anything that I found on my last trip just 2 years ago. I think that comes about for three reasons. No. 1, of course, is that we are getting a better type recruit now. No. 2, is the emphasis that has been put on people programs and leadership training.

The third thing I was impressed with is that we are now beginning to reap dividends from those extra dollars that we have been authorizing and appropriating for operation and maintenance.

There is no question that improvements are heavily attributable to additional funding over the past 2 years. Here as elsewhere the key to increased readiness is the quality, dedication, professionalism and high morale of our military personnel. It makes no difference how sophisticated or effec-

tive our weapon systems are if we do not have qualified and properly motivated people to operate them.

Serious deficiencies remain. We do not have adequate training facilities, ammunition, flying hours, or steaming days to maintain proficiency levels. There is also a shortage of funding for joint exercises needed to improve coordination between the services and allied forces. Finally, the material readiness of critical communications and support equipment continues to be a problem due to the lack of spare parts and trained maintenance personnel.

Our forces and those of our allies are ready to meet the formidable challenges facing them today. Sustainability is the biggest challenge we face at this time. We must build up war reserve stocks in critical areas of fuel, ammunition, spare parts, and major equipment.

In general, the same trend observed in the readiness areas also applies to quality of life programs. Conditions have improved somewhat, but there is much to be done. It seems all too often that people-oriented activities rank at the bottom of the priority list. Overseas, the PX, commissary, gym, and recreation activities represent the only activities to fill the void, and provide our military personnel and their families with some of the comforts we here in the States take for granted.

It was shocking to learn that 48 percent of military personnel stationed in Korea live in substandard housing. Many are being housed in quonset huts built more than 30 years ago. At one remote site, we saw a sign painted on one such hut: "We have done so much for so long with so little that we can now do almost anything with nothing."

Increasing sustainability, improving housing and working conditions, and providing adequate recreation facilities are areas that require congressional support. Improvement in these areas will greatly increase our military readiness.

The operation and maintenance money we have provided is going into people programs, and into making our people ready, which we have done. I certainly hope that trend will continue.

NO SUBMINIMUM WAGE IN ENTERPRISE ZONES

Mr. GARCIA. Mr. Speaker, it has been brought to my attention that sometime during the course of the day the President will be addressing the National League of Cities in Los Angeles. I understand that one of the topics that he will be talking about is enterprise zones and the necessity for pushing enterprise zones during this lame-duck session. As the sponsor of that legislation, I would hope that that would be a reality.

But what concerns me, Mr. Speaker, if I understand a story on the AP wire service, is that there may be an amendment proposed that would in fact add a subminimum wage for teenage workers to the enterprise zone legislation. I want to make it clear that both myself and my colleague from New York (MR. KEMP), have worked very hard. We have struck an agreement with the administration that the minimum wage in an enterprise zone will not be undermined. The legislation does not now contain such language and it was our understanding that no such language would be added.

I want to make it clear that if in fact the enterprise zone comes to this floor and anybody tampers with the minimum wage, after we have all worked very hard over the last several months to make sure it is not tampered with, then I will withdraw my support of that legislation.

A PRAYER FOR HENRY HYDE

Mr. JOHN L. BURTON. Mr. Speaker and Members, after seeing our good colleague, HENRY HYDE, I meditated for a while and came up with a prayer:

"Oh tender Lord, show us Your mercy. Do not let HENRY HYDE run against CHUCK PERCY."

INCREASING AUTHORIZATION OF APPROPRIATIONS FOR ALLEN J. ELLENDER FELLOWSHIP PROGRAM

Mr. PERKINS. Mr. Speaker, I ask unanimous consent that the Committee on Education and Labor be discharged from further consideration of the Senate bill (S. 3002) to increase the authorization of appropriations for the Allen J. Ellender fellowship program, and for other purposes, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

Mr. ERLENBORN. Mr. Speaker, reserving the right to object, I would like to ask my chairman, is this a version of the bill that the House has already passed, a different version having to do with the Ellender fellowships, having passed the other body, and the gentleman is going to ask that the bill passed by the body be amended with the House language and then request a conference?

Mr. PERKINS. That is correct.

Mr. Speaker, if the gentleman will yield, the House on September 29 passed under suspension of the rules H.R. 7137. That bill increases the authorizations for the Close Up Foundation's Ellender fellowship program by $500,000 a year for fiscal years 1983 and 1984. It also extends the authorization for that program for an additional fiscal year and sets the authorization at $1.5 million.

The Senate bill, S. 3002, contains identical provisions as regards the Close Up Foundation.

However, the House passed-bill contains three additional items not included in the Senate bill. These items are:

First, a guarantee of funding for law-related education in the Secretary's discretionary fund in the new education block grant.

Second, an increase in the authorization of appropriations for the law school clinical experience program from $1 to $2 million a year for 2 years.

Third, an authorization of appropriations for the Chappie James Aerospace Memorial at Tuskegee University. This amount is set at $9.6 million.

Mr. ERLENBORN. Mr. Speaker, I have no objection to this request, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 3002

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law, the total amount which may be appropriated to carry out the joint resolution of October 19, 1972 (86 Stat. 907), relating to the Allen J. Ellender fellowship program, shall not exceed $1,500,000 for each of the fiscal years 1983, 1984, and 1985.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. PERKINS

Mr. PERKINS. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. PERKINS: Strike out everything after the enacting clause and insert in lieu thereof the following:

LAW RELATED EDUCATION

SECTION 1. (a) Notwithstanding any other provision of law, the total amount which may be appropriated to carry out the part E of title IX of the Higher Education Act of 1965, relating to law school clinical experience programs, shall not exceed $2,000,000 for each of the fiscal years 1983 and 1984.

(b)(1) Section 583(b) of the Education Consolidation and Improvement Act of 1981 is amended by striking out "and" at the end of paragraph (2), by inserting "and" at the end of paragraph (3), and by inserting after paragraph (3) the following new paragraph:

"(4) the law-related education program formerly authorized by part G of title III of the Elementary and Secondary Education Act of 1965,".

(2) Such section is further amended by inserting "(or $500,000 in the case of the pro-

gram referred to in paragraph (4))" after "fiscal year 1981".

ELLENDER FELLOWSHIP PROGRAM

SEC. 2. Notwithstanding any other provision of law, there is authorized to be appropriated to carry out the joint resolution of October 19, 1972 (86 Stat. 907), relating to the Allen J. Ellender fellowship program, not more than $1,500,000 for each of the fiscal years 1983, 1984, and 1985.

GENERAL DANIEL JAMES MEMORIAL HEALTH EDUCATION CENTER

SEC. 3. Notwithstanding any other provision of law, the total amount which may be appropriated to carry out subpart 2 of part H of title XIII of the Education Amendments of 1980, relating to the General Daniel James Memorial Health Education Center, shall not exceed $9,600,000 for the fiscal years 1983 and 1984.

Mr. PERKINS (during the reading). Mr. Speaker, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. PERKINS. Mr. Speaker, I move the previous question on the Senate bill and the amendment.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the amendment in the nature of a substitute offered by the gentleman from Kentucky (Mr. PERKINS).

The amendment in the nature of a substitute was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title of the Senate bill was amended so as to read: "An act to increase the authorization of appropriations for certain education programs, and for other purposes."

A motion to reconsider was laid on the table.

APPOINTMENT OF CONFEREES ON S. 3002

Mr. PERKINS. Mr. Speaker, I ask unanimous consent that the House insist on its amendment and request a conference with the Senate thereon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky? The Chair hears none, and without objection, appoints the following conferees: Messrs. PERKINS, FORD of Michigan, ANDREWS, MILLER of California, CORRADA, KILDEE, WILLIAMS of Montana, HAWKINS, BIAGGI, RATCHFORD, WASHINGTON, SMITH of Iowa, GOODLING, JEFFORDS, COLEMAN, ERDAHL, and PETRI, Mrs. ROUKEMA, Messrs. DENARDIS, CRAIG, and ERLENBORN, and Mrs. FENWICK.

There was no objection.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

NOVEMBER 29, 1982.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, U. S. House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in the Rules of the U.S. House of Representatives, I have the honor to transmit sealed envelopes received from the White House as follows:

(1) At 3:10 p.m. on Monday, October 25, 1982 and said to contain a message from the President on Federal Pay.

(2) At 3:10 p.m. on Monday, October 25, 1982 and said to contain a message from the President wherein he transmits the Annual Report of the Railroad Retirement Board for fiscal year 1981.

(3) At 3:10 p.m. on Monday, October 25, 1982 and said to contain a message from the President wherein he transmits the 14th Annual Reports on the administration of the Highway Safety Act of 1966 and the National Motor Vehicle and Traffic Safety Act of 1966.

(4) At 3:45 p.m. on Monday, November 1, 1982 and said to contain a message from the President wherein he reports under the International Emergency Economic Powers Act with regard to Iran.

(5) At 1:45 p.m. on Friday, November 5, 1982 and said to contain a message from the President wherein he transmits the Twelfth Annual Report on Hazardous Materials Transportation for calendar year 1981.

(6) At 3:25 p.m. on Monday, November 8, 1982 and said to contain a message from the President wherein he notified the Congress of his extension of the national emergency with regard to Iran for a period beyond November 14, 1982.

(7) At 3:25 p.m. on Monday, November 15, 1982 and said to contain a message from the President whereby he transmits a memorandum of law as required by Section 3 of the Energy Emergency Preparedness Act of 1982.

(8) At 3:35 p.m. on Monday, November 15, 1982 and said to contain a message from the President wherein he transmits the seventeenth annual report of the Department of Housing and Urban Development covering calendar year 1981.

(9) At 3:35 p.m. on Monday, November 15, 1982 and said to contain a message from the President wherein he transmits the Thirteenth and Final Report of the National Council on Economic Opportunity.

(10) At 3:35 p.m. on Monday, November 15, 1982 and said to contain a message from the President wherein he transmits the first annual report on Alaska's mineral resources covering 1982.

(11) At 10:40 a.m. on Thursday, November 18, 1982 and said to contain a message from the President wherein he transmits the 26th Annual Report on Trade Agreements Program.

With kind regards, I am,
Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

FEDERAL PAY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 97-254)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Post Office and Civil Service and ordered to be printed:

(For message, see proceedings of the Senate of today, Monday, November 29, 1982.)

ANNUAL REPORT OF RAILROAD RETIREMENT BOARD FOR FISCAL YEAR 1982—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Energy and Commerce:

(For message, see proceedings of the Senate of today, Monday, November 29, 1982.)

ANNUAL REPORT ON ADMINISTRATION OF HIGHWAY SAFETY ACT OF 1966 AND NATIONAL MOTOR VEHICLE AND TRAFFIC SAFETY ACT OF 1966—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Energy and Commerce and the Committee on Public Works and Transportation:

(For message, see proceedings of the Senate of today, Monday, November 29, 1982.)

INTERNATIONAL EMERGENCY ECONOMIC POWERS ACT WITH RESPECT TO IRAN—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Foreign Affairs:

(For message, see proceedings of the Senate of today, Monday, November 29, 1982.)

□ 1300

ANNUAL REPORT ON HAZARDOUS MATERIALS TRANSPORTATION, 1981—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States, which was read and, together with the accompanying papers, with-

out objection, referred to the Committee on Energy and Commerce, the Committee on Merchant Marine and Fisheries, and the Committee on Public Works and Transportation:

(For message, see proceedings of the Senate of today, Monday, November 29, 1982.)

EXTENSION OF NATIONAL EMERGENCY WITH REGARD TO IRAN FOR A PERIOD BEYOND NOVEMBER 14, 1982—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States, which was read and, together with the accompanying papers, without objection, referred to the Committee on Foreign Affairs:

(For message, see proceedings of the Senate of today, Monday, November 29, 1982.)

FIRST ANNUAL REPORT ON ALASKA'S MINERAL RESOURCES COVERING 1982—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States, which was read and, together with the accompanying papers, without objection, referred to the Committee on Interior and Insular Affairs:

(For message, see proceedings of the Senate of today, Monday, November 29, 1982.)

ANNUAL REPORT OF DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT, 1982—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States, which was read and, together with the accompanying papers, without objection, referred to the Committee on Banking, Finance and Urban Affairs:

(For message, see proceedings of the Senate of today, Monday, November 29, 1982.)

MEMORANDUM OF LAW, PURSUANT TO PROVISIONS OF THE ENERGY EMERGENCY PREPAREDNESS ACT OF 1982—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Energy and Commerce:

(For message, see proceedings of the Senate of today, Monday, November 29, 1982.)

THIRTEENTH AND FINAL REPORT OF NATIONAL ADVISORY COUNCIL ON ECONOMIC OPPORTUNITY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of te United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Education and Labor:

(For message, see proceedings of the Senate of today, Monday, November 29, 1982.)

ANNUAL REPORT ON TRADE AGREEMENTS PROGRAM 1981-82—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Ways and Means:

(For message, see proceedings of the Senate of today, Monday, November 29, 1982.)

COMMUNICATION FROM CHAIRMAN OF COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION

The SPEAKER pro tempore laid before the House the following communication from the Chairman of the Committee on Public Works and Transportation, which was read, and without objection, referred to the Committee on Appropriations:

COMMITTEE ON PUBLIC WORKS
AND TRANSPORTATION,
Washington, D.C., October 6, 1982.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives
Washington, D.C.

DEAR MR. SPEAKER: Enclosed are copies of resolutions adopted by the Committee on Public Works and Transportation on September 23, 1982. These resolutions approve four watershed projects of the Soil Conservation Service in accordance with the provisions of Public Law 566, Eighty-third Congress.

Every best wish.

Sincerely,

JAMES J. HOWARD,
Chairman.

There was no objection.

COMMUNICATION FROM CHAIRMAN OF COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION

The SPEAKER pro tempore laid before the House the following communication from the Chairman of the Committee on Public Works and Transportation, which was read and, without objection, referred to the Committee on Appropriations:

COMMITTEE ON PUBLIC WORKS
AND TRANSPORTATION,
Washington, D.C., October 6, 1982.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: Enclosed are copies of resolutions adopted by the Committee on Public Works and Transportation on September 23, 1982. These resolutions authorize studies of potential water resources projects by the Corps of Engineers in accordance with the provisions of Section 4 of the Act of March 4, 1913, as amended.

Every best wish.

Sincerely,

JAMES J. HOWARD,
Chairman.

There was no objection.

COMMUNICATION FROM CHAIRMAN OF COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION

The SPEAKER pro tempore laid before the House the following communication from the Chairman of the Committee on Public Works and Transportation, which was read and, without objection, referred to the Committee on Appropriations:

COMMITTEE ON PUBLIC WORKS
AND TRANSPORTATION
Washington, D.C., October 14, 1982.

Hon. THOMAS P. O'NEILL,
The Speaker, U.S. House of Representatives,
Washington, D.C.

Dear Mr. Speaker: Pursuant to the provisions of the Public Buildings Act of 1959, as amended, the House Committee on Public Works and Transportation approved the following projects on June 9, 1982:

Lease Construction: Wilkes-Barre, Pennsylvania, Federal Building.

Lease Consolidation: Boston, Massachusetts, Food and Drug Administration.

Washington, D.C., International Communications Agency.

Construction: San Francisco, California, Federal Building.

The original and one copy of the authorizing resolutions are enclosed.

Every best wish.

Sincerely,

JAMES J. HOWARD,
Chairman.

There was no objection.

COMMUNICATION FROM THE CHAIRMAN OF THE COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION

The SPEAKER pro tempore laid before the House the following communication from the chairman of the

Committee on Public Works and Transportation, which was read and, without objection referred to the Committee on Appropriations:

COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION,
Washington, D.C., October 15, 1982.

Hon. THOMAS P. O'NEILL,
The Speaker, U.S. House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the provisions of the Public Buildings Act of 1959, as amended, the House Committee on Public Works and Transportation approved the following projects on September 16, 1982:

REPAIR AND ALTERATION

Anchorage, Alaska, Federal Building-Courthouse, 4th and F Streets.
Washington, D.C., National Archives.
St. Louis, Missouri, Building 110, 4300 Goodfellow Boulevard.
Suitland, Maryland, Oceanographic Building.
Phoenix, Arizona, Federal Building-Courthouse, 230 North First Avenue.
Alexandria, Virginia, Hybla Valley Federal Building, 6801 Telegraph Road.
Detroit Michigan, Patrick V. McNamara Federal Building.
Cleveland, Ohio, Anthony J. Celebrezze Federal Building.
Boston, Massachusetts, John F. Kennedy Federal Building.
Chicago, Illinois, J. C. Kluczynski Federal Building.

REPAIR AND ALTERATION/PRELIMINARY ENGINEERING AND DESIGN

Washington, D.C., Auditors Building.
Washington, D.C., Interior Building, 19th and C Streets, N.W.
Des Moines, Iowa, Federal Building, 210 Walnut Street.
Sioux City, Iowa, U.S. Post Office and Courthouse, 316 6th Street.
New Orleans, Louisiana, F. Edward Hébert Federal Building.
Las Vegas, Nevada, Federal Building and U.S. Courthouse, 300 Las Vegas Boulevard, South.
Manchester, New Hampshire, U.S. Post Office.
Columbus, Ohio, Old Post Office.
Scranton, Pennsylvania, U.S. Post Office and Courthouse, Washington Avenue and Linden Street.
San Antonio, Texas, U.S. Post Office and Courthouse.
Pittsburgh, Pennsylvania, U.S. Post Office and Courthouse, 7th Avenue and Grant Street.
San Francisco, California, Appraisers Building, 630 Sansome Street.

LEASES

Los Angeles, California, Department of Defense, 4727 Wilshire Boulevard.
Los Angeles, California, Defense Contract Administration Service Region, Defense Contract Administration Services, Management Area.
Los Angeles, California, 2500 Wilshire Boulevard.
Los Angeles, California, Multiple Agencies-Consolidation.
Los Angeles, California, 1521-33 West Pico Boulevard.
Los Angeles, California, 3250 Wilshire Boulevard.
Pasadena, California, 150 S. Los Robles.
El Monte, California, 9100 E. Flair Drive.
Phoenix, Arizona, 201 North Central Avenue.
Phoenix, Arizona, Veterans Administration, 3225 North Central Avenue.
Phoenix, Arizona, Federal Bureau of Investigation.
Colorado Springs, Colorado, Chidlaw Building, 221 East Bijou Street.
Houston, Texas, IRS District Office.

NATIONAL CAPITOL REGION

Washington, D.C., Capitol Mall North, 500 North Capitol Street.
Washington, D.C., 1900 Hall Street Building, 1900 Half Street, S.W.
Arlington, Virginia, Ballston Center Tower 1, 800 N. Quincy Street.
Arlington, Virginia, Rosslyn Plaza Building E, 1621 N. Kent Street.
Silver Spring, Maryland, Gramax Building, 8060 13th Street.
Bethesda, Maryland, Phillips Building Extension, 7920 Norfolk Avenue.
Washington, D.C., Todd Building, 550 11th Street, N.W.
Washington, D.C., Federal Triangle Building, 9th and D Streets, N.W.
Arlington, Virginia, Crystal Plaza 5, 2211 Jefferson Davis Highway.
Riverdale, Maryland, ACF Complex, 6501 Lafayette Avenue.

The original and one copy of the authorizing resolutions are enclosed.

Every best wish.

Sincerely,

JAMES J. HOWARD,
Chairman.

There was no objection.

NUCLEAR WASTE POLICY ACT OF 1982

Mr. UDALL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 3809), to provide for repositories for the disposal of high-level radioactive waste, transuranic waste, and spent nuclear fuel, to amend provisions of the Atomic Energy Act of 1954 relating to low-level waste, to modify the Price-Anderson provisions of the Atomic Energy Act of 1954 and certain other provisions pertaining to facility licensing and safety, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arizona (Mr. UDALL).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. UDALL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 333, nays 4, not voting 96, as follows:

[Roll No. 393]

□ 1315

Mr. ERDAHL changed his vote from "nay" to "yea."

So the motion was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 3809, with Mr. PANETTA in the chair.

□ 1330

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole House rose on Thursday, September 30, 1982, the text of H.R. 7187 was considered as an original bill for the purpose of amendment.

Are there any further amendments which are made in order pursuant to the rule?

AMENDMENT OFFERED BY MR. UDALL

Mr. UDALL. Mr. Chairman, I offer an amendment, which is made in order by the rule.

The Clerk read as follows:

Amendment offered by Mr. UDALL: Strike out section 141 and insert in lieu thereof the following:

MONITORED RETRIEVABLE STORAGE

SEC. 141. (a) FINDINGS.—The Congress finds that—

(1) the executive branch and the Congress should proceed as expeditiously as possible to consider fully a proposal for construction of one or more monitored retrievable storage facilities to provide long-term storage of high-level radioactive waste and spent nuclear fuel;

(2) the generators and owners of the high-level radioactive waste and spent nuclear fuel to be stored in such facilities have the primary responsibility to provide for, and the responsibility to pay the costs of, the long-term storage of such waste and spent fuel until such waste and spent fuel is accepted by the Secretary in accordance with the provisions of this title; and

(3) disposal of high-level radioactive waste and spent nuclear fuel in a repository developed under this Act should proceed regardless of any construction of a monitored retrievable storage facility pursuant to this section.

(b) SUBMISSION OF PROPOSAL BY SECRETARY.—(1) Not later than 5 years after the date of the enactment of this Act, the Secretary shall complete a detailed study of the need for and feasibility of, and shall submit to the Congress a proposal for, the construction of one or more monitored retrievable storage facilities for high-level radioactive waste and spent nuclear fuel. Each such facility shall be designed—

(A) to accommodate spent nuclear fuel and high-level radioactive waste resulting from civilian nuclear activities;

(B) to permit continuous monitoring, management, and maintenance of such spent fuel and waste for the foreseeable future;

(C) to provide for the ready retrieval of such spent fuel and waste for further processing or disposal; and

(D) to safely store such spent fuel and waste as long as may be necessary by maintaining such facility through appropriate means, including any required replacement of such facility.

(2) Such proposal shall include—

(A) the establishment of a Federal program for the siting, development, construction, and operation of facilities capable of safely storing high-level radioactive waste and spent nuclear fuel, which facilities are to be licensed by the Commission;

(B) a plan for the funding of the construction and operation of such facilities, which plan shall provide that the costs of such activities shall be borne by the generators and owners of the high-level radioactive waste and spent nuclear fuel to be stored in such facilities;

(C) site-specific designs, specifications, and cost estimates sufficient to (i) solicit bids for the construction of the first such facility; (ii) support congressional authorization of the construction of such facility; and (iii) enable completion and operation of such facility as soon as practicable following congressional authorization of such facility; and

(D) a plan for intergrating facilities constructed pursuant to this section with other storage and disposal facilities authorized in this Act.

(3) In formulating such proposal, the Secretary shall consult with the Commission and the Administrator, and shall submit their comments on such proposal to the Congress at the time such proposal is submitted.

(4) Nothing in this subsection shall be construed to authorize the Secretary to select a specific site for the location of a monitored retrievable storage facility.

(c) ENVIRONMENTAL IMPACT STATEMENTS.—(1) Preparation and submission to the Congress of the proposal required in this section shall not be considered a major Federal action under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)). The Secretary shall prepare, in accordance with regulations issued by the Secretary implementing such Act, an environmental assessment with respect to such proposal. Such environmental assessment shall be based upon available information regarding alternative technologies for the storage of spent nuclear fuel and high-level radioactive waste. The Secretary shall submit such environmental assessment to the Congress at the time such proposal is submitted.

(2) The requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) shall apply with respect to the construction of any monitored retrievable storage facility developed pursuant to this section.

(d) LICENSING.—Any monitored retrievable storage facility developed pursuant to this section shall be subject to licensing under section 202(3) of the Energy Reorganization Act of 1974 (42 U.S.C. 5842(3)).

(e) IMPACT ASSISTANCE.—(1) Upon receipt by the Secretary of congressional authorization to construct a facility described in subsection (b), the Secretary shall commence making annual impact aid payments to appropriate units of general local government in order to mitigate any social or economic impacts resulting from the construction and subsequent operation of any such facility within the jurisdictional boundaries of any such unit.

(2) Payments made available to units of general local government under this subsection shall be—

(A) allocated in a fair and equitable manner, with priority given to units of general local government determined by the Secretary to be most severely affected; and

(B) utilized by units of general local government only for planning, construction, maintenance, and provision of public services related to the siting of such facility.

(3) Such payments shall be subject to such terms and conditions as the Secretary determines are necessary to ensure achievement of the purposes of this subsection. The Secretary shall issue such regulations as may be necessary to carry out the provisions of this subsection.

(4) Such payments shall be made available entirely from funds held in the Interim Storage Fund established in section 137(c) and shall be available only to the extent provided in advance in appropriation Acts.

(5) The Secretary may consult with appropriate units of general local government in advance of commencement of construction of any such facility in an effort to determine the level of payments each such unit is eligible to receive under this subsection.

(f) LIMITATIONS.—(1) No monitored retrievable storage facility developed pursuant to this section may be constructed in any State in which there is located any site approved for site characterization under section 112. No repository may be developed under this Act in any State in which there is located any monitored retrievable storage facility developed pursuant to this section.

(2) No monitored retrievable storage facility developed pursuant to this section may be constructed unless the Congress by law specifically authorizes such construction and thereafter approves appropriations for such construction.

Mr. UDALL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. UDALL. Mr. Chairman, from the beginning of the nuclear age about 40 years ago, we have ground up and created in this country every day some quantities of nuclear waste. This country has failed, to this moment, to dispose of a single pound of these deadly wastes which now are in temporary repositories in different parts of the country.

This bill dealing with this subject has been before the Congress now for a number of years. This is the third Congress in which we have attempted to secure enactment of a nuclear waste bill.

Mr. Chairman, the passage of this bill will, for the first time, give us a national policy on high-level nuclear waste. It will give us an opportunity to set in motion a procedure by which we will choose for permanent deep geological storage a main repository for the nuclear waste.

Let me emphasize that nuclear waste put in this repository will not be accessible. It will amount to a decision on the part of our country that this is going to be the permanent storage. It will be buried, and it will not be available for us or for future generations. This is the main issue.

The passage of this bill will set in motion a chain of events and decision points by which we will have in the United States a facility licensed and available for permanent storage of high-level nuclear waste.

Let me emphasize in the debate there will be three kinds of facilities that we will be discussing. I am discussing now the major facility for deep geological and permanent storage of nuclear waste. It is time the country made a decision on this and that we have some answers on it.

The second kind of facility that we will be discussing in this debate is what is called AFR, away from reactor storage, to deal with the spent fuel rods from our civilian nuclear power plants.

Originally we calculated on the need for little away-from-reactor storage because we were going to go immediately to reprocessing. Now the reprocessing option is very much in doubt. So we provide in this bill a small, modest size away-from-reactor storage program that cannot exceed 1,700 metric tons capacity and which will be available for emergencies where we have rods that we need a place for and the company cannot do it on-site. We will have a program that cannot exceed 1,700 metric tons where we can take rods in an emergency and where we can carry out commitments we have made to other countries in connection with their nuclear power program.

The third kind of facility—and that is the one that is involved in my amendment—is what is known as monitored retrievable storage. This is another idea of saving the spent nuclear fuel rods, putting them in a cavern or a near-the-surface facility and saving them for the day when, presumably, according to some in America, we will need the fuel, the energy, that is locked up in those rods, and we will be able to go back and get them out and put them to use.

We do not know all of the answers about this monitored retrievable storage. Certainly in the light of the surprises we have had about other nuclear waste and about our nuclear power plants which are more costly and much more difficult to operate than we had imagined, we do not know all of the answers, and I, for one, want to keep this option alive. I think it is an option we ought to keep alive.

So the bill which came out of the various committees had a provision for a study by the Energy Department to tell us within 2 to 5 years—and the argument comes on the 2- to 5-year period—what kind of a facility it should be, where it might be located, and other features of it.

It would then come to the Congress, and if the Congress affirmatively acted, we would then have this monitored retrievable storage facility.

The monitored retrievable storage section of H.R. 7187 is intended to provide research and reports which will assure that special waste management technology will be available if it is needed as part of the waste management program.

This "MRS" technology is not the best answer to our national nuclear waste problem. It does not provide a permanent solution, but rather would require that nuclear wastes be under guard at constant expense until some permanent solution was developed. Nonetheless, it is probably important that we have this back-up technology available to assure that technical or institutional failure in our effort to develop permanent deep geologic facilities does not leave us unable to fulfill our obligation to provide some answer to the waste problem.

Upon review of our MRS section, the chairman and ranking minority members of the Interior and Commerce committees and subcommittees have agreed on some changes to that section which we believe would improve its operation:

First. We would increase the amount of time the Secretary has to provide the required MRS report from 2 to 5 years. The report we request must include detailed engineering designs adequate to enable the solicitation of bids for a facility and to enable complete construction and operation of an MRS facility. The report must be accompanied be an environmental assessment and by a need and feasibility study.

DOE has flip-flopped on its ability to provide this study in time. But there is no urgency to acquisition of this information, since an MRS decision will not have to be made until well into the next decade.

Second. We remove exemptions from licensing considerations and NEPA. If they are developed, MRS facilities could become indefinite repositories for high-level waste and spent fuel. They may serve other functions, such as storage of spent fuel pending reprocessing. Future decision on the use of any MRS facility, and on its size, must be related to decisions on licensing requirements and on appropriate sites for the facility. We can not remove the regulatory and NEPA reviews that may be required unless we more fully understand the nature of the technology.

Third. We make clear that the decision when to construct an MRS facility, whether it is needed, and what role it will have in the waste management system, is left to future Congresses, which will have a better understanding of these issues.

Our changes in the MRS section do not reduce the information that will be produced, or alter the congressional commitment to assure that this technology will be ready to go if it is needed.

I urge your support for these modifications.

Mr. HUCKABY. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I certainly concur with a lot that our distinguished colleague, the chairman of the Interior Committee, the gentleman from Arizona (Mr. UDALL), just stated. The monitored retrievable storage system I think can properly be characterized as a backup system. I think anybody that knows much about the nuclear industry today recognizes the fact that France is probably the world's leader in this industry. This is how the French store their nuclear waste today, in an environment where they can monitor it, where, if necessary, they can retrieve it, because they recognize that we today, with our state of the technology today, do not know, we do not have all of the answers.

What does MRS buy for us? It buys several things for us.

First of all, it gives us additional years, perhaps up to 50 additional years, to obtain additional technical information, because let me tell you this: It is theoretically possible to reduce the half lives of the really hot radioactive materials from literally hundreds of thousands of years down

to a few hundred years. But we do not know how to do that today.

If you stored this for a period of 50 years, there is tremendous heat dissipation, so that once you put it into a permanent repository it would be far, far safer. But there is one basic flaw with the chairman's amendment to this section. It calls for a 5-year study.

□ 1345

Within 5 years this bill mandates that the President pick the site for the permanent repository.

The Department of Energy informs me that they have the capability of completing an indepth, detailed study of how you would go about developing a monitored retrievable storage system and reporting back to Congress within 2 years. And that is what the basic bill calls for. It does not authorize an MRS. It tells the DOE to make an in-depth study and come back and a future Congress could make that determination, if it were necessary, if as the chairman stated we ran into serious technical problems in determining a permanent repository.

So if you want a backup system, if you want a system that makes sense, I think you have got to recognize that the timeframe is the operative section here, and to put out to 5 years the time of just when a study is due to be reported back to Congress will negate the whole impact of this Nation ever possibly having the option of going with an MRS if we should need it in the future.

And that is why I would urge a "no" vote on this amendment.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. HUCKABY. I yield to the gentleman from New York.

Mr. OTTINGER. I thank the gentleman for yielding.

I wonder if the gentleman has something new from the Department of Energy. The reason we chose the 5-year period is the testimony the Department of Energy gave in the Senate hearings. And what they communicated to the Congress was that it would take 5 years. This is not just a study. It is a site specific selection including the complete studies involved in putting a MRS at a specific site. And they testified to the Congress, and I will read the testimony if the gentleman likes, that they could not do this in less than 5 years. That is why it was selected.

There is no desire to delay unduly. As a matter of fact, I think the MRS is the way to go.

Mr. HUCKABY. As the gentleman is very well aware, there have been studies that the Department of Energy has contracted out to private contractors ongoing in the last several years. And I think that the timeframe the gentleman talked about was the entire timeframe of time that has already elapsed.

In my communications with them, they have indicated that 2 years is ample time to go ahead—where it would be in a sequence on a PERT chart—so that if it was necessary to bring it into play we would still have the option, whereas after 5 years we might not have that option.

Mr. OTTINGER. Has the Department of Energy communicated this to the gentleman in any way?

Mr. HUCKABY. I did not hear the gentleman.

Mr. OTTINGER. Has the Department of Energy communicated this to the gentleman in any way? It has not communicated it to the committee.

Mr. HUCKABY. Yes.

Mr. OTTINGER. How? Does the gentleman have it in writing?

Mr. HUCKABY. No. Strictly telephone.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. HUCKABY. I yield to the gentleman from Arizona.

Mr. UDALL. I thank the gentleman for yielding.

I hope the gentleman will note and I am sure he is aware of the fact that my amendment says not more than 5 years. And the plan is to be produced by the Department of Energy in not more than 5 years.

It seems to me with the uncertainty the Department has shown on this issue that the language in the amendment, is appropriate. If they can bring it in 3, do it in 3, if they can bring it in 4, do it in 4. Four is not more than 5 and 3 is not more than 5.

Mr. HUCKABY. As the gentleman very well knows in no place in our country does Parkinson's law operate better than in the Department of Energy. If you give them 5 years, they will take 5; if you give them 2 years, they will take 2 years.

Mr. MARRIOTT. Mr. Chairman, will the gentleman yield?

Mr. HUCKABY. I yield to the gentleman from Utah.

Mr. MARRIOTT. I thank the gentleman for yielding.

I would like to congratulate the gentleman on his efforts here in this regard and reiterate what the gentleman has said.

The CHAIRMAN. The time of the gentleman from Louisiana (Mr. HUCKABY) has expired.

(At the request of Mr. MARRIOTT and by unanimous consent, Mr. HUCKABY was allowed to proceed for 1 additional minute.

Mr. MARRIOTT. If the gentleman will continue to yield, if we give them 5 years, they will take 5 years. If we give them 2 years, they will take 2 years. And I would think we would get this study done in 2 years. And I applaud the gentleman for his amendment.

Mr. HUCKABY. I thank the gentleman for his comments.

Mr. LUJAN. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition of the amendment.

I want to congratulate the gentleman from Louisiana. He has been persistent in his idea of the monitored retrievable storage plan. And I agree with him.

One of the things that has bothered me about the entire question of burying nuclear wastes is that it is such a waste of money, simply to bury the spent fuel rods. My understanding of the figures is that it is about $5 million value per value for each reactor, and we have 70, that is about $350 million a year that we are just pouring down the hole.

We should have an alternative, if the deep repository is not feasible. And this amendment would delay it for 5 years, when you look at the fact that we must make a choice within 2 years, and perhaps even start digging the shaft for the repository within a reasonable period of time, much less than 5 years. So if we stick to the proposal which is offered today of a 5-year study, and the repository is not feasible, then we will have no plan at all.

Finally, I might just say that the 2-year idea appeals to me. Maybe the Department of Energy might not be able to do it in 2 years and probably cannot. We can always have an extension. But if we give them 5 years, it will be 10 years before we have a plan.

So I would congratulate the gentleman from Louisiana for his foresight in offering such an amendment.

Mr. MARRIOTT. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from Utah.

Mr. MARRIOTT. Did I misunderstand the gentleman? Is the gentleman speaking for the amendment or against the amendment?

Mr. LUJAN. I am speaking against the amendment. I am speaking in favor of the gentleman from Louisiana.

Mr. MARRIOTT. I thank the gentleman for clarifying that.

Mr. OTTINGER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I rise in strong support of the amendment offered by my colleague from Arizona (Mr. UDALL). This amendment was offered on behalf of all those who negotiated on this bill. It was clearly a part of the agreement that we made with the minority; it was signed on to by the chairman of the Energy and Commerce Committee, by myself, chair of the appropriate subcommittee of the Committee on Energy and Commerce, by the gentleman from Arizona (Mr. UDALL), and it is my understanding

that the minority of the Interior and Insular Affairs Committee signed on as well.

I am strongly in favor of an MRS. based on the past experience of the Department of Energy the chances are that they are not going to succeed in establishing a permanent repository that does not leak. Their previous efforts in Lyons, Kans., and indeed at the WIPP site in New Mexico, would indicate it is actively possible that they will be unable to come up with a permanent repository that is totally secure. So I think having monitored retrievable storage available to us is a very worthwhile endeavor. But siting monitored retrievable storage in a way that protects the communities where it is located is vitally important. It is designed to store wastes for some 50 to 100 years. A great many hazards are attached to it that would not be present in a permanent repository and I do not think we ought to rush to a decision on it without providing the kind of safeguards that we provide for a permanent repository.

For example, the legislation would set a very bad precedent in allowing for the first time the environmental impact statement to be restricted so you could not consider alternative sites or alternative designs. In addition, the NRC would be restricted in its licensing to protect the health and safety of the public by preventing them from considering alternate sites and alternate designs—I think that is a very unwise provision.

Moreover, the timetable is so short that the Department of Energy could not possibly meet it. And as the gentleman from Arizona (Mr. UDALL) has indicated, this amendment does not mandate that they take 5 years. It just says up to 5 years.

The Department of Energy testified last year before the Senate, and I will quote their testimony.

"If this provision is enacted, then a specific site must be selected to comply with it. It is not feasible to complete such activities within the one year allowed * * *" in the bill as it was in the Senate.

It would also take 9 months to 1 year just to solicit bids from and select an architect/engineering firm to prepare necessary designs and an additional 2 years to complete actual detailed design specifications and drawings required for solicitation of bids for facility construction. In addition to the architectural/engineering selection process and detailed site-specific specifications, 2 years would be required to identify and select a specific site for a MRS facility. This would include:

(1) Development of detailed siting requirements and criteria;

(2) A thorough analysis of potential sites proceeding from a national perspective through regional and area reviews to actual sites for consideration in the final selection process;

(3) Coordination of activities with states in which potential sites for an MRS facility are located.

These and other factors would extend beyond the limitation in the bill.

So what we are talking about here is not just an abstract study of what an MRS would look like. What is called for in this bill is a site specific design that would permit us to go ahead with just a simple additional authorization by Congress to construction. This is a very complex endeavor; it is something that has never been constructed before in this country. It poses considerable hazards to the States if it is not done properly. It does not require the same safeguards and procedures that we require for a permanent repository, and that concerns me.

I think that the protections provided by the gentleman from Arizona, to allow adequate time to do this right, No. 1, and do it within the time that DOE says it needs, and second, to assure that there is an adequate environmental impact statement, and to assure that the NRC is not restricted in its ability to review and license this first-of-a-kind technology is very important.

For that reason, I strongly urge adoption of the amendment.

The CHAIRMAN. The time of the gentleman from New York (Mr. OTTINGER) has expired.

(By unanimous consent, Mr. OTTINGER was allowed to proceed for 1 additional minute.)

Mr. MARRIOTT. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield to the gentleman from Utah.

Mr. MARRIOTT. I thank the gentleman for yielding.

Does the gentleman see the retrievable system being something different than the permanent repository? The question I have is if in fact we ought to have a retrievable system, then maybe we should not move ahead so quickly on the permanent repository.

And if we have a shorter study time, perhaps we can find one repository that is retrievable and not wind up with two different systems.

And I wonder if the gentleman would comment on that issue.

Mr. OTTINGER. I would be glad to comment. There is a major difference. A permanent repository is designed so that spent fuel and high level nuclear waste can be disposed of in a nonretrievable form which is environmentally safe and secure.

Monitored retrievable storage is designed for long-term storage, 50 to 100 years, in a manner that would be retrievable so if something goes wrong you could get back at it.

Mr. MARRIOTT. So the gentleman thinks there should then be two different systems, a permanent repository and a separate retrievable system?

Mr. OTTINGER. I do indeed.

The CHAIRMAN. The time of the gentleman from New York (Mr. OTTINGER) has expired.

(By unanimous consent, Mr. OTTINGER was allowed to proceed for 2 additional minutes.)

Mr. OTTINGER. I think that we ought to take our time about a permanent storage facility, because the experience of the Department in developing a permanent disposal facility has been so bad in the past. It is very difficult to find a geological formation that is stable enough to reasonably guarantee that these highly radioactive substances can be safely disposed of for the tens of thousands of years they are going to remain dangerous.

So I do not think we ought to rush that process. It is in part to give us the time that is needed to find a permanent repository that I favor the monitored retrievable storage concept. I do not think we ought to abandon permanent disposal, but this alleviates the pressure to rush to a poor choice.

Mr. MARRIOTT. If the gentleman will continue to yield, the problem I am faced with now is that DOE is moving along on five permanent repository sites. They are going to move ahead and they are going to make a decision. In fact, the press states they are about to make that decision any minute.

Now the question I have is if in fact that is premature, maybe we better speed up the study on the retrievable system and delay the permanent repository until we know what we are doing.

Mr. OTTINGER. Well, my point is that you cannot speed up the site specific design called for in this bill in such a manner as to pose a potential hazard to the communities that would qualify as a site. And the gentleman's district may be one of the areas in which that retrievable storage is in fact placed. I am sure the gentleman would not want it put there without full environmental review or without full NRC licensing procedures to assure that the storage is secure. That is what this amendment provides.

If they can do it in 2 years, so much the better. And I would be glad to join in putting pressure on the Department to move as quickly as possible. But I do not think we ought to tie their hands in the manner in which the language in the bill does. As I mentioned, DOE has already testified that they could not accomplish the bill's requirements on a sound and safe basis.

□ 1400

Mr. MARRIOTT. I thank the gentleman.

Mr. BROYHILL. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. Of course, I would be glad to yield.

Mr. BROYHILL. I just wanted to comment on the statement of the gentleman from Utah. He has a somewhat different view of this legislation than I do. It is important that we select a permanent repository.

The CHAIRMAN. The time of the gentleman from New York has expired.

(At the request of Mr. BROYHILL, and by unanimous consent, Mr. OTTINGER was allowed to proceed for 2 additional minutes.)

Mr. BROYHILL. Mr. Chairman, if the gentleman will yield further, it is not my understanding that the Department's selection is imminent. In fact, under the terms of the bill, that selection may not occur until as late as 1987 or it could be as late as a year thereafter.

I would also point out, and I looked back into the law to make sure that it is a fact, that any repository, the final repository, permanent repository, that is constructed, shall be designed and constructed to permit the retrieval of any spent nuclear fuel that is placed in that repository. Is that not correct?

Mr. OTTINGER. That is absolutely correct. Everything the gentleman has said is correct.

Mr. BROYHILL. I do not disagree with the MRS that has been proposed here. My only concern, as always, has been the timeframe in which these decisions can be made. If it has taken these many years to come up with the siting and the design and the plans and so forth for the permanent facility, it does not seem reasonable that we are going to be able to make these same decisions in just a few short months on an MRS.

I certainly do not disagree with it, but we at least ought to give them a little more time in order to make sure that they do the right thing.

Mr. OTTINGER. My friend, the gentleman from North Carolina, is supporting the Udall amendment then; am I correct?

Mr. BROYHILL. That is correct.

Mr. BEREUTER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong opposition to the Udall amendment to H.R. 7187 relating to monitored retrievable storage facilities (MRS).

Although I have the greatest respect for the gentleman from Arizona and appreciate greatly his tireless efforts to bring this essential legislation to the floor, I must oppose him on this issue. As the cosponsor of the MRS sections of the Interior Committee's bill, H.R. 3809, with my distinguished colleague from Louisiana, Mr. HUCKABY, I believe that it is imperative that this amendment be defeated.

I contend that at least my support for the MRS concept comes from no selfish or parochial motive. As a Representative of a State which is not under consideration for a deep geological storage site, nor likely to be because of the geology, my advancement of the MRS concept indeed raises the possibility that the district or State I represent could become a repository for high level nuclear wastes. Nevertheless, I think it is important that this amendment be defeated. I believe that parallel implementation of the MRS program is imperative. That implementation must occur without the unnecessary delay envisioned and resulting from the Udall amendment.

For more than 40 years, we have used excuse after excuse to delay the final decision on nuclear waste disposal—less time for high level nuclear waste, but I think that timeframe is accurate for nuclear waste. No doubt, we can keep thinking up logical sounding excuses for more and more decades. The time for excuses is over, however. The time for action has come.

I support the MRS concept because I believe that the deep geological storage option will be beset by continued delay and objection. You are dealing with uncertainty when you are dealing natural geology. In fact, this Nation may never see a permanent deep geological waste storage facility due to political and technological obstacles. Waste storage cannot continue in the temporary, unsafe fashion that it has maintained for these decades. We are just courting disaster if we continue to take that course.

Our Nation must find some safe method of waste isolation. The MRS concept offers our Nation a way to isolate wastes, yet still monitor them for the continued safety of our citizens. It is a concept which must at least be kept on a parallel track with the other ongoing efforts, like deep geologic storage, or else we may wake up 5 or 6 years from now still without any waste disposal option or solutions readily available to us for the storage of high level nuclear wastes.

For these reasons, I think we ought to move on parallel tracks and we ought to move rapidly on those parallel tracks.

This amendment, while it keeps alive the concept of MRS, MRS does not move us in parallel fashion. Therefore, I urge my colleagues to defeat the Udall amendment.

Mr. MARKEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of this amendment and I do so for a number of reasons; but preeminent among them is the real belief that I have that if we do not pass this amendment, then the monitored retrieval storage facility will displace the permanent nuclear waste facility. A permanent repository should be the centerpiece of any piece of legislation which we produce in this body this week. Under the existing language in the legislation, there is only a 2-year timeframe for reporting back to the Congress as to the site and the type of MRS facility which ought to be constructed.

Now what will transpire is this: With the possibly construction of a facility of a huge nature—an MRS facility could perhaps store for several hundred years the surplus nuclear wastes which we have in this country. An MRS would, without question, derail any efforts to construct, in the ensuing years, a permanent waste repository.

So the real issue here is, are we serious about putting together a permanent waste repository bill? If we are, then we cannot possibly use the present language of H.R. 7187, because that language calls for a monitored retrieval storage facility in 2 years. While the Department of Energy testified that it would take at least 5 years for them to comply with the terms of the bill with regard to reporting back the logistical difficulties in putting together such an MRS project. And, H.R. 7187 as before the House would telescope the timeframe down to 2 years. Such a proposition exposes what I believe is the real agenda of the present bill and the underlying assumption of this bill which is to replace the permanent repository which should be the real objective of the legislation.

The estimated cost of monitored retrievable storage facility is upward of $3.8 billion—that is $3.8 billion. Do we seriously believe that we are going to be able to appropriate $3.8 billion for an MRS facility and then find the money, $3 billion or $4 billion or $5 billion for a depository. Do you think that will happen when this interim facility will take care of all the problems for several hundred years? I doubt very seriously whether that would ever be the case.

What we have in front of us is an attempt to bait and switch, a very attractive and superficially alluring proposal to take care of an interim problem; when in fact what we are asking for is a streamlined process: Cutting back on environmental protections, cutting back on public participation, very costly, and ultimately something which will kneecap any attempts which we have at finding a permanent repository.

My hope is that we can keep on a clear track, that we can keep the objective very clearly in front of us. By doing so is how we put together a bill which will take care of our permanent waste problems.

I believe that the amendment which has been put together by the gentleman from Arizona (Mr. UDALL), the gentleman from Michigan (Mr. DINGELL), and the gentleman from New

York (Mr. OTTINGER) very aptly deals with the problem.

We say to those proponents of the language in H.R. 7187, let us have a 5-year study period. Let us have it reported back to Congress, since it is only in its conceptual form right now. And, it says that if in 5 years it does not appear likely that a permanent repository is ever going to be constructed, then perhaps we can consider some interim type of facility on a massive basis such as this. But, here as we enter into for the first time the area of permanent repositories, it seems to me to be counterproductive and ultimately will signal the death knell of any permanent repository if we go forward with the current language.

What I ask you to do is to consider very seriously the proposal put forth by the chairman. I think that it is a solid one. I think it is one that takes care of the problems of public participation, of the environmentalists, and of the taxpayers, which I genuinely believe want to see their dollars expended wisely in this coming era of austerity at the Federal level.

Mr. BEREUTER. Mr. Chairman, will the gentleman yield?

Mr. MARKEY. I would be glad to yield to the gentleman from Nebraska.

Mr. BEREUTER. Mr. Chairman, I thank the gentleman for yielding.

I do have a question. Given what I think the gentleman would agree to, given the fact that we are dealing with uncertainty when we are dealing with natural geologic structures, we cannot know precisely about the consistency, the possibility of voids, unless we go into the type of drilling and testing which really ruins the geologic media itself.

Is the gentleman willing to assure this Member and other Members of the body that we are not going to reach an impasse in 4 to 6 years, whereby questions about the unknown in geologic storage simply delay us again from finding a high level nuclear waste geologic repository that will work?

Mr. MARKEY. I cannot guarantee the gentleman that they will find a permanent respository that will be suitable for storing these materials for 10,000 years.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

(By unanimous consent, Mr. MARKEY was allowed to proceed for 2 additional minutes.)

Mr. MARKEY. I can give the gentleman one guarantee, however, that if we pass this monitored retrievable storage facility legislation in its present form, we will never have a permanent repository in this country. The political will to accomplish the goal of pressuring a State to accept the Nation's nuclear waste will end, because potential repository States can argue, and argue convincingly, that the Nation will have a monitored retrievable storage facility that will hold this waste for 200 or 300 years. Let the next generation worry about the problem.

This is the problem that we have faced for the past 20 years, the problem of parochialism. The only way that we are going to be able to circumvent it, is if we take out the roadblocks and we keep our minds straight on the problem ahead of us. Any other approach on the question of a monitored retrievable storage facility, as superficially appealing as it appears to be, will in fact be counterproductive and will result in the exact contrary with what is the objective of the gentleman.

Mr. BEREUTER. Mr. Chairman, will the gentleman yield again?

Mr. MARKEY. I would be glad to yield to the gentleman.

Mr. BEREUTER. I thank the gentleman for yielding again.

I come from a State that has no possibility of having geologic media that can be used for high level nuclear waste storage. I do not share the conclusions of the gentleman about what MRS will do.

It seems to me that it is just inevitable that 4 to 6 years from now the gentleman and I, or our successors, are going to be here and we are going to be hearing about all the reasons why deep geologic waste contains these uncertainties, which make it unacceptable for the storage of high-level nuclear waste.

Mr. MARKEY. The problem is that the gentleman is now conceding that there is no permanent geologic repository possible. I believe that it is possible; but the only way in which it can be done, is if we rally all the forces, that includes the utilities, the nuclear vendors, and public opinion and the Congress together in commitment to a single common objective.

What we are now talking about is constructing interim facilities which can be used by the nuclear utility companies in this country to take care of their public relations problem, which has prohibited them from constructing any new nuclear powerplants until there is a permanent waste repository.

The headline, saying we have found a permanent solution, will give them that victory; but coupling it with a monitored retrievable storage facility will be a hollow victory for the people of this country that do want a permanent waste repository.

Mr. LUNDINE. Mr. Chairman, I move to strike the requisite number of words.

I rise in support of the amendment.

I think a lot of important points with respect to the Udall amendment have already been made. I certainly do not want to be redundant; but I would like to add my support infavor of the Udall amendment.

The idea of an MRS is another interim technology. At a hearing of the Science and Technology Committee earlier this year, I asked the Department of Energy what this facility, MRS, would look like, where it might be located. The witness from the Department of Energy had no idea. He had no basic concept. He said the Department had no engineering plans, no criteria for such a facility.

Mr. HUCKABY. Mr. Chairman, will the gentleman yield on that point?

Mr. LUNDINE. I would be glad to yield if the gentleman will let me finish with just that point.

The Department of Energy had no concept with respect to the issue even of whether it would be colocated at a permanent site or it would be set apart at another site.

Now I would be happy to yield to the gentleman.

Mr. HUCKABY. The Department of Energy has spent hundreds of thousands of dollars on studies already. There are artists' sketches in detail of how this might be stored inside mountains or in deserts. Numerous other alternative scenarios presently exist in the hands of the Department of Energy of how an MRS might be constructed, plus we have the knowledge of the French who are doing it today.

□ 1415

Mr. LUNDINE. This testimony this year before the Committee on Science and Technology left unequivocal the point that we are at only the conceptual design stage of such a facility. It seems to me not unreasonable to ask that a technology which is interim and which is going to be very expensive, as this would, be given the same amount of attention as was given to a permanent repository because we are talking about something that is going to be very expensive.

As the gentleman from Massachusetts has already indicated, it is not likely we are going to have an MRS and a permanent repository. The chances are that we are going to have one or the other.

Now, it just seems to me to be reasonable and, considering the technological progress today, considering the likely expense and keeping in mind that it is our object to develop a permanent answer to isolating these radioactive elements from the biosphere, we must allow for the proper amount of time for this study, and that is the reason I support the Udall amendment.

Mr. VENTO. Mr. Chairman, will the gentleman yield to me?

Mr. LUNDINE. I yield to the gentleman from Minnesota.

Mr. VENTO. I thank the gentleman for yielding.

Mr. Chairman, I want to commend the gentleman for his statement. I would rise in support of the Udall amendment. The fact is that while the MRS idea or concept may not necessarily be intended to short circuit a so-called permanent type of storage facility—it may very well do so. I do not think that is the intent of the authors and I hope that is not the consequence of the MRS facility, irrespective of what direction this particular amendment takes.

There are different types of high-level wastes, some of which can be retrieved, some that do have an economic value, because of simply the nature of the qualities of the waste in fact, from light-water reactors. How to deal with these wastes is the question we are trying to address. We do not have breeders. We do not have a reprocessing system in place. Different types of wastes therefore can indeed justify a monitored-retrievable-storage-type facility.

Nevertheless, if we are going to pursue this particular goal, this particular facility, to deal with waste, it seems to me it deserves a fair hearing. It deserves, for instance, an adequate environmental impact statement with respect to where it is located, if it is Minnesota, Indiana, or New York.

All of us want to have an adequate criterion of the area that the waste goes to. I think in the same instance, it deserves an adequate review and licensure by the NRC.

I am concerned with the attempt and object to in terms of the MRS not only with the fact that it competes with and has a potential to short circuit a permanent type of solution to this problem, which I understand no one agrees with as a goal. We are concerned about that; but what we object to is the attempt to force this particular type of decision.

After all, the delay with regard to permanent disposal of nuclear wastes, and in most instances justified by the lack of knowledge and uncertainty that continues to exist, we do not need false hopes raised with an MRS system that is based on half-baked concepts and an unjustified optimism. I urge a vote to adopt the Udall amendment and a realistic timeframe for the consideration of the MRS facility.

The CHAIRMAN. The time of the gentleman from New York (Mr. LUNDINE) has expired.

(On request of Mr. VENTO and by unanimous consent, Mr. LUNDINE was allowed to proceed for 2 additional minutes.)

Mr. VENTO. Mr. Chairman, indeed there is uncertainty. The idea to force the MRS and push it is the type of concept that is going to create more problems than it is going to solve.

So I appeal to my colleagues to support the amendment today which would provide us adequate time for a relatively new concept, a new concept brought about because of the lack of reprocessing, because of the lack of a breeder reactor, and the lack of an answer as to what to do with spent nuclear fuel rods.

Mr. Chairman, all we are asking for is adequate time. This time gives what is relatively a new concept of MRS adequate time for licensure, adequate time for an environmental impact statement before we go off with a half-baked idea in a couple of years to force a decision.

So if we can accomplish this today, I think we will have a parallel system of two tracks, and hopefully it will not short circuit the answer and solution to this particular problem.

Mr. LUNDINE. Mr. Chairman, I thank the gentleman for his contribution and for his support of my position in this regard, even though our analysis of the overall situation may be slightly different.

I think the point is, we ought to take a careful look at this MRS proposal. We ought to make progress, but we ought to allow the Department of Energy to do a proper job. This is exactly what the Udall amendment is directed toward achieving, and that is why I am so strongly in support of the amendment.

Mr. Chairman, I yield back the balance of my time.

Mr. UDALL. Mr. Chairman, I do not know of too many more speakers on this amendment. I would like to see if we could get an agreement.

Mr. Chairman, I ask unanimous consent that all debate on the pending amendment cease at 2:30.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona that all debate on the Udall amendment cease at 2:30?

There was no objection.

Mr. TAUZIN. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the Udall amendment.

Mr. Chairman, the proponents of the Udall amendment would have you believe that the present bill authorizes the construction of an MRS without EIS evaluation and without proper evaluation by this Congress of a site recommended by the study. That is not so.

The legislation before us does not authorize an MRS facility to be constructed. It certainly does not authorize one to be constructed before this Congress approves one; nor does it authorize one to be constructed without a proper environmental impact statement and evaluation. In fact, the present legislation provides that within 2 years the Department of Energy would recommend this Congress a concept for construction of a site-specific MRS. Then it would be the prerogative of this Congress to examine, with appropriate hearings, that study, that decision by the Department to recommend to the Congress.

Those hearings could last ad infinitum if we so choose. Those hearings could go on as long as we determine there were questions unanswered by the DOE study. Those hearings would not necessarily produce an MRS; those hearings would simply be the basis upon which this Congress could then make a decision as to whether the DOE recommendations made sense or did not make sense.

Those hearings would not produce the construction of an MRS unless the construction is then authorized. Even that authorization would not produce an MRS until proper environmental impact statements were obtained and the total environmental aspects of that project would be evaluated and acted upon.

So the proponents of the Udall amendment who would make you believe that the current status of this bill produces an MRS without an environmental impact statement, without proper action considered by this Congress, are simply in error.

The Udall amendment, on the other hand, would extend by 3 additional years the study, the information that this Congress ought to have in order to determine whether the MRS concept makes sense.

I think it makes sense. Some of the proponents of the Udall amendment do not believe that the MRS makes sense. They would rather see us make a decision on the permanent deep-geologic storage question prior to determining whether or not we can monitor the storage of nuclear wastes and find out exactly some of the answers to the questions that have gone unanswered all these years with reference to deep-geologic storage.

So, those proponents of the Udall amendment would have us reach that point somewhere down the way where we would have to make a decision on deep storage when all the facts are not in a point in time when we have to decide or begin shutting down nuclear plants. They would have us reach that point without the advantage of this study by DOE on a monitored retrievable system of storing nuclear wastes pending the final decision on a deep-geologic study.

Gentlemen, I believe the Udall amendment extends unduly the study by DOE. It does not in any way give further protection to the establishment of an MRS than does the present bill, which adequately protects this Congress and the American people in regard to the environmental concerns that we all share in the disposition of nuclear wastes.

Extending the study by 3 years simply means we are not going to have an MRS. We are, instead, going to be

faced with the hard question of where do we permanently store nuclear wastes without having all the answers. Therefore, I think this amendment ought to be defeated.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The Chair recognizes the gentleman from Arizona (Mr. UDALL) for the concluding 5 minutes of debate.

Mr. UDALL. Mr. Chairman, I just wanted to make a couple of points.

Neither our amendment nor the original bill mandates 5 years. It says "not more than 5 years." The most vigorous proponent of the legislation for getting something done has been the Department of Energy, and that Department will be in charge of this 2-year or 3-year or 4-year or 5-year study, whatever it is.

Mr. Chairman, I want to emphasize that in voting for my amendment, Members are for the MRS, they are for it as a backup system. What we are saying is: Let us get going on a decision framework for the main deep-geologic repository, but in the event it does not work out, in the event conditions occur that make it required, we will have a backup system such as the MRS under study and hopefully under constuction at some point.

So I would urge the adoption of the amendment.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. Under the unanimous-consent request, all further debate on the amendment offered by the gentleman from Arizona (Mr. UDALL) is suspended.

The question is on the amendment offered by the gentleman from Arizona (Mr. UDALL).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. LUJAN

Mr. LUJAN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Is the amendment permitted under the rule?

Mr. LUJAN. Yes, Mr. Chairman, it is.

The Clerk read as follows:

Amendment offered by Mr. LUJAN:

Page 79, beginning on line 21, strike out section 135(f)(3) in its entirety and insert in lieu thereof the following:

(3)(A) If any notice of disapproval is submitted to the Congress under paragraph (2), the proposed provision of 300 or more metric tons of storage capacity at the site involved shall be approved unless, during the first period of 90 calendar days of the Congress following the date of the receipt by the Congress of such notice of disapproval, either House of Congress passes a resolution in accordance with this subsection disapproving such proposed provision of storage capacity in accordance with the procedures established in this paragraph. For purposes of this paragraph, the term "resolution" means a resolution of either House of the Congress, the matter after the resolving clause of which is as follows: "That there hereby is approved the notice of disapproval regarding the disapproval of the provision of 300 or more metric tons of spent nuclear fuel storage capacity at the site located at ——, with respect to which a notice of disapproval was submitted by —— —— on ——.". The first blank space in such resolution shall be filled with the geographic location of the site involved; the second blank space in such resolution shall be filled with the designation of the State Governor and legislature or Indian tribe governing body submitting the notice of disapproval involved; and the last blank space in such resolution shall be filled with the date of submission of such notice of disapproval.

(B)(i) The provisions of this subparagraph are enacted by the Congress—

(I) as an exercise of the rulemaking power of the Senate, and as such they are deemed a part of the rules of the Senate, but applicable only with respect to the procedure to be followed in the Senate in the case of resolutions under this paragraph, and such provisions supersede other rules of the Senate only to the extent that they are inconsistent with such other rules; and

(II) with full recognition of the constitutional right of the Senate to change the rules (so far as relating to the procedure of the Senate) at any time, in the same manner and to the same extent as in the case of any other rule of the Senate.

(ii)(I) Not later than the first day of session following the day on which any notice of disapproval under paragraph (2) is submitted to the Congress, a resolution under this paragraph shall be introduced (by request) in the Senate by the chairman of the committee to which such notice of disapproval is referred, or by a Member or Members of the Senate designated by such chairman.

(II) Upon introduction, a resolution under this paragraph shall be referred to the appropriate committee or committees of the Senate by the President of the Senate, and all such resolutions with respect to the same storage capacity shall be referred to the same committee or committees. Upon the expiration of 45 calendar days of continuous session after the introduction of the first resolution under this section with respect to any site, each committee to which such resolution was referred shall make its recommendations to the Senate.

(iii) If any committee to which is referred a resolution introduced under this paragraph, or, in the absence of such a resolution, any other resolution under this paragraph introduced with respect to the capacity involved, has not reported such resolution at the end of 45 days of continuous session of Congress after introduction of such resolution, such committee shall be deemed to be discharged from further consideration of such resolution, and such resolution shall be placed on the appropriate calendar of the Senate.

(iv)(I) When each committee to which a resolution under this paragraph has been referred has reported, or has been deemed to be discharged from further consideration of, a resolution described in clause (III), it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) for any Member of the Senate to move to proceed to the consideration of such resolution. Such motion shall be highly privileged and shall not be debatable. Such motion shall not be subject to amendment, to a motion to postpone, or to a motion to proceed to the consideration of other business. A motion to reconsider the vote by which such motion is agreed to or disagreed to shall not be in order. If a motion to proceed to the consideration of such resolution is agreed to, such resolution shall remain the unfinished business of the Senate until disposed of.

(II) Debate on a resolution under this paragraph and on all debatable motions and appeals in connection with such resolution, shall be limited to not more than 10 hours, which shall be divided equally between Members favoring and Members opposing such resolution. A motion further to limit debate shall be in order and shall not be debatable. Such motion shall not be subject to amendment, to a motion to postpone, or to a motion to proceed to the consideration of other business, and a motion to recommit such resolution shall not be in order. A motion to reconsider the vote by which such resolution is agreed to or disagreed to shall not be in order.

(III) Immediately following the conclusion of the debate on a resolution under this paragraph and a single quorum call at the conclusion of such debate if requested in accordance with the rules of the Senate, the vote on final approval of such resolution shall occur.

(IV) Appeals from the decisions of the Chair relating to the application of the rules of the Senate to the procedure relating to a resolution under this paragraph shall be decided without debate.

(C)(i) The provisions of this subparagraph are enacted by the Congress—

(I) as an exercise of the rulemaking power of the House of Representatives, and as such they are deemed a part of the rules of the House, but applicable only with respect to the procedure to be followed in the House in the case of resolutions under this paragraph and such provisions supersede other rules of the House only to the extent that they are inconsistent with such other rules; and

(II) with full recognition of the constitutional right of the House to changes the rules (so far as relating to the procedure of the House) at any time, in the same manner and to the same extent as in the case of any other rule of the House.

(ii) Resolutions under this paragraph shall, upon introduction, be immediately referred by the Speaker of the House to the appropriate committee or committees of the House. Any such resolution received from the Senate shall be held at the Speaker's table.

(iii) Upon the expiration of 45 days of continuous session after the introduction of the first resolution under this paragraph with respect to any site, each committee to which such resolution was referred shall be discharged from further consideration of such resolution, and such resolution shall be referred to the appropriate calendar, unless such resolution or an identical resolution was previously reported by each committee to which it was referred.

(iv) It shall be in order for the Speaker to recognize a Member favoring a resolution to call up a resolution under this section after it has been on the appropriate calendar for 5 legislative days. When any such resolution is called up, the House shall proceed to its immediate consideration and the Speaker shall recognize the Member calling up such resolution and a Member opposed to such resolution for 2 hours of debate in the House, to be equally divided and controlled by such Members. When such time has expired, the previous question shall be considered as ordered on the resolution without

intervening motion. No amendment to any such resolution shall be in order, nor shall it be in order to move to reconsider the vote by which such resolution is agreed to or disagreed to.

(D) For purposes of this paragraph—

(i) continuity of session of Congress is broken only by an adjournment sine die; and

(ii) the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of the 90-day period referred to in this paragraph and the 45 day period referred to in this paragraph.

Mr. LUJAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Mexico?

There was no objection.

Mr. LUJAN. Mr. Chairman, the amendment which I am offering deals with section 135 in subtitle B of this act, specifically with the process which the States will have, to object to siting of interim storage facilities within their boundaries.

Let me briefly summarize and then contrast the act's existing language with my proposed amendment on this process. As currently proposed in this act, once the Secretary of Energy has decided to provide for 300 or more metric tons of interim storage for spent nuclear fuel at an existing Federal facility, he must first notify the affected State's Governor and legislature of his decision. The Governor and legislature may then, if they so choose, jointly submit a notice of disapproval to the Congress, a disapproval which becomes effective unless a majority of both Houses of Congress pass a resolution overturning the objection. My amendment changes the last step of this process. Instead of requiring a two-House congressional override of a State's objection, my amendment requires that a State's notice of disapproval be sustained by a majority vote of one House of Congress before it can become effective. This is not applicable to the permanent repository—only to the last resort interim storage facility.

Mr. Chairman, let me now present my supporting arguments for this amendment. This Congress, by passing a high level nuclear waste act, will be mandating a major Federal program for the ultimate solution of this Nation's growing radioactive waste problem. The last resort, interim storage facilities provided for in this act are an integral part of a relatively small, but essential, subprogram which contributes to the comprehensive solution. It makes no sense for this Congress to now pass legislation for a major Federal program, one whose ultimate purpose is clearly in the overriding national interest, but then require that a subsequent Congress enact another separate law in order for subprograms established within this act to take effect. But that is exactly what the currently existing two-House overrride provision in this act requires. I agree that it is essential that we provide processes within this act by which the States can participate in decisions which impact them. The difference between the existing two-House override provision and my proposed one-House sustain provision is that my amendment effectively requires that a State submit, along with its notice of disapproval, the basis for its objections. If the State's rationale is determined to be sound after congressional review, then the State should have little trouble in convincing a majority in one House of Congress to vote to sustain its notice of disapproval.

Realistically we can expect some States to be reluctant partners in hosting last resort, interim storage facilities. Unfortunately, this reluctance will not necessarily arise from sound technical arguments, or for reasons affecting the public health, safety, and the environment. Rather, in some cases, this reluctance will appear simply because it is politically expedient in these times for a State to adopt such a position. In crafting this legislation we certainly must be careful where we choose to preempt or redefine the State's authority. However, we must be equally careful not to allow summary or frivolous actions on the part of any State to unnecessarily impede the progress of a major Federal program whose ultimate purpose is clearly in the overriding national interest.

Let me present some additional reasons which support my amendment. I ask my colleagues to remember that what we are talking about are last resort, interim storage facilities with limited capacity. This act authorizes the Department of Energy to provide a maximum of 1,900 metric tons of interim storage capacity. This is estimated to represent less than 3 percent of the utilities' spent fuel storage needs through the year 2000. This interim storage is to be provided at existing Federal facilities, so we are not talking about acquiring additional land. And most importantly, this storage is only temporary. Once a permanent deep geologic facility has been constructed and licensed to operate, as is provided for in other sections of this bill, the radioactive waste stored at these interim storage facilities will be transferred to the permanent disposal site. Thus these interim storage facilities do not represent a permanent burden to the individual States in which they are sited. While it can be argued that the permanent disposal sites, ultimately holding materials which will remain radioactive for thousands of years, require stronger States participation in their siting, these interim storage facilities will have no long-term and relatively little short-term impact on their host States.

Mr. Chairman, before closing let me briefly address one last reservation which some of my colleagues may have with my proposed one-House sustain provision. The constitutionality of the one-House sustain provision as a form of legislative veto is currently under review by the courts. My feeling is that the one-House sustain provision which I am proposing for this act is not a direct legislative veto of an Executive order, but rather an action related to a State objection. Historically, a large number of pieces of legislation have been passed containing forms of congressional vetoes, and the courts have accorded to Congress broad discretion to draft necessary institutional arrangements. In any case, I do not feel that we as the legislative branch of the Government should allow the possible actions of the judicial branch to predetermine our course of action in this matter. To do so would be to improperly tip the constitutionally mandated balance of power.

Mr. Chairman, in closing let me just reiterate that we must assure that this legislation clearly establishes a democratic process by which legitimate concerns of the affected States will be heard and resolved by the Federal Government prior to siting of interim storage facilities within their boundaries. I know from the ongoing experience of my State of New Mexico with the Department of Energy's waste isolation pilot plant program that failure to do so can cause substantial problems, delays, and bad feelings between the Federal and State governments. I feel that my amendment will establish an interfacing process between the States and Federal Government which will achieve a proper balance between States rights and the national need to move forward toward the solution of this Nation's radioactive waste problem. I ask my colleagues to support passage of this amendment.

□ 1430

The CHAIRMAN. The time of the gentleman from New Mexico (Mr. LUJAN) has expired.

(On request of Mr. UDALL and by unanimous consent, Mr. LUJAN was allowed to proceed for 2 additional minutes.)

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I will be glad to yield.

Mr. UDALL. Mr. Chairman, let me say that I am going to support the gentleman's amendment personally, and give just a couple of reasons why.

I have always been in favor of a State veto on these major nuclear facilities. I think rather than running over the States, we ought to bring them into the process. We ought to re-

quire at some point that a State, after having been selected for the site, can say, "No thanks" and veto it.

But, there has to be a mechanism so that the Federal Government, in the national interest, the national welfare, can act as we have to do in wartime when we need a military base of some kind, simply override the State in the national interest. We have machinery to do that.

The question in this amendment, this issue here, is how tough should it be. Should we load the dice so that it is fairly easy for the State to veto and get away with it and make it stick, or should we make it tougher for them?

With regard to the away-from-reactor (AFR) spent fuel storage facility that is in the gentleman's amendment, it seems to me that if the State can convince one House of the Congress to agree with it, it ought to be able to avoid the honor of having this AFR facility.

With regard to the deep geologic storage, I take a different view, and I think I am consistent in doing so, but I think the gentleman's approach is the correct one and I would personally support the gentleman's amendment.

Mr. LUJAN. I thank the gentleman.

Mr. MARRIOTT. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from Utah.

Mr. MARRIOTT. Mr. Chairman, I am just curious here about why the gentleman wants to weaken the States' position. Under the current bill we treat AFR's like we do permanent repositories. Now, the gentleman is coming along and treating AFR's differently, and is weakening the States' power.

Why should AFR's be treated any differently than a permanent repository? They are just as dangerous to the public, are they not?

Mr. LUJAN. Well, there are two different types of facility. The permanent repository will last for thousands of years. This one, the gentleman must remember, is simply an interim storage facility.

The CHAIRMAN. The time of the gentleman from New Mexico has again expired.

(At the request of Mr. MARRIOTT and by unanimous consent, Mr. LUJAN was allowed to proceed for 2 additional minutes.)

Mr. LUJAN. This, the gentleman must agree, is simply a temporary, interim storage facility so that as soon as the permanent repository is completed these will be taken out of there and there will be no permanent damage done.

Mr. MARRIOTT. I understand that, but from the State's point of view, it seems to me the States should be just as concerned about nuclear waste material coming in on a temporary basis as they are on a permanent basis. In fact, they might have more security if they knew we had a permanent Federal repository. I am wondering why it is you want to weaken the States' position. Why not leave it like it is?

Mr. LUJAN. The gentleman must understand what we are doing here. We are just hedging our bet a little bit if the repository is not ready yet. It is limited to 1,900 metric tons, a infinitesimal amount of what is needed, so it is just for a very short time that these materials will be there before they are moved to the permanent repository.

Mr. MARRIOTT. But if there is any doubt that this is in the national interest, does it not make sense that both Houses will override the veto anyway?

Mr. LUJAN. Well, under the present provisions of the bill, I might just tell the gentleman there is another point that must be considered. The State might say, "We do not want it," and give absolutely no reason, and then it must take the two Houses to override. Under this, they must give their reasons why they do not want it, to say if there is some technical problem or some public health problem—not just because it is politically popular to say that they do not want it. We are going to get that from everyone of the 50 States, so we make some additional provisions to strengthen it.

Mr. MARRIOTT. I thank the gentleman.

Mr. OTTINGER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment. There were very few areas on which we were unable to reach agreement when push finally came to shove at the 11th hour on this bill, but this was one of the areas. There are a great many of us who felt that there was no need for the AFR provided by the Federal Government at all, and indeed an amendment in our committee which would have knocked out the AFR provisions lost by only a few votes.

The fact of the matter is that the utilities have done nothing to expand their spent fuel storage, waiting for the Federal Government to act. That is not entirely their fault, since at various times various administrations have indicated that the administration would in fact act first by supporting reprocessing, and then, as under the Carter administration, by supplying an AFR. But, the process of getting approval to add to a spent fuel storage facility is so simple—these things are essentially swimming pools—but no utility has requested permission from NRC for this very simple thing. Once the utilities understand that the Federal Government is not going to pick up this ball for them, then I think they will be able to act readily.

It was the structure of the compromise and the bill we put through that we would have last resort storage capacity just in case, for some unforeseen reason, utilities could not expand existing onsite storage, or by installing dry storage. The NRC testified before our committee that dry storage technologies could be approved within 1 year, and that it was some 5 or 6 years before any utility would need this AFR capacity.

But, just in case something fouled it up, we decided to establish a last resort AFR, but put as many obstacles to creating a Federal AFR as possible to put pressure on the utilities to provide for spent fuel storage themselves. We provided, for example, that the NRC would have to make a determination that in fact there would be no AFR facility unless a utility could show to the NRC in an on-the-record hearing that failure to provide such storage would interfere with the orderly operation of the reactor; that in fact a reactor would have to close down if AFR facilities were not created.

One of the other things we provided was a two-House veto so that if a State objected to the siting of an AFR, the State would have an enforceable means to exclude an AFR it felt to be unnecessary. Certainly, the State is going to be very much concerned. If the State feels that a utility in that State is going to have to close down and therefore buy higher cost replacement power, the State is not going to seek to veto that application. But, if the State feels that the utility is acting arbitrarily or operating in such a way as to increase spent fuel transportation to an AFR or increase the danger to its residents it ought to have an effective means to veto that decision.

The second argument of the gentleman from New Mexico is the constitutional question; that is to say, that there is a recent Federal court case that has declared the one House veto unconstitutional, and if the Supreme Court concurs, this provision could be eliminated. That means that under the separability clause as provided in this legislation, there would be no State protection whatsoever. This is a precursor to an argument that will be made for an amendment offered by my good friend from North Carolina sometime following this amendment, that there should be a one-House veto with respect to a permanent repository. Clearly, what my friends are seeking to do is take the easier case with the AFR section. If they can get a one-House veto here, they can say, "You have already done it here, why not do it on the other."

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield.

Mr. LUJAN. Mr. Chairman, the gentleman is completly incorrect. As a

matter of fact, in the Interior Committee I have always supported the two-House override for permanent repositories. I just thought in this particular case, as a last resort, interim storage facilities, the one-House approval was better.

Let me also raise one additional point. We do consider it, as the gentleman has said, a last resort, interim storage facility. As the gentleman knows, we have done everything we can in the bill to encourage the utilities to expand at the prime site to the maximum that they possibly can, and only—and only in the case where it is found that they cannot do that, then we have to have a place to put it as an alternative to closing down the powerplant.

Mr. OTTINGER. Well, I felt that an AFR was not needed. I still feel it, but I was willing to go along with the last resort storage since there was so much pressure and so much interest in it by so many Members, but I do think it really ought to be a last resort. Part of that making it a really last resort is to give the States an effective right. That is the reason I am differing from my colleague from New Mexico and feel that a two-House veto is warranted in this case particularly, in view of the fact that if the one-House veto is declared unconstitutional, the State would have no protection at all.

Mr. BROYHILL. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I want to make it clear that the section of the bill which we are addressing at this time is that section which provides for a last resort temporary interim storage facility at present Federal sites for spent fuel. I might point out, of course, that this last resort spent fuel program does include, of course, a number of environmental protections as well as State participation guarantees.

It has already been pointed out by the gentleman from New Mexico that this program is limited to only 1,900 metric tons. In other words, only 1,900 metric tons can be stored in these last resort fuel storage facilities. That is less than 3 percent of the total spent fuel that was projected to be generated by nuclear powerplants by the year 2000.

We are not sure as to when the permanent repository is going to be in place or be available. What concerns us is that there may be a window in the later 1980's or early 1990's where some utility in some part of the country is going to have a problem.

□ 1445

They will not be able to pull the used spent fuel and to have any place to put it. The bill, of course, requires the utilities to make every effort to provide for themselves. In fact, the NRC has to make that determination as to whether or not they have met and done everything they can to provide the storage space for themselves, but having done that, there may be some emergency and for that reason we feel there should be some place that could be used as a temporary storage facility.

As I pointed out, this only provides for 1,900 metric tons in a last resort interim spent fuel storage facility. Now, one of the concerns that was brought up in the debate, as well as in all of the negotiations that occurred on this bill, was as to where these 1,900 tons are going to end up, and it was never the intent of the sponsors of this AFR amendment that those 1,900 tons end up in one particular State, region or one particular area. It was always the intent that the spent fuel be scattered around the country, and it was for that reason that we provided the State veto of more than 300 or more metric tons of storage at any one Federal facility. We feel that will have the practical effect of assuring that these materials will be scattered at Federal facilities that are presently storing or presently handling nuclear spent fuel so that that will be scattered around the country.

Mr. Chairman, I urge the adoption of this amendment. This amendment provides that if the Governor does veto it, he would have to come to the Congress and get one House to sustain his action. It seems to me that this is entirely reasonable, but I suspect that it will not be needed inasmuch as our intent is to try to scatter these materials around the country, and I doubt that the State veto would even come up under those circumstances.

Mr. MARKEY. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

I rise in opposition to the amendment because it sets the precedent for saying that the States ought not to have full participation in decisions which will affect them for perhaps generations and perhaps a lot longer than that. We cannot have any guarantees as to what the timeframe will be for the construction of a permanent respository in this country. We can guarantee a meaningful State role.

We have heard arguments that interim storage, really, is not as serious a problem as the permanent repository. Therefore, we can have a one-House veto for interim storage rather than a two-House veto. We hear that State role is not a serious problem? We hear that it is for only—and I repeat only—1,900 or 2,000 metric tons of high level nuclear waste.

Only? Only 2,000 metric tons, that is all. They tell us that is a minor problem; we do not need a two-House veto on something like that; we can just select any State and dump it in that State and we do not have to give them the full rights of participation.

My belief is that the State ought to have the strongest possible role. It is ironic that here in the House we hear those most ardent supporters of States rights come down on the opposite side of that issue when issues which most seriously and dramatically affect the long-term environments in their State are at issue. Here, for some reason or other, many Members are willing to argue that the States ought not to have a strong role. They argue that States should yield to the Federal Government. It ought to be "Big Daddy" that decides to select any site in America it wants. The Washington bureaucrat should decide that they will plunk down a facility in the middle of your State and give you 2,000 tons of nuclear waste, severely constraining the ability of the State to fully participate in that decisionmaking process.

As much as it might seem to be contradictory, those of us who believe that the States ought to have a full role in decisionmaking come from States that are not ordinarily identified with that issue. But we believe that on issues of this nature it makes a lot of sense to give our States that full role.

Now, why is this State role amendment a problem? It is a problem for a number of reasons. It gives the States which will eventually just be swept out of the way by an administration, which is fully committed to those States' right to raise questions as to how much transportation of nuclear waste will be increased within their borders, and what will be the routes, and what will be the nature of the facility, and what kind of conditional environmental safeguards we build in it. It gives each State the leverage in negotiations with the Federal Government that each State is going to need to insure that it has the strongest possible set of protections are built into any facility.

Now, we are also running into another very serious problem. A Federal district court of the District of Columbia has ruled recently that the one-House veto is most likely unconstitutional. Therefore, what we might be talking about here is whether we should adopt a provision of this bill that is likely to be struck down as unconstitutional. And with the severability clause of this legislation, we are debating whether we will allow no State role in the bill because we have not included in it the strongest possible protection for the States.

What have the courts said? The courts have said—and it is being interpreted now in its broadest possible terms—that not only is a one-House veto considered unconstitutional, but a two-House veto is unconstitutional. It

is only a two-House action with the President's signature. A joint resolution is within the scope of the law, according to a full reading of the Federal district court decision.

So what we are talking about is not something that just runs contrary to commonsense; it also runs contrary to law, to the constitutional protections which are built into a Presidential decision.

So what we need to have is commonsense reign. We are talking about the most serious environmental problem any State could possibly encounter as soon as a State is designated for an away-from-reactor facility. If we establish the precedent here that we do not recognize State role for the away-from-reactor storage, then we would be hard pressed to argue that there ought not to be an exception made for the permanent repository. We are going to have to be intellectually consistent here. The extent of the problem is relatively the same whether we talk about permanent or interim storage of these materials. And, I would argue that it is not going to do anyone any good to try to include a provision which ultimately is going to be struck down by the Supreme Court. We should not offer the States an empty role in the decisionmaking process.

So, Mr. Chairman, I would hope that the amendment offered by the gentleman from New Mexico (Mr. LUJAN) is rejected as an attempt to undermine the full role which the States should have in considering the placement of nuclear waste repositories within their boundaries.

The CHAIRMAN. If there is no further debate, the question is on the amendment offered by the gentleman from New Mexico (Mr. LUJAN).

The question was taken, and the chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. HUCKABY. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 181, noes 194, not voting 58, as follows:

[Roll No. 394]

AYES—181

□ 1510

Messrs. VOLKMER, WIRTH, CRAIG, and HANSEN of Idaho changed their votes from "aye" to "no."

Messrs. WILSON, BADHAM, and GEJDENSON changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

REQUEST FOR CONSIDERATION OF AMENDMENT

Mr. HUCKABY. Mr. Chairman, I have an amendment at the desk, and I ask unanimous consent for its immediate consideration.

The CHAIRMAN pro tempore (Mr. BIAGGI). Is there objection to the request of the gentleman from Louisiana?

Mr. TAUZIN. Mr. Chairman, reserving the right to object, I would like to inquire of the author of the amendment the nature of the amendment which he is seeking unanimous consent to offer.

Mr. HUCKABY. Mr. Chairman, I think, as most Members of the House realize, this is a unique bill. In fact, both the Commerce Committee and the Interior Committee had joint jurisdiction over this legislation.

When Members were invited to testify before the Rules Committee, Mr. Chairman, there was not a printed bill that is before the Members today. The staffs were in the process of merging the Interior Committee bill with the Commerce Committee bill when the Members testified before the Rules Committee, Mr. Chairman.

I assumed, as I think many Members assumed, that provisions that were identical in the two bills would emerge as identical in the bill that is before the Members of the House. And hence,

Mr. Chairman, I did not ask for a rule that would reinstate a section of the bill that was passed in the same language by both the Commerce Committee and the Interior Committee. That is why I find myself in the unique position of having to come before the House to ask unanimous consent to present an amendment that has been voted on and has been approved by both the Commerce Committee and by the Interior Committee.

□ 1520

Mr. Chairman, I think that the integrity of the House is at stake here, and the fact that we as the Members may not have an opportunity to vote on this provision that was passed identical by both committees.

Mr. TAUZIN. Mr. Chairman, reserving the right to object, I would like one additional question answered by the author of the amendment.

As a relatively new Member of this body, I am taken by surprise by the action that has occurred here. Is the gentleman saying that the Rules Committee has reported out a bill that is different from the language that was adopted in both the Energy and Commerce Committee and the Interior Committee?

Mr. HUCKABY. Mr. Chairman, if the gentleman will yield further, that is exactly right. If I might refer to the nature of the amendment. The Interior bill directs the Department of Energy to go henceforth and select three sites, narrow down this selection process to three sites in three different geological media. The Commerce bill also has directed them to pick three sites, but in at least two media. But both said they must pick three sites.

Today we have before us a bill that says you must now go out and pick five sites in two media. What does this do, Mr. Chairman? The Department of Energy has estimated it will cost at least an additional $100 million, which they consider wasted money. Plus it puts us into a possible scenario of the fact that since they only have to have two different media the Department of Energy could possibly not pick their second choice now.

An amendment to be offered by the gentleman from Mississippi will eliminate the third choice, the State of Mississippi. The Department of Energy has an agreement with the State of Louisiana at the very highest levels to exclude that State which is their fourth choice.

So this legislation could very well mandate that if we have problems with the first choice, you have to jump all the way down to the fifth choice in the order of priorities of which site should be chosen.

I think there are numerous flaws. I do not know exactly how these numbers were changed in the committee process, but I would urge the chairman and the ranking minority members to at least give the Members of the House of Representatives the opportunity to hear the debate and consider what both committees have already passed and what we thought would be reported to the floor of the House of Representatives.

Mr. TAUZIN. Mr. Chairman, further reserving the right to object, I yield to the gentleman from Louisiana (Mr. ROEMER).

Mr. ROEMER. Mr. Chairman, as I understand it the point that the gentleman from Louisiana makes is that his amendment would adhere to what has come out of both the Committee on Energy and Commerce and the Committee on Interior and Insular Affairs in regard to number of sites selected, and that would be three.

Am I correct in that?

Mr. TAUZIN. That is the explanation I just received. What appalls me, however, is that having served on the Committee on Energy and Commerce, having voted with that committee to report a bill that provided for the selection of three sites, having seen the Interior bill providing for the selection of three sites, I cannot yet understand by what procedure are we looking at a bill that now provides for five sites. I do not understand that.

Perhaps the gentleman could answer that question.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. TAUZIN. I yield to the gentleman from New York.

Mr. OTTINGER. I think I can clarify this situation somewhat. The representation from the gentleman from Louisiana is not wholly accurate. The Commerce bill in fact provides for the selection of six sites, and the Interior bill provides for five sites. The substitute before us provides for the selection of five sites with one additional site at a later date. Only the dates for site selection have been changed, not the number of sites to be selected.

Mr. STRATTON. Mr. Chairman, I make a point of order. I object.

The CHAIRMAN pro tempore. The Chair will inquire, what is the gentleman's point of order?

Mr. STRATTON. Mr. Chairman, I object. Does that not bring to a halt the reservations?

The CHAIRMAN pro tempore. Objection is heard. The unanimous-consent request of the gentleman from Louisiana (Mr. HUCKABY) is denied.

AMENDMENT OFFERED BY MR. STRATTON

Mr. STRATTON. Mr. Chairman, I offer an amendment which is in order under the rule.

The Clerk read as follows:

Amendment offered by Mr. STRATTON: On page 10, after line 25, insert the following new section:

APPLICABILITY

SEC. 8. (a) ATOMIC ENERGY DEFENSE ACTIVITIES.—Subject to the provisions of subsection (c), the provisions of this Act shall not apply with respect to any atomic energy defense activity or to any facility used in connection with any such activity.

(b) EVALUATION BY PRESIDENT.—(1) Not later than 2 years after the date of the enactment of this Act, the President shall evaluate the use of disposal capacity at one or more repositories to be developed under subtitle A of title I for the disposal of high-level radioactive waste resulting from atomic energy defense activities. Such evaluation shall take into consideration factors relating to cost, efficiency, health and safety, regulation, transportation, public acceptability, and national security.

(2) Unless the President finds, after conducting the evaluation required in paragraph (1), that the development of a repository for the disposal of high-level radioactive waste resulting from atomic energy defense activities only is required, taking into account all of the factors described in such subsection, the Secretary shall proceed promptly with arrangement for the use of one or more of the repositories to be developed under subtitle A of title I for the disposal of such waste.

(3) Any repository for the disposal of high-level radioactive waste resulting from atomic energy defense activities only shall (A) be subject to licensing under section 202 of the Energy Reorganization Act of 1973 (42 U.S.C. 5842); and (B) comply with all requirements of the Commission for the siting, development, construction, and operation of a repository.

(c) APPLICABILITY TO CERTAIN REPOSITORIES.—The provisions of this Act shall apply with respect to any repository not used exclusively for the disposal of high-level radioactive waste or spent nuclear fuel resulting from atomic energy defense activities, research and development activities of the Secretary, or both.

On page 11, strike out line 5 and all that follows through line 15 on page 12 (and redesignate the following section accordingly).

On page 12, line 20, strike out "section 101" and insert in lieu thereof "section 8".

On page 72, beginning on line 2, strike out "section 102" and insert in lieu thereof "section 8".

On page 98, strike out lines 22 through 25 and insert in lieu thereof the following:

SEC. 212. The provisions of this title are subject to section 8 and shall not apply to facilities that are used for the disposal of high-level radioactive waste, low-level radioactive waste, transuranic waste, or spent nuclear fuel resulting from atomic energy defense activities.

On page 137, beginning on line 8, strike out "section 102" and insert in lieu thereof "section 8".

Conform the table of contents on page 2 accordingly.

Mr. STRATTON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. STRATTON. Mr. Chairman, I hesitate to interrupt the enlightening discussion that was going on just a

moment ago. But the Rules Committee, on considering this highly complex bill, did provide for the consideration of a number of specific amendments; and those individuals who had other amendments, which the Rules Committee in their wisdom did not consider as important to the legislation, had to request unanimous consent. I think in pursuit of orderly procedure we ought to deal first with those matters which the Rules Committee had felt were of primary importance.

At this particular point, Mr. Chairman, there is a good deal of confusion as to exactly what is going on. This amendment, which I offer on behalf of the Armed Services Committee, is a very simple one and one on which I do not believe there is a great deal of controversy, either on the part of the chairman of the committee or the ranking member on the other side.

It would simply exclude from the provisions of the bill, not merely in title I and in title III, but in all three titles—the nuclear defense activities of the Department of Energy.

I would yield at this point to the chairman of the committee, the gentleman from Arizona (Mr. UDALL).

Mr. UDALL. I thank the gentleman for yielding.

He and I have one major difference on this whole nuclear waste business, and that is I would hope that we would have a repository for both defense and commercial nuclear material.

The Armed Services Committee and the distinguished gentleman from New York have resisted this very strongly. I suspect some day the military is going to be up there knocking on the door, when we get it all built, and asking us to put in the civilian repository, the military waste.

But that is not involved in this fight today, and it is not involved in the bill coming before us.

As I understand the gentleman's amendment, he is simply trying to nail down that the exemption of military waste from the Commerce and Interior titles of the bill and also from the title of subcommittee of the Committee on Science and Technology chaired by the gentlewoman from Tennessee (Mrs. BOUQUARD) turned out, that that exemption continues in full force and effect. I agree with that, and I see no objection to the amendment because I think it carries out what we intended to carry out anyway.

□ 1530

Mr. STRATTON. I appreciate the chairman's comment and let me just say that I also share the view of the gentleman from Arizona (Mr. UDALL). In fact, at some future date I am sure there will be a common repository for defense wastes, as well as for civilian wastes, but that will be many years down the road, as I see it.

The point is that today, in the defense activities of the Department of Energy, we have a number of specific kinds of waste facilities, and we do not believe that it is in the national interest to have those comingled with the various facilities that are contemplated in the other titles of this bill.

Mrs. BOUQUARD. Mr. Chairman, will the gentleman yield?

Mr. STRATTON. I would be glad to yield to my friend, the gentlewoman from Tennessee.

Mrs. BOUQUARD. Mr. Chairman, I rise in support of the gentleman's amendment. It is merely a technical amendment to clarify several provisions of the bill dealing with the atomic energy defense activities. I do not think it changes the substance of the bill. I do support the amendment.

Mr. STRATTON. I thank the gentlewoman for her support.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield.

Mr. STRATTON. I would be glad to yield to my friend, the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, I have no objection to the gentleman's amendment. My understanding is that it just applies to the science title of the bill, those provisions with respect to atomic energy defense activities that already exist with respect to the other titles of the bill. That being the case, while I agree with the gentleman from Arizona (Mr. UDALL), I would rather have provided for a commingling at this point, the provisions of the bill provide for that eventually if the President so decides.

I have no objection to the gentleman's amendment.

Mr. STRATTON. Mr. Chairman, I wonder if I could have the attention of the gentleman from North Carolina (Mr. BROYHILL).

Since these other leaders in the nuclear energy legislation have indicated their willingness to support this House Armed Services Committee amendment, I am just wondering whether the gentleman might want to add his accolades as well.

Mr. BROYHILL. Yes. The amendment is acceptable on this side.

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. STRATTON. I am glad to yield to the gentleman from New Mexico.

Mr. LUJAN. Mr. Chairman, I have consulted with my colleagues over here on this side. We have absolutely no objection to the gentleman's amendment.

Mr. MARKEY. Mr. Chairman, the issue whether or not defense wastes ought to be included in any permanent waste solution that we put together for this country this week is a central concern. Ninety percent of all nuclear wastes in this country by volume is military nuclear waste. Ordinary citizens cannot differentiate between civilian waste and military waste as it is stored near population centers.

As we establish the rules and regulations by which any facility will be constructed it is critical that we do so on a uniform basis. We cannot establish arbitarily two classes of nuclear waste, when in fact conceptually they are indivisible in the minds of people who have been clamoring for a permanent waste repository for the past generation.

What we see in this amendment is an attempt to undermine the process by which a test and evaluation facility could be used to determine the feasibility of a potential permanent military or civilian nuclear waste facility.

What I am asking for, and because I will later make an amendment to include military waste in this legislation, is for us to leave the bill as it is because it is critical—it is critical if we want to gain the respect of the people in this country who are asking us to put together a permanent nuclear waste bill. We cannot exclude 90 percent of the problem and give a public relations victory for the nuclear utility industry at the expense of the people in this country who so desperately want us to deal with the full realm of nuclear waste in this country.

So I would ask that the amendment by the gentleman from New York be defeated. We must understand that this is a permanent facility for all nuclear waste; that it is impossible to differentiate between military and civilian waste; and that if we are going to be serious about this problem, we cannot allow the sacred cow of defense security to be able in any way to mitigate our efforts to deal with this problem in a comprehensive way. That is what has to be the critical word in any negotiations or any deliberations today: comprehensive.

We are talking about all the nuclear waste which has been generated over the past generations and all that will be generated in the years to come. Otherwise, what we have put together here is nothing but a bailout for the private nuclear utility industry and we will not have dealt with the problem of all the nuclear wastes generated in this country.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. MARKEY. I would be glad to yield to the gentleman from New York.

Mr. OTTINGER. I am sure the gentleman is aware of it, because he has been working so hard on this bill, but I would like for the sake of the committee to point out where we stand on this.

The science and technology section of the bill, title II, already has a military exclusion in it.

The other titles to the bill have the following provisions: First of all, that if there is a separate military facility, and there is no mandate that there be a separate military facility, but if a separate military only repository is created, then it will be subject to the State participation provisions of this act, but not to the other provisions of the act. This very important provision was included through the leadership of the gentleman from Mississippi (Mr. MONTGOMERY).

A comingled repository is subject to all provisions of the act.

Lastly, we provide that there will be comingling unless the President finds after a 2-year study that is mandated in the act that there are national security and other important reasons for not providing that comingling. That is the best we could get in our negotiations. It goes a long way toward the position that the gentleman desires. I am sorry that we could not go all the way, but so far as this amendment is concerned, it really has very little to do with the ultimate question which the gentleman so ably addressed.

Mr. MARKEY. Mr. Chairman, if I might reclaim my time, I would argue that from beginning to end there ought to be no distinction between civilian and military wastes. As long as we can provide for the security purposes of the disguising of the military nuclear wastes, then that ought to be the only limitation upon its being treated identically to any civilian wastes.

We have been assured by Department of Energy and by Nuclear Regulatory Commission officials that that is the case. That being the case, I see no reason why we should set up two separate tracks that will engage in different procedures and different safeguards in terms of the construction of any facility for the treatment of any nuclear wastes.

The CHAIRMAN pro tempore. The time of the gentleman from Massachusetts has expired.

(At the request of Mr. SANTINI, and by unanimous consent, Mr. MARKEY was allowed to proceed for 2 additional minutes.)

Mr. SANTINI. Mr. Chairman, will the gentleman yield?

Mr. MARKEY. I am happy to yield to the gentleman.

Mr. SANTINI. Mr. Chairman, I think the gentleman makes an extremely valuable point that should be emphasized time and time again in the course of the deliberations on this legislation, and that is essentially that this legislation is addressing approximately 20 percent of the problem, the civilian waste. It ignores or postpones any meaningful decision response to 80 percent of the problem, and that is the military waste.

Now, whether it is in the context of this particular amendment or 2 years hence, we cannot ignore the reality of the fact that 80 percent of the problem solving is being postponed. That is being done for political expediency purposes of the moment, but that chicken will come home to roost in various Members' nests long after certain lameducks have quacked off into the sunset.

I think the gentleman's point should be understood and appreciated. We are beginning the debate on the disposition of nuclear wastes. We are not resolving the question.

Mr. MARKEY. I thank the gentleman for his point.

I would argue once again that to remove military waste is arbitrary. We have to put together a comprehensive bill. To not do so would be dangerous to the environment and to the people of this country. I argue for rejection of the amendment of the gentleman from New York.

Mrs. HOLT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I urge acceptance of the Stratton amendment. It is simply technical in nature.

□ 1540

The gentleman from Massachusetts is wrong. This is included in one title of the bill, and all we are asking is that it be included in three titles of the bill. It is purely a technical shifting of the applicability provisions regarding the defense activities from section 101 of title I to a new section 8.

Mr. STRATTON. Mr. Chairman, will the gentlewoman yield to me?

Mrs. HOLT. I will be happy to yield to the gentleman from New York.

Mr. STRATTON. I thank the gentlewoman for yielding to me.

Mr. Chairman, as the ranking Republican member of the subcommittee, the gentlewoman from Maryland is an extremely able participant in these discussions. She is well aware that the allegation that has just been made by the gentleman from Massachusetts that this somehow does not apply to nuclear waste provided by defense activities of the DOE is completely wrong. In fact, 98 percent of the substitute bill would not apply to a DOE defense program in any case.

The purpose of the substitute legislation is that it deals with repositories of permanent high-level waste and the interim storage of spent power reactor fuels.

The fact of the matter is that it will be 10 years before defense high-level wastes are even in an appropriate form for disposal, if we assume that all of the bureaucratic State and regulatory hurdles have been crossed by that time.

As I referred in my colloquy earlier with the chariman of the committee, the gentleman from Arizona (Mr. UDALL), at that time we anticipate that the defense and civilian fuels will very likely be commingled in those repositories.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from New York (Mr. STRATTON).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. MARRIOTT

Mr. MARRIOTT. Mr. Chairman, I offer an amendment.

Mr. OTTINGER. Mr. Chairman, I reserve a point of order against the amendment.

The CHAIRMAN pro tempore. The gentleman from New York (Mr. OTTINGER) reserves a point of order.

Mr. OTTINGER. Mr. Chairman, I would like to ask the gentleman if his amendment is made in order by the rule.

Mr. MARRIOTT. Yes, it is, Mr. Chairman. I have three amendments, and all three of them have been made in order.

Mr. OTTINGER. Mr. Chairman, may I ask the gentleman which amendment this is?

Mr. MARRIOTT. Mr. Chairman, we will be issuing amendment No. 1, printed in the RECORD on page H7739, having to do with the transportation of nuclear waste.

Mr. OTTINGER. Mr. Chairman, I withdraw my reservation of a point of order.

The CHAIRMAN pro tempore. The clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. MARRIOTT: Page 16, line 24, insert after the period the following new sentence: "Such guidelines shall take into consideration the proximity to sites where high-level radioactive waste is generated or temporarily stored and the transportation and safety factors involved in moving such waste to a repository.".

Mr. MARRIOTT. Mr. Chairman, currently under section 112A, the Secretary must take into account certain guidelines in selecting a repository. He has to take into account the proximity to the water supplies, national parks, the effect on population and natural resources.

What my amendment does is simply require the Secretary, in establishing guidelines for a permanent repository, to consider the proximity to nuclear reactors and the transportation factors when recommending sites for characterization.

This would minimize the danger to public health and safety by carefully considering the distance this material will be shipped.

More than 3,000 metric tons of high-level radioactive waste will be shipped by rail or truck annually through highly populated areas, and all we are doing here is asking the Secretary to make, as part of his guidelines, the transportation safety issues as well as some of the others.

Mr. UDALL. Mr. Chairman, will the gentleman yield to me?

Mr. MARRIOTT. I yield to the gentleman from Arizona.

Mr. UDALL. I thank the gentleman for yielding to me.

Mr. Chairman, I have no objection to the amendment. I think what we are doing here will be followed by a number of other amendments where we are saying to the Secretary that as he develops the guidelines for this facility, consider so-and-so.

Here the gentleman from Utah focuses on transportation. Obviously, that is a key consideration that ought to be looked at.

Mr. Chairman, I have no objection to the amendment.

Mr. MARRIOTT. Mr. Chairman, we focus on transportation and the distance between the reactor and the repository site.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield to me?

Mr. MARRIOTT. I yield to the gentleman from New York.

Mr. OTTINGER. I thank the gentleman for yielding to me.

Mr. Chairman, I think the gentleman's amendment makes a good deal of sense, and we should try to locate these respositories as close as possible to the reactors and, therefore, we have no objection to the amendment.

Mr. LUJAN. Mr. Chairman, will the gentleman yield to me?

Mr. MARRIOTT. I yield to the gentleman from New Mexico.

Mr. LUJAN. I thank the gentleman for yielding to me.

Mr. Chairman, as I understand the amendment, it just adds transportation as one of the factors to be considered in the selection of a site. Is that correct?

Mr. MARRIOTT. Also proximity to the reactor.

Mr. LUJAN. Mr. Chairman, we have no objection to the amendment.

Mr. MARRIOTT. Mr. Chairman, with all that support, I yield back the balance of my time.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Utah (Mr. MARRIOTT).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. MARRIOTT

Mr. MARRIOTT. Mr. Chairman, I offer a second amendment.

The Clerk read as follows:

Amendment offered by Mr. MARRIOTT: Page 23, beginning on line 1, strike out "at not less than 3 candidate sites approved under section 112" and insert in lieu thereof the following: "beginning with 3 candidate sites that have been approved under section 112 and are located in at least 2 different geologic media".

Mr. MARRIOTT. Mr. Chairman, this amendment requires the Secretary to carry out characterization activities of at least three sites in two different geologic media. The original intent of this bill reported out of committee was that three sites should be recommended for characterization in the first phase, and three sites would actually be characterized.

All these, however, could be characterized in one medium. It was the intent of the committee that we use three different media—salt, basalt, and tuff—to be evaluated.

During the drafting of the final compromise, changes made to require five sites to be recommended by DOE with at least three to be characterized, and all sites could be characterized in one medium, clearly not the intent of the Committee on Interior and Insular Affairs, the Committee on Energy and Commerce, or the Department of Energy.

Therefore, what this amendment does is to restore us to the original intent of the committees.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. MARRIOTT. I yield to the gentleman from New York.

Mr. OTTINGER. I thank the gentleman for yielding to me.

Mr. Chairman, this was actually what had been provided by, I think, both of the committees. It is the intent of our committee that two geologic media be included and, therefore, I support the amendment.

Mr. UDALL. Mr. Chairman, will the gentleman yield to me?

Mr. MARRIOTT. I yield to the gentleman from Arizona.

Mr. UDALL. I thank the gentleman for yielding to me.

Mr. Chairman, this does, as the gentleman suggests, correct a drafting error. This is what was intended.

Mr. Chairman, I have no objection.

Mr. LUJAN. Mr. Chairman, will the gentleman yield to me?

Mr. MARRIOTT. I yield to the gentleman from New Mexico.

Mr. LUJAN. I thank the gentleman for yielding to me.

Mr. Chairman, I would ask the gentleman to clarify something for me.

The amendment says "not less than three candidate sites approved under section 112," and further, "in at least two different geologic media."

Let us assume that we get to the point where we decided that one particular medium is the one where it should be. It is the gentleman's feeling that we still ought to characterize that medium that we think is the best or the probable one, and then another that we may have found that we are not going to use at all?

Mr. MARRIOTT. No. It is the intent of the author of this amendment to say that we need to evaluate all of the various media, salts, basalt, and tuff.

Right now, as I read the way the bill was written, it really would say that we could do all of our characterization in one medium, say salt only, and not be concerned with evaluating either basalt or tuff. This amendment requires at least evaluation of two different media.

Mr. LUJAN. I thank the gentleman for his explanation.

Mr. Chairman, we have no objection to the gentleman's amendment.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Utah (Mr. MARRIOTT).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. MARRIOTT

Mr. MARRIOTT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MARRIOTT: Page 24, line 7, insert "and for the mitigation of any significant adverse environmental impacts caused by site characterization activities" after "candidate site".

Page 26, after line 22, insert the following new paragraph:

(4) If a site is determined to be unsuitable for application for a construction authorization for a repository, the Secretary shall take reasonable and necessary steps to reclaim the site and to mitigate any significant adverse environmental impacts caused by site characterization activities.

□ 1550

Mr. MARRIOTT. Mr. Chairman, the Secretary under the current bill is required only to minimize environmental impact during characterization activities. Plans for site characterization contain no plan for mitigation, only those activities which are permanently terminated. This amendment requires the site characterization plan for a candidate site to include a plan of mitigation. It also requires the Secretary to reclaim the land and mitigate significant environmental impacts once a candidate site is determined unsuitable for a repository.

It provides front-end assurance to States that these concerns have been looked at and addressed at the Federal level. It is logical to assume that the DOE will go ahead and remove the evidence of this work and restore the land. The concrete assurance is absent from the bill.

Potential impacts of these studies requiring mitigation would be the removal of surface facilities, revegetation, and most important, the disposal of the quantity of material removed from the exploratory shelf. The quantity of material from inside the shaft to be disposed of is staggering. DOE estimates moving as much as 40,000 to 50,000 cubic yards of salt during its study of that medium. The amendment will not leave the fate of the restoration of this land in the air.

What the amendment does in layman's language, is say that when the Federal Government has completed its studies, it will in fact mitigate any damages caused if the site is unacceptable.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. MARRIOTT. I yield.

Mr. OTTINGER. Mr. Chairman, I would like to tell the gentleman that this amendment is so good that I wish that I had thought of it myself. We enthusiastically support the gentleman's amendment.

Mr. MARRIOTT. I thank the gentleman.

Mr. UDALL. Mr. Chairman, if the gentleman will yield, I am in favor of the gentleman's amendment.

Mr. MARRIOTT. Mr. Chairman, with this overwhelming support I will take my seat.

The CHAIRMAN pro tempore (Mr. BIAGGI). The question is on the amendment offered by the gentleman from Utah (Mr. MARRIOTT).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. LOTT

Mr. LOTT. Mr. Chairman, I offer an amendment.

The Clerk read as follows: The sentence beginning on page 16, line 24, and ending on page 17, line 4, is amended to read as follows: "Such guidelines shall specify population factors that will disqualify any site from development as a repository if any such site would be located (1) in a highly populated area; or (2) adjacent to an area 1 mile by 1 mile having a population of not less than 1,000 individuals."

Mr. LOTT. Mr. Chairman, I rise today to offer an amendment which makes certain that the people of our country are not the losers when a decision is made on where to locate a nuclear waste repository.

It is incredible to me that the paramount issue of the health and safety of our citizens is not assured in this bill. Health and safety are not even given one fraction of the protection which the Congress afforded the snail darter in that landmark legislation of the last Congress.

That is why I am offering my amendment which states simply that a nuclear waste repository cannot be located adjacent to a 1 mile by 1 mile area containing at least 1,000 individuals.

This is not a parochial question. This square mile area could be a section of the city of Clevelend, Ohio, or a town within the State of Mississippi. My amendment is not intended to make distinctions among regions of the country. What it does is to make a universal statement that the rights of people are primary in deciding where to locate nuclear waste facilities, just as they have been in deciding where to locate atomic reactors.

The population language in the bill before us falls short of providing that safeguard by focusing on the "surface facility" on a repository site, instead of the buried highly radioactive waste itself.

The population language in H.R. 7187 states that a site will be disqualified from development as a repository if its "surface facility" is located adjacent to a square mile area of 1,000 persons or more. First, you must understand that a "surface facility" is the above-ground structure—a plywood shack will do—which sits atop a vertical ground shaft leading to the underground area where nuclear waste will be stored.

You must understand as well that no nuclear waste will be enclosed in that surface facility, that shack from which this bill professes to protect the public. Nuclear waste, however, will be stored in horizontal tunnels extending out from that vertical shaft—underground tunnels that will extend laterally in all directions.

As a result, radioactive material could end up, not 1 or 2 miles away from a populated area, but directly underneath the residents of a city.

Clearly this is not Congress legislative intent, and I am offering my amendment to clarify that the final resting place of these contaminated materials—not a benign surface facility—is the focus of concern.

The Senate companion to the legislation we are considering today, S. 1662, which was approved earlier, contains no population density standard, leaving DOE to decide questions of safety. I urge you not to leave this decision to others.

Since the development of nuclear power during World War II, population has been the primary consideration in deciding where to locate atomic facilities. In fact, the Nuclear Regulatory Commission has declined to license several powerplants because of their proximity to populated areas. Now, when we come to the question of where to discard our highly radioactive nuclear wastes, are we going to abandon 40 years of prudent practice and say that population does not count?

Within the past year, the Office of Technology Assessment released a widely respected study which concluded that the most difficult aspect of the whole repository program is the fact that the public has lost confidence in the Federal Government's ability to effectively manage the nuclear waste disposal program. What do you think will be the effect on this matter of public confidence if the population question is ignored in this legislation?

The vote before you is on the question of protecting the rights of citizens in all communities and cities as an integral part of setting national policy for nuclear waste disposal.

Under this legislation, five candidate sites will be recommended to the President by DOE in 1984 for selection as a repository.

If you have not already had the opportunity to do so, I strongly urge you to study the maps which are available off the floor which show the locations where nuclear waste may one day be buried.

If your communities are not now targeted, you may be next. You will be prudent to vote cautiously on this basic safety standard for protecting the public.

Members might say that this does not affect them, but I urge them to take a look at that map showing different geological formations. I think they will see that probably as many as 30 of the States could have an area that could be touched, and some of these formations are in the Northeast, running into Pennsylvania and New York and the Midwest; some of them are out West, and some of them are in the South.

All I am saying here is that we should pay attention to population density, and we should say clearly what the general area and the population level is that should be considered. This is not a regional question.

Mr. MORRISON. Mr. Chairman, will the gentleman yield?

Mr. LOTT. I would be glad to yield to the gentleman from Washington.

Mr. MORRISON. Mr. Chairman, I thank the gentleman for yielding. This amendment does represent a population density compromise, and my district has a direct interest in this matter. I find the amendment satisfactory to us in the West.

Mr. LOTT. I appreciate the gentleman's comment.

Mr. MARRIOTT. Mr. Chairman, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Utah.

Mr. MARRIOTT. Mr. Chairman, I wish I could share that enthusiasm for the amendment, but apparently there are about five States now being considered for these repositories.

The CHAIRMAN pro tempore. The time of the gentleman from Mississippi has expired.

(At the request of Mr. MARRIOTT and by unanimous consent, Mr. LOTT was allowed to proceed for 2 additional minutes.)

Mr. MARRIOTT. What this amendment does is really exclude Mississippi from being one of the plans, does it not?

Mr. LOTT. It does not. I am glad the gentleman raised that question, because even in my own congressional district it would only affect one of the two sites being considered. As a matter of fact, two of the top three in the Nation are in my district.

All I intend to say is where we have people in the immediate area, that factor should be a major consideration.

Mr. MARRIOTT. We do not want to increase the odds of having this in Utah by excluding Mississippi. I mean, that is what the bottom line is.

Mr. LOTT. I want to emphasize again that my State still will have one of the major sites.

Mr. MARRIOTT. We would like all sites to be looked at equally. In the guidelines, does it now require the Secretary to look at the population issue? If that is already in there, then I am wondering exactly what purpose this amendment serves.

□ 1600

Mr. LOTT. What guidelines is the gentleman referring to, the existing guidelines?

Mr. MARRIOTT. No.

Mr. LOTT. We do not know what those will be.

Mr. MARRIOTT. In the bill we established guidelines the Secretary must adhere to in selecting a repository. One of those was a proximity to national parks, one was population density, and one was the effect on water.

I just put the amendment in now that dealt with transportation agencies. Now, if that is in the bill, then it looks to me like what the gentleman is doing is going beyond that now and excluding a certain region of the country.

Mr. LOTT. Mr. Chairman, if the gentleman will allow me to make this comment, there will be efforts, I presume, later to knock even that reference out. There are those Members here who are going to be saying that we should give more consideration to maintaining pristine areas then to the consideration of human beings in making these determinations.

So I want to reemphasize that there are areas all over the country that may be affected by this population question, maybe not this year or next year, but they do exist as possible sites in the future. It is not a question that would affect population in just the East or the Midwest, but it would also affect the West.

Mr. MARRIOTT. Does this amendment, then, exclude specifically an area in Mississippi?

Mr. LOTT. It would have the effect of excluding one, but not both of the ones that are now under consideration.

Mr. MARRIOTT. Mr. Chairman, I thank the gentleman.

Mr. LOTT. Mr. Chairman, I urge a favorable vote on this amendment.

Mr. JOHN L. BURTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have listened to the debate here for some time, and I believe everybody has a theory about nuclear waste, that it ought to be stored here or there but not in their own backyards, and I can appreciate that.

I think in the spirit of compromise maybe the chairman of the committee should offer an amendment that says we do not produce any more nuclear waste, and then we would not have this problem.

I wonder if the distinguished Republican whip would support that type of approach?

Mr. LOTT. Mr. Chairman, will the gentleman yield?

Mr. JOHN L. BURTON. I am happy to yield to my good friend, the Republican whip.

Mr. LOTT. Mr. Chairman, I do not think I would support that approach. I have confidence that all the various committees that have worked on this legislation and the House will be able to come up with a finished product that will help us deal with the materials involved and still allow us to have the benefit of nuclear power.

Mr. JOHN L. BURTON. As long as it is not in Mississippi?

Mr. LOTT. I want to reemphasize that there is still at least one site in Mississippi that would be qualified under my amendment, and there could be others.

Mr. JOHN L. BURTON. Is that in SONNY MONTGOMERY's district?

Mr. LOTT. No.

Mr. UDALL. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I have great admiration for the gentleman from Mississippi (Mr. LOTT). He is one of the outstanding Members of this House. He fights very hard for his people and his district, and I suspect that most of us, given his situation, would be doing what he is doing here today.

But one of the most depressing things in public life is to find paralysis, to find that you cannot make a decision because you have paralysis. We are going to be tested on this amendment and a half a dozen more like it before we are through here, where we have a little old amendment that says this in effect: They usually do not come right out and say it, but they say in effect, "you can't put this in my district or in my State."

We already have guidelines in the bill. We came out of the committee with a bill with a number of guidelines, and I think it is fair and I think it is right, when the Secretary of Energy is trying to decide where this thing goes and make recommendations to us, that we mandate that you consider transportation, that we mandate that you consider population, and we do not put this in Central Park in New York City, other things being equal.

We are now going beyond that. In the bill we have all kinds of guidelines, and my friend, the gentleman from Mississippi, is talking about population areas, and so on. His amendment would transfer what are sensible guidelines, which we have accepted in the mandat i results, and I do not think we should take that step.

It was kind of interesting to me when we were at the committee stage and in the Rules Committee that the gentleman from Mississippi came in and said that he wants an amendment saying we cannot have these repositories where there are a lot of people, and within a very few days the folks in Utah were upon us—not the gentleman from Utah who is on our committee and has been a statesman and very fairminded in voting on this. People were coming in, some of them, and saying, "well, you can't have Mississippi because there are too many people in Congressman LOTT's district," and they were saying, "you can't have it in Utah because there aren't any people." They were proposing to put it out near the Canyonlands National Park. That is a desolate beautiful place, and you do not mess up a beautiful desolate place with some kind of nuclear repository.

So the answer is to reject amendments of this kind to have guidelines. We will have the final say here in the Congress when we come back with the suggested way to handle this, and that is the way to do it. But we are going to open the door if we pass this amendment. We are going to open the door and will consistently have to support a lot of other amendments that will have the net result of canceling out every one of the potential sites.

I remember an old story of my father's that he told about the guy going into a restaurant to eat. He hung up his coat and began to dine, and he saw a thief come in and pick up his coat and put it on and go out the door. He chased him down the street. He would not stop, and he enlisted a cop or policeman, and the policeman, after the fellow with the coat would not stop, raised his gun to fire, and the owner of the coat yelled, "shoot him in the pants."

Well, let me tell you something. We cannot do that as national policy. We cannot sit here in this consideration and, one by one, exclude the sites where this thing ought to go. We want fair consideration. We provided a strong State veto. We have set it up so the final decision would be made by the Congress, and before any studies are made, before any conclusions are drawn, and before any of the myriad protections are set up here, it is wrong for us in this debate now to rule out one of the prime sites, even though it happens to be in the district of my good friend, the gentleman from Mississippi (Mr. LOTT). As I say, I suspect I would be doing the same thing if it were in my district.

This amendment really ought to be defeated. It is a test of whether we are going to have a workable bill or not. If we are going to have a repository, believe me, it will be in one of the 50 States. It will be in one of the 50 States, and we would be excluded a great State, one of the 50 States, or at least most of it, that part that is in the gentleman's district, if we adopt this amendment.

Mr. LOTT. Mr. Chairman, will the gentleman yield?

Mr. UDALL. I yield to the gentleman from Mississippi.

Mr. LOTT. Mr. Chairman, will the gentleman acknowledge that there is still one site that is not excluded in my own State by this language?

Mr. UDALL. The gentleman is correct. I wonder if the gentleman from Mississippi, Mr. MONTGOMERY or some other Member would claim parentage of that other site.

Mr. LOTT. No, it is in my district too.

Mr. UDALL. Why should we pick out one of two sites? Why should the Congress decide now that this one is no good and the other one might be considered?

Mr. LOTT. Because of the population, because of the people that are located on top of this particular area. And is it not a fact, I ask the committee chairman, that exemptions have already been given to such things as territories and possessions, which would exclude the Pacific Trust Territories; to ocean disposal, which would exclude the Atlantic and Pacific coastal areas; and defense waste repositories, which would exclude some States that already may have defense wastes? Is there not, as a matter of fact, even broader population density language that would exclude Cleveland, Ohio, and New York City?

Is it not a fact, then, that in this bill there are already several similar exemptions that have been established?

Mr. UDALL. If there are several, I hope the gentleman will help me get them out of there. There are a lot of guidelines, and the difference in this proposal from that of the gentleman from Utah, Mr. MARRIOTT, is that it says we must consider and in any report we must talk about transportation and weigh that.

Mr. LOTT. I have a list of 20 specific exemptions that I would be glad to present to the gentleman so he could go over them. I just mentioned five or six.

Let me say to the committee chairman that I understand his position. He has done a great job with a tough bill that has been evolving over several years, but I am just trying to emphasize that population density should be considered.

The CHAIRMAN. The time of the gentleman from Arizona (Mr. UDALL) has expired.

(By unanimous consent, Mr. UDALL was allowed to proceed for 2 additional minutes.)

Mr. UDALL. Mr. Chairman, I do not have any prejudgment on this, but I am told by the experts that the site the gentleman excludes is one of the choice sites, that it is one of the very likely sites. If we had to pick out seven, if we got a bunch of scientists to say, "give us seven sites," it would be considered clearly that this is one of the seven that would be picked.

Mr. MARRIOTT. Mr. Chairman, will the gentleman yield?

Mr. UDALL. I yield to the gentleman from Utah.

Mr. MARRIOTT. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I do have great regard for the gentleman from Mississippi, the minority whip, but I would like to indicate this: That we have been led to believe by Dr. Kaufman and others in the last several months that every site will be evaluated fairly and evenly, that there is no hanky-panky going on, that no deals have been cut underneath the table, and that every site will be looked upon and we will then evaluate them based upon the criteria.

I would think, since we now have this bill—and the committee chairman will correct me if I am wrong—that the concerns of the gentleman from Mississippi have been addressed. They will look at population density among other things, and I would think that is the only way to come out with a bill.

Mr. UDALL. Mr. Chairman, the gentleman is correct, and he has shown real statesmanship on this because one of the choice sites is in Utah.

I want to make a commitment to the gentleman from Mississippi (Mr. LOTT) that I made in Salt Lake City to the gentleman's Governor and others there, that if the choice should come down to Utah as one of the sites or if the choice should come down to Mississippi and I am still around and have anything to do with it, there are going to be hearings on the ground by congressional committees. I think we owe that to the people in Utah and in Mississippi, to go down and take a look and see if they have a real case for prohibiting that site from construction or from serious consideration.

□ 1610

Mr. KINDNESS. Mr. Chairman, will the gentleman yield?

Mr. UDALL. I yield to the gentleman from Ohio.

Mr. KINDNESS. I thank the gentleman for yielding.

The statement has been made two or three times here that among the guidelines is one which provides for the consideration of population. Would someone elucidate on just how population is to be considered? Do the guidelines specify the manner in which it is to be considered?

Mr. UDALL. We have several pages of guidelines and suggestions and that is what they are.

I think what we are saying with population is that, other things being equal, you put it in a lightly populated area. That is what it means to me.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield so I may quote the language?

Mr. UDALL. I yield to the gentleman from New York.

The CHAIRMAN. The time of the gentleman from Arizona (Mr. UDALL) has expired.

(At the request of Mr. OTTINGER and by unanimous consent Mr. UDALL was allowed to proceed for 2 additional minutes.)

Mr. OTTINGER. The bill, on page 16, line 24, after specifying the Secretary's ability to set guidelines for consideration in selecting a site says:

Such guidelines shall specify population factors that will disqualify any site from development as a repository if any surface facility of such repository would be located (1) in a highly populated area; or (2) adjacent to an area one mile by one mile having a population of not less than 1,000 individuals.

Mr. UDALL. Bear in mind that this will come back to Congress. We are not deciding this today. We are saying get some site characterization done and eventually the President and the Department of Energy will say to the Congress, "We pick this one here."

Mr. KINDNESS. Will the gentleman yield further on that point?

Mr. UDALL. I yield to the gentleman.

Mr. KINDNESS. On the point about population the consideration seems to be only with respect to the surface, not where the nuclear waste is stored or located.

Mr. UDALL. The gentleman makes a very good point. What this thing will look like when we get through is you are going to have a very large underground cavern. It may go a mile or two. You go down 4,000 or 5,000 feet, then you go out into the underground a good distance. On top you have a few buildings where they process this stuff, and they have the machinery to operate the mine shaft and all of the rest. But this is not going to be some huge facility. It is probably going to occupy a few dozen acres at best.

Mr. KINDNESS. If it conforms to that prescription then what would be the objection to this amendment? I do not understand.

Mr. UDALL. I cannot see it myself. But I have never met a State Governor or been to a State where the State Governor has any enthusiasm about going into the dark for the next 250,000 years. I am joking.

The CHAIRMAN. The time of the gentleman from Arizona (Mr. UDALL) has again expired.

(At the request of Ms. OAKAR and by unanimous consent Mr. UDALL was allowed to proceed for 2 additional minutes.)

Mr. UDALL. Nobody is enthused about that. But one of our colleagues I saw here a little earlier said his State and his district would be glad to have it. But I got a quick message from the Senator from that State very shortly thereafter that not all of the people

were in favor of having it in their State.

I frankly do not think it is going to be as bad as people think. One can go out in almost any one of our States where it has been suggested and find grave concern. I suppose the politicians reflect it. I suppose I would, too, in that situation.

Mr. KINDNESS. If the gentleman will yield further, if the guideline with respect to surface structures is appropriate, then what is wrong with this amendment? I have completely lost track.

Mr. UDALL. The thing that is wrong with the amendment is that there are five, six, or seven prime sites. In all likelihood if I wrote a list on the back of an envelope of seven places, it is probably going to be in one of those seven places, and what is wrong with this amendment is that it cuts it down to six.

You are simply saying, without any information, any study, that we are going to eliminate this because he is a nice guy, he comes from a nice State, and we are going to eliminate one of the prime areas.

Mr. KINDNESS. The gentleman is surely suggesting, because the guidelines already indicate for surface structures that you want to avoid such population.

Mr. UDALL. These are guidelines and they are not mandatory. They say, all other things being equal, let us take the low population place and not the high population place.

Mr. KINDNESS. Now I understand.

Ms. OAKAR. Mr. Chairman, will the gentleman yield?

Mr. UDALL. I yield to the gentlewoman from Ohio.

Ms. OAKAR. I want the gentleman to know that I certaintly respect him and I believe him, but I have never believed the Department of Energy. I think that is the problem that I have with the situation.

For some time in the previous administration and in this administration they have tried to do nuclear testing in the city of Cleveland, right below downtown Cleveland, with the view of burying that nuclear waste underneath the most densely populated area in Ohio. That is why I am reluctant.

If the gentleman were the head of the Department of Energy I would believe it. But I know all of the tricks and the games that they have tried to pull.

Mr. UDALL. Let me say to my friend from Ohio, trust me.

Ms. OAKAR. I do trust you. That is the problem.

Mr. UDALL. This thing will have to come back to the Congress or there will not be a repository anywhere. In about 1985, or 1986, when this whole study is completed, they will say this is the place and they will bring it back to the Congress and we have to make the final decision.

Ms. OAKAR. If I could just add one more thing. This administration is so pro nuclear in its attitude instead of alternative sources of energy that we have more and more wastes and I understand obviously the problem. I just do not trust that they will not plant it in densely populated areas.

The CHAIRMAN. The time of the gentleman from Arizona (Mr. UDALL) has again expired.

(By unanimous consent Mr. UDALL was allowed to proceed for 2 additional minutes.)

Mrs. BYRON. Mr. Chairman, will the gentleman yield?

Mr. UDALL. I yield to the gentlewoman from Maryland.

Mrs. BYRON. I rise in agreement with the gentleman from Arizona.

What I would like to say to the gentleman from Mississippi is that if the issues he has brought forward today are valid ones then the Select Committee that is going to make that decision between the seven sites will take that into consideration. I think the gentleman has little faith in that committee.

I have to agree with our chairman.

Mr. SANTINI. Mr. Chairman, will the gentleman yield?

Mr. UDALL. I yield to the gentleman from Nevada.

Mr. SANTINI. The chairman, as usual, is overwhelming in his logic and persuasion, and I am leaning very strongly to go with my chairman on this issue.

However, if my good friend, the imaginative author of this amendment, the gentleman from Mississippi (Mr. LOTT), would consider by unanimous consent some minor language modifications of his amendment perhaps I could be persuaded to join him in support.

Mr. UDALL. Would those modifications include the exclusion of sites in Nevada?

Mr. SANTINI. No, no, much more objective than that, Mr. Chairman. Any site located within a radius of 112 miles of a major tourism, travel, recreation center in the United States of America that is visited by over 1 million people on an annual basis.

I can see by the gentleman's acquiescence that unanimous consent is agreed to, and I thank him very much.

Mr. LOTT. If the gentleman would yield, may I respond to that?

Mr. UDALL. I yield to the gentleman from Mississippi.

Mr. LOTT. As the Representative of that beautiful tourist area of Biloxi, Miss., I think we might well qualify under that criteria.

Mr. SANTINI. I hope the gentleman does, and I know we do.

Has unanimous consent been agreed to, Mr. Chairman?

Mr. UDALL. I object.

The CHAIRMAN. Objection is heard.

Mr. MONTGOMERY. Mr. Chairman, will the gentleman yield?

Mr. UDALL. I yield to my friend from Mississippi.

Mr. MONTGOMERY. I will be very brief with the gentleman in the well.

As I understand the amendment, it says the nuclear waste site cannot be put within a mile of where 1,000 individuals live. That does not seem too unreasonable to this gentleman.

What are we going to do with the 1,000 people? Do they move out, do they stay there, or what?

Mr. UDALL. No; I think there is a misconception my friend has about what we are talking about. There will be a shaft which is 10, 15 feet wide, and they will drill down like they do for a mine and have some equipment to bring things up at the bottom of the shaft.

The CHAIRMAN. The time of the gentleman from Arizona (Mr. UDALL) has again expired.

(At the request of Mr. MONTGOMERY and by unanimous consent, Mr. UDALL was allowed to proceed for 1 additional minute.)

Mr. UDALL. They will have a couple of buildings to process this stuff and to house the personnel that are concerned with it. We are not talking about a big military base or hundreds of buildings. It is a relatively small operation.

I think we can and we ought to go along with it.

Mr. MONTGOMERY. You will not move the people out? It will go underground and people will live on top of this nuclear waste.

Mr. UDALL. During construction there will be some of this but no one is going down permanently underneath the ground.

We hope these will be permanent things. They will put the wastes in there and they will backfill it and they will store it and they will block it up and it is going to be there forever, 5,000 feet underground. It is not going to bother anybody on the top of the ground.

Mr. MONTGOMERY. I rise in support of the Lott amendment and even though this is not in my district I certainly would not want these people to get hurt or feel uncomfortable even though the site under consideration is not in my district.

I thank the gentleman.

Mr. SANTINI. Will the gentleman yield again?

Mr. UDALL. Would the gentleman like the shaft I am talking about in his district?

Mr. SANTINI. I was concerned with precisely where that shaft was going, Mr. Chairman.

Mr. UDALL. I urge the defeat of the amendment.

Mr. OTTINGER. Mr. Chairman, I move to strike the requisite number of words and rise in opposition to the amendment.

There is very little I can add to the fine words of my friend from Arizona as augmented very ably by my colleague on our committee from Nevada, Mr. SANTINI, who is on both committees.

□ 1620

The fact is that there is a real difference in the language of the bill as it presently stands and the language of the amendment. The language of the amendment would have the effect of absolutely excluding the site of Richton, Miss., the only site in the country that would be excluded. I think that kind of a provision—which would be requested for each area that was under consideration—is a tremendous mistake. I think that language specifying 1 mile from a population of 1,000 individuals is arbitrary. It was originally included because of the tremendous power and prestige and influence of the gentleman from Mississippi. I do not think it belongs in the bill. I think we ought to have a general population criteria, then have the Secretary come back with a specific standard. I understand the gentleman from Colorado (Mr. WIRTH) will offer such an amendment. It seems to me that that is the correct way to go. That would leave all of the areas of the country at equal jeopardy, with an objective look-see at which are the best sites and then take a look at the particular objections of an individual State when one site is tentatively selected and is going to be characterized.

Mr. LOTT. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield to the gentleman from Mississippi.

Mr. LOTT. I take it that the gentleman does think that population density is a factor that should have major consideration in deciding where a repository should go.

Mr. OTTINGER. Absolutely. It ought to be a very important consideration.

Mr. LOTT. And the gentleman does acknowledge that the two words "surface facility" significantly alter the population density language now included in the bill?

Mr. OTTINGER. It does indeed.

I understand it was intended to take care of the situation which the gentleman is now trying to address. It does not. That is why I would like to see that language out of there altogether. The language as it presently exists would not exclude the gentleman's site, which is why he is offering the amendment. If we took this 1 mile by 1 mile area and population of not less than 1,000 individuals out altogether, then we would have the most objective look at it. And that is what I would support at the appropriate time.

Mr. LOTT. I know the gentleman cannot see this map, but I think he will understand the question. The gentleman would acknowledge that, even with this language that I proposed, it is possible that a repository site could actually still be put in the so-called Richton dome which is beyond the 1-mile radius of where you have 1,000 people. Would the gentleman acknowledge that?

Mr. OTTINGER. No; my information is that the language that the gentleman now has included would effectively preclude the Richton site. But I do not think that whether it is effective or whether it is not effective in achieving that result really ought to be governing. The fact is that we ought not to be setting these parameters in the legislation in such a way as to exclude important sites. There is that chance, and I think we are best off not having that provision in the bill.

Mr. MARKEY. Mr. Chairman, I rise in opposition to the amendment.

Briefly, Mr. Chairman, we have twin obstacles that we are trying to overcome in putting together a permanent repository that will bury as deeply and as long as is possible the nuclear waste that we are generating in this country.

We have, on the one hand, the problem of special interests, that is, people who are interested in finding a temporary solution to the problem. These special interests include the utilities who have a problem with referenda passing in State after State around this country and who would like to see some kind of bill passed that just gets this stuff off their facilities and into interim facilities. We will then let future generations worry about it.

We have got the other problem of parochialism, that is, people who do not want it buried in their State at all. And this amendment is very much indicative of that problem.

For those who are very interested in seeing a permanent waste repository, neither of those obstacles ought to be allowed to get in the way of a good, solid bill. This is the objective of all people who have looked at this problem over the past years.

So you might get people who are going to get up and say, "Well, we do not want a repository here because it affects a lot of people."

Or you might get people, like the gentleman from Mississippi, who say, "Do not put it in my district because it affects the people of LOTT."

But in either situation you are going to wind up with somebody who is trying to protect a very, very narrow interest, because this is a very politically volatile issue. It is why you want to have a good strong States' right protection. But building in those protections is what is critical to insuring that when you reach issues of population density, issues of environmental protection, and issues of public health and safety, that there is a good remedy which is available to States to insure that they have had a complete vindication of all of the issues to which they are concerned.

I think in this instance that it makes no sense for us to allow a site specific amendment to be included in this legislation, because it would set a precedent which would, like dominoes, allow legislator after legislator to get up here and to exempt through very narrow wording of an amendment all of the potential sites in this country. I think it would set a bad precedent, and I hope that the amendment is defeated.

Mr. CHAIRMAN. The question is on the amendment offered by the gentleman from Mississippi (Mr. LOTT).

The question was taken; and the chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. LOTT. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 81, noes 296, not voting 56, as follows:

[Roll No. 395]

□ 1640

Mr. ROSTENKOWSKI changed his vote from "aye" to "no."

Mr. DAUB changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. BROYHILL

Mr. BROYHILL. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Chair will inquire, is the amendment in order under the rule?

Mr. BROYHILL. Yes, Mr. Chairman. It has been printed.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. BROYHILL: Page 35, beginning on line 19, strike out section 115 in its entirety and insert in lieu thereof the following:

REVIEW OF REPOSITORY SITE SELECTION

SEC. 115. (a) IN GENERAL.—The designation of a site as suitable for application for a construction authorization for a repository shall be effective at the end of the 60-day period beginning on the date that the President recommends such site to the Congress under section 114, unless the Governor of the State in which such site is located, or the governing body of an Indian tribe on whose reservation such site is located, as the case may be, submits to the Congress a notice of disapproval under section 116 or 118. If any such notice of disapproval is submitted, the designation of such site shall not be effective except as provided under subsection (b).

(b) CONGRESSIONAL REVIEW OF SITES.—If any notice of disapproval of a repository site designation is submitted to the Congress under section 116 or 118 after a recommendation for approval of such site is made by the President under section 114, the designation of such site as suitable for license application as a repository shall be effective upon the expiration of the first period of 90 calendar days of continuous session of the Congress following the date of the receipt by the Congress of such notice of disapproval unless, during such period, either House of the Congress passes a resolution in accordance with this subsection disapproving such site designation.

(c) DEFINITION.—For purposes of this subsection, the term "resolution under this section" means a resolution of either House of the Congress, the matter after the resolving clause of which is as follows: "That the ——— hereby approves the notice of disapproval submitted by ——— regarding the disapproval of the site at ——— for a repository for the disposal of high-level radioactive waste and spent nuclear fuel.". The first blank space in such resolution shall be filled with the designation of the appropriate House of the Congress; the second blank space in such resolution shall be filled with the designation of the State Governor or Indian tribe governing body submitting the notice of disapproval involved; and the last blank space in such resolution shall be filled with the geographic location of the proposed repository site involved.

(d) PROCEDURES APPLICABLE TO THE SENATE.—(1) The provisions of this subsection are enacted by the Congress—

(A) as an exercise of the rulemaking power of the Senate, and as such they are deemed a part of the rules of the Senate, but applicable only with respect to the procedure to be followed in the Senate in the case of resolutions under this section, and such provisions supersede other rules of the Senate only to the extent that they are inconsistent with such other rules; and

(B) with full recognition of the constitutional right of the Senate to change the rules (so far as relating to the procedure of the Senate) at any time, in the same manner and to the same extent as in the case of any other rule of the Senate.

(2)(A) Not later than the first day of session following the day on which any notice of disapproval of a repository site selection is submitted to the Congress under section 116 or 118, a resolution under this section shall be introduced (by request) in the Senate by the chairman of the committee to which such notice of disapproval is referred, or by a Member or Members of the Senate designated by such chairman.

(B) Upon introduction, a resolution under this section shall be referred to the appropriate committee or committees of the Senate by the President of the Senate, and all such resolutions with respect to the same repository site shall be referred to the same committee or committees. Upon the expiration of 60 calendar days of continuous session after the introduction of the first resolution under this section with respect to any site, each committee to which such resolution was referred shall make its recommendations to the Senate.

(3) If any committee to which is referred a resolution introduced under paragraph (2)(A), or, in the absence of such a resolution, any other resolution under this section introduced with respect to the site involved, has not reported such resolution at the end of 45 days of continous session of Congress after introduction of such resolution, such committee shall be deemed to be discharged from further consideration of such resolution, and such resolution shall be placed on the appropriate calendar of the Senate.

(4)(A) When each committee to which a resolution under this section has been referred has reported, or has been deemed to be discharged from further consideration of, a resolution described in paragraph (3), it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) for any Member of the Senate to move to proceed to the consideration of such resolution. Such motion shall be highly privileged and shall not be debatable. Such motion shall not be subject to amendment, to a motion to postpone, or to a motion to proceed to the consideration of other business. A motion to reconsider the vote by which such motion is agreed to or disagreed to shall not be in order. If a motion to proceed to the consideration of such resolution is agreed to, such resolution shall remain the unfinished business of the Senate until disposed of.

(B) Debate on a resolution under this section and on all debatable motions and appeals in connection with such resolution, shall be limited to not more than 10 hours, which shall be divided equally between Members favoring and Members opposing such resolution. A motion further to limit debate shall be in order and shall not be de-

batable. Such motion shall not be subject to amendment, to a motion to postpone, or to a motion to proceed to the consideration of other business, and a motion to recommit such resolution shall not be in order. A motion to reconsider the vote by which such resolution is agreed to or disagreed to shall not be in order.

(C) Immediately following the conclusion of the debate on a resolution under this section and a single quorum call at the conclusion of such debate if requested in accordance with the rules of the Senate, the vote on final approval of such resolution shall occur.

(D) Appeals from the decisions of the Chair relating to the application of the rules of the Senate to the procedure relating to a resolution under this section shall be decided without debate.

(e) PROCEDURES APPLICABLE TO THE HOUSE OF REPRESENTATIVES.—(1) The provisions of this section are enacted by the Congress—

(A) as an exercise of the rulemaking power of the House of Representatives, and as such they are deemed a part of the rules of the House, but applicable only with respect to the procedure to be followed in the House in the case of resolutions under this section and such provisions supersede other rules of the House only to the extent that they are inconsistent with such other rules; and

(B) with full recognition of the constitutional right of the House to change the rules (so far as relating to the procedure of the House) at any time, in the same manner and to the same extent as in the case of any other rule of the House.

(2) Resolutions of repository siting approval shall, upon introduction, be immediately referred by the Speaker of the House to the appropriate committee or committees of the House. Any such resolution received from the Senate shall be held at the Speaker's table.

(3) Upon the expiration of 45 days of continuous session after the introduction of the first resolution under this section with respect to any site, each committee to which such resolution was referred shall be discharged from further consideration of such resolution, and such resolution shall be referred to the appropriate calendar, unless such resolution or an identical resolution was previously reported by each committee to which it was referred.

(4) It shall be in order for the Speaker to recognize a Member favoring a resolution to call up a resolution under this section after it has been on the appropriate calendar for 5 legislative days, When any such resolution is called up, the House shall proceed to its immediate consideration and the Speaker shall recognize the Member calling up such resolution and a Member opposed to such resolution for 2 hours of debate in the House, to be equally divided and controlled by such Members. When such time has expired, the previous question shall be considered as ordered on the resolution without intervening motion. No amendment to any such resolution shall be in order, nor shall it be in order to move to reconsider the vote by which such resolution is agreed to or disagreed to.

(f) COMPUTATION OF DAYS.—For purposes of this section—

(1) continuity of session of Congress is broken only by an adjournment sine die; and

(2) the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of the 90-day period referred to in subsection (c) and the 45-day period referred to in subsections (d) and (e).

(g) INFORMATION PROVIDED TO CONGRESS.—In considering any notice of disapproval submitted to the Congress under section 116 or 118, the Congress may obtain any comments of the Commission with respect to such notice of disapproval. The provision of such comments by the Commission shall not be construed as binding the Commission with respect to any licensing or authorization action concerning the repository involved.

Page 30, line 17, strike out "and legislature".

Page 45, line 7, strike out "and legislature".

Mr. BROYHILL (during the reading). Mr. Chairman, I ask unanimous consent that the amendmant be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

Mr. OTTINGER. Reserving the right to object, Mr. Chairman, I shall not object, but I make this reservation to ascertain from the gentleman which one of the two rather long and similar amendments he is offering. One is a one-House sustained and the other is a two-House sustained.

Mr. BROYHILL. The one I called up was the one-House sustained. I hope that is the one that the Clerk read.

The CHAIRMAN. Is that on page 35?

Mr. BROYHILL. Yes.

The CHAIRMAN. That is the one-House.

Mr. OTTINGER. Mr. Chairman, I thank the gentleman, and I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

□ 1650

Mr. BROYHILL. Mr. Chairman, apparently much of the controversy that we have had over this bill up to this time, and this, of course, has come out in the debate today, is what role the Governor will have at the time that a final repository is selected.

We also discussed, an hour or so ago, an amendment offered by the gentleman from New Mexico (Mr. LUJAN) the role that the Governor would have in the placement of more than 300 tons of spent fuel on a temporary basis in a particular State.

My amendment provides for the so-called one-House sustain State veto. Let me explain to my colleagues why we are asking you to vote for this amendment and why we feel that it is imperative that this language go into the final bill that is approved by this House.

This bill provides for a very detailed road map that the Department of Energy and the President and the other agencies that are involved must follow in the selection of a final repository for spent nuclear fuel.

All through this bill there are ample environmental protections. The repository is subject to NEPA, an environmental impact statement is required and, of course, the DOE must, before they even set foot on a site, start that procedure.

Environmental assessments are all through this bill. Also, if my colleagues will consult the text of the bill, they will find that the Governors and Indian tribes are consulted all during the process and the procedure as it goes forward.

Now, the main sponsors of this bill, the gentleman from Arizona and others, have put a provision in here, though, that gives the Governor, after going through that entire process, an absolute veto over what had been done. In other words, we could spend several years, 7 or 8 years, up until 1987 or beyond, and several hundred million dollars, in making the selection and then have a Governor veto the project, overriding the decision of this Congress, overriding the decision that had been made by the President, on the advice and counsel of a major department and other agencies of the Government.

I think that is going too far. I do not think that is the way we ought to go.

My amendment calls for a one-House sustain; that is, if the Governor objects, and one House sustains that objection, then that objection shall stand.

It seems to me that that is a fair compromise between those who would say that a Governor could have absolute veto over these projects as opposed to those who might say, "Well, the Governor should have no say whatsoever in this decision once it is finally made."

I think that the Governors and the States should be consulted not just at the final end, but all during the process. That is why we have added amendments in this bill to assure Governors are consulted, the States are consulted, all during the procedure, all during the process.

But once that decision has been made as to where the final repository is to be, it seems to me that that decision should stand unless we find that one House of the Congress should go along with the Governor and vote to sustain that Governor's veto.

Mr. Chairman, I might point out as a matter of legislative history that this House, the full House, back in 1980, by a substantial vote, refused to allow a State to veto a President's final selection of a repository. This one-House sustain veto was contained in the 1980 bill that passed this House. It was also included in the Senate-passed bill this past year, and also in the Committee on Energy and Commerce reported bill as well as the Committee on Science and Technology reported bill.

The one-House sustain veto is fair, it is balanced. Clearly to me it is the middle ground between the extreme two-House override in the fill now, and no State veto at all.

Mr. Chairman, I would urge the adoption of this middle ground amendment.

Mr. CORCORAN. Mr. Chairman, will the gentleman yield?

Mr. BROYHILL. I would be glad to yield to the gentleman from Illinois.

The CHAIRMAN. The time of the gentleman from North Carolina (Mr. BROYHILL) has expired.

(On request of Mr. CORCORAN and by unanimous consent, Mr. BROYHILL was allowed to proceed for 1 additional minute.)

Mr. CORCORAN. I thank the gentleman for yielding to me.

Mr. Chairman, my question to the gentleman from North Carolina is in connection with the procedure that he has described here. Is he talking about the final repository or is he talking about the last-resort, interim, away-from-reactor storage program?

Mr. BROYHILL. We are talking about the final repository. This amendment has nothing to do with the temporary away-from-reactor storage facility. We have already passed that part in the bill, and the House voted not to go along with that, but we are talking now about an entirely different part of the bill. We are talking about the final repository that will be selected and should be selected under the terms of this bill by 1987.

Mr. CORCORAN. If the gentleman will yield further, in view of the fact that the gentleman is talking about Federal power and the preemption of that power with respect to the final repository, I would urge my colleagues to support the amendment.

Mr. BROYHILL. I thank the gentleman for his support.

Mr. FUQUA. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, the amendment offered by the gentleman from North Carolina and I helps make this a much more workable bill. We have spent considerable time in bringing forth from three committees, I think, a very, very good bill.

This is the one flaw that I find in this bill, even though two of the three committees involved opt for this type of language. However, in the final version that was meshed together as a result of the rule, this part was left as it came out of the Committee on the Interior, but what we are proposing, and the gentleman from North Carolina has outlined it very clearly, I think, is that there will be participation by the Governors of the several States, but instead of Congress putting itself with the States in a confrontational type atmosphere, one House would sustain the veto should a Governor so exercise that prerogative.

As the gentleman from North Carolina also pointed out, this is not new. On December 3, 1980, on rollcall 662, the House took a position rather overwhelmingly to support this position of the one-House sustained veto.

□ 1700

I think it makes it a very workable bill. It recognizes the rights of the States, and yet on the other hand does not put the Congress in a confrontational-type position. The House as well as the Senate on previous occasions has taken this position, and I think it would help make this a more workable bill, so that we could achieve a meaningful waste disposal that this bill envisions rather than having the two Houses having to override a veto of a governor.

I think it gives all the rights that we need. It has been done in the House. I think it is constitutional. Questions have been raised that it may or may not be constitutional. There is a separability clause in the bill, and I do not see that this item that has been not only used in previous Congresses, but I do not see this being a matter for making the entire bill unconstitutional.

So, I think all of the provisions have been met, as was mentioned by the previous speaker, such as environmental impact. All of the factors that must be considered, and the Governor has that right to make this objection, but we put the Congress acting in a positive rather than in a negative fashion in the sustained veto. So, I urge my colleagues to vote in favor of this amendment that was offered by the gentleman from North Carolina and which I have cosponsored with him.

Mr. MOORHEAD. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I rise in support of this compromise amendment to provide that one House of Congress must sustain a State veto of a repository site.

Between the position or requiring either two Houses to sustain or two Houses to override a State veto, there is a clear and compelling compromise provision that would require only one House of Congress to sustain such veto. This is the middle ground found irresistable by the House in 1980, the Senate in 1982, and by both the Energy and Commerce Committee and the Science and Technology Committee during their consideration of this legislation this session.

It is my understanding that the only reason a one-House sustain provision was not included in H.R. 3809 was because of concern about the constitutionality of a one-House legislative veto. Clearly such concern is unfounded.

We are not dealing with what has been traditionally called a legislative veto in our amendment. We are not requesting that one House of Congress be allowed to veto an action of the executive branch of the Federal Government.

We are only providing that Congress can exert some influence on a State veto of a Federal project. We give the State the opportunity to have its veto sustained by either House of Congress. It is this Federal legislation which grants the State the right to a veto in the first place—and I submit that there is absolutely no constitutional problem whatsoever in requiring that such State veto be sustained by one House of Congress prior to it becoming effective. For over 150 years, the courts have permitted Congress broad discretion to effectuate the powers delegated to it under the necessary and proper clause (article I, sec. 8, cl. 18) of the Constitution. H.R. 3809 clearly provides that the Federal Government has the responsibility to provide for the permanent disposal of nuclear waste—it provides that this is a national problem demanding a national solution. There is, of course, no constitutional requirement that a single State have any veto whatsoever over Congress solution to this national problem—and there is certainly no constitutional requirement that Congress cannot limit such a State veto by requiring one House to sustain that veto before it becomes effective.

Nuclear power issues have always been under the province of the Federal Government because of the valid concerns about the national welfare and public health and safety. Just because Congress has seen fit in this legislation to grant to the States a strong role in the approval of a nuclear waste repository site does not mean that the Federal Government can only override that role by passing new legislation. This is what H.R. 3809 currently requires.

The proper balance of State and Federal power on such a critical issue should be as follows:

Yes—allow the States to disapprove of a repository site in their territory—but simply require that one House of

Congress must sustain that veto before it takes effect.

Make no mistake, I have been a strong advocate of the States' role in the selection of a nuclear waste repository site. H.R. 3809 contains extensive opportunities for the States to participate in the siting process through a strong Federal-State agreement covering virtually every aspect of the repository siting and development that might affect the health and safety of the States' residents, or that might affect the environment of the State. Our bill provides for total compensation for any costs incurred by the States during this participation in this process. From beginning to end, the State has been made a close partner with the Federal agencies responsible for this project.

All we seek through this amendment is the opportunity to restore balance to this partnership. I urge you to vote yes on this amendment requiring one House of Congress to sustain a State if it chooses to veto this desperately needed Federal project.

Mr. OTTINGER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, it may strike many as being ironic that the gentleman from North Carolina (Mr. BROYHILL), the gentleman from Florida (Mr. FUQUA), and the gentleman from California (Mr. MOORHEAD) are arguing against States rights, and here I am arguing for them. But, this is about as drastic a thing as one can do to a State. Members saw how drastic it is. We just went through an hour's debate on whether we ought to exclude a particular site in Mississippi from having this repository. The State of Louisiana went so far as to get a commitment from the previous administration that a repository would not be put in the State of Louisiana. There are strong feelings and fears about putting a repository in any particular State.

What we are talking about in this amendment is how effective protection we will give, and to require full congressional deliberation of a State's objections. Under the amendment offered by the gentleman from North Carolina, the State would have to actively pursue support in the two Houses, because if neither House did anything, the objection would never be effective.

I think that the States deserve better protection than that. Further there is a very serious constitutional problem with the "one House sustain" formula that the gentleman from North Carolina puts forward. In a District of Columbia Court of Appeals decision on January 29 of this year, in the case of Consumer Energy Council of America et al. against the Federal Energy Regulatory Commission, the Court ruled that a one-House congressional veto is unconstitutional, now quoting from the opinion:

> Both by preventing the President from exercising his veto power and by permitting legislative action by only one House of the Congress.

The formula provided in the bill provides for consideration by both Houses of Congress and signature by the President, so it clearly is constitutional.

The gentleman from Florida, who is my good chairman, and I love him very deeply, says yes, but there is a separability clause. But, the separability clause here causes untold damage because if this provision is found to be unconstitutional, then the State will have no protection whatsoever, and the Secretary of Energy would not have to pay attention to the State whatsoever.

□ 1710

With an action that is this drastic and of this much concern to the people of the State, certainly the State ought to have a voice.

I tried in committee to get an agreement from the minority on a provision that says if this provision is deemed unconstitutional by the Supreme Court, then the two-House veto provision would take effect. I said then I agreed to the Broyhill language under those conditions. There was no willingness to agree.

For effective protection of our States against these drastic actions, to at least have the full Congress and the President of the United States consider the States' objections, you should vote against this amendment.

Mr. SWIFT. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield to the gentleman from Washington.

Mr. SWIFT. It is true, is it not, that this House voted just a few minutes ago on a one-House veto for AFR?

Mr. OTTINGER. Against a one-House veto.

Mr. SWIFT. To retain its two-House veto for AFR?

Mr. OTTINGER. That is correct.

Mr. SWIFT. If we were to pass this amendment we would then have an outrageous inconsistency. We will have had the more strict two-House veto for the AFR but only a one-House veto for the final repository site and have given the more stringent State veto for, if you will, the lesser problem than for the final one where we are going to be living with it for thousands of years and we would have for that but a one-House veto if in fact the House does not vote consistently as it did before and vote down the one-House veto, vote down this amendment. Is that correct?

Mr. OTTINGER. The gentleman is absolutely correct. It would be an ironic situation to have the more stringent review for temporary storage and have no effective State protection with respect to a permanent repository that is going to store high level wastes for hundreds of thousands of years.

Mr. BROYHILL. Will the gentleman yield on that point?

Mr. OTTINGER. Surely.

Mr. BROYHILL. I do not want to take much of the gentleman's time. But I certainly can understand why people would have some concern about the presence of temporary storage of nuclear spent fuel materials in their State. But we are talking about something entirely different. We are talking about a selection of a permanent repository which everybody wants and wants to expedite.

Mr. OTTINGER. I have the greatest respect for the gentleman from North Carolina and would like to say the compromise that is before us is due largely to his flexibility and statesmanship. But I think this is one area on which we could not agree. I just do not think adequate protection is provided under the formula which he advances.

Mrs. BOUQUARD. Mr. Chairman, I move to strike the requisite number of words and rise in support of the amendment.

I think it is important we realize in the last session of Congress that both the other body and the House passed comprehensive nuclear waste legislation which contained the requirement that a State objection can be sustained by a majority vote of one House of Congress.

It is also relevant that the other body has recently passed such legislation as well.

Referring to the one-House provision and its constitutionality, I think it is worthwhile to point out that a one-House concurrence with the State should be constitutionally permissible because we are not dealing with decisions on individual rights. We are talking about a regulation proposed to be promulgated pursuant to an Act of Congress. We are dealing with a proposal to locate a Federal facility at a particular site.

If the Congress can give the final decision to the State under the current provision then constitutionally it is consistent for Congress to be permitted to retain part of the override authority.

If a two-House override is required by the Constitution, then the Congress cannot give away more authority than it has by allowing a State to override the President.

The only permissible State veto would then be one where both Houses must agree with the State in order for the veto to become effective.

I ask that we do support this amendment and yield back the balance of my time.

Mr. SANTINI. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

I ask my colleagues to consider and weigh carefully the formula that is being offered by the gentleman from North Carolina (Mr. BROYHILL) and the formula that is contained in the bill as it was sent to this House by the Rules Committee.

The Department of Energy, the President of the United States makes a decision about the permanent repository. The Department of Energy and the President select State X. State X objects.

Question: What happens under the bill as it is being considered by this committee at this time; what happens under the proposed amendment?

Under the bill as sent to us by the Rules Committee there is a 90-day timeframe. Within that 90-day time frame the objection would stand unless the House and the other body overrode that objection.

What in essence this creates is an affirmative burden of proof and persuasion in the Department of Energy to come to the committees of jurisdiction and say here is the reason and basis that we selected State X. Within 90 days then to have the House and the other body support that position of the Department of Energy and the President of the United States.

Conversely, under the amendment offered by the gentleman from North Carolina, the State veto or objections would be tubed unless one House of the U.S. Congress supported State X.

I plead and appeal to you as individual Members with sensitivity within your own districts and within your own congressional concerns, understand in practical terms what we are looking at here this afternoon.

We are considering in practical, realistic, real world terms whether or not State X, whether it is Louisiana, South Carolina, Utah, Nevada, Texas, whether State X is going to have any chance to have its cares and its concerns enunciated, heard and understood.

The State of Washington may not have any concerns and may be receptive to the location. But in practical terms if you were a legislator representing the district in which the permanent repository had been selected you would be virtually and in practical terms under the gentleman from North Carolina's amendment precluded, foreclosed, foreclosed from having your opportunity within 90 days to express your own concerns to this body and the similar body in the U.S. Senate.

In essence, you would be denied your day or opportunity to present your issues and your concerns of your State and your congressional district because the gentleman from North Carolina in all sincerity offers to this body a State participation which is in essence a fraud and a sham.

There is no conceivable way that State X is going to come before the House of Representatives or the U.S. Senate and persuade a majority of its Members to support its position, however meritorious, however valid its concerns, however justified those complaints.

You see the sophisticated but very important difference between the amendment being proposed and the language in the committee bill is the Department of Energy, the Government agency that made the decision to locate the permanent repository has the burden of proof and persuasion to you as Members of this body, to the U.S. Senate. It is a decision that will last 1,000 years, 100,000 years, in terms of impact on that State, on that congressional district and on this Nation, and it is a decision that deserves a fair and honest and open and aired hearings before this body and the U.S. Senate. It is a decision that will never receive a fair, honest, or open hearing under the amendment offered by the gentleman from North Carolina (Mr. BROYHILL).

Mr. BROYHILL. Mr. Chairman, will the gentleman yield?

Mr. SANTINI. I yield to the gentleman from North Carolina.

Mr. BROYHILL. The gentleman is giving the Members the impression that there is no consultation with the States in this whole procedure and the gentleman knows that is not true.

The CHAIRMAN. The time of the gentleman from Nevada (Mr. SANTINI) has expired.

Mr. BROYHILL. Mr. Chairman, I ask unanimous consent that the gentleman from Nevada (Mr. SANTINI) be given 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

Mr. UDALL. Mr. Chairman, reserving the right to object, I am trying to keep my commitment to the leadership to wind this thing up at 5:30 and also get a vote on this amendment.

I hope there will be no further requests for additional time.

Mr. Chairman, I withdraw my reservation of objection.

□ 1720

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina (Mr. BROYHILL)?

There was no objection.

The CHAIRMAN. The gentleman from Nevada (Mr. SANTINI) is recognized for 2 additional minutes.

Mr. BROYHILL. If the gentleman will yield further, the gentleman would agree that before even sinking any sites in the shaft in the characterization stage the DOE must consult with the States, and they must also perform environmental assessments and that these assessments are judicially reviewable.

Mr. SANTINI. If the gentleman will permit me to reclaim my time, the precious 2 minutes that have been allocated to us, if my good friend on the Commerce and Energy Committee would honestly recognize that those who have been ecstatic and enthusiastic about the cooperative communications from the Department of Energy in the past to individual States and congressional districts, they should be ecstatic and consoled with the language in that bill.

But there is nothing that protects the individual State unless it is the largesse and the good will of the Department of Energy reaching out to State X and saying, "We will bring you in for a consultation." If my good friend could only understand those of us who have dealt with Federal agencies in the past and have found ourselves perhaps not the beneficiaries of an extension of good will—"Hi, we are from the Federal Government, we are here to help you today"—we are concerned about the fact that in practical terms the gentleman's amendment wipes out any meaningful State role, because what you do by shifting the burden of proof from the Department of Energy over to the State is to require the State to come in and prove that it was wrong, instead of the Department of Energy to come in and prove it is right. That is a significant and substantial difference that will produce in the Department of Energy a sense of arrogance, a sense of indifference, and all of the consultation language in the world will not protect that State if that kind of language such as you propose goes in here.

Mr. BROYHILL. If the gentleman will yield, the gentleman is not giving any credit whatsoever to the amendments that we put in here at his request, the request of the Governors, requiring timely response from the DOE to a request from the Governors, and if those requests are not made in a timely way, the DOE must halt all progress in the program.

Mr. SANTINI. I do not have any faith in the bureaucracy when it comes to arbitrary decisionmaking. No, I do not.

Mr. BROYHILL. All of this is judicially reviewable.

Mr. UDALL. Mr. Chairman, I ask unanimous consent that all debate on the pending amendment close at 5:35 p.m.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

Mr. DANNEMEYER. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. UDALL. Mr. Chairman, I ask unanimous consent that all debate on the pending amendment close at 5:40 p.m.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The CHAIRMAN. Members standing at the time the unanimous consent request was granted will be recognized for 1½ minutes each.

The Chair recognizes the gentleman from Mississippi (Mr. MONTGOMERY).

Mr. MONTGOMERY. Mr. Chairman, I rise in opposition to the amendment.

The gentleman from Nevada is totally right that this amendment by Mr. BROYHILL totally weakens the States rights under the bill reported by the committees. It totally wipes out the two-House override and basically says that if Congress is quiet, then the Governors' veto is ignored. It is just not fair.

I serve on the House Armed Services Committee. We amended the bill for the two-House override in the House Armed Services Committee. It was adopted 25 to 6. You are eliminating what we did in the three committees.

Now, I think the strongest point is when a State site has been picked, that State is going to have a tough time. Forty-nine other States are going to be ganged up against it. So what is wrong with giving that State Governor as much chance as possible under the House and let him have the two-House override? And if this is such a good amendment that Mr. BROYHILL has offered, I really cannot understand why three committees which handled this bill did not vote up this amendment. I certainly hope that Members will defeat the amendment. It is a bad amendment and it should be defeated.

Mr. BROYHILL. Mr. Chairman, will the gentleman yield on that point? I would like to correct what the gentleman has said.

The CHAIRMAN. The time of the gentleman from Mississippi (Mr. MONTGOMERY) has expired.

The CHAIRMAN. The Chair recognizes the gentlewoman from Maryland (Mrs. BYRON).

Mrs. BYRON. Mr. Chairman, I rise in support of the amendment to substitute new language for existing section 115. The provision allows States de facto veto authority over the siting of a high level radioactive waste repository. I believe that the amendment will improve the high level waste bill, which I am pleased to cosponsor and support.

Under existing law, the authority of States and Indian tribes to participate in the decisionmaking process leading to the siting of high level waste repositories is quite limited. This is a reflection of the fundamentally Federal character of our atomic energy program and the important national purpose to develop atomic energy technology which underlies that program.

While I firmly believe in appropriate participation by States and by Indian tribes in decisions relating to the siting of high level radioactive waste repositories, I similarly believe that such participation must be in agreement with the fundamental national interests involved.

The current section 115 of the waste bill does not reflect the proper balance in State and Federal interests. The section essentially permits a State to veto a siting decision lawfully made by the Department of Energy and the President, even after the Department and the President have reviewed and taken into account all legitimate concerns raised by the State and all other interested members of the public. The only way that this State veto could be overriden would be for Congress to pass a law within 90 days of learning of the State action.

Mr. Chairman, the failure of the proposed section 115 to reflect important national interests is especially troubling in view of the applicability of the section to defense wastes under other provisions of the bill. It is a questionable and potentially dangerous policy to confer veto authority upon States and Indian tribes over any aspect of our atomic energy defense activities.

The substitute for section 115 addresses these concerns and yet amply recognizes the legitimate interests of States and Indian tribes in this area. The amendment authorizes States and Indian tribes to submit notices of disapproval to Congress. The State disapprovals will be effective, however, only if sustained by at least one House of Congress within a specified period. This provision allows States and Indian tribes to call upon Congress to review a siting decision, yet does not require us to pass yet another law to resolve the high level waste issue.

This is essentially the mechanism provided in the bills reported by two of the three major committees in the House and is closer in nature to the mechanism for State participation provided in the bill adopted by the Senate. It allows the Federal Government to select an optimal repository location without the roadblock of an unwarranted and unsupported veto by a State or Indian tribe.

I believe that the substitute will facilitate the siting, construction, and operation of the very best high level waste repositories which we can reasonably expect to achieve. In addition, it will do this without inflicting unreasonable additional costs and delays on ratepayers, taxpayers, our national defense, and the power companies. I urge my colleagues to vote in favor of this amendment.

The CHAIRMAN. The Chair recognizes the gentleman from California (Mr. DANNEMEYER).

Mr. DANNEMEYER. Mr. Chairman, the French have shown the world how to dispose of high-level nuclear waste in a safe manner. For the last 3 years they have been operating a facility in the south part of their country that stores high-level nuclear waste, and it is about the size of a basketball court, I am told. It consists of concrete about 30-feet deep, and in this concrete they have drilled cylinders about a foot in diameter, and in these cylinders they placed two 6-foot heights of virtrified high-level nuclear waste at the bottom, a total of 12 feet, and at the top of that they put a 12-foot cork of concrete.

Now, that is sufficient shielding for people in that region—this representation has been made to me—that 100 people working on that site walk around the top of that facility. Now think of that. Now, if the French can build that kind of facility in the premier—one of the premier—wine-growing regions of the country, which obviously makes it a premier tourist attraction for France, are we really doing anything constructive here in this great Chamber backing and filling? There is an underlying fear, I think, in the Members that if we place this waste disposal site in any of our 50 States, we are going to expose the citizens of that State to perilous danger. Nothing could be further from the truth.

The gut issue on this amendment is whether we in this country who run the political affairs want to have a means of disposing of high-level nuclear waste. That is the issue. Because if we turn down this amendment, there is not any elected Member of this body who really believes——

The CHAIRMAN. The time of the gentleman from California (Mr. DANNEMEYER) has expired.

The CHAIR recognizes the gentleman from Washington (Mr. SWIFT).

Mr. SWIFT. Mr. Chairman, I would suggest that the gentleman who just spoke misses the point entirely. What we are deciding here today is whether or not the State in which the Nation decides they are going to place the waste has any say-so about it and what is the nature of that say-so.

The information that the gentleman shared with us and all of the Members in the Chamber is information that is also available to the States. I am surprised, serving on the committee with the gentleman as I am, and knowing his concern for States rights, and that people in Washington, D.C., do not dictate the fate of the people out in the local communities, that he would not see that it clearly is an issue not of our making a decision based on the lack of information, but his not having

faith that the States are able to use that same information in making wise judgments.

Mr. DANNEMEYER. Mr. Chairman, will the gentleman yield?

Mr. SWIFT. I yield to the gentleman from California.

Mr. DANNEMEYER. I am a firm proponent of States rights. But let us face it: This is an issue of national significance. It transcends States interests and rights.

Mr. SWIFT. I ask the gentleman if he believes the States ought to have a significant right of say-so of what the Federal Government puts in their back yard.

Mr. DANNEMEYER. I agree the States should have that input. But somebody has to decide.

Mr. SWIFT. They should have it, but not meaningful enough so that in fact their say-so has any effect at all, is that what the gentleman is saying?

Mr. DANNEMEYER. It is in the bill so that States can have an input. They will stay there even if we adopt the Broyhill amendment.

Mr. SWIFT. They can have input as long as they cannot affect the decision.

Mr. DANNEMEYER. And the States will have input and their input will be evaluated and given the dignity to which they are entitled.

□ 1530

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. Mr. Chairman, this is really a question of whether the Federal system under which we have been operating for over 200 years will prevail in a field as important to our national security and to our economic development as is nuclear energy.

As the gentleman who is offering the amendment, the gentleman from North Carolina (Mr. BROYHILL), pointed out a moment ago, everybody says that we have got to solve the problem of nuclear waste. This is precisely what this bill is designed to do. And yet here we are undercutting that effort by imposing impossible conditions on getting any kind of design or decision approved.

What the amendment of the gentleman from North Carolina would do is simply permit any one State that does not want the repository to come before either House of Congress and make its case. And certainly one House is as good as the other for making that decision. What better court could they have? If they cannot get one House to support them, then they are really in trouble.

But what the committee bill does, what it says that they have got to undertake, the Government itself has got to get two Houses of Congress to oppose the State and then to get the President to disagree. That is a formula for doing nothing whatsoever; and as the gentleman from California has indicated, we are going to be way behind our French colleagues if this is the way we run our atomic railroad.

The CHAIRMAN. The Chair recognizes the gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. Mr. Chairman, the railroad would be run through States that did not have that much political clout to begin with.

Let us take a State like Nevada. This is a State that obviously will not be able to put a big roadblock in the path of the nuclear railroad: One Congressman and two Senators against the President of the United States, the Secretary of Energy, and most likely every other State that was not unlucky enough to get the nuclear repository all lined up against it. One Congressman and two Senators saying, Please, Congress, will you just listen to our case. There are a few criteria that should have been looked at. We wanted to know whether or not the NRC reviews have been an integral part of the site selection process; if sufficient study has been done to determine suitable geologic media; if public comments and criticisms have been responsibly assessed by DOE. And then, if there is no reason to give any credence to any of the objections of the Representatives from Nevada, then override them.

And most likely it would be 434 to 1 with a great sigh of relief from all of the nonwinners of this Congress who avoided becoming the nuclear garbage can of the United States for the next 20,000 years. This is all we are trying to build into this law: An opportunity by the Senators and the Congressmen of the least densely populated States to come before their respective bodies and make a case that a little bit more caution ought to be put into the siting of the Nation's permanent high-level nuclear waste facility.

Most likely some modest change will be made and the facility will be built in any circumstance. But that does not seem like too high a concession to make to a State as it is being asked to become the nuclear garbage can of this country for eternity.

The CHAIRMAN. The Chair recognizes the gentleman from Utah (Mr. MARRIOTT).

Mr. MARRIOTT. Mr. Chairman, I rise in opposition to the Broyhill amendment and support a two-House override. The Governors are coming to me and saying they do not believe they have enough authority in this area, and here we are now trying to weaken the bill evermore.

This two-House override really gives the States some teeth, it gives them some attention, and I think it is a necessary step.

Putting a repository in any State is not a simple matter. It is a very serious proposition. If a Presidential selected site is really in the national interest, then I believe we will override that State veto. But until that happens, I think we ought to give the States the benefit of the doubt.

(By unanimous consent, Mr. OTTINGER yielded his time to Mr. UDALL).

The CHAIRMAN. The Chair recognizes the gentleman from North Carolina (Mr. BROYHILL).

Mrs. HOLT. Mr. Chairman, will the gentleman yield?

Mr. BROYHILL. I yield to the gentlewoman from Maryland.

Mrs. HOLT. Mr. Chairman, I rise in support of the substitute.

Mr. BROYHILL. Mr. Chairman, there seems to be the implication here in this debate from the other side that there is nothing in this bill that protects any rights of the States during this whole procedure of selection of the final repository.

I just hope that Members will take time to read the bill. All through it it states notification, consultation, three sets of public hearings, all through this bill, consultation on site characterization, a timely response from States who request information or cooperation and have the power to halt the procedures and the process if they do not get that.

Environmental assessment of each one of the candidate sites which is judicially reviewable. And also a final environmental impact statement which also is reviewable. Also environmental assessment all through this legislation.

All we are talking about here after going through these years and years of consideration, then a Governor can come up and just halt the thing in its tracks.

We are saying that the Governor under our amendment will have his say and if he comes to the Congress and gets one House to go along with it, then his veto will stand. But we do not think it is right that a Governor's veto would just halt the project in its tracks. We think that that is the wrong approach.

We think that the Members should consider very carefully the impact that this language, which is presently in the bill, is going to have on the delicate balance that we do have in this legislation.

If the repository is delayed, we only have ourselves to blame. If the only alternative is temporary solutions for the next decade on two, such as away-from-reactor facilities, we do not think that is a solution. Let us have a final, permanent solution.

The CHAIRMAN. The Chair recognizes the gentleman from Arizona (Mr. UDALL) for 3 minutes to conclude debate.

Mr. UDALL. Mr. Chairman, we have built a consensus as we went through about five different committees in con-

sideration of this bill, and I think a commonsense consensus on most major points. I do not see the differences here as being all that cosmic or all that vital.

This consensus has been reached with all of the committees that we have worked with. We are all agreed that the States ought to have a veto. If you are going to put something as important as this in a State, then the State through its Governor or legislature ought to be able to say no thanks.

We are also agreed that once the State has made that veto, that there ought to be a mechanism so that, in the national interest, it could be overridden as we do in war when we need an air base or at other times when we need Federal eminent domain.

The questions here really surround how tough it should be to override the State's veto, where should the burden of proof lie, and so on.

I prefer the language now in the bill. I prefer that and oppose the amendment. What the language now in the bill says is that you must get both the House and the Senate to override a Governor or the State's decision stands. That means there is a presumption that the State's veto of that site will stand and it takes both the House and Senate to override the Governor's decision.

The Broyhill amendment says that unless one of the Houses votes to sustain the State Governor, then the State loses. The presumption stands against the State veto.

As I say, I do not see great cosmic differences between them. We do have a possible conflict problem, a constitutional problem with the one House veto, and for these and the reasons I have stated I prefer the language now in the bill to the language offered by my good friend from North Carolina.

Mr. BROYHILL. Mr. Chairman, I must point out this is a considerable switch from where the gentleman was a couple of years ago when he appealed to everybody to vote down the Kostmayer amendment. At that time he was saying that the bill before us gives us a road map for a solution to the problem and urged everybody to vote down that amendment.

So I hate to see that we are on different sides here. But it seems to me that he is not arguing very vehemently against my amendment. So perhaps I ought to be quiet.

Mr. UDALL. Well, if I have a moment left at the end of the day, I can tell one of my favorite stories about old Senator Ashurst from Arizona, chairman of the Judiciary Committee.

□ 1740

President Roosevelt did not like the Supreme Court decisions and he introduced a bill to add six members to the nine-member Court so that he could get a better quality decision. Senator Ashurst introduced that bill and got it out of the Judiciary Committee and caught so much hell from Arizona that he turned around and led the fight on the Senate floor to defeat his own bill.

He used to tell about a telegram from a lady in Phoenix who sent a telegram saying, "Thank God for your courageous stand on that Supreme Court bill."

And he wired back, "Which one?"

So I guess I have not been all that consistent, but I think here the amendment ought to be defeated.

The CHAIRMAN. All time has expired.

The question is on the amendment offered by the gentleman from North Carolina (Mr. BROYHILL).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. BROYHILL. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 190, noes 184, not voting 59, as follows:

[Roll No. 396]

□ 1750

Messrs. CROCKETT, MURPHY, DENARDIS, and BEARD changed their votes from "aye" to "no."

Mr. LUNGREN and Mr. FINDLEY changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

□ 1800

Mr. UDALL. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. PANETTA, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3809) to provide for repositories for the disposal of high-level radioactive waste, transuranic waste, and spent nuclear fuel, to amend provisions of the Atomic Energy Act of 1954 relating to low-level waste, to modify the Price-Anderson provisions of the Atomic Energy Act of 1954 and certain other provisions pertaining to facility licensing and safety, and for other purposes, had come to no resolution thereon.

MAKING JOBS—AND SAVING THEM

(Mr. MAZZOLI asked and was given permission to address the House for 1 minute and to revise and extend his remarks, and to include extraneous material.)

Mr. MAZZOLI. Mr. Speaker, the Congress is laboring to find job creation bills, job mechanisms to put Americans back to work.

One bill which I think would very aptly fill that definition and, therefore, should be part of the agenda for the lameduck session of Congress is H.R. 6514, which is the Immigration Reform and Control Act of 1982.

Depending on whose estimate one would use, as many as 1 million to 2 million jobs, and certainly no fewer than half a million jobs, would become available to Americans, those jobs now being held by people in this country without the proper documentation.

I think all of us who campaigned over the last 2 months know that the people back home, the grassroots, want H.R. 6514 passed so that jobs in America are held by Americans.

I would ask the leadership of the House to schedule, during this lameduck session, the bill, H.R. 6514, and make jobs for Americans and put Americans back to work.

Mr. Speaker, I include an article from the New York Times of November 25, 1982, entitled "Making Jobs—and Saving Them."

The article follows:

[From the New York Times, Nov. 25, 1982]

MAKING JOBS—AND SAVING THEM

"Our first priority," says House Speaker O'Neill, "must be to put the millions of unemployed back to work." The Speaker has his social priorities straight; he's willing to act urgently to make jobs. But is he equally willing to act urgently to save them? Doing that is within his grasp, and that of the lame-duck Congress starting next week—by passing the nearly finished legislation to reform the immigration laws.

One need not be an economic scholar to see the connection between unemployment and illegal immigration. Undocumented aliens pour across the borders in search of jobs. True, many of those jobs are so menial that Americans won't take them, or might be automated if there were no illegals willing to do them for low pay. Nevertheless, the Labor Department estimates that for every five jobs taken by illegal immigrants, one American is deprived of a job.

How many jobs are lost that way? The facts are spongy. No one knows how many illegals come in each year, or how many leave. But the United States Ambassador to Mexico recently reported that if the immigration laws were strengthened, "Probably between one and two million Mexicans would be forced to return to Mexico." And Mexico supplies only half the illegal entrants.

It seems reasonable to guess that some 500,000 illegal immigrants a year are added to the work force, displacing at least 100,000 American workers. That leads to an obvious question. The Speaker—and the President—want quick action on a $33 billion infrastructure program that would make 320,000 jobs. Why not equally quick action on an immensely cheaper immigration bill that could save 100,000 or more jobs?

Quick does not mean hasty. On the contrary. The Simpson-Mazzoli immigration reform bill is the painstaking, balanced result of years of study, adjustment and compromise. It would do much more than save jobs. Without being nativist, racist or mean, it would put the country back in charge of its own borders, while bringing humane status to illegal immigrants already here.

The Administration supports the bill enthusiastically; so do leading Democrats, which explains why it passed the Senate in August by a lopsided 80-to-19 margin. The bill would probably pass the House, too, if it were brought to the floor during the lame-duck session starting next week. If not, it will die and have to run the whole Congressional gauntlet again next year.

That's where Speaker O'Neill comes in. Making jobs is on his priority list for the session; saving jobs is on his "possible" list. If Mr. O'Neill is truly concerned about unemployment, not to mention fairness and humanity, he will give immigration reform the priority it deserves.

SATURDAY'S SHAME

(Mr. WOLF asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. WOLF. Mr. Speaker, I would like to call to the attention of my colleagues an editorial in this morning's edition of the Washington Post entitled, "Saturday's Shame." The violence which rocked the streets of our Nation's Capital on Saturday was indeed shameful, just as shameful as the prejudicial attitudes of the Klan in this country.

We should not concentrate on criticizing groups at this time but rather emphasize that Washington, D.C., is supposed to reflect the best of this Nation. The frightening, ugly display on our city's streets did not do justice to the city or what it represents.

I wholeheartedly agree with the Post editorial in calling for vigorous prosecution of those involved in the acts of violence and destruction which rocked the downtown area. We must let these lawbreakers know that their action will not be tolerated.

I want to especially mention the police of this city, many of whom sustained injury in the line of duty on Saturday. They responded with professionalism in quelling the disturbance and protecting the citizens and property of the city and they deserve special commendation.

Now we must go forward. If anything, Saturday's demonstration has focused on the need to solve our problems, not through hatred and violence, but through love and reconciliation. Just think of the good which could have come if those in this city on Saturday had concentrated their energies in the direction of groups such as the Greater Washington Board of Trade, which was holding a jobs conference, or the churches of the area which were feeding the needy on that day.

[From the Washington Post, Nov. 29, 1982]

SATURDAY'S SHAME

Please, no excuses for the rampage of Saturday. Even to grace those mindless rock- and bottle-throwers and looters with the label of "anti-Klan protesters" gives them a status they don't deserve to enjoy. It is equally bubble-headed to explain the violence and destruction as an outburst in reaction to unemployment, the Reagan administration, Israel, South Africa or any of the other named objects of complaint. All it took was a handful of practiced delinquents and trouble-hungry instigators to stir things up.

There are some episodes that have no handy, built-in insights or great moral lessons to impart—but only self-evident truths to be understood. Foremost among such truths this weekend is that the Ku Klux Klan is no less despicable because a crowd of vandals behaved so recklessly. If the Klan members' bid for attention and trouble was an objective, consider it accomplished. But they were still bit players in the action, their message no less ugly than it ever has been.

Who got hurt? Not the Klan; all it may have gotten is the last laugh, and that's a shame, too. Bystanders were physically hurt, police officers were injured, people with messages of tolerance and words of peace were knocked around. Worst of all, the people of Washington—those whom the Klan would like to hurt the most—ended up with wounds that will be long in healing.

Police Chief Maurice Turner, as much as anyone, had his hands full and responded

professionally to the pressures. So did the rank and file, who were stretched beyond instant-response capabilities in many instances but who did what they could to arrest as many suspects as possible. Prosecution, we expect, will be vigorous. This may not calm the understandably furious merchants whose downtown stores and offices were destroyed, but everyone deserves assurances that the laws of the city are being enforced as effectively as possible.

Washington has been, and will continue to be, host city to demonstrators with messages that run the full range, from the bigotry of the Klan to what many would consider to be significant and important petitions to their government. In the past, this city has reacted as well as any in ensuring the rights of peaceful protest while protecting all people from violence. That was the assignment of the authorities on Saturday, and it will remain so.

REPORT ON COMMISSION ON SOCIAL SECURITY REFORM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. CONABLE) is recognized for 60 minutes.

Mr. CONABLE. Mr. Speaker, I take this time—and I doubt that I will use my entire hour—for the purpose of advising the Members of the House of the deliberations and accomplishments, if such they be, of the Commission on Social Security Reform which was appointed some time ago and which has been meeting throughout this year, having a 3-day meeting beginning on the 11th of November for the purpose of putting together its thoughts on the difficulties the social security system is facing.

This came, Mr. Speaker, after the very difficult election in which social security was a major issue for many candidates, and I must say that many of the people who spoke on the subject knew comparatively little about it. The fact is that the Commission, meeting almost monthly throughout the year, had to gather together a considerable body of information, and there was some hope that the 3-day meeting in November would bring about substantial agreement on the subject for the consideration of the lameduck session. Unfortunately, leaders in the House have made clear that the lameduck session will not consider social security, saying that instead the issue is to be left for another time, and presumably for another Congress.

Mr. Speaker, initially I opposed the appointment of this Commission. It seemed to me that the appropriate time to deal with the social security problem was last fall, and for a while there was a serious bipartisan effort to bring a reform bill to the floor. Leadership opposition, however, on the majority side made impossible any action at that time. The inflammatory rhetoric which was addressed to earlier proposals put out by the President led him to seek, through the Commission, to reduce the polarization.

The Commission was appointed with five members selected by the President, five by the Speaker, and five by the majority leader of the Senate. It included seven Members of the Congress, two former Members of the Congress, and six private citizens who were appointed variously, some of them by the Speaker, some of them by the Senate and some by the President.

The chairman of the Commission was Alan Greenspan, a distinguished economist. The other public members were Alexander Trowbridge, the former Democratic Secretary of Commerce, now the head of the NAM; Robert Ball the long-time Commissioner of Social Security; Lane Kirkland, head of the AFL-CIO; Mary Falvey Fuller, a well-known business woman from the west coast who was previously experienced in social security; and Robert Beck, the chairman of the board of Prudential Insurance Co.

□ 1810

Together with the Members of Congress and the former Members of Congress, this considerable Commission formed a bulwark behind which the Congress could retreat if it wished, or behind which it could advance if it wished. It could shield us, in short, if we wished to use it as a shield.

The Commission was, in its November meeting, a disappointment to some because it did not come out with a strong majority report. However, it did make some accomplishments.

For instance, there was close to a consensus as to the dimension of the problem. Many have been saying, "There's nothing wrong; don't touch it." The Commission decided that between now and 1990 there would be a shortfall in social security funds of between $150 and $200 billion.

That shortfall was not based on the most pessimistic of economic scenarios. It was based on the so-called middle course of economic assumptions; and, therefore, taking that middle course it was assumed that we would need some sort of fail-safe proposal, a contingency which would protect the further erosion of the fund in the event the most pessimistic economic scenario proved to be the acutal one.

There was at least a strong majority agreement of the Commission that we should extend the coverage of social security to new civilian Federal hires; that we should move toward universal coverage. This proposal is controversial to Federal employees only. There is very strong support for it among the public at large.

Provided we do not get into the difficulty of transition rules for existing Federal employees who, as you know, do not have vested pension benefits under the civil service retirement system for the first 5 years they work—provided we avoid this pitfall—it seems entirely appropriate to try to work out some sort of an integrated system for the civil service retirement program and social security, not a merger by an integrated system. This would ultimately be in the best interests of all, and current employees would not be disadvantaged in any way.

There was agreement also in the Commission that we should have a balanced program, that we should not put the total burden of reform on one element of those involved with the social security system the social security payroll taxpayers or the beneficiaries, those who in many cases are dependent on social security for their sustenance.

It was agreed in short that we should come up with a proposal that would have a number of people unhappy but nobody unfairly or exclusively burdened by the solution.

At the end of our deliberations, the end of the 3-day meeting, we agreed that also it was necessary if we were to play an effective role that the principals in this action; namely, the Speaker and the President, must be involved and must be willing to let the Commission serve as a negotiating element in trying to arrive at a balanced reform package.

The problem otherwise would be this: We would find one side or the other making concessions which the other side would put in its pocket and it would become the starting point for negotiations which ultimately must be consummated here in the Congress and between Congress and the President.

Thus it was felt that any strong majority report of the Commission to be effective must have the understanding and the support of the Speaker and the President.

Having failed to go beyond that, the Commission is now meeting again on December 10 to prepare its final report. If we have not been able to get any substantial areas of agreement between the White House and the Congress, obviously, our final report will simply list a series of options and urge that they be put together in some sort of a balanced form.

Those are the alternatives that face us, either a majority report with the agreement of the President and the Speaker behind it or a list of options left to the next Congress. It is still not too late to do something in this Congress.

I would like to talk the politics of social security a little at this point because we are now in a different condition than we were at the time of the election when this so inflamed the rhetoric of the campaign trail.

First of all I think it is apparent the Commission can be a useful tool. It is willing, but it knows the final solution

lies in the Congress and not in its majority report.

It is a useful tool because it is a commission that should not be ignored. Congress can simply duplicate its effort by going through a whole series of hearings similar to those already held by the Commission and can ignore its findings and the body of knowledge about the social security system that it has built up. This would be wasteful and duplicative.

Obviously the members of the Commission are happy to appear before congressional committees. But if we were to act in this lameduck session on social security the Commission could provide a bulwark against public opinion and provide an alternative rather than the purely political forum that the Congress is likely to be on a subject which has been so recently the matter of intense debate.

A second point I want to make about the politics of this is that if we do not do it in the lameduck session we are going to be considering it in a budget context. What do I mean by that?

On February 1 the President is going to have to submit the budget for fiscal year 1984. We all know there is going to be very disturbing deficits in whatever proposal the President makes. We know the deficit for fiscal year 1983 is burgeoning. Budgets are going to be a major concern following the February 1 submission by the President of his budget to the Congress. It is going to be almost inevitable then that during the deliberation about social security early next year, if we put it off until then, the budget people are going to be talking about how nice it would be if we could just cap entitlements or if we could just save some money in the social security system.

Mr. Speaker, one thing I am sure of after this election campaign we have just come through is that the American people will not let you reduce the deficit or balance the budget on the backs of pensioners. It is not a budget issue. It should not be a budget issue.

What we do to social security should be designed to save the system and not to cure our fiscal disorders.

Yet well intentioned people in the budget area, looking at the large amount of moneys involved in social security, are inevitably going to talk wistfully about the necessity of capping entitlements, to many people a code word for social security.

Thus it is my impression that politically we would be much better off trying to deal with this issue now when budget matters do not predominate. Yet, as I hear the leadership, there is talk of starting hearings in Ways and Means early in January and having a bill on the floor by the middle of March when the budget process will be in full bloom. This timetable will add greatly to the difficulty of resolving the social security issue. People will inevitably be confused and suspicious about why we are raising taxes or suppressing the growth of benefits.

A third political point, Mr. Speaker, is that dealing with social security early next year, and it must be dealt with early next year, is going to be a very tough vote for our new Members to cut their teeth on. They, after all, many of them are coming here because they have made a big issue of social security. It was one of the critical issues of this past election and they are not going to be free agents, certainly not in the minds of most of them, to do what may be necessary in order to save the system. No one can blame an eager candidate from making incorrect assumptions about the necessity of our action, but it is embarrassing and difficult to change one's tune so soon after a first election.

□ 1820

We have, I think, a clear indication that the system is badly out of balance. Every indication, also, leads us to believe that sometime between April and July of next year, if further steps are not taken, we will have at least the temporary embarrassment of not being able to send the checks out. And so we do not have the option of postponing reform any longer. That is the fourth point I want to make politically. This is not an issue that can be temporized any longer. We have run out bailing wire. Social security is in a crisis that must be met, and if it is not met in the lameduck session, it must be made early, at the beginning of the next session, with new Members, with many people who are not informed about it and will not have the opportunity to use the Commission's work to the same degree that it could be used in this lameduck session. The Members of the new Congress would be grateful for our action now. It is not too late, Mr. Speaker.

I remain optimistic. I believe that ultimately the Congress does what it must do. I acknowledge it does what is necessary at the last possible moment; but I do believe that it is important that the Members understand that now is the last possible moment to deal effectively with social security.

I deeply regret that the leadership has decided that we are not going to use the Commission as a shield but are going to try to duplicate its work. I deeply regret that they have decided that we are not going to deal with it now, when it will be clear that we are dealing with it in order to save the system, rather than in order to reduce our budget deficit that will be such a looming presence when we do take it up next year. I deeply regret that we are not using the lameduck session and the low political sensitivity that always attends a period of congressional session immediately following an election, but instead are going to take this subject up during a period of rising political interest again as the new Congress starts out on its new programs.

It is the last moment, Mr. Speaker. It is my sincere hope that the Members will speak to our leadership and urge them to try to work out, using the Commission as a bargaining agent, some kind of a majority report, a balanced report, that would permit us to certify to the beneficiaries that they are going to get next month's check, and to certify to those young people who are going to have to pay for the rest of their working lives that, by the time they retire, they will still have a system that will be of substantial benefit to them. It remains to be seen if we have the wisdom to do that. I would like to predict, however, that if we do not take this course and try to resolve it now, it will be all the harder to resolve with the imminence of the crisis facing us next year in a budget context.

Mr. Speaker, that is all the time I wish to take at this point. I have accomplished my purpose. If any Member has any questions, I would be happy to answer them.

GENERAL LEAVE

Mr. CONABLE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order on today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

SENSE OF HOUSE RESOLUTION INTRODUCED URGING HOUSE LEADERSHIP TO ACT ON DRAMATIC RISE IN PRICE OF NATURAL AND PROPANE GAS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kansas (Mr. WINN) is recognized for 30 minutes.

Mr. WINN. Mr. Speaker, I have introduced today a sense of the House resolution urging the House leadership as well as the appropriate committee chairmen having jurisdiction to act on the dramatic rise in the price of natural and propane gas. We can talk endlessly about the problem of higher gas bills for our constituents, but actions speak louder than words and it is essential that the House put this dilemma at the top of the legislative calendar in this lameduck session.

A flood of bills have been introduced this year and certainly many have merit. At last count, there are some 50 pieces of legislation in the hopper dealing with the sharp rise in natural gas prices. It is vital that we create a

clear consensus on this issue which affects the daily lives of people who will deal with one of the coldest winters in recent history. My challenge to the leadership is to consolidate the good ideas put forth in current proposed legislation and lead the concerted action we must have. My challenge to committee chairmen is to move the necessary legislation along so it can reach the floor of the House where it can be acted upon during this lame-duck session.

This resolution does not advocate any one bill or solution but is intended to impress upon Congress, and particularly the leadership and the appropriate committees, that the thousands and thousands of natural gas customers who have written to their Representatives and Senators demand decisive action by the Congress as a whole. It is our responsibility to act on behalf of our constituents.

The impact of natural gas price increases has had the most devastating impact on residential users. Depending on the locality, gas rates have increased anywhere from 15 percent to near 60 percent. But the commercial sector is also feeling the pinch of higher energy costs which are ultimately passed on to the consumer. In a recent updated energy analysis study, reported by the American Gas Association, educational, health service such as hospitals and nonresidential apartments or building represent almost 40 percent of the U.S. commercial sales volume. And notwithstanding the application of energy efficiency measures to reduce consumption, overall costs have continued to rise.

I recently received data from Rockhurst College in my area showing that despite a considerable effort and expense to successfully achieve a 25-percent reduction in energy use over a 4-year period from 1979 through 1982, total MCF usage has decreased from 47,517 to 36,457.06 while total costs have increased from $82,277.82 to $151,816.45.

In my district, as perhaps in yours, coordinated efforts are underway to assist individuals and families with their gas bill. Numerous private, church, and social service agencies, as well as cities and counties, are actively involved in raising funds. While most of these projects are voluntarily financed, I can tell you also of both city and county endeavors which have earmarked a portion of their respective budgets to help people pay high utility bills. The city of Overland Park, Kans., for example, has committed $15,000 to a special mayor's fund with a final goal set at $30,000. The Johnson County Commission is contributing $50,000 for needy households. The cities of Kansas City, Kans.; Olathe; Mission; and Lenexa have all begun relief programs. KCMO television has raised money for needy households, through call-in pledges—and the newspapers, the Kansas City Star, Kansas City Kansan have highly publicized the problem.

I have been gratified at the amount of monetary support that has been generated by churches, social service agencies, and cities and counties in my district, but the funds passed on to people struggling to pay their gas bills is just a beginning in tackling the sometimes complicated task of limiting natural gas price increases. Congress did not intend for the Natural Gas Price Act of 1978 to cause this sort of hardship in the natural gas market.

I am sure many of you have received the enormous volume of mail, just as I have. The people we represent are sending us a clear message and are asking for our help. We can help them—even if it is in the short term—by taking action in this lameduck session of Congress. Many of the people who write me are wondering how they are going to keep warm, and at the same time, feed their families. It is a desperate situation.

Talking and debating the causes of this price hardship will not make life easier for the people. Only quick and decisive action can relieve gas consumers besieged with the highest gas bills in history. In large part, it is the NGPA and contractual problems which created this situation—legislation I did not support—and I believe a legislative remedy can at least partially undo the injustices of the past.

Let us show our resolve as well as our compassion and move ahead with substantive legislation to lessen the burden on people who put us here.

□ 1830

INTERNATIONAL SALES AND SERVICES CORPORATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. FRENZEL) is recognized for 20 minutes.

● Mr. FRENZEL. Mr. Speaker, I am today, for myself and Mr. GIBBONS of Florida, introducing legislation that is designed to offer a meaningful, substantive, and inexpensive solution to our mounting trade deficit problems. Our bill, the International Sales and Services Corporation Act of 1982, is designated to further the debate as to a possible replacement for the current Domestic International Sales Corporation (DISC) legislation, and is intended as an update replacement for a bill we introduced last year, H.R. 5179.

Over the past year, it has become evident that the DISC is doomed to extinction. DISC, which was originally enacted in 1971 as a means of partially offsetting the export incentives offered by the European tax systems, has been under attack for the past several years as a subsidy that does not conform to the General Agreement on Tariffs and Trade (GATT). Earlier this year, the U.S. Treasury finally acquiesced to the GATT, and agreed that the meager benefits provided by the DISC were not in conformity with GATT rules. The problems with the GATT were discussed fully in my RECORD Statement of December 11, 1981, on page H9410.

In admitting that the DISC was not in conformity with the GATT, the Secretary of the Treasury indicated that the Treasury would seek legislative changes in the DISC program in order to bring it in line with the GATT's requirements. Several proposals have been developed by various Members of Congress, the Treasury Department, and several business organizations whose members would be adversely effected by the repeal of the DISC. All of the proposals represent a serious attempt to resolve the current difficulties DISC is facing.

Our bill, the International Sales and Services Corporation Act of 1982 is similar to several of the proposals that are being circulated in that it attempts to address the GATT's domestic tax subsidy argument by requiring ISSC's to be incorporated outside of the United States. The bill also, however, attempts to respond to other GATT concerns by requiring some substance in the foreign corporation, making modifications in the arms-length pricing rules, and altering the method by which the ISSC is taxed.

In general, as stated earlier, our bill would require an ISSC to be incorporated outside of the United States including Puerto Rico. The ISSC would generally not be permitted to have a U.S. office, although rules have been provided to significantly ease the harshness of this rule. The shareholders of the ISSC will be deemed to have received 60 percent of the ISSC's earnings as a taxable dividend. The shareholders would also receive a pro rata portion of any foreign tax credits earned by the ISSC on the taxable deemed distribution. Forty percent of the earnings of the ISSC would be required to be invested in a qualified export asset for a period of no less than 1 year. After the 1-year period, the 40 percent would be considered to be previously taxed income. The shareholders of the ISSC would not have any U.S. tax liability for the dividends they receive out of previously taxed income.

In order to facilitate the use of ISSC's by smaller exporters, those exporters with less than $200,000 in qualified export receipts would be relieved of the requirement in the bill that the ISSC not have a U.S. office. In addition, no limit has been placed on the number of shareholders in an ISSC, thereby opening the door to multiple company ISSC's.

The bill also expands the definition of services in the bill to include virtually all exportable services. However, due to the revenue loss to the Treasury of such a proposal, services will not be considered qualified export receipts until 3 years after the effective date of the bill.

Our bill represents a substantive attempt to address the problems with the DISC in the GATT. It does not attempt to make DISC GATT-conforming by making minor, cosmetic changes. Rather it is an attempt to provide a workable, beneficial, GATT conforming export incentive. In my judgment, the Congress must enact a substantive proposal if it is going to make a serious effort to convince the GATT that the new proposal is GATT conforming. A cosmetic solution, such as one that merely moves DISC offshore without making any other changes in the program, and maintains current DISC for smaller exporters would, I believe, be a serious mistake. A nonsubstantive change would not show the GATT that we are serious about conforming to GATT guidelines, but rather, could be perceived as a perpetuation of our admittedly current non-GATT conforming policies. In addition, a cosmetic solution such as moving DISC off-shore intact could be seen by our major trading partners as generally bad-faith bargaining, and could set back our negotiations with the GATT several years, not only on the DISC issue, but on other issues as well.

This bill is not intended to be the final solution to the DISC problem, but rather is intended as a means of furthering the discussion as to a GATT conforming, substantive export program. The bill represents the end products of the hundreds of suggestions for changes I have received from various business groups, and the suggestions transmitted to me by my colleagues. There are still flaws with the bill, especially with the definition and mechanics of the U.S. office. On this issue, and on any other of the provisions in the bill, I would welcome additional comment. On the whole, however, we think that this bill is a step in the right direction to developing a useful, GATT conforming, export incentive for U.S. businesses. A more detailed explanation of the bill follows.●

PAST, PRESENT, AND THE FUTURE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. COLLINS) is recognized for 30 minutes.

● Mr. COLLINS of Texas. Mr. Speaker, learn from the past. Live in the present. Build for the future. That has been the code that I determined for my own life. And it is a good way to live.

There is so much we can learn from past history.

We ought to live in the present, yet we see so many people that live in memories. You see some people that borrow too much money and overspend.

But what makes for success is to build for the future. When I was in business, we used to keep our expenses to the minimum, we used to save all we could and as we built up reserves, we plowed this back to buy land, buildings, machinery, inventory for a better future for the business.

I think about my code as I lived my eight terms in Congress. The more I see of the American public, the more I believe that they are mainly interested in the present. Too many people do not seem to learn from the past. And many people today certainly do not want to wait for the future. They want to know what is in it for them right now.

If we are going to build a great country; if we are going to build a greater America, we would do well to learn from past experiences. In the first 5 years of this Republic, the country spent more money. The continental dollar in the first 5 years of this Republic dropped from a dollar to 1 penny. We had an expression, "It is not worth a continental dollar." Today in Congress we hear that America should borrow more money, print more money and that will take care of the present.

As to the future, experience proves the best way that you can build for the future is by saving, We hear people constantly who say Congress should spend and spend, because as we spend we will make the country rich. They do not realize that you can no more spend yourself rich than you can drink youself sober.

There is one answer for America, and that is for Congress to pass the balanced budget constitutional amendment. When Congress starts balancing our budget, the American people will have some of their salary left to save. This will provide a lower prime interest rate under 7 percent. A balanced budget will provide the momentum on which this country can grow.

There is too much emphasis on what each person can get out of things today. People want to know how short the work week would be. They want to know how many days vacation there are. How much cost of living can they get. This is living in the present, but we do not hear much about building for the future. When you are working in a business, do employees talk about quality control, do they talk about putting out a good product so you will have repeat customers come back in 3 years? Do they talk about saving money, so that the company can buy new machinery? Do they talk about reducing costs and making more profits for retained cash so the company will not need to borrow money at high interest rates.

America needs a return to religion. We need to live by the Golden Rule. Read the good book every day, and we will have more love and happiness.

It is a good code to live by. Learn from the past. Live in the present. Build for the future.●

SOCIAL SECURITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. ARCHER) is recognized for 10 minutes.

● Mr. ARCHER. Mr. Speaker, this lameduck session of Congress is the best opportunity we will have to act in a nonpartisan climate on the serious question of social security financing.

All of us in this Chamber know the trust funds will be insolvent in a few short months. We know we must act before that occurs so that current beneficiaries will not be denied any portion of their earned benefits. We know the options that are available. We know there are no painless, easy solutions. The question is whether we will act now, without political bias, to make those tough decisions in a responsible fashion.

Two years ago, at the start of the 97th Congress, the Social Security Subcommittee on which I serve began the difficult task of shaping a bipartisan solution to the problem. After months of work under the able leadership of our chairman, JAKE PICKLE, we were making significant progress on such a plan. Democrats and Republicans alike on the subcommittee were working toward a common goal—to forge a bipartisan bill to present to the House.

We were stopped dead in our tracks when you, Mr. Speaker, told the subcommittee to halt its work. We then were forced to stand idle while the Democratic National Committee sent out its series of election year mailings playing on the fears of the Nation's elderly. Governmental responsibility took a back seat to political opportunism. Congress could have acted then. It should have acted then. It did not because you refused to permit it.

The elections are over now and whatever political gain may have been derived from the delaying tactic has already been realized. It is time now to put partisanship behind us and to consider social security in a calm, rational climate.

There are 36 million people out there receiving benefits today who want our final assurance that their benefits will be continued. There are 117 million people in America who are paying the taxes to support those benefits. They, too, want to know for certain that social security will be there

when they retire—and what the cost to them will be during the remainder of their working lives.

We owe it to those people to avoid any further delays in making our difficult decisions.

No, there are not any easy, painless solutions we can pull out of a hat. But we were not elected to make only those decisions which are easy. When each of us ran for office we willingly chose to accept the responsibility for the difficult decisions as well.

Mr. Speaker, I implore you again, as I did a year ago, to permit this House of Representatives to meet its responsibility on the issue of social security financing. As before, you have the power, by virtue of the office you hold, to let this House proceed with its work. I urge you to use that power to help us enact a responsible, bipartisan solution to social security before final adjournment of this Congress.●

MARY OBERSTAR: A TRIBUTE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. OBERSTAR) is recognized for 5 minutes.

Mr. OBERSTAR. Mr. Speaker, my grandmother, Mary Oberstar, was born in the small rural village of Sodrazica, in what is today the Republic of Solvenia, Yugoslavia, on March 16, 1891. She died this past Tuesday, November 23, 1982, in Chisholm, Minn. Between those two milestones was lived a life both simple in its manner and extraordinary in its impact on us members of the family and on others whose lives she touched. A beautiful moving funeral mass was concelebrated Saturday, November 27 at St. Joseph's Church by our pastor, Father Cornelius Kelleher, and Father Frank Perkovich, a lifelong family friend. Grandma Oberstar, as everyone affectionately called her, was the central force in our family, a magnet drawing all of us to her and, through her, to each other—a very special woman.

It was my privilege at that mass to offer a eulogy on behalf of the family. I would like to include those remarks at this point in the RECORD.

GRANDMA OBERSTAR

Every great work of art needs a frame. Life, the greatest work of all art, is framed by birth and death.

The final line has now been drawn around Grandma's great work of art, framing her life. But a part of her lives on in each of us members of the Oberstar family, and in others whose lives have been touched by her.

If we look closely, we can learn much from this life, this great work of art. We can learn about love, persistence, strength, and courage.

We can learn about the courage it took to leave a familiar home on a long journey across Europe and the Atlantic to an unfamiliar land and an uncertain future.

There were no TV cameras, no photographers or reporters on hand to record her arrival in America or to chronicle her innermost thoughts.

She might have been thinking something like this: "With hopeful hearts we arrived in New York harbor. After nine days of stormy voyage on the Atlantic, I recall how all my friends had sea sickness. On passing the Statue of Liberty, we greeted her: 'Pozdravljena Amerika! Bodi nam dobra' ('Greetings to you, America! Be good to us.')."

And there, on landing, standing in line to see the immigration inspector: "The word spread that everybody must have $5 in cash or be deported. I was frantic. I had only $3 left. I begged the woman ahead of me to pass me her $5 behind her back after she had seen the inspector. I proudly showed my $8 and the inspector didn't as much as look at my money."

Those impressions of her arrival here were recorded by Marie Prisland, founder of ZVEZA (The Slovenian Women's National Union), of which Grandma was one of Chisholm's earliest members—but they were undoubtedly similar to the experience of most immigrants of that time—and not much different from Grandma's experience, as I recall her telling it recently.

We don't know what emotions Grandma felt when she left her beloved Slovenia where, from sunrise to sunset, hard labor earned you 15¢ and a meal—probably zhgonce; where a dress cost two weeks' work; where ocean liner passage took two years' earnings. But we can imagine how demoralizing it must have been in her first encounter with the new world, when this inexperienced teenager was cheated out of the first class ocean liner passage her family had paid for her.

But, typically, Grandma overcame the adversity, found friends aboard ship and made the best of it.

Next came New York harbor, Ellis Island, a long train ride to Minnesota. Here she found, not a land flowing with milk and honey, as many had been led to expect, but hard work and unforeseen hardship: serving rough-hewn miners in the boarding house, carrying buckets of water through harsh, sub-zero winters, losing her husband in the prime of life, raising eight children on a meager income, one good leg and a crutch.

A lesser person would have succumbed. Many do today, in the face of less imposing obstacles.

There is a Yiddish proverb that says: "God gave us burdens, but he also gave us shoulders." Grandma has been "shoulders" to all of us. A pillar of strength, an inspiring example of ironwilled persistence and determination to overcome.

We can also learn about independence from a spirit fiercely independent to the last.

We can learn about the wit and good humor that characterized her life and which she imparted to each of us. I vividly recall returning home in January 1975 shortly after I had been sworn in to my first term in Congress. Dad and I walked through a light snow fall to Grandma's for a visit—my first opportunity to see her after being sworn in to office.

Her first words were not: "Congratulations on being a Member of Congress," or "How nice of you to come visit," but: "Jimmy, where are your rubbers. You are going to catch cold."

Dad quickly said: "Ma, you can't talk to him like that anymore. He is a Member of Congress." Grandma responded very softly but firmly with that twinkle in her eye: "He is still my grandson. I still have to worry about him." And so it went with each of us; the care and concern expressed with a touch of wit and good humor.

We can learn about concern for the well-being of others. Who can measure the impact of her remarks to us as children: "You such good boy!" (Said with her gentle Slovenian accent.) It made you want to do better.

Or her mini-sermons: "You have to obey father and mother." It made you want to head for the nearest confessional for breaking the 4th Commandment, or go home and do some good deed.

Who can forget her words of praise that lightened the heart and lasted a lifetime within us, as a recurring inspiration of confidence.

We can learn about love—for our family—the way she always seemed to find something good to say about each one of us—that made us feel very special, and much loved.

Most of all, we can learn faith—simple, open, uncomplicated, unquestioning faith. The kind that moves mountains; that keeps a family together on one good leg and a crutch; that conquered life's most formidable obstacles; that now has conquered death itself and earned life everlasting. Her unshakable faith was the deep well from which she drew her extraordinary strength.

Irving Howe, a noted contemporary thinker, philospher, writer, in a recent book wondered: what if we have gone through all this existence of ours and find there is nothing after life. It was an awesome dilemma for him.

I doubt if such a thought ever occurred to Grandma. Her faith told her that life is eternal.

Death is not defeat. We read about so many herioc efforts in medicine; about doctors who begin thinking they've failed when the patient dies.

Spiritually, for the Christian, death is a triumph—the entry to eternal life. That, I'm sure, is how Gradma saw it—in a way uncomplicated by a philosophy or theorlogy; for her, it was a reality, it was truth.

More than 2,000 years ago, the great Roman Senator and orator Cicero said: "Gratitude is not only the greatest virtue; it is the parent of all others."

We are gathered here in gratitude to Grandma—for the sharing, the caring, the sacrifice, the love, that she showered upon each of us.

The finest testimonial, the finest expression of gratitude we can offer to her is for each of us to bear proudly within us the indelible lessons of her life, and to live our lives as a tribute to her.

THE SITUATION IN EL SALVADOR AND CENTRAL AMERICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 30 minutes.

Mr. GONZALEZ. Mr. Speaker, I am impelled to rise at this point because of the extremely growing concern and apprehension that I have expressed before with respect to the quagmire that is building up now in Mexico. The last time I spoke out was with respect to Central America. And I will remind my colleagues very seldom have I addressed myself to this subject matter,

and for the first time did so on April 1, 1980, at which time I addressed myself to then President Carter, because I had been unable to reach anybody on the State Department or the White House decisionmaking-process level.

And again I was motivated to do so because if one will only go back and dig a little bit into history, by April 1, 1980, the situation was reported to me to be very much deteriorating in El Salvador. I pointed out to the President that the United States would have at the most, if we were lucky, 90 days at the most, 3 months, in which it could exercise some of the last remaining leverage of leadership that our country still had at the time.

And when I talk about leadership, I am talking about suasion, not pressure. And unfortunately, I failed, and I think the rest is history.

I also forewarned that I did not think we would get the 90 days, but if we did, and we let it go by without exerting that leadership, American leadership, that then no matter what the United States would do, and it would have to, it would be wrong, that is would be reacting in meager fashion. And we did.

I predicted at the time that it was far better to anticipate, even if it meant that we would have to amend some sections of the Assistance Act, rather than to later find ourselves having to invest our boys in the jungles of South and Central America.

Well, we have our boys and they have been there, and ironically some have been my constituents, and some are still serving in El Salvador. And some in Honduras. And the situation is very precarious. In fact, it has deteriorated to the point where I saw now on the eve of the President's departure to South America, Central America, that I only wish I had had my letter written to him in anticipation of this trip, and dated November 6 when I first read that he was planning definitely to go.

Of course, if Jimmy Carter was inaccessible in 1980, let me tell my colleagues that this President is the most inaccessible I have worked with in 21 years, with six different Presidents. This is the first President who does not even answer a Congressman's letter, but rather delegates the acknowledgement of the letter to some assistant in the White House.

So that I rise only because, Mr. Speaker, the United States will be lucky now if Mexico—now, forget about Central America. At the time I was speaking last, Mexico had not deteriorated, though I had spoken out on the matter and had said in my reports back home on television and radio, in English and Spanish, that Mexico was in a terrible crisis. But nobody would report it. Nobody wanted to see it. In fact, I got heavily criticized and vilified in Mexico, in fact if I had gone to Mexico I would have probably been shot, because it was interpreted down there by the controlled press that I was anti-Mexican. Here a man whose ancestry goes back to northern Mexico, to 1561, and who's members of that family are still in that area.

So that it shows you, though, the situation now.

The United States, I say at this time, we will be lucky, the United States will be lucky if Mexico turns out to be our Poland. But I am afraid that I must be pessimistic and say that it is more likely that Mexico is going to turn out to be our Afghanistan.

Now, this sounds again very, very flamboyant, and I only hope and pray that I am dead wrong.

In the bitter days of the Vietnam war, the conflict and our policy toward Vietnam generally were often described as being in an endless swamp, a quagmire. A wise and prudent policy it was said would have avoided a miserable and tragic conflict, too costly in life, limb, and treasure for any conceivable gain. History will be the judge of those bitterly argued issues. But in the meanwhile, we are faced here and now with new challenges and new choices.

Now the field is much closer to home. Now the challenges in Latin America beginning immediately south of us in Mexico and parts of which the President departs today to visit.

I regret to say that after my experience in speaking out on El Salvador generally, and related subject matters later, that I find the same obtuseness that I discovered all during the process of what turned out to be the Vietnam war.

Latin America is plagued by poverty, it is a poverty compounded by the general recession in the world today.

Matters that we notice but little in our own great economy have catastrophic effects in Latin America. A drop in the demand or price for tin has enormous consequences in Boliva. Chile reels when copper sales are off. Aluminum-dependent economies in other countries feel tremendous disruption if the use of their product declines or the price drops.

□ 1840

Latin America has been something of history's orphan. Well, let me say that it is the U.S. history's orphan; but the accumulated grief of centuries is ready to burst. We see the warning signs everywhere.

The so-called Sandinista revolution, the brutality that is a fact of life, not ony in Salvador now, but in Guatemala and on the border along with Mexico.

I visited just last week with a high religious dignitary, a church official who serves in the Diocese of Chiapus, which is a Mexican State bordering with Guatemala. That visit with him has been one of the most devastating and sad and tragic stories I have ever heard, with the United States deeply involved and yet not one report in our press have I seen.

As I am speaking here today, babies of the peasants in northern Guatemala are having their stomachs ripped out by soldiers' bayonets, bayonets made in the USA.

We are having all the brutality that some of us have read about in wars generally and specifically in these wars that have been marking the development of history since 1945.

The atrocities being perpetrated now in Guatemala, with a growing danger of conflict between Mexico and Guatemala because of old feuds and disputes that exist there, that our media does not either report or reflect in the least. I have yet to see any story written on that and yet right now the situation is tense along the Mexican-Guatemalan border.

Now I know why. When I reported to this House and exposed the secret deal between our Government and Mexico in 1980 whereby we provided Mexico with about a dozen F-5-E's and then I was the one who reported earlier this year on this floor the so-called sale of two of our destroyers from our active duty destroyer list as scrap to Mexico, and I raised the question, why? This is a radical departure from Mexican policy since the revolution, since 1910.

All Mexican leaders have prided themselves in not advocating anything that would be consistent with what any other country would define as a large standing army. Their proudful boast has been, "We are not an aggressor nation and never will be. We are the preachers of the doctrine of 'auto determinacion,' self-determination, no intervention." And proudfully, all of a sudden, here is a President who finds it necessary to arm Mexico in a big way.

Also as I have brought out, and I have not seen it reported in the press, our deal to give about 14 F-16's to Venezuela. Why?

The F-16 is a big issue with Israel—but Venezuela? What is the purpose behind all this. Well, at the time of the Mexican deal I did not know, but now that the shapes are developing, I can say that it was that mistaken erroneous Haig-Reagan policy of sowing dragon's teeth along the Caribbean and south of us and now we are going to see those dragon teeth sprouting horrible and calamitous consequences for us and our boys.

What I am saying here today, even if we were to have acted on some suggestions that I have written the President about, I have not been so closed minded that I am not willing to risk the debate of exposure of my ideas

and recommendations, but I do think that they deserve at least some attention, but they have not, either in the Congress or in the White House.

I have written letters to the proper committee chairmen. At least I have had them acknowledged, which is more than I have had from President Reagan; but what I am saying right now, and I repeat and I hope I am dead wrong, but if I felt that the odds were even 50-50, I would not be wasting anybody's time here today, but we are going to have our Poland, if we are lucky; Afghanistan, if we jog along the way we are.

Mexico is a great and proud nation. It is ravaged by economic misfortune, monstrous human suffering, and lamentably terrible corruption—terrible corruption. Yet we have no real program to help overcome the misfortune or to alleviate the suffering. Mexico is our poor cousin, as I said, our Poland.

In Central America also we have too little idea of what the realities and the possibilities are. We have wasted too much time in declining to confront the issues, the realities, and in deciding what to do. Even now there is no clear policy.

Just look. Haig in this general arms pushing and selling, twisted Argentina's leaders to send a military component to help us "destabilize" the Sandinista regime in Nicaragua.

Is it surprising that Argentina then felt that at least we had a moral obligation when they got into a war with England?

The American press reports nothing that I have seen in any of our great organs or in the electronic media about what that feeling is now in Latin America, even though most of those countries have had no use for the Argentinian regime.

A great friend of America, the present leader in Peru, refused—refused any kind of courtesy visit or reception to protest America abandoning the Pact of Rio when we went in and sided with England in an active way.

Why should not the Argentinians have felt we were in communication with them when they let us have their soldiers on our insistence?

What press has reported that we have got a thousand Colombians in the Sinai with our so-called peace keeping troops there, and we have over 1,200 of our military from the 81st Airborne right there in the Sinai. Do you read about it? You read about the Marines in Beirut. What about the others? And what about the thousand Colombians who are there because we simply told the Colombian leaders, "If you want to keep on receiving any aid from us, you better let us have some soldiers over here. We need some country to join us in this"—what I consider to be a misbegotten venture, which incidentally the Congress is responsible for. We debated this almost a year ago next month the first time, an unprecedented resolution passed by this Congress mandating military. This has never happened since the First Congress and we got those men there and we got 1,000 Colombians. Has that been reported in the press?

Let me assure you, maybe we have not, maybe our Americans are not informed, but the Europeans are, the Latin Americans are, the Russians are.

We cannot make any mistake now. We have vital interests in Latin America. We do have a positive role to play and we have no time to waste.

I have twice written President Reagan asking that he establish a clear national commitment for long-range progress, but asserting his leadership and the U.S. leadership with our sister nations through the OAS, a program of hope in place of repression.

□ 1850

We, right now, as were the soldiers ripping open the bellies of infants in Guatemala, right now, are identified with the rippers. We are everywhere else. In El Salvador, it is our arms that are killing from both sides. Our CIA, cheek by jowl with the assassins of the archbishop, four nuns and two American labor consultants that were murdered; nothing done about it, and it is not being done.

How long can America continue the luxury of being identified with those forces of oppression, of tyranny, of murder, and of injustice, and still say that we are going to avoid a confrontation, except that the way they will put it is that we have got to put down communism or Castroism or intervention by either of them.

I am certain, of course, that Reagan has not seen any of my letters. I can only hope that whatever desk they have been shuffled to will be seen by somebody who can at least—at least—have the policymakers in the State Department evaluate.

His trip now, for instance, where he will stop, is inciting very heavy criticism from some of the neighboring countries he is going to skip over. His trip is not to announce a grand purpose, as I have suggested, but it is a traveling sales circus, and that is no substitute for a seriously and progressively humane policy.

If we wait for the crisis to burst—and at this point I do not see how it is being avoided—we have waited too long. If we do nothing until the gunfire starts or the banks shut down for good all over, we have waited too long.

Time is not on our side, as I warned, I repeat, on April 1, 1980. There are steps that we can take, immediate actions that we could initiate. I outlined such a program in my letters to the President. I have offered and offer now a repeat of those letters for the RECORD in the hope and in the trust that they will draw some attention toward an area of the world that has sadly lacked our genuine interest much less our priority.

The letters referred to follow:

HOUSE OF REPRESENTATIVES,
Washington, D.C., October 27, 1982.

Hon. RONALD REAGAN,
President of the United States,
The White House, Washington, D.C.

DEAR MR. PRESIDENT: Between 1975 and this year, the foreign indebtedness of Latin American countries quadrupled. During that same time, American bank lending in Latin America doubled. U.S. bank loans to Argentina increased sixfold in that period, while loans to Mexico increased fourfold. Neither Argentina nor Mexico is able to repay its debt. Brazil is also in great difficulty.

The extraordinary problems in Mexico caused the United States to take emergency action to stave off an outright collapse of the Mexican economy. There is still considerable question about Mexico's future. The future course of Mexico and other hard-pressed nations is very much an open question. These are not matters that trouble only the affected countries; economic crises do not respect national borders, they affect us all.

The problems of Mexico, for example, have caused U.S. citizens to take large losses on debts owed to them by Mexico. One constituent of mine is owed almost $200,000 for goods sold in Mexico. He has been told that he can be paid only in pesos, at a rate that would cause him to lose forty per cent of the amount due. The result will be ruinous. Another individual, a wholesaler, has found his business wiped out because his Mexican customers can no longer obtain currency to deal with him. Dozens of others who had a large Mexican retail trade now find their businesses in grave difficulty. Thousands of U.S. citizens with dollar deposits in Mexico are unable to recover their deposits. Hundreds of businesses throughout the border region are near collapse, unemployment is up, and there is no prospect for relief. At the same time, massive unemployment, rapid inflation, and growing desperation is sure to cause a large increase in illegal immigration from Mexico. These are matters that affect Americans, and as such they are of real and immediate concern to our country.

You know, I am certain, that economic disintegration soon leads to social unrest and political disorder. The threat facing Mexico is real. There is no question that disorder in Mexico would create enormous problems in our country, and pose serious challenges to our policy.

The United States cannot ignore the problems of Mexico. Your clear recognition of this fact is evidenced by the emergency action that you took earlier this year. But more than emergency action is needed. It is necessary now for the United States to work with Mexico and other Latin American nations to forge a blueprint for the future. United States leadership and cooperation is essential if the economic problems of Latin America are to be resolved. Failure to address these problems will only complicate our already difficult domestic situation.

I know that you are planning a trip to Latin America at the end of November. Before that time, I believe that the United States should propose a mini-Bretton Woods Conference, to devise workable programs to deal with the debt crisis facing

Latin America, to devise programs for recovery, and to establish mechanisms for cooperation. The problems that exist are too complex to be dealt with on an ad hoc, bilateral basis. They are too difficult to be resolved with emergency actions. They require a genuine program, and a genuine commitment of United States leadership. It was just such a program, just such leadership, and just such commitment at Bretton Woods that enabled the world to recover from the chaos and destruction of World War II, and to benefit from the longest and greatest economic growth of all time.

As matters now stand, the world is threatened with trade warfare, more so than at any time in the past five decades. We know, from long and bitter experience, that beggar-thy-neighbor actions not only fail to resolve domestic problems, but lead down the road to universal tragedy. This need not happen. We can best help ourselves, and our neighbors, by positive and responsive leadership. I urge that you act at once to establish a Western Hemisphere Conference on economic recovery, stabilization and cooperation. This type of conference, like Bretton Woods, offers the best hope of exerting the leadership that is essential to resolving the very great problems that our country and neighbors must face together.

Respectfully yours,

HENRY B. GONZALEZ,
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, D.C., November 6, 1982.

Hon. RONALD REAGAN,
President of the United States,
The White House, Washington, D.C.

DEAR MR. PRESIDENT: Though for the past two years national attention has been concentrated on domestic economic issues, these are momentous times in the realm of foreign policy. Your planned meetings with heads of state in Washington, and your forthcoming journey to Latin America, clearly evidence the scope and depth of urgent problems.

I am, as you know, gravely concerned about the economic and social problems of our neighboring countries—problems that are reflected in grave political events. It was this concern that led me to suggest earlier a hemispheric version of the Bretton Woods talks. Concentrating on economic problems, these talks produced the framework of economic growth, international cooperation, and political stability that blessed the industrial world in postwar times. Since President Nixon ended the Bretton Woods monetary policy in 1971, there has been nothing to replace it. During the intervening years, we have seen an explosive growth in debt, a rapid erosion in trade terms for developing countries, and a steady march toward protectionism and similar beggar-thy-neighbor policies.

It is no secret that the prospect for world economic growth is not very bright today, nor that country after country is finding itself unable to repay debt, resist the drift toward trade warfare (for example, the threat only this week by Secretary Block to dump U.S. dairy products on the world market; Japan's deliberate cheapening of the yen; unwarranted European and Japanese export subsidies), or maintain political stability. More and more, it seems, there is a drift toward radical schemes that promise something different—though the radical is not often something that works. All of this, I think, reflects a growing kind of anarchy. This trend can be stopped, and must be. It can only be done if the world finds within itself the leadership and discipline to agree on sensible programs for the benefit of all—which is what Bretton Woods was all about. If ever there was a time when new arrangements were needed, it is now. If ever there was an opportunity for American leadership, it is now. Opportunity is at hand, and you can grasp it by the forelock, and I urge that you do.

Not only do I think that you should propose a hemispheric conference, on the order of Bretton Woods, I believe you should reassert American commitment to democracy and human rights. This could be done by revising the Haig policy of vast arms sales. It could be done by maintaining insistence (for example) that the Government of El Salvador make genuine progress toward redressing the grivances of that country's people. Violence is no substitute for honest government, and no substitute for necessary reform. The flight of hundreds of thousands of political refugees to our country signifies but one thing: that ours is a land of honest government, a land of open voices, a land where peaceful change is possible.

Our country is frequently blamed for all the problems of neighboring nations. Mexican politicians, no less than Fidel Castro, are prone to blame their ills on the United States. Yet everywhere, the great mass of people look to the United States as the hope for reform, for progress, for a better world. To the extent that our policy nourishes those hopes, helps to realize them, we remain true to our Revolution, our national principles. But if we merely peddle arms, ignore abuse and grievance, and stand silent in the face of overwhelming abuse, we not only fail to live up to our own ideals, we promote enmity elsewhere. Therefore, I hope that you will use your forthcoming journey to revise the Haig arms sales drive, call for a Hemispheric Conference on economic and human progress, and hold high the American dream of freedom for all people.

With all good wishes, I am,

Respectfully yours,

HENRY B. GONZALEZ,
Member of Congress.

SOVIETS CONTINUE TO DENY HUMAN RIGHTS TO VIKTOR AND BATSHEVA YELISTRATOV

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, I rise to call to the attention of my colleagues the unfortunate plight of Viktor and Batsheva Yelistratov, who have been repeatedly denied permission to leave the Soviet Union. Their tragic story is representative of Soviet treatment of Jews and the numerous human righs violations committed against them by the Communists.

The Yelistratovs first applied for an exit visa in 1972, and because of this application, Viktor was fired from his job as a translator of foreign publications. Ever since that time, Viktor has moved from menial job to menial job, and the Soviets have subjected Viktor and his wife, Batsheva, to continued harassment and persecution.

Although over the last decade the Communists have tried to prohibit the Yelistratovs from practicing their religion and from helping other refuseniks, with actions including arrests, imprisonments, beatings, wiretaps, and threats of sending them to the East, the Soviets have been unable to crush their spirit, their determination to emigrate to Israel, and their selfless and fearless assistance to others who are also harassed by the Communists. Their dedication is a source of strength and inspiration for all refusenik families living in the Soviet Union, and all freedom-loving people throughout the world.

The Communists have consistently denied the Yelistratovs permission to emigrate to Israel on the false grounds that Viktor held a job with a secret classification and had access to military secrets. Viktor's closest access to any military secrets was his 2 years of service in the Soviet Army as a radio engineer from 1968 to 1970. This was over 12 years ago, so such a reason given by the Soviets is clearly a poor excuse for prohibiting the Yelistratovs from leaving the country.

Mr. Speaker, unfortunately, the tragic case of Viktor and Batsheva Yelistratov is not unique. Thousands of Soviet Jews daily must face a dismal life of tyranny and oppression under Communist rule, and harassment of Jews seeking to leave the country has increased in recent months. In addition, the rate of Soviet Jewish emigration has significantly declined from a monthly average of approximately 4,000 in 1979 to about 200 at present.

We must protest these human rights violations by the Soviets in the strongest possible terms, and make clear that we will not tolerate such conduct which is inconsistent with the Helsinki Agreement on Human Rights, signed by the Soviets in 1975. I encourage my colleagues in the Congress, and all freedom-loving people throughout the world, to write the Soviet leaders, on behalf of the Yelistratovs, demanding that they be granted freedom to emigrate to Israel, and that persecution of all Soviet Jews must cease, so human rights of Soviet Jews are not trampled on by the Communists.●

REMARKS OF ROBERT L. HARDESTY, CHAIRMAN, BOARD OF GOVERNORS, U.S. POSTAL SERVICE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. FORD) is recognized for 15 minutes.

● Mr. FORD of Michigan. Mr. Speaker, published reports during the past few weeks indicate that the Reagan administration is preparing to launch an effort aimed at undermining the foundation of the traditional American postal system: The Private Express Statutes. This body of law—

which has existed in one form or another since 1775—gives the U.S. Postal Service a partial monopoly over the delivery of letter mail, thereby giving the Postal Service the financial underpinning it needs to carry out its mandate to provide reliable service at reasonable rates in every corner of the Nation.

In anticipation of the coming debate over this vital public policy issue, I want to share with the Members of the House a speech made during the recess by the Chairman of the Postal Service Board of Governors, Robert L. Hardesty. Although admittedly a party at interest in this case, Mr. Hardesty, who is also president of Southwest Texas State University in San Marcos, Tex., presents an objective, lucid, and comprehensive defense of the private express statutes—and of the national postal system which they make possible. I commend Mr. Hardesty on an outstanding presentation and I urge Members to consider his remarks most carefully.

ADDRESS BY ROBERT L. HARDESTY, CHAIRMAN OF THE BOARD OF GOVERNORS, U.S. POSTAL SERVICE, BEFORE THE CONVENTION OF THE NATIONAL ASSOCIATION OF POSTMASTERS, BILOXI, MISS., OCTOBER 6, 1982

I bring you greetings from the Board of Governors of the U.S. Postal Service.

It's a real privilege to be here with you today. You are the front-line managers who deserve so much of the credit for the progress of the Postal Service since postal reorganization. Your skillful management has been essential to the productivity gains of the past decade. Your continued commitment is critical as we work to improve what is already the finest postal operation in the world.

I am proud to be associated with you as we face the challenges and opportunities of the 1980's. To meet those challenges and make the most of those opportunities, the Postal Service, as an institution, must be strong and healthy.

Today, I would like to talk with you about a threat to the strength and health of the Postal Service—a threat that could subvert its fundamental mission to serve all Americans. I refer to the current round of proposals to abolish the private express statutes. As you know, these statutes grant the Postal Service a partial monopoly over the delivery of letter mail, to assure the American people of mail delivery throughout the Nation at uniform rates.

A great debate is beginning in America about the future of these private express laws. This debate is erupting in the Congress, in the executive branch, among mailing groups, in the press, on university campuses. The debate is one the Postal Service must join with deadly earnest. As the key officials on the front line of the Postal Service, you must bring home to every community in America the significance of the postal monopoly to our citizens—and the frightening ramifications of eliminating it.

The past few years have seen numerous calls from influential sources to abolish the private express statutes.

In a 1977 report, the Antitrust Division of the Department of Justice claimed that private express statutes could no longer be justified and that they should be repealed "absent very compelling public policy reasons."

In 1981, the Heritage Foundation stated:

"The postal monopoly is based upon 19th century concepts which are almost completely inappropriate to today's methods of communication. The postal monopoly . . . should probably be abolished entirely. . . . The long term future of the Postal Service should be reexamined. In a competitive age in which the telephone, not the post, provides essential communications, it is unclear why there should be a publicly owned and supported national document delivery company."

In this Congress, four bills to abolish the private express statutes have been introduced.

A few week ago, in testimony before the Joint Economic Committee of the Congress, James Miller, the Chairman of the Federal Trade Commission, challenged the Postal Service to demonstrate that it still deserved the postal monopoly.

I am here today to accept that challenge.

After years of association with the Postal Service—both before and after postal reorganization in 1971—it is my firm conviction that the private express statutes are essential to the public interest as a whole. Those statutes are critical if the Postal Service is to continue to provide universal letter delivery at uniform rates. As the chairman of the House Post Office and Civil Service Committee, William Ford, has stated, the private express statutes are "the financial underpinning [that the Postal Service] needs to provide reliable service at reasonable rates to every corner of the nation."

The private express statutes do not exist to protect the Postal Service. They exist to protect the mailing public. Their abolition would be costly to our taxpayers, chaotic to our systems of commerce and communications, and corrosive to the fabric of our democracy.

It is important to remember what the private express laws are. Basically, they prohibit anyone except the Postal Service from carrying letters on post roads for compensation.

As a practical matter, what does this mean? The Postal Service monopoly applies only to letter mail. In addition, traditional exemptions from the statutes permit a letter to be sent outside the Postal Service, if the sender uses his own carriers or if the carrier receives no compensation. And the Postal Service has suspended the statutes in particular instances. For example, time-sensitive mail may be carried outside the Postal Service.

The private express laws are an important part of our Nation's history. They have existed in one form or another since the beginning of the American postal system in 1775. The Articles of Confederation expressly granted the Government a monopoly over the delivery of letters. Article 9 provided that:

"The United States in Congress assembled shall . . . have the sole and exclusive right and power of . . . establishing and regulating post-offices from one State to another, throughout all the United States, and exacting such postage on the papers passing thro' the same as may be requisite to defray the expenses of the said office."

The authority of the Congress over the provision of postal services was preserved in Article I of the Constitution, which provided that "The Congress shall have Power . . . To establish Post Offices and Post Roads."

In the first years of the Republic, the monopoly permitted the postal system to nourish and consolidate the dramatic growth of the American Nation. The number of post offices doubled every three years during the early decades of the Republic, as postal operations expanded from east coast cities to frontier after frontier.

Our first national leaders recognized the importance of this expansion and the monopoly that made it possible. George Washington advocated expansion of the postal network as a means of increasing the bond between the frontier settlers and the East. "These settlers," he said, "are on a pivot and the touch of a feather would turn them away . . . Let us bind these people to us with a chain that can never be broken." The Postal Service provided strong links for that chain. The expansion of the Postal Service to the frontiers of the South and West was funded largely with mail revenues derived from the eastern cities.

These mail revenues also subsidized certain services critical to the development and preservation of our democracy. To assist the flow of information from Members of Congress to the citizens they represented, these revenues subsidized the free delivery of franked correspondence to and from Federal officeholders. To encourage the publication of local newspapers and help assure the vitality of a free press, these revenues made possible the free delivery of newspapers and news pamphlets within each county in America.

By the 1820's, as volume grew, private express companies began circumventing the rather loose postal monopoly laws then in existence. By the early 1840's, up to half of postal volume—undoubtedly the most profitable half—was being carried outside the postal system. Postal deficits grew so large that in 1845, the Congress revised the law to tighten the postal monopoly, and lowered postage rates. In passing the bill, the Congress indicated that the Government should provide service to all areas, even though such service might not be self-supporting. Losses from rural service were to be offset by revenues from more populous areas. The Congress established a uniform rate for nationwide service. New services were introduced, such as free city delivery in 1863, and free rural delivery in 1896. These services, made possible by the postal monopoly, permitted the development of the mail order industry, which helped bring an ever increasing variety of consumer goods to rural America.

The history of our Nation is marked by a series of very pragmatic contracts between the Federal Government and the American people, to bolster our national strength and promote the public welfare. The private express statutes are one of the most succesful of these historic contracts. We, the people, agreed to give up a small measure of our individual commercial freedom to secure for ourselves and our country the far greater benefit of nationwide mail service, at uniform rates. If we now default on this historic contract, a small number of businesses might profit, but the American people will lose.

Those who would abolish the private express laws believe that men and women driven by the profit motive can deliver all the mail more efficiently, and at a lower cost, than the Postal Service. This is nonsense, the Postal Service is exactly what the word says—a service—not just a business to be dominated by the desire to take home a profit. Sure, a private business can make a profit by delivering some mail at a lower price in certain easily accessible, densely

populated areas. But the consequences for nationwide postal delivery would be disastrous. The universal postal system, as we know it today, would be destroyed.

Scores of private postal operators would spring up in populated areas to offer delivery services for local mail. As smart businessmen, these operators would limit themselves to high-volume, low-cost areas, like Wall Street, and similar downtown business districts. They simply would not bother to deliver mail to high-cost areas such as rural America, less densely populated suburbs, and poor inner-city neighborhoods. They would also not be likely to offer postal consumers conveniences that we have come to rely on, such as window service. No wonder mail service by some of the private operators would be less expensive—they would only provide low-budget delivery service in high-profit areas.

The consequences for the Postal Service would be ominous. This "cream-skimming," as it is called, would take a considerable volume of mail away from the Postal Service. The cost of providing service to rural communities, center-city neighborhoods, and other high-cost areas would skyrocket due to the loss of the urban business volume. The Postal Service would either have to raise its rates dramatically, or more likely, look to the Congress for the lost revenue. The mailers or the taxpayers would be left to bear these costs. If the postal monopoly were eliminated today, and the taxpayers subsidized delivery in nonprofitable areas, the cost of delivering mail to those areas would add $100 billion to the federal deficit by the mid-1990's.

The consequences for the American consumer would be worse, for we would have a balkanized postal service with many delivery systems. In addition to first and second class mail, we would have first and second class communities.

Where does the buck stop under such a balkanized system?

Who accepts the ultimate responsibility for the many services the public has come to expect?

For forwarding the mail when it has to go to another part of the country?

For protecting the privacy of the mail?

For protecting the public against fraud and false advertising?

For handling the huge volumes of foreign mail?

For assuring uniformity of service?

To force the American people to depend on the services of private carriers is to ask them to play Russian roulette with their personal correspondence, their bills, and their financial transactions.

It imposes upon them a crazy quilt system of rates that a genius couldn't keep in his head. If you think that the public has trouble with parcel post rates, just let people try to figure the cost of mailing a letter from New York to Louisville to a rural route outside of Paducah, Ky.—via three different carriers, or two carriers plus the Postal Service.

Having a nationwide system is a clear benefit to the American public and to American business. It justifies a uniform rate for a first class stamp, even if every mailer does not at all times take advantage of the nationwide feature of the system. In putting a first class stamp on his letter, a mailer in New York City or Biloxi, Miss., or Honolulu, Hawaii, can reach anyone in the fifty states from the local mailbox on the nearby street corner. In a world without the private express statutes, the Postal Service simply could not offer such service to everyone at a relatively low uniform price.

Abolition of the private express statutes would have other damaging consequences. The Postal Service's nationwide network would be curtailed, if not abolished. The Federal Government would lose the one contact that most Americans have with the Government on a daily basis. There are over 30,000 post offices in this country, and the Postal Service, through its network of carriers, reaches every point in this land.

Without its nationwide reach, the Postal Service could not provide the Federal Government with such special assistance as selective service registration, or help the FBI and other law enforcement agencies. Programs like "Carrier Alert," where postal carriers check daily on the elderly and handicapped, could not continue. This program has already saved dozens of lives because dedicated mail carriers noticed something wrong at the home of an elderly or handicapped citizen. I doubt whether many private companies, eager to earn a profit on their delivery service, would be interested in conducting such a program.

Other services Americans now take for granted would be likely casualties of a repeal of the private express statutes. The price of the first class stamp covers the cost of forwarding mail in case the addressee has moved. The letter follows the individual until it reaches him. This service is possible under a universal system that can keep track of millions of Americans who change their residences annually. In a balkanized postal world, it is not clear who would be responsible for forwarding mail or who would take mail from one local delivery system to another—and at what surcharge.

And how would international mail be handled? At a time of increasing interdependence, with international communications growing rapidly, predictable and regular communications among Nations are essential. How would foreign postal systems deal with a variety of private postal operations in large cities?

And what about the privacy of mail without a postal monopoly? Today, when someone deposits a check, or letter, or contract in the mail, he is confident that it will not be subject to prying eyes while in the postal system. Indeed, by law, a search warrant issued by a Federal judge is generally required before a first class letter may be opened. As a result, valuable documents and merchandise are placed in the postal system daily without a second though that they will be opened or stolen in transit. Simply put, the mail is safe, and it is private. In the brave new world of several postal systems, I would be less confident about the security and sanctity of any communication that I might send.

Other services would be in jeopardy. At present, postal inspectors help guard the public against mail fraud and false advertising. These frauds, often directed at the naive and the elderly, frequently involve sophisticated nationwide schemes. Enforcement of mail fraud and false representation laws would be virtually impossible if the unscrupulous could operate among many private mail services. Who would enforce these laws? The private companies would certainly not be interested in maintaining an investigative force that would lower profits. And what authority would any private investigative group have? To whom would any such private investigators be answerable?

It is said that abolition of the private express statutes will lead to competition in the delivery of mail, and that this will hold down postal rates. Competition, however, already exists and is having precisely that effect. The Postal Service is but one supplier of communication services in the fiercely competitive communications market. In that market, the Postal Service's share of all communications has declined from 70 percent in 1900 to less than 20 percent today. Of course, the telephone is our greatest competitor, and it is responsible in large part for our declining share of the communications market. On the horizon, an even more formidable competitor looms—electronic communications. As electronic mail and electronic fund transfers become more common and their costs decline, they will compete for a substantial portion of the business transaction service that we now provide.

These communications alternatives serve to hold down postal prices. They require that the Postal Service be as efficient as possible in providing its universal delivery. For if the Postal Service is to compete with electronic communications services, it must be able to provide mailers with a nationwide network that can reach all the people at the lowest price possible.

You and I know that the U.S. Postal Service remains the most efficient postal system in the world, providing reliable, universal service at uniform rates. We know that the private express statutes are essential if we are to continue to be the best, continue to do our job.

But we must take our message to the American people. We must remind each citizen what a universal postal system means to him and to her. That is why I have come to speak to you today—to urge you to take this message back to every community and every citizen in America.

When you return to your home, remind the citizens in the communities you serve what the Postal Service with its universal delivery system means to them.

It means that any American can send a letter to any part of the country no matter how far away, at a uniform rate.

It means that each American gets the same high delivery standards—whether poor or old, a wealthy businessman or a storeroom clerk, or whether he lives in Biloxi, Miss., Harlem in New York City, or at an Alaskan outpost.

It means that the carrier who delivers the mail in you neighborhood is a trusted, reliable employee of an agency of the U.S. Government.

It means that each American can send a private letter, knowing that privacy will be protected as a sacred right.

It means that wherever you live in this Nation, there is a mail carrier who will deliver your letters to you.

It means that when you move to another street, or another city or another State, your important mail will follow you.

It means that you can trace a lost social security check, no matter where in the country you live.

It means that you can be protected from fraudulent mail schemes and false advertising.

If you remind your friends and customers what a universal postal system means to each of them, they will stand with you and with the Board of Governors of U.S. Postal Service. They will join us in the fight to preserve the postal service that has meant so much to the commercial development of this great Nation and the individual liberty of its citizens.●

COMMENTS BY CHARLES McDOWELL ON VIETNAM WAR MEMORIAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Colorado (Mr. WIRTH) is recognized for 5 minutes.

● Mr. WIRTH. Mr. Speaker, I had the privilege of first visiting the Vietnam War Memorial with a group of Colorado Vietnam veterans on November 12. It was a most moving experience. The sight of 57,939 names on that gleaming black wall was a stunning reminder of the tragedy of that war, and I hope it will help prevent our country from ever becoming involved in such a conflict again.

I watched many veterans and family members of the dead who gathered to look for names of friends, sons, husbands, and brothers in those stark panels which reflected their own faces. I shared a moment with one of the Colorado veterans who held a bouquet below the name of one of those who gave his life in Vietnam—someone who had been his close childhood friend. The monument evoked many such intimate personal responses from all who were touched by the Vietnam war. Despite the controversy surrounding the design, I did not see anyone at the memorial who was unmoved by its painful message, and I would like to commend those dedicated people responsible for its construction.

Many eloquent words have been written about the memorial and the national ceremonies to honor the Vietnam veterans. I would like to commend to my colleagues one particularly beautiful statement—that made by Charles McDowell of the Richmond Times-Dispatch on Washington Week in Review on November 12:

TRANSCRIPT OF REMARKS BY CHARLES McDOWELL OF THE RICHMOND TIME-DISPATCH ON WASHINGTON WEEK IN REVIEW, NOVEMBER 12, 1982

PAUL DUKE: We've had thousands of people streaming into the capital this week, Charlie, to salute and honor some people who have not been saluted and honored before, the veterans of the Vietnam War.

CHARLES McDOWELL: We've had a week of ceremonies to salute those veterans. Vietnam veterans are people who feel as if they've been ignored, indeed disdained, for a very long time. Saturday we will dedicate the Vietnam Veterans Memorial, which is more than a memorial. It seems to me it's a symbol of all our needs to come to terms with that war and to come to terms with ourselves. So on the Mall, with Lincoln and Washington and the great museums of our heritage, we have a new monument for a war we didn't win, a war that wore away at most of the things that hold us together, a war that divided the generations—young and old, and a war that divided the young generation against itself.

Of the people eligible for service in the Vietnam War, far more than half avoided military service. Of the minority that was left, 2 million of them went to Vietnam and they took the casualties of body and in spirit. They were largely the poor, the black, the less sophisticated among us, perhaps can be said. In any case, they weren't in college. Because they weren't in college, they weren't deferred from being killed, is a harsh way to put it. Many were responding just to a call to duty of their country. Few probably knew a lot about the more sophisticated notion that a government can be wrong, and a government can be tragically wrong, and if it's wrong enough, resistance becomes moral; that was probably more than some of those people got into. In any case, the bitterness of the division of that generation left its mark on all of us to this day. A monument to a national trauma like that is necessarily somewhat ambiguous. It seems to me that in this monument's ambiguousness—ambiguity—there's truth, and the simple truth is to be found in 57,939 names carved in a black marble wall. Those are the dead, and those are the first things to remember when you remember Vietnam.

CHARLES CORDDRY: Charlie, there's been in my memory hardly as much controversy about anything in this city as about what this memorial's shape would be. It seems a little obvious to me that you've been down there looking at it. What do you make of it?

CHARLES McDOWELL: Charlie, it's an amazing place. It causes a tremendous quiet to come over you even if you've come to dislike it or like it. A lot of that memorial is what you've been through, I think that's probably proper. It's a 500-foot wall; it's angled like a PFC stripe; it's black granite—one of the most reflective substances in the world. As you look at it, at 58 thousand names, you realize the reflections you're seeing. You do see the Washington Monument; you do see the Lincoln Memorial. You see earth and sky and grass and trees. And if you look more closely you see the people looking at the names as clearly as you see the names. You see old couples holding hands; you see buddies from Vietnam taking pictures, or touching the monument—or crying. You see a man rolling a wheel-chair 500 feet, the length of that monument, and if you're low enough to look up as I was, he's moving across the sky itself. A lot happens there. Always one thing is constant in these images that change—57,939 names.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. LEHMAN (at the request of Mr. WRIGHT) for this week, on account of illness.

Mr. SHUSTER (at the request of Mr. MICHEL), for today and the balance of the week, on account of recuperation necessitated by several major surgeries due to an auto accident in the Ninth District on October 11, 1982.

Mr. TAUKE (at the request of Mr. MICHEL), for today until 4 p.m., on account of official business.

Mr. YATES (at the request of Mr. WRIGHT), for today, on account of illness in the family.

Mr. YOUNG of Florida (at the request of Mr. MICHEL), for today after 1:30 p.m., on account of a death in the family.

Mr. JONES of North Carolina (at the request of Mr. WRIGHT), for today, on account of medical reasons.

Mr. JONES of Tennessee (at the request of Mr. WRIGHT), for today, on account of illness in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. CONABLE, for 60 minutes, today.

(The following Members (at the request of Mr. MORRISON) to revise and extend their remarks and include extraneous material:)

Mr. WINN, for 30 minutes, today.

Mr. SCHULZE, for 10 minutes, today.

Mr. FRENZEL, for 20 minutes, today.

Mr. COLLINS of Texas, for 30 minutes, today.

Mr. ARCHER, for 10 minutes, today.

Mr. MICHEL, for 60 minutes on November 30.

Mr. ERLENBORN, for 60 minutes on November 30.

Mr. DORNAN of California, for 60 minutes on December 3.

Mr. DORNAN of California, for 60 minutes on December 7.

Mr. LUNGREN, for 60 minutes on December 7.

Mr. DORNAN of California, for 60 minutes on December 9.

Mr. DORNAN of California, for 60 minutes on December 13.

Mr. DORNAN of California, for 60 minutes on December 14.

Mr. DORNAN of California, for 60 minutes on December 16.

(The following Members (at the request of Mr. DORGAN of North Dakota) to revise and extend their remarks and include extraneous material:)

Mr. GONZALEZ, for 30 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. OBERSTAR, for 5 minutes, today.

Mr. FORD of Michigan, for 15 minutes, today.

Mr. WIRTH, for 5 minutes, today.

Mr. LEVITAS, for 60 minutes, on December 2.

Mr. LEVITAS, for 60 minutes, on December 6.

Mr. SKELTON, for 60 minutes, on December 8.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. MORRISON) and to exclude extraneous matter:)

Mr. BROYHILL.

Mr. PURSELL.

Mr. LEWIS in two instances.

Mr. PARRIS in two instances.

Mr. BROOMFIELD.

Mr. GREEN.

Mr. RHODES.

Mr. FISH in two instances.

Ms. FIEDLER in two instances.

Mr. OXLEY.
Mr. HYDE.
Mr. THOMAS.
Mr. BEREUTER.
Mr. MCGRATH.
Mr. ARCHER.
Mr. LOWERY of California.
Mr. MOORHEAD.
Mr. LUJAN.
Mr. ROUSSELOT.
Mr. GINGRICH.
Mr. CONTE.
Mr. PASHAYAN.
Mr. YOUNG of Alaska.
Mr. SAWYER.
Mr. LAGOMARSINO.

(The following Members (at the request of Mr. DORGAN of North Dakota) and to include extraneous matter:)

Mr. KILDEE in two instances.
Mr. SIMON in two instances.
Mr. MATSUI in two instances.
Mr. CLAY in two instances.
Mr. ANDERSON in 10 instances.
Mr. GONZALEZ in 10 instances.
Mr. ROSENTHAL in 10 instances.
Mrs. BOUQUARD in five instances.
Mr. HAMILTON in 10 instances.
Mr. BROWN of California in 10 instances.
Mr. ANNUNZIO in six instances.
Mr. JONES of Tennessee in 10 instances.
Mr. BONER of Tennessee in five instances.
Mr. WAXMAN.
Mr. OTTINGER.
Mr. FRANK in five instances.
Mr. COELHO.
Mr. MOFFETT.
Mr. FORD of Michigan.
Mr. GAYDOS.
Mr. BOLAND.
Mr. LANTOS.
Mr. GUARINI in two instances.
Mr. YATRON in two instances.
Mr. D'AMOURS.
Mr. SAVAGE.
Mr. HUBBARD.
Mr. SKELTON in three instances.
Mr. MOTTL in two instances.
Mr. CONYERS.
Mr. BROOKS.
Mr. BINGHAM.
Mr. MILLER of California.
Mr. AUCOIN.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 273. An act for the relief of William Vojislav Rankovic, Stanislava Rankovic, husband and wife; and William Rankovic, Junior, and Natalie Rankovic, their children; to the Committee on the Judiciary;

S. 369. An act for the relief of Ludina V. Dave; to the Committee on the Judiciary;

S. 370. An act for the relief of Cecilia Dagmang; to the Committee on the Judiciary;

S. 372. An act for the relief of Dr. Mahmooda Haquani; to the Committee on the Judiciary;

S. 374. An act for the relief of Rosita A. Genio; to the Committee on the Judiciary;

S. 375. An act for the relief of Irma A. Gunda; to the Committee on the Judiciary.

S. 377. An act for the relief of Estrellita Tapang; to the Committee on the Judiciary.

S. 379. An act for the relief of Lily T. Paragas; to the Committee on the Judiciary.

S. 617. An act for the relief of Mrs. Elsie B. Lawson; to the Committee on the Judiciary.

S. 642. An act for the relief of Nesca Nicolas and her children Patricia Robert Nicolas and Bernard Robert Nicolas; to the Committee on the Judiciary.

S. 717. An act for the relief of Carole Joy Maxfield-Raynor and Bruce Sherlock Maxfield-Raynor, wife and husband, and their children Charlton Bruce Maxfield-Raynor and Maxine Anne Maxfield-Raynor; to the Committee on the Judiciary.

S. 747. An act for the relief of Seela Jeremiah Piula; to the Committee on the Judiciary.

S. 1329. An act for the relief of Samuel Joseph Edgar; to the Committee on the Judiciary.

S. 1465. An act for the relief of Kwok Tung Yu; to the Committee on the Judiciary.

S. 1470. An act for the relief of Grietje Rhea Pietens Beumer, Johan Christian Beumer, Cindy Larissa Beumer, and Cedric Grant Beumer; to the Committee on the Judiciary.

S. 1499. An act for the relief of Prashant Agarwal; to the committee on the Judiciary.

S. 1513. An act for the relief of Cirilo Raagas Costa and Wilma Raagas Costa; to the Committee on the Judiciary.

S. 1547. An act for the relief of Alberto Hernandez Perez; to the Committee on the Judiciary.

S. 1636. An act for the relief of Kim Hae Ok Heimberger; to the Committee on the Judiciary.

S. 1782. An act to amend section 305 of the Federal Property and Administrative Services Act of 1949 pertaining to contract progress payments made by agencies of the Federal Government, providing for the elimination of retainage in certain instances, and for other purposes; to the Committee on Government Operations.

S. 1838. An act for the relief of Cesar Noel Jump; to the Committee on the Judiciary.

S. 2039. An act for the relief of Margit Liberda and her daughter, Veronika Koszegi; to the Committee on the Judiciary.

S. 2103. An act for the relief of Kok Djen Su and Grace Su, husband and wife; to the Committee on the Judiciary.

SENATE ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

The SPEAKER announced his signature to enrolled bills and joint resolutions of the Senate of the following titles:

S. 478. An act to provide for the partitioning of certain restricted Indian land in the State of Kansas;

S. 734. An act to encourage exports by facilitating the formation and operation of export trading companies, export trade associations, and the expansion of export trade services generally;

S. 1018. An act to protect and conserve fish and wildlife resources, and for other purposes;

S. 1210. An act to authorize appropriations for the operations of the Office of Environmental Quality and the Council on Environmental Quality during fiscal years 1982, 1983, and 1984, and withdraw certain lands within the Mount Baker-Snoqualmie National Forest from leasing under mineral and geothermal leasing laws;

S. 1573. An act to exempt the Lake Oswego, Oregon, hydroelectric facility from part I of the Federal Power Act (Act of June 10, 1920) as amended, and for other purposes;

S. 1698. An act to amend the Immigration and Nationality Act to provide preferential treatment in the admission of certain children of U.S. citizens;

S. 1872. An act to provide for a study of grazing phaseout at Capitol Reef National Park, and for other purposes;

S. 2036. An act to provide for a job training program and for other purposes;

S. 2146. An act to extend the lease terms of Federal oil and gas leases, W66245, W66246, W66247, and W66250;

S. 2252. An act to authorize appropriations for the Coast Guard for fiscal years 1983 and 1984, and for other purposes;

S. 2375. An act to extend the expiration date of the Defense Production Act of 1950;

ADJOURNMENT

Mr. GONZALEZ. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 54 minutes p.m.) the House adjourned until Tuesday, November 30, 1982, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4918. A communication from the President of the United States, transmitting a request for appropriation amendments and amended appropriation language for fiscal year 1983 (H. Doc. No. 97-247); to the Committee on Appropriations and ordered to be printed.

4919. A communication from the President of the United States, transmitting a request for appropriation amendments and amended appropriation language for fiscal year 1983 (H. Doc. No. 97-248); to the Committee on Appropriations and ordered to be printed.

4920. A letter from the Secretary of State, transmitting a report explaining the manner in which the national interest of the United States has been served by payments made to private individuals or corporations in satisfaction of assurance agreements or under loan guarantees with respect to loans made or credits extended to the Polish People's Republic in the absence of a declaration of default, pursuant to section 306 of Public Law 97-257; to the Committee on Appropriations.

4921. A letter from the Secretary of State, transmitting a report explaining the manner in which the national interest of the United States has been served by payments made to private individuals or corporations during the month of October in satisfaction of assurance agreements or under loan guarantees with respect to loans made or credits extended to the Polish People's Republic in the absence of a declaration of default, pursuant to section 306 of Public Law 97-257; to the Committee on Appropriations.

4922. A letter from the Director, Office of Management and Budget, Executive Office of the President, transmitting a cumulative report on rescissions and deferrals of budget authority as of October 1, 1982, pursuant to section 1014(e) of Public Law 93-344 (H. Doc. No. 97-246); to the Committee on Appropriations and ordered to be printed.

4923. A letter from the Comptroller General of the United States, transmitting a report on a revision to an existing deferral increasing the amount deferred, proposal D82-249A, contained in the message from the President dated September 23, 1982, pursuant to section 1013 of the Impoundment Control Act; to the Committee on Appropriations.

4924. A letter from the Acting Assistant Secretary of Defense (Comptroller), transmitting notice of transfers of funds appropriated to the Department of Defense, pursuant to section 733 of Public Law 97-114; to the Committee on Appropriations.

4925. A letter from the Principal Deputy Assistant Secretary of Defense (Comptroller), transmitting a report of the value of property, supplies, and commodities provided by the Berlin Magistrate and under German Offset Agreement for the quarter July 1, 1982, through September 30, 1982, pursuant to section 719 of Public Law 97-114; to the Committee on Appropriations.

4926. A letter from the Secretary of the Air Force, transmitting a report that a weapon system has exceeded a baseline unit cost by more than 25 percent, pursuant to section 917(c)(2) of Public Law 97-86; to the Committee on Armed Services.

4927. A letter from the Secretary of the Navy, transmitting notice of the Department's delay in submitting formal 30-day reports on unit cost increases in excess of 15 percent, pursuant to section 139b(d)(3)(A) of Public Law 97-252; to the Committee on Armed Services.

4928. A letter from the Secretary of the Navy, transmitting a report that a weapon system has exceeded a baseline unit cost by more than 25 percent, pursuant to section 917(c)(2) of Public Law 97-86; to the Committee on Armed Services.

4929. A letter from the Director, Defense Security Assistance Agency, transmitting a copy of Presidential Determination No. 82-20 regarding the sale of communications equipment to Lebanon and a plan for the prompt replenishment of defense stocks as a result of this sale, pursuant to 10 U.S.C. 975(b); to the Committee on Armed Services.

4930. A letter from the Director, Federal Emergency Management Agency, transmitting a report that the Agency acquired no real or personal property during the quarter ending September 30, 1982, pursuant to section 201(h) of the Federal Civil Defense Act of 1951; to the Committee on the Armed Services.

4931. A letter from the Deputy Assistant Secretary of Defense, transmitting notice of the Navy's intention to omit the clause authorizing the Comptroller General to examine certain records which would otherwise be required to be included in the contract with the Golcuk Naval Shipyard, Golcuk, Turkey, for repair and alteration to U.S. 6th Fleet vessels, pursuant to 10 U.S.C. 2313(c); to the Committee on Armed Services.

4932. A letter from the Deputy Assistant Secretary of Defense, transmitting notice of the Navy's intention to omit the clause authorizing the Comptroller General to examine certain records which would otherwise be required to be included in the contract with the Oficinas Gerais De Material Aeronautico, Alverca, Portugal, for standard depot level maintenance services on U.S. Navy C-1A, C-2, C-130, and C-131 aircraft; to the Committee on Armed Services.

4933. A letter from the Deputy Assistant Secretary of Defense (Administration), transmitting notice of the Army's intention to exclude the examination of records by the Comptroller General from a contract with the Swiss Government, pursuant to 10 U.S.C. 2313(c); to the Committee on Armed Services.

4934. A letter from the Deputy Assistant Secretary of Defense (Comptroller-Administration), transmitting notice of the Navy's intention to exclude the examination of records by the Comptroller General from a contract with the United Kingdom, pursuant to 10 U.S.C. 2313(c); to the Committee on Armed Services.

4935. A letter from the Deputy Assistant Secretary of Defense (Comptroller-Administration), transmitting notice of the Navy's intention to exclude the examination or records by the Comptroller General from a contract with the Ministry of Defence, United Kingdom, pursuant to 10 U.S.C. 2313(c); to the Committee on Armed Services.

5167. A letter from the Deputy U.S. Trade Representative, Executive Office of the President, transmitting the semiannual report on the operations and effect of the International Sugar Agreement, pursuant to section 5 of Public Law 96-236; jointly, to the Committees on Agriculture and Ways and Means.

5168. A letter from the Secretary of Labor, transmitting the 1981 annual report on the administration of the Employee Retirement Income Security Act (ERISA), pursuant to section 513(b) of that act; to the Committee on Education and Labor and Ways and Means.

5169. A letter from the Secretary of Health and Human Services, transmitting a report on the study of equitable formulas for the allocation of block grant funds for Preventive Health and Health Services; Alcohol and Drug Abuse and Mental Health Services; and Maternal and Child Health Services, pursuant to section 1902(e) and section 1912(d) of the Public Service Health Act, and section 2192(b)(2) of Public Law 97-35; jointly, to the Committees on Energy and Commerce and Ways and Means.

5170. A letter from the Comptroller General of the United States, transmitting a report on how the Department of Housing and Urban Development establishes and reports information on the extent to which lower income persons benefit from the community development block grant program (GAO/RCED-83-15, November 3, 1982); jointly, to the Committees on Government Operations and Banking, Finance and Urban Affairs.

5171. A letter from the Comptroller General of the United States, transmitting a report on the problems hampering the Foreign Commercial Service's RX progress, (GAO/ID-83-10, October 18, 1982); jointly, to the Committees on Government Operations and Foreign Affairs.

5172. A letter from the Comptroller General of the United States, transmitting a report on the Veterans' Administration's agent orange examinations, (GAO/HRD-83-6, October 25, 1982); jointly, to the Committees on Government Operations and Veterans' Affairs.

5173. A letter from the Comptroller General of the United States, transmitting a report on the problems of the Department of Interior on public range land improvement (GAO/RCED-83-23; October 14, 1982); jointly, to the Committees on Government Operations, Interior and Insular Affairs, and Agriculture.

5174. A letter from the Comptroller General of the United States, transmitting a report on a comprehensive approach needed to help control prescription drug abuse; jointly, to the Committees on Government Operations, Energy and Commerce, and the Judiciary.

5175. A letter from the Comptroller General of the United States, transmitting a report on how existing appropriations practices used to fund relief programs for major disaster such as Mount St. Helens could hamper recovery from future catastrophic disasters (GAO/RCED-83-16, November 15, 1982); jointly, to the Committees on Government Operations, Appropriations, and Public Works and Transportation.

SUBSEQUENT ACTION ON A REPORTED BILL SEQUENTIALLY REFERRED

Under clause 5 of rule X:

Consideration of H.R. 6514 by the Committees on Agriculture, Education and Labor, Energy and Commerce, and Ways and Means extended for an additional period ending not later than December 1, 1982.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BENNETT:

H.R. 7305. A bill to insure that a country receiving foreign assistance cooperate with the Government of the United States in its efforts to reduce the flow of illicit drugs from such country; to the Committee on Foreign Affairs.

H.R. 7306. A bill to amend the Internal Revenue Code of 1954 to deny the benefits of the accelerated cost recovery system to any business which does not expand its employment; to the Committee on Ways and Means.

By Mr. BIAGGI:

H.R. 7307. A bill to amend the Internal Revenue Code of 1954 to permit certain cooperative housing corporations to replace conventional financing with tax-exempt financing; to the Committee on Ways and Means.

By Mr. BROYHILL (for himself and Mr. MADIGAN):

H.R. 7308. A bill to amend the Motor Vehicle Information and Cost Savings Act to provide for the use of the Webster-heise valve by 10 percent of new gasoline-powered Government passenger vehicles purchased in model year 1984 and thereafter; to the Committee on Energy and Commerce.

By Mr. CONTE (for himself, Mr. HYDE, Mr. REUSS, Mr. DORNAN of California, Mr. BARNES, Mr. CORRADA, Mrs. BOGGS, Mr. LEHMAN, Mr. HUGHES, Mr. HORTON, Mr. ROE, Mr. FRENZEL, Mr. FRANK, Mrs. HECKLER, Mr. ADDABBO, Mr. MARKEY, Mr. CONABLE, Mr. EDGAR, Mr. PERKINS, Mr. HAMMERSCHMIDT, Mr. BIAGGI, Mr. O'BRIEN, Mr. YATRON, Mrs. CHISHOLM, Mr. FISH, Mr. BENNETT, Mr. PEPPER, Mr. CROCKETT, Mr. PORTER, Mr. HOYER, Mr. HOWARD, Mr. KEMP, Mr. SUNIA, Mr. FINDLEY, Mr. HANSEN of Idaho, Mr. LUNGREN, Mr. NAPIER, Mr. FORD of Tennessee, Mr. DOWDY, Mr. RATCHFORD, Mr. DASCHLE, Mr. LELAND, Mr. SAWYER, Mr. LEBOUTILLIER, Mrs. KENNELLY, Mr. CORCORAN,

Mr. MOFFETT, Mr. BUTLER, Mr. MAVROULES, Mr. LEVITAS, Mr. EMERY, Mr. PRITCHARD, Mrs. ROUKEMA, Mr. RUDD, Mr. YOUNG of Florida, Mr. MOTTL, Mr. BAILEY of Missouri, Mr. ERDAHL, Mr. DAUB, Mr. BLILEY, Mr. SIMON, Mr. GINGRICH, Mr. HALL of Ohio, Mr. DUNCAN, Mr. TAUKE, Mrs. SNOWE, Mr. SCHEUER, Mr. LONG of Louisiana, Mr. VANDER JAGT, Mr. YOUNG of Alaska, Mr. FAUNTROY, Mr. MOAKLEY, Mr. BEVILL, Mr. GRISHAM, Mr. THOMAS, Mr. DREIER, Mr. LOWRY of Washington, Mr. BEILENSON, and Mr. DENARDIS):

H.R. 7309. A bill to provide for the establishment of a Commission on the Bicentennial of the Constitution; to the Committee on Post Office and Civil Service.

By Mr. DOWDY:

H.R. 7310. A bill to amend the Agricultural Act of 1949 to repeal the authority of the Secretary of Agriculture to make certain deductions from the proceeds of sale of milk marketed commercially by producers; to the Committee on Agriculture.

By Mr. FRENZEL (for himself and Mr. GIBBONS):

H.R. 7311. A bill to amend the Internal Revenue Code of 1954 to provide more equitable taxation of foreign source income, and for other purposes; to the Committee on Ways and Means.

By Mr. GLICKMAN (for himself, Mr. SKELTON, Mr. SIMON, Mr. MINISH, Mr. BEDELL, Mr. STOKES, Mr. MAZZOLI, Mr. WHITTAKER, and Mr. HOWARD):

H.R. 7312. A bill to amend the Natural Gas Policy Act of 1978 to limit the use of "take or pay" clauses and to impose a prudence test; to the Committee on Energy and Commerce.

By Mr. GLICKMAN (for himself, Mr. SKELTON, Mr. SIMON, Mr. MINISH, Mr. STOKES, Mr. MOTTL, Mr. MINETA, and Mr. HOWARD):

H.R. 7313. A bill to amend the Natural Gas Policy Act of 1978 to impose a moratorium on price increases; to the Committee on Energy and Commerce.

By Mr. GUNDERSON:

H.R. 7314. A bill to amend the Agricultural Act of 1949 to modify the dairy price support program for fiscal years 1983 through 1985; to the Committee on Agriculture.

By Mr. LANTOS:

H.R. 7315. A bill to freeze for fiscal year 1983 the rate of salary payable to Members of Congress; to the Committee on Post Office and Civil Service.

By Mr. LUJAN:

H.R. 7316. A bill to establish the National Park Visitor Facilities Fund, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. NOWAK:

H.R. 7317. A bill to prohibit increases in the wellhead prices of natural gas during the 6-month period beginning December 1, 1982; to the Committee on Energy and Commerce.

By Mr. OBERSTAR:

H.R. 7318. A bill to amend the Railroad Retirement Act of 1974 with regard to the definition of the term "spouse"; to the Committee on Energy and Commerce.

By Mr. SABO:

H.R. 7319. A bill to amend the Internal Revenue Code of 1954 to impose an additional 10-cent tax on any liquid sold for use or used as a fuel in a highway vehicle and to provide that the revenue from such tax shall be available to State and local governments for maintenance of public roads and for other traffic-related purposes; jointly, to the Committees on Ways and Means and Public Works and Transportation.

By Mr. SMITH of Oregon (for himself and Mr. APPLEGATE):

H.R. 7320. A bill to freeze for fiscal year 1983 the rate of salary payable to Members of Congress; to the Committee on Post Office and Civil Service.

By Mr. STANGELAND:

H.R. 7321. A bill to amend the Agricultural Act of 1949 to modify the dairy price support program; to the Committee on Agriculture.

By Mr. STARK (for himself and Mr. DREIER):

H.R. 7322. A bill to direct the President to seek negotiations with the Soviet Union for the establishment of a permanent joint United States-Soviet Communications Center to provide an additional channel for communications in order to reduce the threat of an accidental nuclear war; to the Committee on Foreign Affairs.

By Mr. STUDDS (for himself, Mr. BARNES, and Mrs. ROUKEMA):

H.R. 7323. A bill with regard to Presidential certifications on conditions in El Salvador; to the Committee on Foreign Affairs.

By Mr. APPLEGATE:

H.J. Res. 625. Joint resolution to designate the week beginning January 2, 1983, as "National Buy American Products Week"; to the Committee on Post Office and Civil Service.

By Mr. BONKER:

H. Con. Res. 428. Concurrent resolution condemning all forms of religious persecution and discrimination as a violation of human rights; to the Committee on Foreign Affairs.

By Mr. LOTT:

H. Res. 609. Resolution providing for the consideration of the bill (H.R. 746) to amend the Administrative Procedure Act to make regulations more cost effective, to insure periodic review of old rules, to improve regulatory planning and management, to eliminate needless formality and delay, to enhance public participation in the regulatory process, and for other purposes; to the Committee on Rules.

By Mr. WINN (for himself, Mr. ROBERTS of Kansas, Mr. WHITTAKER, Mr. JEFFRIES, Mrs. SMITH of Nebraska, Mr. COLEMAN, Mr. BEREUTER, and Mr. TAYLOR):

H. Res. 610. Resolution expressing the sense of the House regarding the need for changing the laws governing the natural and propane gas markets in order to provide relief for consumers from excessive natural gas prices; to the Committee on Energy and Commerce.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

508. By the SPEAKER: Memorial of the Legislature of the State of Texas, relative to comprehensive and coordinated services for elderly citizens; to the Committee on Education and Labor.

509. Also, memorial of the Legislature of the Territory of Guam, relative to the Government Comptroller for Guam; to the Committee on Interior and Insular Affairs.

510. Also, memorial of the Legislature of the State of Montana, relative to distribution of aviation industry Federal taxes to units of State and local governments; to the Committee on Public Works and Transportation.

511. Also, memorial of the Legislature of the State of California, relative to vessel emissions, jointly, to the Committees on Energy and Commerce and Merchant Marine and Fisheries.

512. Also, memorial of the Legislature of the Territory of Guam, relative to U.S. citizenship for former members of a special military unit known as the Philippine Scouts; jointly, to the Committee on Veterans' Affairs and the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. HUBBARD:

H.R. 7324. A bill for the relief of Mithila Rajendra Agshikar Bharne; to the Committee on the Judiciary.

By Mr. PERKINS:

H.R. 7325. A bill for the relief of Carmen Villagran; to the Committee on the Judiciary.

H. Res. 497: Mr. BINGHAM.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

636. By the Speaker: Petition of the City Council, Berkeley, Calif., relative to the Western Regional Research Center, Albany, Calif., to the Committee on Agriculture.

637. Also, petition of the Enlisted Association of the National Guard of the United States (EANGUS), relative to the readiness of the National Guard; to the Committee on Armed Services.

638. Also, petition of the National Association of Retail Druggists, Alexandria, Va., relative to efforts to produce tamperproof medication and packaging of nonprescription, over-the-counter products; to the Committee on Energy and Commerce.

639. Also, petition of the Episcopal Diocese of Milwaukee, Wis., relative to nuclear weapons; to the Committee on Foreign Affairs.

640. Also, petition of the Secretary of State, State of Wisconsin, relative to voter referendum adopted regarding nuclear weapons moratorium and reduction; to the Committee on Foreign Affairs.

641. Also, petition of the Sixth General Assembly of the International Federation of Rural Catholic Adult Movements, Recife, Brazil, relative to human rights; to the Committee on Foreign Affairs.

642. Also, petition of the Lake County Parks and Recreation Board, Crown Point, Ind., relative to the Indiana Dunes National Lakeshore Park, Inc.; to the Committee on Interior and Insular Affairs.

643. Also, petition of the Miller Citizens Corp., Gary, Ind., relative to the late Honorable Adam Benjamin, Jr.; to the Committee on Interior and Insular Affairs.

644. Also, petition of the European Parliament, Brussels, Belgium, relative to visa reciprocity between the United States and the European Community; to the Committee on the Judiciary.

645. Also, petition of the Conference of State Sanitary Engineers, Westminster, Md., relative to the Clean Water Act; to the Committee on Public Works and Transportation.

646. Also, petition of Frank Rucinski, Chicago, Ill., et al, relative to the social security system; to the Committee on Ways and Means.

647. Also, petition of the Hudson Guild-Fulton Senior Center Association, New York, N.Y., relative to social security; to the Committee on Ways and Means.

648. Also, petition of the Los Angeles City Council on Aging, Los Angeles, Calif., relative to the social security system; to the Committee on Ways and Means.

649. Also, petition of the Municipal Council of the city of Paterson, N.J., relative to a nuclear weapons freeze; jointly, to the Committees on Armed Services and Foreign Affairs.

650. Also, petition of the Allegheny County Board of Commissioners, Pittsburgh, Pa., relative to a nuclear freeze; jointly, to the Committees on Armed Services and Foreign Affairs.

651. Also, petition of the Borough Council, Borough of Milltown, county of Middlesex, N.J., relative to a nuclear freeze; jointly, to the Committees on Armed Services and Foreign Affairs.

652. Also, petition of the City Council, Lincoln, Nebr., relative to the nuclear arms race; jointly, to the Committees on Armed Services and Foreign Affairs.

653. Also, petition of the City Council, Seattle, Wash., relative to Federal funds for local jobs in vital services; to the Committee on Appropriations.

654. Also, petition the Board of Governors of the National Association of Housing and Redevelopment Officials, Washington, D.C., relative to public housing programs; to the Committee on Banking, Finance and Urban Affairs.

655. Also, petition of Board for International Broadcasting, relative to amending the Board for International Broadcasting Act of 1973; to the Committee on Foreign Affairs.

656. Also, petition of the City Council, Berkeley, Calif., relative to the Hardin Flat power project, California; to the Committee on Interior and Insular Affairs.

657. Also, petition of the Commission on Self-Determination, Territory of Guam, relative to commonwealth status; to the Committee on Interior and Insular Affairs.

658. Also, petition of the City Council, Elizabeth, N.J., relative to the Fifth Preference Quota in Immigration Rules and Regulations; to the Committee on the Judiciary.

659. Also, petition of the General Conference of the United Pentecostal Church International, Marianna, Ark., relative to the passage of H.R. 2873; to the Committee on the Judiciary.

660. Also, petition of the Korean Committee to Retain the Fifth Preference, Fremont, Calif., relative to the family preference system as contained in H.R. 6514; to the Committee on the Judiciary.

661. Also, petition of the City Council, Berkeley, Calif., relative to an infiltration/inflow correction program; to the Committee on Ways and Means.

662. Also, petition of the Board of Directors of the Metropolitan Washington Council of Governments (COG), Washington, D.C., relative to a bilateral nuclear freeze; jointly, to the Committees on Armed Services and Foreign Affairs.

663. Also, petition of the City of Kearney, Nebr., relative to nuclear freeze; jointly, to the Committees on Armed Services and Foreign Affairs.

664. Also, petition of the Society of American Archivists, Chicago, Ill., relative to nuclear weapons; jointly, to the Committees on Armed Services and Foreign Affairs.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 6514

By Mr. EDWARDS of California:

Purpose: To require a properly executed warrant before an officer or employee of the Immigration and Naturalization Service may enter a farm or other outdoor operation without the consent of the owner (or agent thereof).

—At the appropriate place in section 111, add the following:

(c) Section 287 of the Immigration and Nationality Act (8 U.S.C. 1357) is amended by adding at the end thereof the following:

"(d) Notwithstanding any other provision of this section, other than paragraph (3) subsection (a), an officer or employee of the Service shall not enter without the consent of the owner (or agent thereof) or a properly executed warrant onto the premises of a farm or other outdoor operation for the purpose of interrogating a person believed to be an alien as to the person's right to be or to remain in the United States."

H.R. 7205

By Mr. FOGLIETTA:

—Page 29, line 6, strike out "$1,850,000,000" and insert in lieu thereof "$1,875,000,000."

—Page 30, line 20, strike out "$1,737,211,000" and insert in lieu thereof "$1,786,712,000".

REGULATION OF LOBBYING ACT

In compliance with Public Law 601, 79th Congress, title III, Regulation of Lobbying Act, section 308(b), which provides as follows:

(b) All information required to be filed under the provisions of this section with the Clerk of the House of Representatives and the Secretary of the Senate shall be compiled by said Clerk and Secretary, acting jointly, as soon as practicable after the close of the calendar quarter with respect to which such information is filed and shall be printed in the CONGRESSIONAL RECORD.

The Clerk of the House of Representatives and the Secretary of the Senate jointly submit their report of the compilation required by said law and have included all registrations and quarterly reports received.

REGISTRATIONS

The following registrations were submitted for the third calendar quarter 1982:

(NOTE.—The form used for reporting is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective headings.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19.....

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§302(e).
(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports. ☐

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following quarterly reports were submitted for the third calendar quarter 1982:

(NOTE.—The form used for reporting is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective headings.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19.....

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:
1. State name, address, and nature of business.

2. If this Report is for an employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).
(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports. ☐

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

PAGE 1

NOTE ON ITEM "D."—(a) *In General.* The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—Section 302(a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In General.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in accordance with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multipurpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In General.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

Receipts (other than loans)

1. $.....Dues and assessments
2. $.....Gifts of money or anything of value
3. $.....Printed or duplicated matter received as a gift
4. $.....Receipts from sale of printed or duplicated matter
5. $.....Received for services (e.g., salary, fee, etc.)

6. $.....TOTAL for this Quarter (Add items "1" through "5")
7. $.....Received during previous Quarters of calendar year

8. $.....TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

Loans Received

"The term 'contribution' includes a . . . *loan* . . ."—Sec. 302(a).

9. $.....TOTAL now owed to others on account of loans
10. $.....Borrowed from others during this Quarter
11. $.....Repaid to others during this Quarter

12. $.....Expense money" and Reimbursements received this Quarter

Contributors of $500 or more (from Jan. 1 through this Quarter)

13. Have there been such contributors?

Please answer "yes" or "no": .....

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last days of this Quarter total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under ~~under~~ the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

Amount	*Name and address of Contributor* ("*Period*" from Jan. 1 through....., 19.....)
$1,500.00	John Doe, 1621 Blank Bldg., New York, N.Y.
$1,785.00	The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
$3,285.00	TOTAL

NOTE ON ITEM "E".—(a) *In General.* "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—Section 302(b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the spaces following the number.

Expenditures (other than loans)

1. $.....Public relations and advertising services
2. $.....Wages, salaries, fees, commissions (other than item "1")
3. $.....Gifts or contributions made during Quarter
4. $.....Printed or duplicated matter, including distribution cost
5. $.....Office overhead (rent, supplies, utilities, etc.)
6. $.....Telephone and telegraph
7. $.....Travel, food, lodging, and entertainment
8. $.....All other expenditures

9. $.....TOTAL for this Quarter (Add "1" through "8")
10. $.....Expended during previous Quarters of calendar year

11. $.....TOTAL from January 1 through this Quarter (Add "9" and "10")

Loans Made to Others

"The term 'expenditure' includes a . . . *loan* . . ."—Sec. 302(b).

12. $.....TOTAL now owed to person filing
13. $.....Lent to others during this Quarter
14. $.....Repayment received during this Quarter

15. Recipients of Expenditures of $10 or More

In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

Amount	*Date or Dates—Name and Address of Recipient—Purpose*
$1,750.00	7-11: Roe Printing Co., 3214 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill."
$2,400.00	7-15, 8-15, 9-15: Britten & Blaten, 3127 Gremlin Bldg., Washington, D.C.—Public relations service at $800.00 per month.
$4,150.00	TOTAL

QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following reports for the second calendar quarter of 1982 were received too late to be included in the published reports for that quarter:

(NOTE.—The form used for reporting is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective headings.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19.....

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:
1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).
(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

PAGE 1

NOTE ON ITEM "D."—(a) *In General.* The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—Section 302(a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In General.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in accordance with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multipurpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In General.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

Receipts (other than loans)

1. $.....Dues and assessments
2. $.....Gifts of money or anything of value
3. $.....Printed or duplicated matter received as a gift
4. $.....Receipts from sale of printed or duplicated matter
5. $.....Received for services (e.g., salary, fee, etc.)

6. $.....TOTAL for this Quarter (Add items "1" through "5")
7. $.....Received during previous Quarters of calendar year

8. $.....TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

Loans Received

"The term 'contribution' includes a . . . *loan* . . ."—Sec. 302(a).

9. $.....TOTAL now owed to others on account of loans
10. $.....Borrowed from others during this Quarter
11. $.....Repaid to others during this Quarter

12. $.....Expense money" and Reimbursements received this Quarter

Contributors of $500 or more (from Jan. 1 through this Quarter)

13. Have there been such contributors?

Please answer "yes" or "no": .....

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last days of this Quarter total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

Amount	*Name and address of Contributor* ("*Period*" from Jan. 1 through....., 19.....)
$1,500.00	John Doe, 1621 Blank Bldg., New York, N.Y.
$1,785.00	The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
$3,285.00	TOTAL

NOTE ON ITEM "E".—(a) *In General.* "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—Section 302(b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the spaces following the number.

Expenditures (other than loans)

1. $.....Public relations and advertising services
2. $.....Wages, salaries, fees, commissions (other than item "1")
3. $.....Gifts or contributions made during Quarter
4. $.....Printed or duplicated matter, including distribution cost
5. $.....Office overhead (rent, supplies, utilities, etc.)
6. $.....Telephone and telegraph
7. $.....Travel, food, lodging, and entertainment
8. $.....All other expenditures

9. $.....TOTAL for this Quarter (Add "1" through "8")
10. $.....Expended during previous Quarters of calendar year

11. $.....TOTAL from January 1 through this Quarter (Add "9" and "10")

Loans Made to Others

"The term 'expenditure' includes a . . . *loan* . . ."—Sec. 302(b).

12. $.....TOTAL now owed to person filing
13. $.....Lent to others during this Quarter
14. $.....Repayment received during this Quarter

15. Recipients of Expenditures of $10 or More

In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

Amount	*Date or Dates—Name and Address of Recipient—Purpose*
$1,750.00	7-11: Roe Printing Co., 3214 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill."
$2,400.00	7-15, 8-15, 9-15: Britten & Blaten, 3127 Gremlin Bldg., Washington, D.C.—Public relations service at $800.00 per month.
$4,150.00	TOTAL

EXTENSIONS OF REMARKS

NEW CHALLENGES IN INTERNATIONAL TRADE

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. RHODES. Mr. Speaker, we all are aware of the enormous problems our Nation is experiencing in international trade. We no longer enjoy our former position of prominence as an exporting country. On the other hand, today, we are the biggest importer, providing other exporting countries with a large and prosperous market. There has been considerable commentary about and analysis of this problem, as well as speculation about the proper course to follow to improve our balance of trade.

Last month, at a dinner sponsored by the American Graduate School of International Management, I had the privilege of hearing Robert H. Malott, chairman of the board of FMC Corp., deliver his thoughts on this issue, including his suggestions for improving our balance of trade, and making the international trade market more equitably accessible to all trading nations.

I would like to share Mr. Malott's insights into this critical matter with my colleagues. The text of his remarks follows:

The economic challenges we faced as we entered the 1980's loom increasingly large. Developing countries are struggling to manage foreign debt loads, protectionist pressures are on the increase, and everywhere countries are trying to dispel their economic woes by expanding exports, limiting imports, and passing local content legislation. It is a sobering and disturbing picture.

If there's one overriding issue in world trade today, it seems to me it is the question of the relevance of the general agreement on tariffs and trade. When GATT was established in 1947, the United States was supreme in technology, management skills, and productive capacity. The other major industrialized countries were still recovering from the devastation of World War II, and what we now call the developing countries were primarily struggling for political independence. Since that time, the structure of the world economy has changed dramatically—although the U.S. remains the single largest exporter in the world, we have dropped to second place in the critical area of manufactured goods, and developed and developing countries have become stiff competitors for both our domestic and export markets.

In most of the post-war period, GATT served us well. Through three rounds of trade negotiations, it succeeded in progressively reducing tariffs to a minimum among the industralized trading nations. But GATT may have been a victim of its own success. Now that import duties have become almost negligible in many cases, we have moved into the more subtle and complex arena of non-tariff barriers—including export subsidies, import licensing requirements, and local content rules—to name just a few. These are the barriers which are responsible for distorting current trade relationships. These are the barriers which today impede the development of economically sound trade patterns. And these are the barriers which create the increasingly vindictive political issues that interfere with normal relations between nations.

The issue we must face squarely is this: Can GATT handle the realities of today? Can it handle the tough problems of nontariff barriers? Or do we need new, more comprehensive guidelines on which to base future international trade?

With this issue in mind, I'd like to address five problems in international trade that urgently require solutions.

The first problem concerns the increasing lack of respect for industrial property rights in the international marketplace. In the 1950's, the United States possessed most of the world's technology and controlled the majority of its patents. But since that time, new technology has been transferred out of this country and has become common knowledge throughout the world. Much of this technology transfer has occurred through joint-venture or licensing arrangements, but recently there's been an alarming and expanding disrespect for patent agreements and an increase in surreptitious transfers.

FMC has had to combat this problem with a state-owned enterprise in Hungary that was selling in Brazil a counterfeit version of our pesticide, Furadan. Although we have a valid patent in Brazil for our product, it has taken five years of litigation to stop imports of the Hungarian product into that country.

Many developing countries do not belong to the 1883 Paris convention on industrial property rights, the convention which binds member countries to respect one another's patents. Many that do belong want to change the rules so they can obtain immediate and cost-free access to developed country technology. In the United Nations, where the Paris codes are being revised, developing country Governments have been pressing for agreements which would allow them to seize patented technology and give it to their own domestic firms if multinational patent owners did not exercise their patent rights within a set time period—perhaps as little as 30 months!

Should the developing countries succeed in this effort, they may well impede technology development and transfer throughout the world. For if the industrialized countries have no ability to protect their patents, they will have less incentive to spend money on R & D and, in the long run, will have less technology to transfer.

Recently, FMC has been working with Senator Danforth to amend the U.S. Trade Act of 1974 to give U.S. companies greater recourse against violators of U.S. patent rights. Under this amendment, the President would have powers to raise tariffs, impose quotas, or even revoke most-favored nation status. We believe this change in legislation would be an important first step in preventing other countries from pirating the technology that U.S. firms have worked so long and hard to develop.

In another, more subtle invasion of property rights, a former Common Market commissioner by the name of Vredeling has proposed a plan to the European Parliament which would require multinational companies operating in Europe to share their long-term strategic plans with their labor unions. It would be absurd to try to operate a business effectively if all long-range strategies were laid bare to the competition!

Surprisingly, this issue is expected to come to a vote shortly in the EEC Parliament, and only the British have indicated they would veto it. Issues like this are appearing with increasing frequency in the debates of the EEC, the deliberations of the United Nations and the economic concessions demanded by the less developed countries.

A second major problem is the recent escalation of credit wars, as industrial countries resort to subsidized financing packages to stimulate exports. Over the past decade, trade officials from major exporting countries have admittedly made some effort to curb the problem through negotiations leading to "gentlemen's agreements" on export credits.

But isn't it a bit naive to assume that countries which depend on trade for 20 to 40% of their gross national product can avoid domestic political pressures that support aggressive export efforts? Won't these pressures make gentlemen's agreements difficult to enforce?

Let me pose an alternative. We might consider establishing a new international export credit agency to enforce common rules on export financing, much as the IMF, supported by its enormous financial resources, oversees international monetary practices. If all major trading nations agreed to abide by the same export credit rules, export financing would no longer be the determining factor in international buy/sell decisions.

Certainly the status quo is not acceptable—the current export credit war is irrational, costly, and leads to serious misallocation of resources. It must be stopped.

The third major problem concerns tax subsidies on export sales. Like export credits, tax subsidies create enormous distortions to international trade. They are particularly insidious because they are so difficult to identify, measure and verify with accuracy.

The industrial countries are wasting an enormous amount of time, energy, and money just to stalemate each other's export subsidies. Shouldn't we devote our efforts instead to reaching an understanding on common standards for export tax relief?

A fourth area of concern is the increasingly predatory manipulation of foreign exchange rates. In 1971, when the U.S. went off the gold standard, the world officially switched from fixed to floating exchange rates. But floating rates have turned out to be more an illusion than a reality—most nations have endeavored to manage their floats very carefully. The manipulation is

not overt but is often hidden in a maze of capital or financial market controls.

Japan, in my judgment, is a prime example. The Japanese have been able to keep the value of the yen artificially low. At present, the yen is trading at the depressed level of about 265 to the dollar, when most experts agree it should be trading between 180 and 200 to the dollar if, in fact, the rate reflected market conditions. This managed float strongly encourages Japanese exports and discourages imports. Not surprisingly, Japan's trade surplus with the United States is expected to reach $20 billion this year—or almost half America's projected trade deficit with the entire world in 1982.

One possible solution might be to broaden the scope of the International Monetary Fund to include explicit authority over exchange rate manipulation. The fund's member countries could give the IMF the power to impose appropriate sanctions on nations which did *not* allow their currencies to move freely in response to underlying market forces.

The fifth and last item on my agenda, is the exceedingly tough issue of assuring fair market access. It seems that most countries in the world today hope to export their way to economic salvation. It should be obvious that they cannot all succeed as exporters if no one is willing to be an importer.

The U.S. represents the biggest import market in the world and, by and large, we've made this great asset available to our trading partners with relatively few restrictions. But we're at the point now where we can't continue giving foreign producers unfettered access to our markets unless we gain equivalent access to theirs.

The market barriers American producers face overseas come in many guises. For instance, they may be told their products don't meet local specifications or consumer tastes. Or, they may be told their products don't meet domestic safety standards even if they have passed international standards accepted by the importing country. In other cases, they may have to comply with restrictive licensing requirements or agree to manufacture a certain percentage of their product in the importing country. All of these restrictions severely limit the ability of U.S. companies to penetrate foreign markets.

Japan has been particularly effective in restricting access to its markets. Let me recount the experience of FMC and other American companies in marketing soda ash, the principal ingredient in manufacturing glass. Although U.S. producers of soda ash have had a substantial cost advantage over Japanese producers, they've been restricted for the past 10 years to only 5% of the Japanese market. If U.S. producers could compete head-to-head with the Japanese manufacturers, it's been estimated that they could capture up to 40% of the Japanese soda ash market.

In the case of soda ash, there are no problems with product quality, reliability, or distribution capability—factors which the Japanese have traditionally used to explain the failure of foreign goods to penetrate their markets. Nor is there a problem in meeting specifications for the home market, a requirement Japan often invokes, since soda ash is a commodity chemical with universal properties. It is a clear case of import restrictions to protect Japanese producers.

We're a country that truly believes in open markets and the free entry of goods, but our trading partners must know that we are no longer willing to tolerate one-way streets. Free access to all markets of the world must be an unending objective as we seek better guidelines for international trade.

In summary: The protection of industrial property rights; an armistice in export credit wars; the elimination of competition in tax subsidies; the control of exchange rate manipulation; and, above all, the assurance of fair access to world markets; are five international trade challenges we must confront successfully during the 1980's.

I opened my remarks by questioning whether GATT is capable of effectively addressing issues as tough as these. By asking the question, I don't mean to suggest the answer is "no," but it is apparent that changes must be made, either within the structure of the GATT or as a supplement to the agreement, to address the changes that have taken place in international trade over the last 35 years.

A drift away from a free trading system could close off the longest ERA of prosperity the world has ever known. But free international trade faces its greatest challenge since World War II, as neither we, nor any other nation, have yet eliminated the lure of protectionist responses to increasingly severe problems.

The stakes are enormous. In my judgment, we must develop broader, more comprehensive guidelines to address the complex realities of international trade today and prepare for the challenges of tomorrow. Just as there is no shortage of challenges, I am confident there will be no shortage of creative solutions.●

A DAY OF SORROW

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. BIAGGI. Mr. Speaker, November 7 marked the 65th anniversary of the "October Revolution," the day in which the Russian people were deprived of their liberty by the Bolshevik Communist Party. It is a day of sorrow for the Russian people, Russian Americans, and freedom-loving persons everywhere; but it is also a day that must not be forgotten.

The occasion serves as a grim reminder of the terrible suffering the Russian people have been forced to endure at the hands of the Communist-controlled Soviet Government since 1917.

During my 14 years in Congress, I have joined my colleagues in calling on the Soviet Government to end their constant violations of basic human rights, particularly against their Jewish citizens. Regrettably, these violations continue.

With this in mind, we must use this occasion of the "October Revolution" to renew our commitment to secure basic human rights for the Soviet citizens, and oppressed people everywhere.

At this time, Mr. Speaker, I insert an important statement about the "October Revolution," prepared by the Congress of Russian-Americans, Inc., who are based in my home district in New York:

A DAY OF SORROW

On the 65th anniversary of the "October Revolution", we, as Russian-Americans, wish to remind the Free World that on November 7, 1917 the Bolshevik Communist Party deprived the peoples of Russia of their liberty.

Since that day the Soviet government under the leadership of its Communist Party had continually perpetrated crimes that are an affront to humanity. Among them:

The creation of an Orwellian state founded on a basis of human fear and ignorance and maintained by a ruthless military police;

The "reedification" of the Russian peoples, a policy inaugurated by the heinous murder of the royal family and pursued in the hopes of stripping the Russian peoples of their heritage and thereby creating the ideal human cipher, Homo Sovieticus;

The desecration and destruction of over 50,000 churches and monasteries;

The forcible collectivization of peasants, an act which resulted in the death by starvation of seven million people;

The exploitation of workers and the reduction of peasants to the status of government serfs;

The abandonment of Soviet P.O.W.'s (branded "traitors" by the Soviet regime) in Nazi war camps, resulting in the death of 4,650,000 native sons by starvation and disease;

The forceable repatriation of Soviet citizens remaining in Western European countries after the war and the subsequent imprisonment of these citizens in concentration camps;

The extermination of tens of millions of people in concentration camps and prisons;

The mental and physical torture of countless millions without regard to human rights or dignities;

The military suppression of any popular uprisings within the Soviet Union or any of its satellite nations, particularly Hungary, Czechoslovakia, and Poland;

The creation, through the wanton exploitation of natural resources and environment, of an aggressive military machine which continues to grow at the expense of the people's needs and aspirations;

The suppression of the freedoms of religion, thought, speech and the press and the persecution of individuals for their religious convictions and their beliefs in basic human rights.

No document can enumerate the countless crimes perpetrated by the Soviet government against its peoples. Only the tears of an anguished and suffering people can serve to measure these atrocities. To these tears we direct our hopes, our prayers, and our actions.

The 7th of November, the day of pompous Soviet celebrations, parades and deceitful proclamations about the "struggle for peace" and about the "joyous life" of Soviet citizens, we designate as a Day of Sorrow and Irreconcilability.

This Day of Sorrow and Irreconcilability has been faithfully observed by Russian-Americans and by all Free Russians for the past six decades. Throughout all these years Russians free in mind and spirit have continually attempted to warn the Free World of the threatening Communist danger, but to no avail.

Once again, we appeal to the government of the United States of America to proclaim this day as a Day of Sorrow and Irreconcilability and we invite the citizens of this country to join us in prayers for those who perished at the hands of Communism and for the deliverance of those presently living under the yoke of Communism.●

INDIANA'S ECONOMY: I

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. HAMILTON. Mr. Speaker, I would like to submit my Washington Report for November 3, 1982 into the CONGRESSIONAL RECORD:

INDIANA'S ECONOMY: I

Indiana's economy is in the worst shape I can recall during my service in Congress. Never have Indiana resident's expressed to me so frankly and forcefully their concerns about their economic future.

Hoosiers with whom I have spoken want more jobs, lower interest rates, and fewer price increases. I have spent many long hours thinking about these problems and trying to see how to solve them. This newsletter and the one to follow give some of my thoughts on Indiana's economy, its troubles, and the steps we must take to strengthen it.

Everyone recognizes that the health of the national economy has a profound impact on the health of the Hoosier economy. Renewed growth in the national economy is the best thing that could happen to Indiana. However, Hoosiers should not just sit back to see what happens at the national level. There are a number of steps we can take at home, and we should take them as quickly as possible.

In addition to the recession, Indiana's economy has had to cope with long-term structural changes which altered opportunities for employment in its major industries. But the double-digit unemployment and massive dislocation that afflict Indiana and other states in the industrial heartland are neither inevitable nor irreversible. Our state has natural advantages that we can build upon to keep the Hoosier economy vibrant and healthy.

Hoosiers are painfully familiar with our state's current economic predicament. At the start of the 1980's basic manufacturing provided 40 percent of the income earned by the people of Indiana, compared to less than 30 percent for the nation as a whole. Nearly one Hoosier in four worked in the production of durable goods, and four heavy industries—steel, automobiles, machinery and electric equipment—accounted for more than one sixth of our state's employment. But basic manufacturing—the dominant employer in Indiana and a traditional backbone of the Hoosier State's economy—has contracted quite sharply during the recession.

Unemployment in Indiana has ranged from two to three percentage points above the national average. Testimony at congressional hearings I held in Indianapolis indicated that roughly 45,000 Hoosier jobs have been lost in automobile and steel production alone. Even without the hardship of back-to-back recessions, however, these key industries have been weakening. Among other factors, aging plants, government regulation, and the high cost of energy and financing have lessened their ability to meet increasingly stiff competition from abroad.

Neither Indiana nor the nation as a whole can afford to abandon basic manufacturing. We must help basic industry toward recovery. At the same time, we must acknowledge that some of the jobs recently lost in automobile factories and steel mills will never be restored. We must move into new fields of commerce, industry, and trade where the potential for employment and economic growth is strong.

So far, it has been difficult for new, high-technology industries—those producing lasers, semi-conductors, robots and the like—to become firmly established in Indiana. There are, for example, only three robotics firms in Indiana, compared to 17 in Michigan and eight apiece in Ohio and Illinois. The availability of skilled labor is one of the major factors determining where such firms locate.

Indiana has a strong educational base, but it has not achieved its full potential. Hoosiers graduate from high school at a rate above the national average (75.1 percent in Indiana, compared to 73.6 percent nationwide), but only 11 percent of our residents are college graduates, compared to a national average of 13.9 percent. With our first-rate institutions of higher learning, Indiana should have the highly skilled labor force to meet the challenge presented by the new industries; instead, many young, highly skilled workers trained in Indiana have taken jobs elsewhere. We need to encourage our young people to achieve their full educational potential. At the same time, we must insure that people with specialized training do not need to leave our state to find jobs.

There are also steps that we can take to utilize existing manpower and industrial capacity. One of the most important is to improve our public infrastructure. There are 4,700 bridges in Indiana, many of which, like the 45 percent of all bridges throughout the nation, are structurally deficient or functionally obsolete. It is estimated that bad bridges and roads alone cost the private sector $30 billion per year nationwide in damages and lost business. Water mains, parks, sewer systems, ports, public buildings, and railroads are also in desperate need of repair. Delays in repairing these facilities cost millions of dollars and thousands of jobs each year. Despite budgetary constraints, we can find ways to put our people to work restoring the vital public infrastructure on which all economic growth is ultimately based.

We should take steps to prompt a broad range and wide variety of investments—in education and training, in public infrastructure, in research and development—which would help attract the new, innovative businesses upon which Indiana must rely for future growth. Such investments would clearly complement efforts to improve our position in basic manufacturing as well. We will also need to strengthen cooperative relationships among labor, business, and government, and find more effective means of combining public and private resources for the good of our state.

(Note: In next week's newsletter I will discuss these proposals in more detail. Also, I will make specific recommendations to help solve our state's pressing economic problems.)●

AN AMERICAN CELEBRATES 25 YEARS OF CITIZENSHIP

HON. WILLIAM M. THOMAS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. THOMAS. Mr. Speaker, the Nation has just finished celebrating Thanksgiving, a day when we stop to reflect upon all that we have for which to be grateful. Thanksgiving held special significance this year for one of my constituents, Mr. John Florian of Bakersfield, Calif.

John Florian and his wife recently celebrated their 25th year as citizens of the United States, having fled the Communist regime in Hungary in 1957. I would like to share Mr. Florian's recent letter to me, because I think it is a fine expression of the spirit upon which our Nation was founded. It should also serve to remind each of us that Americans have one thing we can all be grateful for—we have our freedom:

DEAR CONGRESSMAN THOMAS: I am writing to you because my wife and I reached a very cherished anniversary of our life. For twenty five years, we enjoyed freedom and privileged living in this wonderful country.

In September 1957 we came as refugees from Hungary and we were accepted as citizens of this great nation which we proudly call home. This past quarter of a century brought us many happiness and satisfaction both in our family and professional lives.

We cannot think of a more proper way to celebrate than expressing our thanks and gratitude to the American People, and no better way to communicate than through our elected representative.

Thank you America for opening your doors and letting us come and enjoy the freedom and opportunities of this majestic land! Bless the people who have given us the helping hands, so we may do the same for others.

Respectfully yours.

JOHN FLORIAN.●

DAN CRYSTAL, DEFENDER OF CIVIL LIBERTIES

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. CONYERS. Mr. Speaker, for close to a decade, the Judiciary Committee—and the Subcommittee on Criminal Justice in particular—has been the fortunate recipient of the assistance and counsel of Daniel Crystal, the chairperson of New Jersey Coalition to Defend the Bill of Rights.

In our efforts to reform the Federal Criminal Code, for example, Mr. Crystal has been our constructive and most indefatigable critic. In a recent article, Mr. Crystal has detailed a previous instance in which he provided Members of Congress with invaluable help. I be-

lieve that my colleagues may find this article of interest.

[From the Reporter, Spring 1982]

A FOOTNOTE TO HISTORY, OR HOW I HAD A HAND IN THE DISGORGEMENT OF THE PENTAGON PAPERS AND OTHER UNLIKELY EVENTS AND MARVELS

(By Daniel Crystal)

Everyone is writing his or her memoirs these days.

Henry Kissinger has just weighed in with the second volume of his new version of the Arabian Nights in which Air Force One takes the place of the flying carpet. The Watergate conspirators have made zillions of bucks from their books and on the lecture circuit. My Bergen County neighbor, Richard M. Nixon (he's now from Saddle River; I'm downcounty in Saddle Brook) is slithering his way back to respectability as a so-called elder statesman. ("Cry, the Beloved Country" is a useful title to remember).

Its high time then for me to tell Reporter readers of how I once taught a valuable discovery technique to the House of Representatives and at least in my own mind, became a legitimate footnote in history as a result.*

The surprising (but entirely true) tale begins (if anything ever has a real beginning) with the election of Bella Abzug to the House. Her staff had asked a lawyer I know, Morton Stavis, now of Hoboken, to brief her on the intricacies of House parliamentary procedure. He lacked time, having to write a brief for the United States Supreme Court. He asked me to take over. Ignoring the old saying about fools rushing in, I agreed. I obtained a copy of the "Rules of Procedure of the House of Representatives," dutifully looked the rules over, researched reform ideas on Congressional procedure, and in general made myself a Man Friday to Bella. I can't say I learned all that much since much of parliamentary procedure is arcane and unwritten. It reposes in the notes of the House Parliamentarian who, at least then, played ball with the powers that be, and not with those who weren't in the inner circle.

Years loped along, and we suffered the agony of the war in Vietnam. And along the line (1973, if memory is accurate) we began to learn of the secret and horrendous bombing of Cambodia. It will be interesting to read the minuet that Henry Kissinger undoubtedly dances in telling of his part in that massive use of airpower against civilian targets.

Now the story commences.

On one Friday afternoon, just before I was leaving the office for the weekend, the phone rang. It was someone in Bella's office, asking if I could suggest a way to break through the wall of secrecy about the bombing in Cambodia.

I said the honest thing: "I don't know anything offhand, but let me think about it."

I had nothing to go on but the copy of the "Rules of Procedure of the House of Representatives" I had acquired years before. It was (at least then) poorly indexed, perhaps to protect the turf of the House Parliamentarian. In fact, it has two sets of rules in it, one those originally formulated by Thomas Jefferson, the other a more modern set.

There was, of course, nothing to do but to start fishing the hard way—that is, to read the whole damned, dull book.

About three quarters of the way through that long Friday evening, I recapitulated Archimedes. Fable has it that he said, "Eureka" when he found the answer to a scientific problem. I said, "Aha!"

What I had run across in my methodical reading of the House rules was something called "A Resolution of Inquiry." It's a discovery rule. It provides that the House can pose factual questions to the executive department. I spotted the kicker immediately. If the Cabinet member, President, or other executive department official does not respond and turn over the desired information in seven calendar days, it becomes the privileged business of the House.

"Privileged business!" That means it cuts through the Rules Committee and the other road blocks and parliamentary obstructions barring House action. It's a veritable blockbuster of a rule. It makes possible an end-run around both the Administration and its allies in the House.

Next day, Saturday, I spent at Rutgers Law School Library. Years before, at the time of the March to Selma, Alabama, I had holed up there, researching material for a brief on behalf of the Mississippi Freedom Democratic Party challenging the right of the Congressional delegation from Mississippi to be seated in view of the racist violation of the voting rights of blacks in that state. That's another yarn for these offbeat memoirs. What's pertinent now is that I had then become familiar with a set of massive books called, "Precedents of the House of Representatives. It had originally come out in 1917 or 1919. There was an annotation and supplement in 1931 or 1933. After that, silence, and ask the help of the House Parliamentarian (if you're a favored member of the Congressional club).

So with that useful knowledge, I hied myself to the law school and xeroxed or photostated the numerous precedents I found when my discovery, the Resolution of Inquiry, had been actually used. It developed later that it had not been used for some forty-one years or so before I rediscovered it that boring night, of now so many years past sleepily reading all the rules of the House of Representatives.

I sent off the envelope of xeroxes to Bella's office with an explanatory letter, and went about my own affairs. In fact, eventually I forgot completely about my foray into Congressional parliamentary procedure. Bella filed a Resolution of Inquiry, but nothing came of it, just then.

Nothing is forever, not even forgetfulness.

Time passed, and I received another phone call from Bella's office, once again on a late Friday afternoon.

This one was different, though.

If I could make anything out of this call, I was being congratulated for helping spring the Pentagon Papers loose from Richard M. Nixon.

Pentagon Papers! Me and the Pentagon Papers? The Pentagon Papers and I?

What's going on here? I felt as remote from the Pentagon Papers as I do now from the budget cut planning by the only President we have.

Then memory took over.

I asked if Bella had filed a Resolution of Inquiry.

She had, and that explained it. Nixon had sent the Pentagon Papers to Congress under tight security. Members of Congress could read the Pentagon Papers volumes under those restrictions. They couldn't get copies, but they could read the actual volumes.

The press was giving Bella credit for ripping the Pentagon Papers loose from Nixon's clutches. And her staff was courteously sharing the credit with me.

It was an unreal feeling of disbelief and pride.

I equaled that quite incredible mood some time later following the impeachment of Nixon and President Gerald Ford's pardon of the man who now is the resident squire of Saddle River. The unprecedented happened. A sitting President came before a subcommittee of the House Judiciary Committee to answer a Resolution of Inquiry directed at why he had pardoned Richard M. Nixon for high and low crimes, felonies, misdemeanors, and parking tickets.

I had recently had surgery and was convalescing. I sat enthralled, watching the subcommittee hearing on television. And I marveled that I, the third son of Jewish immigrants, Joseph and Jennie Crystal, who had lived with the entire family of eight of us in two rooms behind a Mom-and-Pop grocery store in East Orange, had somehow been able to reach into the Oval Office of the White House and help force a President of the United States to do something he didn't want to do.

Resolutions of Inquiry are used all the time by Congress now. In recent months, a member of President Reagan's cabinet came close to being held in contempt of Congress by defying the House as to information demanded about energy. Like any other rule, all groupings in the House use it now, the right as well as the moderates and the liberals.

What I did was to go into Congress' museum of obsolete weapons, blow the dust off one of them, bow and hand it to the House for modern usage. As any lawyer familiar with interrogatories and depositions would readily know, it works. Somehow, by tedious reading, I had given the House a valuable aid in the constant battle between two co-equal departments of our government, the legislative and the executive. I had resurrected yet another check or balance of the sort we all learned about when we first took civics in junior high school.

That night's solitary reading of the "Rules of Procedure of the House of Representatives" (a soporific volume if ever I drowsed over one) has turned out to be the most important single achievement of mine in the practice of law. It just goes to prove again what powerful instruments for truth are our discovery rules.

Nevertheless, it still feels totally unreal to have ever had anyone link me with the disgorgement of the Pentagon Papers from the grip of that "historian" who has grown accustomed to disgrace. Daniel Ellsberg nearly went to prison because of the Pentagon Papers. Most emphatically, those trying to let the country know about what was going on in Vietnam did not win the favor of Richard M. Nixon, once the peripatetic tenant of Key Biscayne, San Clemente, and 1600 Pennsylvania Avenue in the District of Columbia, and now my near neighbor in Bergen County.

Understandably, we're still not talking to each other.●

* To quote a wise observer of the passing scene, Dorothy Leavy, history always begins on the day of one's birth.

THE SOPHISTICATED CRIMINAL

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. BIAGGI. Mr. Speaker, today's criminal, are becoming much more sophisticated and, thus, much more dangerous. Of special concern is the increasing criminal use of bullet-resistant vests, similar to those used by police.

In last year's Nyack, N.Y., Brink's robbery, a criminal's vest stopped a police bullet, allowing the robber to return the fire and kill two law enforcement officers.

Other incidents include one of the FBI's most wanted killers, Joseph "Mad Dog" Sullivan, being captured earlier this year wearing a bullet-resistant vest; and two New York City drug dealers, after being arrested, boasting to police that "our vests are better than yours."

In a more recent incident, the New York Daily News reports that two New York City bank robbery suspects "wore bulletproof vests" during a robbery and subsequent shootout with police. One of the vests stopped a police bullet that would have disabled one of the robbers, but instead, both criminals escaped. At this time, Mr. Speaker, I wish to insert the full text of the New York Daily News article, which discusses the event in further detail:

[From the New York Daily News, Nov. 19, 1982]

BANK-HEIST SUSPECT IN 3-HOUR SIEGE

(By Bernard Rabin and Don Singleton)

A bank robbery suspect with a submachine gun held police and FBI agents at bay yesterday for three hours at a Queens rooming house before surrendering.

Walter Anderson, 21, had been traced by New Rochelle FBI men to 102-35 Remington St. off Liberty Ave. in South Jamaica.

After the agents and Queens detectives asked the landlady if Anderson was there, she called to him, and he yelled: "I'm not coming out! I have a submachine gun and I won't be taken!".

Beginning at 9:15 a.m., the lawmen negotiated with Anderson, who was in a room with a girlfriend, Liza Borden. Hearing a report that he had fragmentation grenades, police evacuated adjoining houses. The rumor was unfounded.

Early in the siege, Anderson swapped a .38-caliber revolver for a pack of cigarettes. Anderson made no demands but said he was reluctant to give himself up for fear of being injured by police.

At 11:55 a.m., with the house surrounded by flak-jacketed cops, Anderson agreed to give up. Agents entered and emerged at 12:03 p.m. with Anderson and Borden. One agent carried Anderson's Uzi submachine gun.

Detective Inspector Roy Richter said Anderson was wanted in four bank robberies in Westchester County.

Richter said Anderson and another suspect, Wayne Glover, had evaded arrest Nov. 1, after a shootout at 175th St. and Walton Ave. in the Bronx. The suspects wore bulletproof vests, and Anderson's stopped a bullet that would have penetrated his chest, Richter said.

Glover reportedly was captured a few days later.

Anderson was taken to Manhattan Federal Court to await arraignment on charges of holding up the Bank of North America at 928 McLean Ave., Yonkers, on Oct. 13, and the Knickerbocker Savings & Loan Association at 929 McLean Ave. on Oct. 18.

During my 23 years as a New York City police officer, I was wounded 10 times in the line of duty. As a result, much of my work in Congress has been devoted to better protecting the lives of our law enforcement officers. An important part of this effort is insuring that police officers are better equipped than the criminals they are protecting us against.

This means that criminals must not be allowed such easy access to bullet-resistant vests. I have authored two bills that would help in this regard. Specifically, my bills, H.R. 4978 and H.R. 5559, would place tighter controls on those persons selling and buying bullet-resistant vest, and would impose tough new penalties for any person caught wearing a bullet-resistant vest during the commission of a crime.

The prompt and favorable consideration of this legislation is essential to the future well-being of our Nation's 528,000 law enforcement officers.●

BURDEN SHARING

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. HAMILTON. Mr. Speaker, I would like to submit my foreign affairs newsletter for October 1982 into the CONGRESSIONAL RECORD.

The article from the newsletter follows:

BURDEN SHARING

One of my impressions from the campaign is that Americans are questioning the burden placed on them by America's role in the world. Why, they ask, should so many of our tax dollars be sent abroad when there are so many needs at home? This newsletter addresses only one aspect of that question: the perception that our allies have not done enough to respond to Soviet militarism. The feeling runs deep in America that we bear too big a share of the burden of defending the West. It made news when a Senate subcommittee voted to cut our troop strength in Europe to its 1980 level.

The issue of burden sharing is not new. In 1950, the original members of NATO agreed to divide the defense burden equitably. In 1966, Senator Mansfield criticized the expense of our troops in Europe and drafted a bill to bring some troops home. In the 1970's, American and European leaders tried to devise a formula to spread the cost of defense. A 1978 accord stated that NATO members would hike their real defense spending by 3 percent annually. With this formula, it was hoped, NATO would match the Soviet military build-up and Europeans would do more in their own defense.

Americans are concerned about burden sharing for two reasons: the American economy, and allied policies toward the Soviet Union. Confronted with a bigger defense budget and an economy in recession, members of Congress are looking for ways to save money. Some members say that the economies of Western Europe and Japan are stronger than in the 1950's and can now carry more costs. The desire in Europe to expand commercial contact with the Soviet Union is also a problem. Lack of support for all our sanctions against Poland and the Soviet Union has emphasized the difference between the allies and us on the question of how to deal with the Soviet Union. Some Americans wonder why nearly 350,000 troops should be kept in Europe without a firmer European commitment to stronger defenses against the Soviets.

Americans know that the alliance has kept the peace for more than 35 years and still serves our interests. Such an alliance should not be lightly discarded, especially when the alternatives to it are not clear. At present, the Soviet Union is engaged in a massive military expansion, and only through joint effort can the West preserve its security. Americans are also aware that the global duties we have carried since 1945 demand sacrifices. These include high defense costs and the regular stationing of our forces abroad.

Europeans say that a cut in American forces would be a blow to their security and to their confidence in us. They argue that we cannot afford to compromise our own security for short-term financial gain. They cite statistics to show that Europe is pulling its weight. The United States paid 53% of the total allied defense bill in 1980, down from 61% in 1971. During the 1970's, American defense spending decreased by 1% per year while the European members of NATO raised theirs by 2% per year. Many of the allies have the military draft, in part for the alliance, and it skews comparisons of defense budgets since conscripts tend to cost less than volunteers.

Contrasted with these statistics are others which show the extent of America's sacrifice. In 1980, the United States and Greece each spent 5.6% of gross domestic product (GDP) on defense. No other NATO member matched this figure, and Japan spent only 1% of its 1980 GDP on defense. As a percentage of population, we have more men under arms then do any of our allies. Per capita, we spend $607 per year for defense, compared to NATO's collective average of $434 and Japan's $84. Our forces in the Mediterranean Sea and those we have committed to the Persian Gulf protect European sources of oil. They should be counted as part of the cost of defending the allies.

Perhaps the standard by which burden sharing should be judged is the 3% formula established in 1978. Only the United States and Luxembourg have met the goal each year. France has missed it only once. NATO as a whole has raised its defense spending by 2.1% to 2.6% annually. West Germany, the country most central to European security, has increased its defense budget by 2.8% annually during the last decade. Some critics charge that the 3% formula is unrealistic in light of the worldwide recession, but without the formula the ends of the alliance would be harder to achieve.

Western security would not be enhanced if we attempted to settle the issue of burden

sharing by unilaterally bringing forces home. An objective of our foreign policy is to prevent the Soviet Union from decisively influencing Europe, but to reduce our conventional strength in Europe would only mean riskier reliance on nuclear deterrence. Such a move would also undermine negotiations on the mutual withdrawal of Soviet and American forces from Europe. Odd as it seems, the redeployment of our Europe-based troops in America might even add $17 billion to our defense costs.

The allies say that their troubled economies will not allow them to expand their military establishments substantially. They do have major economic problems, but this fact must not prevent negotiations on burden sharing. Many options exist. For example, the allies could gradually contribute more to the maintenance of our forces within their boundaries. Also, burden sharing would be promoted by a vigorous effort to end duplication and waste in NATO. Talks to encourage the production of more weapons by the allies could advance burden sharing as well. Finally, it does make sense to bring our troops home if Soviet troops are also removed from Europe. At talks in Vienna, NATO itself has proposed to cut ground forces on each side to 700,000, with cuts in American and Soviet ranks before all others.

As it responds to the growing weariness of Americans with global duties, Congress needs to determine which options promote burden sharing and work for a consistent foreign policy toward Europe and Japan. The mixed signals we have sent Europe on the pipeline and grain sales have confused the allies. Without steady leadership from us, agreement on burden sharing cannot be expected. If we and the allies cannot decide how to divide defense costs, only the Soviet Union will benefit.●

LELAN F. SILLIN, JR. RECIPIENT OF THE NEW ENGLAND COUNCIL, INC., 1982 DISTINQUISHED SERVICE AWARD

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. GEJDENSON. Mr. Speaker, I would like to take this opportunity to recognize the outstanding accomplishments and contributions of one of my constituents Lelan F. Sillin, Jr., who was chosen as the recipient of the New England Council's 1982 Distinguished Service Award. The New England Council, Inc., a 58-year-old business association representing 1,200 corporations and industries throughout New England has worked assiduously to advance the objectives of the region's business community. Mr. Sillin has been a key element in that effort.

In addition, Mr. Sillin's contributions to the field of energy development and his strong sense of community leadership truly represent the American spirit of enterprise in action. The Council's Distinquished Service Award honored Mr. Sillin for these qualities among many others.

Mr. Sillin, who lives in Lyme, Conn., with his wife Joan and their four children, is chairman of the board of trustees and chief executive officer of Northeast Utilities, He also serves as chairman of Connecticut Yankee Atomic Power Co.

Mr. Sillin was born in Tampa, Fla., and earned his law degree from the University of Michigan Law School in 1942. In 1969, he received an honorary degree of doctor of laws from Wesleyan University, Middletown, Conn.

Mr. Sillin began his business career in 1945 with the New York City law firm of Gould & Wilkie as general counsel for Central Hudson Gas & Electric Corp. In 1951, he was named secretary and assistant treasurer of Central Hudson, becoming an assistant general manager in 1953 and elected vice president and a member of the board of directors 2 years later. He was named president in 1960, and became chief executive in 1964.

Mr. Sillin has given his time and energies unstintingly in order to enrich the lives of others. He is a member of the National Leadership Council of ELDERHOSTEL, an independent national nonprofit corporation whose goal is to serve older adults; He is also a member of the National Industrial Advisory Council of Opportunities Industrialization Centers of America, and an active member of the Utilities Publication Committee and director of Public Utilities Reports, Inc.

He serves as well, as a member of the National Advisory Board, Federation of Americans Supporting Science and Technology (FASST).

Prior to Mr. Sillin's current work he served from April 1979 to February 1981 as a member of the Committee on Prevention of Significant Deterioration of Air Quality of the National Research Council's Environmental Studies Board. The board is a unit of the Commission on Natural Resources of the National Research Council, which is the joint operating body of the National Academy of Sciences and the National Academy of Engineering.

Last month, the New England Council, Inc., formally honored Lee Sillin at its board of directors annual dinner in Boston. During these ceremonies several congratulatory telegrams and letters were presented. One, from the president of the American Nuclear Energy Council, John T. Conway, said of Mr. Sillin, "Because of your foresight and courageous actions in the field of energy development, our Nation's security and the well-being of the people of New England will be greatly enhanced during the coming decades."

Indeed, Lelan Sillin, proud son of Connecticut, has earned the praise of his colleagues, as well as the distinguished academic and civic awards granted him over the years. I would like to bring to the attention of my colleagues the many achievements of Lee Sillin.●

DEFENSE APPETITES MUST BE CURBED

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. GREEN. Mr. Speaker, near the top of our agenda as we return today must be consideration of the 1983 Defense Department appropriations. During our break for this year's elections, the New York Times printed an able summary by Fred Kaplan of what goes wrong when Congress considers the Nation's defense needs. I draw my colleagues' attention to Mr. Kaplan's comments with the hope that porkbarrel politics and shortsighted cuts in vital military operations and maintenance (O&M) do not overtake this year's DOD bill.

Mr. Kaplan points out that O&M cuts have the attraction of reducing outlays, and therefore the deficient. He notes that even "dovish" Members support defense programs of only parochial merit, and describes the enthusiasm gold-plated strategic gadgetry arouses in Members. In contrast, although it is the area of defense in which we are most deficit, readiness has no outspoken, moneyed lobbies to protect it, and is basically a mundane aspect of defense.

What makes these typical irrationalities of defense politics worse today is the fact that the current administration and especially the Secretary of Defense are not playing their appointed roles as arbiters of the demands of the Joint Chiefs and the legitimate needs of our Armed Forces. Instead, DOD has acceded to virtually every whim of the services, no matter how unnecessary or how out of line with current budget realities. Because the military budget lacks proper oversight at the Department of Defense, Congress must fulfill that responsibility better than is usually the case.

I ask that Fred Kaplan's essay, "Defense Nuts and Bolts" be printed in the RECORD at this point.

DEFENSE NUTS AND BOLTS

(By Fred Kaplan)

WASHINGTON.—President Reagan's defense budget will almost certainly be cut substantially next year. Federal deficits are intolerably high, social programs have been cut to the bone; the new, more liberal 98th Congress will surely insist that the Pentagon start making its share of sacrifices.

However, if Congress behaves in the usual fashion, it is likely that the wrong things will be cut. The burden will fall disproportionately upon spare parts, fuel, ammunition, depot repair and other elements of the operations and maintenance account that comprise "military readiness."

In short, the items that Congress tends to cut most heavily are those that are most essential to fighting a conventional war for longer than a couple of weeks.

In the past year or so, Congress has paid more attention, in rhetoric anyway, to the importance of readiness. Yet it continues to cut still further the one section of the defense budget that is underfunded to begin with. The reason has to do with incentives that lie close to the heart of the legislative system.

First, cutting the production of major weapons yields relatively small savings in immediate outlays. It takes several years to build tanks, missiles, airplanes, ships; only a small fraction of the appropriated money—2 percent in the case of aircraft carriers, about 15 percent for tanks—is actually spent in the first year of outlays.

However, the workaday items of operations and maintenance are used almost right away; a $1 billion cut in this account produces, on average, an $850 million saving in first-year outlays. At a time of enormous deficits and demands for quick solutions, this situation makes the readiness account a tempting target.

Second, there really is a military-industrial complex, and Congress is caught in the middle of its workings. Even liberal legislators are often persuaded by arms manufacturers in their districts to preserve otherwise useless weapons programs that mean big money and thousands of jobs for constituents. For example, Alan Cranston, Democrat of California, one of the Senate's leading nuclear-freeze advocates, always votes for the B-1 bomber, manufactured by his home state's Rockwell International Corporation. And if some Congressmen have no such interests to serve, they may need to trade favors on other bills with those who do. By comparison, the makers of spare parts and bullets carry no measurable clout.

Third, to a much greater degree than is casually assumed, Congress still defers to the wisdom of the Joint Chiefs of Staff (who in this Administration also appear to have the Secretary of Defense firmly in their pocket). Even if some members are skeptical of the military's requests for bigger and more expensive weapons, there is no consensus among the 535 individuals and their staffs in Congress for any coherent alternative.

Finally, there is a visceral dimension that few would openly acknowledge but that is very obvious to anyone who has observed relations between Congress and the Petagon for a while—and that is that big, fancy weapons systems are sexy, while the mundane supplies that keep the weapons operational are not. Few experiences aside from a roller-coaster provide the thrills of watching—or better yet, riding in—an M-1 tank tearing across the countryside at 35 miles per hour (even though it breaks down after a few hours of wear), an F-15 jet zooming at Mach 2 (even if no pilot flies that fast in combat), an Aegis destroyer with dozens of radar-control switches lighting up (even if the radar makes the ship vulnerable to antiradiation missiles).

On the other hand, reports on depot backlogs, low readiness rates and spare-parts shortfalls tend to be boring.

To the extent that Congress cuts funding for major weapons at all, it usually just stretches out the procurement schedule—thus accomplishing little more than making the weapon still more expensive, because of future inflation, in the end.

A great defense debate has been raging in the news media over fundamental issues concerning weapons procurement: Should we buy small numbers of expensive weapons or a larger number of cheaper, simpler ones? Since many new weapons have failed miserably in testing, why fund them any further? Is the counterforce strategy that justifies many of the Pentagon's new nuclear missiles prudent or practical?

The story to watch is whether members of the new Congress will be able to overcome the incentives that lead them to dodge such issues, or whether they will continue to slash the essentials and let the bloated parts remain. It may well be that only a President can hope to control the Pentagon's appetite—and Ronald Reagan has not revealed an inclination to do so.●

PERSONAL TRIBUTE TO VIETNAM VETERANS BY FRANK UMBRO, ARDSLEY, N.Y.

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. OTTINGER. Mr. Speaker, I rise today to share with my colleagues a personal tribute by Mr. Frank Umbro of Ardsley, N.Y., to the thousands of American men and women who gave their lives while serving in Vietnam. Mr. Umbro, a veteran himself, served with the 30th Artillery Division in Vietnam from 1967–68, has sent me his own salute, in the form of a poem, to the Vietnam Veterans Memorial dedicated on November 13, 1982.

For the 2.7 million Americans who served and the 57,939 who sacrificed their lives in this unpopular war the "National Salute to Vietnam Veterans," and the Vietnam Veterans Memorial were more than a 5-day tribute and the dedication of another monument. They represent a lasting tribute to the service and dedication of Americans who deserve a place of honor beside the men and women who fought in all America's battles.

The historic week of November 10 to 14, will be remembered for the reading of nearly 58,000 names of those lost forever or missing in Vietnam, shows, vigils, ceremonies, unit reunions, concerts, receptions, a parade, and the culmination of the week with nationwide religious services and prayers, remembering and honoring all those who served in Vietnam. Mr. Umbro's personal salute follows:

"V"

Soon there will be a monument, erected for the children.
Who gave their lives, without question, and didn't choose to run;
For political or whatever reasons, they stayed in their country's name.
And forfeited their freedom, I ask you who's to blame?
Since '68, I've watched each sunrise, and so much time has since elapsed.
Yet every night, I still hear, that mournful sound of "Taps".
For them, I pray in silence, and bid them; rest in peace.
And hope I never again be a part; of war, such a terrible disease.
At last; there will be a monument, standing solemnly in twilight's calm.
A "V" for all the valor, for those who gave their lives in Vietnam.
And for those of us, who came home, a question, come November.
Will you pay your final respects, Will you at least remember?
And you; the unsuspecting, the tourist, from near and far.
Kneel down, and give abundant thanks, for knowing where your children are . . .

—FRANK V. UMBRO.●

UNITED NATIONS WORLD ASSEMBLY ON AGING

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. BIAGGI. Mr. Speaker, one of the most significant events to take place this year on behalf of senior citizens was the first U.N. World Assembly on Aging held in Vienna, Austria between July 26 and August 6. I was proud to have been named by President Reagan to be a member of the U.S. delegation which included the illustrious chairman of the House Select Committee on Aging, CLAUDE PEPPER.

The World Assembly marked the first time in history that governments of the world gathered together to discuss the implications of the aging of society both in the developed and developing world. There are an estimated 300 million people 60 and over in the world today. This number is expected to double by the year 2000 and by that time fully two-thirds of the elderly will be living in the developing nations.

The World Assembly on Aging provided a first time opportunity to discuss the global perspective of aging. It was a frank discussion of how a society responds to its elder members and how that in turn impacts the economic political and social fabric of all societies.

As an original member of the House Select Committee on Aging, I joined with a majority of my colleagues in 1977 in supporting legislation which called for the convening of and U.S. participation in a World Assembly on Aging. The purposes of this meeting were set forth in a 1980 resolution adopted by the United Nations General Assembly.

To focus attention of various governments on issues of aging in designing policies and programs for economic and social development in both developed and developing countries;

To provide an international forum for the exchange of views among governments on the ways and means of dealing with the aging—both legislatively and administratively;

To identify aspects of various issues and consider how nations can cooperatively benefit from collective thinking on these issues; and

To focus attention and encourage wider support for future activities of the United Nations and related organizations in the field of aging.

The U.S. delegation, representing the nation that first advanced the idea of the conference, was composed of a number of notable policymakers, from both the public and private sectors, as well as advocates from the aging network. I wish to commend Secretary Schweiker, as head of the delegation as well as the alternate delegates and advisers who joined the official U.S. party. These delegates included Dorcas Hardy, Assistant Secretary for Human Development Services; Dr. C. Everett Koop, Surgeon General of the U.S. Public Health Services; Virginia Knauer, Special Assistant to President Reagan; Commissioner on Aging, Dr. Lennie-Marie Tolliver; Chairman of the Federal Council on Aging, Adelaide Attard; Ambassador Roger Kirk of the U.S. Mission to UNIDO, and their advisers. Private sector participants included Constance Armitage, president of the 1981 White House Conference on Aging; Cyril Brickfield, executive director of the American Association of Retired Persons; Eleanor Cain, president of the board of NASUA; George Telisman, president of the board of N4A; and Curt Clinkscales, national director of the National Alliance for Senior Citizens. All these delegates worked extremely hard and were especially effective in presenting our country's position in a unified and articulate fashion.

Preparation by the United States for participation in the WAA was extensive and comprehensive. In early 1981, a Federal Interagency Committee was established, which included Members of Congress, in order to monitor and assess each stage of U.S. participation. Nongovernmental organizations also played a key role in fashioning our position. On an international level, an NGO Committee on Aging was organized in New York in 1977 which regularly sponsors meetings through the U.N. Secretariat and other international aging groups. There is also an NGO Committee on Aging in Vienna which provides for a comprehensive and coordinated approach to international aging issues. On a national level, there are approximately 40 aging organizations with a total membership of 18 million. It is undoubtedly clear that these 18 million citizens have made themselves actively allies of the elderly and are critical to policy formulation on Federal, State, and local levels.

THE CALL FOR INTERNATIONAL ACTION

The basic force behind the convening of the WAA is the basic fact that we are growing older as a society and the concurrent acknowledgment that this aging process has major political, social, and economic implications. Statistics best illustrate this point: The world's total population will increase from about 4.1 billion in 1975 to 6.1 billion in the year 2000—a 49-percent jump. Of this increase, the aged population is expected to grow from 348 million to 590 million—an increase of 70 percent. This increase will be especially pronounced in less developed countries which anticipate that their cumulative populations will double—from 180 million to 360 million. Compare this to developed countries which will experience a 39-percent jump in the same time period, from 166 to 230 million.

Concurrent with the demographics question are the socioeconomic questions that also arise. These issues cover a broad range of issues from health care to housing to education. One of the key roles of the WAA was to identify critical areas of mutual concern and share this information with participants. In a world of ever-diminishing resources, the method by which these resources are allocated and the beneficiaries of these resources must come under close scrutiny. The elderly, which are most often most severely effected by changes in the socioeconomic fabric of a polity, must be assured an adequate standard of living. Just how this standard is and must be addressed in the world of today was a bold and farsighted challenge which was presented to the delegates at the WAA.

The final document adopted by the delegates, known as the Vienna International Plan of Action on Aging was overwhelmingly approved and will be submitted to the United Nations this fall for final approval. The final conference document closely reflected the U.S. goals and initiatives which:

Designated an appropriate intergovernmental body, the ECOSOC Commission for Social Development as responsibile for oversight of the adopted plan of action;

Designation of the UN's Administrative Committee on Coordination as the liaison between the UN agencies and those responsible for implementation of the plan;

Designation of the U.N. Center for Social Development in Vienna as the focal point for any followup activities; and

The continuation of the WAA voluntary trust fund to financially support the work of those organizations and individuals who will implement the plan of action through both the public and the private sectors—which will also be encouraged to lend their contributions to the maintenance of the trust fund.

As we assess the success of the U.N. World Assembly on Aging, let me focus on two particular points. The first was the tremendous work performed by Ambassador John McDonald who was the main administrative officer for the delegation but more importantly the inspiration of the group. He has done extensive work with his counterparts from other nations in the months prior to the Assembly and as a result the U.S. delegation was able to be very productive and was looked to by other delegations to set the tone on policy discussions. Ambassador McDonald is deserving of high praise for his work.

A second point which tarnished the otherwise successful conference were the actions of a group of some 50 nations which attempted to politicize the Assembly through their opposition to Israel. More specifically, delegates from 53 nations staged a walkout from the conference during the speech given by the head of the Israeli delegation. It was so unfortunate to have a nongermane political issue interjected into still another U.N. conference. I considered it an insult to all who came to the conference for the express purpose of trying to improve the lives of the 300 million elderly citizens of the world. I was further dismayed to learn that the conference despite the opposition of the United States did include language in their final document which was critical of Israel and their actions in Lebanon.

The United Nations World Assembly on Aging afforded us an opportunity to reflect with pride on all that this Nation has done with respect to the development of policies to aid the elderly. We are especially sophisticated and advanced in our Federal programs which provide important social and human services to our elderly citizens. Such legislative programs as those under the Older Americans Act provide us with good models for the rest of the world in terms of developing partnerships between different levels of government to insure the provision of services.

The relationships, the dialogs, and the sharing of information between various nations were all beneficial aspects of this World Assembly. This event should be viewed as a catalyst for future and further action by the world community on behalf of its older citizens. What we can better for society today will be the benefit of all of mankind's tomorrow.●

USE OF POTENTIAL AUTO BREAKTHROUGH BY FEDERAL FLEET

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. BROYHILL. Mr. Speaker, the Federal Government has imposed many responsibilities upon the auto industry in this country. Two major responsibilities are to increase the fuel economy of automobiles to lessen our dependence upon foreign oil, and to

cut the emissions of harmful pollutants which adversely affect the health of the American people. The auto industry has done an admirable job addressing these concerns in the past several years.

Every year different people claim to have invented engines or devices which will enable vehicles to squeeze even more miles out of each gallon of fuel or release even less pollutants from the tailpipe. Inevitably, thorough testing has exposed these inventions as failures.

A new device has been developed in the last 3 years known as the Webster-Heise valve. This valve has been tested by a U.S. EPA-certified laboratory, at the inventor's expense, and has come through with some remarkable results. Cars equipped with this simple device have registered the following advances: Fuel efficiency increases of up to 20 percent; increases in torque—power—of up to 40 percent; reductions in nitrogen oxide emissions of up to 50 percent; reductions in carbon monoxide emissions of up to 45 percent; and reductions in unburned hydrocarbon emissions of up to 13 percent. Furthermore, cars equipped with the valve operated best on 75 octane gasoline.

The Congressional Research Service issued an exhaustive analysis of this test data and has concluded that the device presents the "potential for substantial national benefits in fuel efficiency, reduced dependence on imported oil, improved balance of payments position, and reduced automotive air pollution." Based on this preliminary data and analysis, Congressman MADIGAN and I recommended to Secretary Drew Lewis that the Department of Transportation conduct tests of the Webster-Heise valve. These tests are now ongoing.

Today, Mr. MADIGAN and I are introducing a bill which we feel provides the next logical step in the testing of this device. The bill amends title V of the Motor Vehicle Information and Cost Savings Act to allow the Administrator of the Government Services Administration, in consultation with the Secretary of Transportation, to require that at least 10 percent of new gasoline-powered cars in the Federal fleet be equipped with the valve. This decision would be based on a finding by the Secretary that there is a substantial likelihood that the valve results in increased fuel efficiency and decreased auto pollutants, based on the ongoing DOT tests.

I do not know if this valve works or not, I only know that test results so far are very promising. I feel that the ongoing DOT tests which I requested along with the program established by this bill will give us a clear answer. If that answer is affirmative, the positive consequences to the American consumer and the country as a whole could be tremendous.●

THE MOOD OF HOOSIERS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. HAMILTON. Mr. Speaker, I would like to submit my Washington Report for October 27, 1982, into the CONGRESSIONAL RECORD:

THE MOOD OF HOOSIERS

A few weeks of intensive visiting with Hoosiers always sharpen my impressions of the things on their minds. A politician is forever trying to catch the mood of his constituents, but that mood, like the wind, is constantly shifting. So I try to monitor it and assess it, testing its direction and force. Measuring the mood of Hoosiers toward government and the economy is, in my view, absolutely critical to the decisions I must make as I vote on legislation and oversee the operation of government. For what they are worth, these are some of my impressions of that mood today.

Several themes are prominent in Hoosiers' thinking. Hoosiers want to reduce the size and cost of government. They want to eliminate waste and fraud in government. They want to cut down federal regulation and red tape. They want to live in a more stable and peaceful world, and they believe that strengthening American military power and launching bold initiatives for peace are essential to that goal. At the same time, they show signs of weariness with the costs and risks of being a world power. In this regard, the size of the foreign aid budget and the danger faced by our Marines in Lebanon are two things which trouble them. Most important of all, Hoosiers want to have a growing economy with jobs for all who need them and low rates of inflation and interest. They recognize that the Hoosier economy is down, but they are holding tight for now and they expect a brighter future.

One of the questions which Hoosiers are wrestling with is the proper role of government. Many of them like the idea of reducing that role, but as specific steps are taken to do so they begin to have second thoughts and they come to think that perhaps the recent budget cuts may be going too far. They have the sense that the scales have been tipped against the average person. Many now say, for example, that cutting spending for social security and pollution control is a misstep, a false economy. Hoosiers reject the excesses of government in the past, but among them the feeling that we may be going from one extreme to the other is growing.

As much as anything else, Hoosiers are seeking a proper balance between government which cuts too much and government which spends too much. They seem to want a lot done, and they accept (even if they are not happy about) the fact that there is no recourse but for government to have some important responsibilities. They also know that big government creates all kinds of problems. So they want public officials to reshape the institutions of government, improve the capacity of government, and show that governmental systems can work better. They want to be assured that government is an institution worthy of their confidence. They are seeking real changes in the conduct of the public's business, but they do not want radical or revolutionary changes. The mood in favor of limits to government action and retrenchment in government budgets seems strong. My guess is that it is likely to be with us for an extended period of time.

Hoosiers are also interested in a whole set of social issues—more so, I think, than the polls may indicate. Issues such as education, crime, drunk driving, and child abuse are very much on their minds. In education, for example, the question is not only busing and federal funding, but also a demand for discipline and competency in the classroom. On crime and drunk driving, the mood is definitely one in favor of an immediate, uncompromising crackdown. Hoosiers want criminals off the street and drunk drivers off the road—period. I have been impressed by the growing number of people who express a genuine desire for more action on child-related problems—child abuse especially, but also the problem of runaways and missing children.

Everywhere I go in Indiana, people want government to develop a coherent policy to deal with the future. There is a widespread sense that our problems are accumulating, even piling up on us, and that they are not being disposed of efficiently or effectively. Very noticeable among Hoosiers is the wish that government do much more to make the world a safer place to live and work—whether the danger be from poisoned medicines, impure water, muggers, terrorists, or nuclear weapons.

When politicians talk about how complex our problems are, there is, I fear, a note of condescension in their voices. However, Hoosiers know that the world is complicated and that the solutions to problems are not easy to come by, but they really do not expect politicians to perform miracles. At the same time, Hoosiers are saying that adjustments are necessary and that staying put will only get the country into deeper trouble. They are quite prepared, even willing, to endure some temporary pain if they believe that the pain will help us reach our long-term goals. The question for politicians, of course, is what and how much temporary pain people are willing to bear.

When he comments on foreign affairs, many a Hoosier will say that he really cannot abide the thought that United States is being pushed around in the world, whether by friend or foe. Just as often, however, he will volunteer his opinion that it is unwise to allow so much international tension to build up. I have been struck by Hoosiers' uneasiness with moves which increase international tension. They want their leaders to be assertive, but not belicose, in the conduct of foreign policy. Hoosiers invariably favor initiatives which enhance chances for stability and peace.

All this is written with some sense of tentativeness. The more I study and deal with the public mood, the more reluctant I am to conclude that people are demanding a particular action and the more certain I am that whatever the mood today, it will probably be slightly different tomorrow.●

CONGRESS, THE PRESIDENCY, AND FOREIGN POLICY

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. BROOMFIELD. Mr. Speaker, my colleagues will be interested to learn that on November 9-10, a 2-day symposium on "The Congress, the President, and Foreign Policy" was held at the Ford Presidential Library in Ann Arbor. Although it was not possible for me to accept the invitation to participate, I have had the opportunity to review the remarks of Dr. Walter W. Rostow, who addressed the panelists at a dinner hosted by the University of Michigan. As a historian, experienced public servant, and adviser to Presidents Kennedy and Johnson, Dr. Rostow speaks with authority on the role of Congress and the Presidency in the foreign policy arena, an issue particularly timely today in the midst of remembering the Vietnam war and the controversies surrounding its conduct, the aftermath of its legacies, and the sacrificies made by hundreds of thousands of the young Americans involved in it. I commend his cogent observations to all my colleagues, Republicans and Democrats alike, for we all bear a heavy measure of responsibility to promote bipartisanship in the formulation of foreign policy.

I would like to add a word about the foreign policy seminar at the Ford Presidential Library, cosponsored by the Gerald R. Ford Foundation; the Association of Former Members of Congress, the 600-member congressional alumni organization; the Atlantic Council; and the University of Michigan. A group of distinguished public servants and scholars participated in the panel discussions, including three former Secretaries of State. Their deliberations initiated a 2-year study by former Members of Congress and the Atlantic Council to explore, in depth, the interrelationships between the executive and legislative branches in all matters of foreign policymaking. Those who will be working on the project possess a great reservoir of practical experience in the political and governmental affairs of the United States, and I look forward to the results of their research. Their perceptions and subsequent recommendations promise to make a substantial, constructive contribution, not only to the work of all of us here in the Congress, but to a clearer public understanding of the problems.

Dr. Rostow's remarks follow:

FOREIGN POLICY: THE PRESIDENT, CONGRESS, AND PUBLIC OPINION

A few days ago I suddenly recalled, while in the office of the Dean of the LBJ School of Public Affairs—who happens to be my wife—that I was committed to speak here tonight. I turned to the Dean and asked if she had some books on her shelves on the subject of this symposium. Without a word she began to collect and deliver one armload of books after another until I said: "Thanks; enough." Among others in the pile were Morison, Bemis, Bailey, Spanier and Nogee, Crabb and Holt—even the report of a 1979 joint LBJ School and Library symposium on the Presidency and the Congress. As I refreshed my memory of the accumulated wisdom on this well-worked but still elusive subject, I was struck by the following passage from the lead article in Foreign Affairs for the spring of 1979, which was also included in the Dean's pile and underlined in red: ". . . I confess to increasingly serious misgivings about the ability of the Congress to play a constructive role in our foreign relations." The author: J. William Fulbright.

There is a good deal to be said for the distinguished Senator's retrospective scepticism. In fact, there were times when I wished he, as an active Senator, had accepted this dictum. We all know that the Constitution is written so as to focus the attention of Congress on their districts and states and, therefore, on local public opinion. We all know that Congress is a diffuse and changing body. There are experienced and wise members of Congress, with a knowledge of foreign affairs to match any in the Executive Branch. Presidents should and often do seek their views; but advice is different from responsibility. Collectively, Congress can, at certain moments, act and, even, act decisively in foreign policy; but there is no continuing locus of responsibility. Moveover, the Congress can change its view on an issue of foreign policy, responding to the swings of public opinion, in a way denied to the President. Above all, Congress can, if it wishes, avoid acting on a problem, leaving the burden of action and political risk to the President.

Wilbur Mills, for example, captured the relationship well at a meeting at the LBJ Ranch early in 1968. President Johnson was asking the leadership for prompt legislative action on a controversial balance of payments measure. At the end, Mills delivered his negative response in the following words: "Mr. President, you sure have my sympathy. You've got more troubles than a dog has fleas." On this matter, clearly, the fleas were going to be Lyndon Johnson's, not Wilbur Mills'. And that's a part of what a President is paid for. The Constitution is so written that foreign policy is inescapably the President's problem; whereas the members of Congress, after consultation, can return to the Hill and leave it to the man occupying 1600 Pennsylvania Avenue.

Having been involved in the business of the Executive Branch, in one way or another, on and off since the summer of 1941, I wish I could, on this occasion, accept the Fulbright Doctrine and make a straightforward case for a Presidential monopoly in foreign affairs. but neither my knowledge as an historian, nor my experience as a public servant, nor, above all, the dictates of the Constitution permit me to do so. Constructive or not, the Constitution mandates an important role for Congress in foreign affairs; and, in the end, I am sure the Founding Fathers were wise in this as in other matters.

So I am back where, I suspect, you have been since this symposium started this morning: trying to sort out the patterns and lessons to be drawn from 194 years of Executive-Congressional relations in foreign policy: years of quiet, of occasional sturdy partnership, and of stormy contention—never more stormy, incidentally, than in the first quarter century of the nation's constitutional life.

II

In preparing these brief remarks, I made four lists:

Examples of constructive Congressional initiatives in foreign policy;

Examples of constructive partnership between Congress and the Executive Branch;

Examples of costly contention between Congress and the Executive Branch; and

Examples of essentially unilateral presidential action in which Congress acquiesced without major opposition.

The first is a short but not trivial list. And I am pleased to note, given my initial quotation, that on any such list one would have to place the Fulbright Fellowships. Of greater constitutional interest is the role of certain Senators, in the late 1950's, in breaking a kind of schizophrenic deadlock within the Executive Branch on the question of development assistance to Latin America, Africa, the Middle East, and Asia. There was a stand-off within the Administration between supporters and opponents of development aid from 1953 forward which, for whatever reasons, President Eisenhower was not prepared firmly to settle. In the late 1950's a group of Senators of both parties took a series of initiatives, of which the Kennedy-Cooper resolutions of 1958-1959 on aid to the Indian subcontinent are a good example. As John Kennedy said on March 25, 1958: "There is no visible political glory for either party in coming to the aid of India. . . ." Nevertheless, his and other enterprises went forward. They not only permitted Eisenhower and Dulles to support the Development Loan Fund but also to respond positively to a series of crises in 1958 in Latin America and elsewhere. The creation of the Inter-American Development Bank and the World Bank's International Development Association were among the fruits of this period.

There are no doubt other examples; but I did not wish to leave Fulbright's somewhat self-flagellating dictum unchallenged.

III

As for effective partnerships—my second list—there have been a good many and they are worth recalling and studying carefully.

The collaboration of a series of Presidents with key Senators in the other party to achieve the creation of the United Nations, support for the Truman Doctrine, the Marshall Plan, NATO, SHAPE, and, most recently, the more controversial passage of the Panama Canal treaties.

There was also the collaboration of President Eisenhower with Senator Lyndon Johnson, which, I heard Eisenhower explain to Johnson in the summer of 1968, was a necessary condition for conducting a "civilized foreign policy" in his time of responsibility.

A number of Senators, at considerable risk, and President Ford performed that function with respect to the Panama Canal Treaties.

The role of Senators Vandenberg, Dirksen, Johnson, and others who helped unite the Executive Branch, the Congress, and the nation at critical moments is a proud aspect of our Constitutional history.

At this point I would simply note that the key to success in all such ventures in Presidential-Congressional collaboration was the rallying of public opinion—and opinion leaders—by full and effective presentation of

the facts. Senator Vandenberg's statement of February 27, 1947, to President Truman of the conditions for supporting the Truman Doctrine is the prototype. He demanded:[1] ". . . a message to Congress and an explanation to the American people, in which the grim facts of the larger situation should be laid publicly on the line as they had been at their meeting that day." Let me recall that Truman's popularity at the time was low; he was generally regarded as a lame duck; Vandenberg was judged to be a quite likely successor; but Vandenberg was wise enough to understand that only the blunt laying of the facts before the people by the President would permit Vandenberg to carry the Senate and Congress in support of what the nation then required. In short, the successes hinged on making the triangle that links the President and Congress work—the crucial third side being public opinion.

IV

Now my third list: the failures of Presidential-Congressional collaboration. There are more than we would wish, but I will cite only three.

Wilson's failure to carry the Senate on the Versailles Treaty and entrance into the League of Nations.

Franklin Roosevelt's failure to persuade the Congress and the people to abandon isolationism until Hitler controlled the European continent and the Japanese attacked Pearl Harbor.

The division between Presidents Nixon and Ford and the Congress over policy toward Southeast Asia in 1973-75 leading to the unilateral Congressional destruction of South Vietnamese military capabilities and morale by radical reductions in the military aid promised by President Nixon to the South Vietnamese government as a condition for acquiescence in the terms of the 1973 agreement.

Merely to evoke these painful episodes is to recall how complex the issues in contention can become. There is Wilson's peculiar personality and style and Henry Cabot Lodge's, as well; there is the disabused interwar interpretation by the Congress and the people of the First World War—an interpretation that played a significant part in the process that led to the Second World War; and, of course, as President Ford's memoir and all other evidence make clear, there is the interweaving of Watergate and the weakening of the Presidency with the destruction by Congress of the peace agreement of 1973, painfully earned, over more than eight years, with the blood of South Vietnamese, Americans, Australians, Koreans, and others who supported the purposes of the Southeast Asia Treaty. (I have stated the nature of the tragedy of 1973-1975 as I feel it; but the tragedy is equally real for those who believed or came to believe we had no business making strategic commitments to Southeast Asia in the first place and that Congress rescued the nation from a costly and misguided policy.)

Before characterizing the nature of these failures, let me give some examples from my fourth list—major unilateral presidential initiatives that occurred with Congressional acclaim or without great or protracted controversy: the Berlin airlift; President Eisenhower's Open Skies proposal of 1955; the Cuba missile crisis; the U.S. intervention in the Dominican Republic in 1965; President Nixon's opening to China; President Carter's negotiation of the Camp David Accords.

The reason for the relative success of these initiatives is, of course, that they had substantial majority support in public opinion. They either appeared to move the world in the direction of peace, or they dealt with a potential source of military conflict without significant bloodshed and promptly.

Here, I believe, is the clue to the cases of tragic failure—my third category—and to the essential nature of the relations of President and Congress in foreign policy. The failures are all cases where public opinion was a key variable. The Presidents either failed to sustain public support or could not do so because there was no lucid, deeply-rooted concept of the nation's abiding interests on the world scene to see the nation through a protracted crisis.

Wilson did not explain our declaration of war in 1917 as necessary to protect the nation's abiding interest in avoiding hostile control of the Atlantic and in maintaining a favorable balance of power on the European continent. He held up a transcendent vision of a world made safe for democracy—an admirable vision but beyond the capacity of the United States to achieve. By the time the battle over the Versailles Treaty occurred, it was clear to the American people that, League of Nations or not, it was going to be, still, a pretty ugly world; and a revulsion began that persisted and even gathered strength in the 1930's. Democratic liberals like Harry Hopkins converged with Republican conservatives like former President Hoover to argue, with overwhelming majority support in public opinion, that we could and should keep out of the conflict of the 1930's raging in Asia and obviously about to break out in Europe. The eloquence of one of our most popular and persuasive presidents could neither evoke U.S. action to try to prevent the coming war nor, even, prepare the nation to defend itself.

With respect to Southeast Asia in 1975—despite overwhelming support for the Manila Treaty two decades earlier—there was no solid understanding in the Congress or public opinion of why seven successive presidents, from Franklin Roosevelt to Gerald Ford, had made or reaffirmed serious strategic commitments to Southeast Asia. (With President Carter's and President Reagan's reaffirmation of the application of the Southeast Asia Treaty to Thailand, the number is now nine.) The opening to China and apparent détente with the Soviet Union converged with Watergate and other forces to lead Congress and a popular majority to believe that, without significant cost to the national interest, we could turn South Vietnam over to the Communists.

I conclude much in the vein of President Washington's Farewell Address, after eight years when he tried to protect the interests of a young country with no lucid or stable sense of its national interest. Almost two centuries later, the major conflicts between the President and the Congress in foreign policy are still the consequence of a lack of stable consensus in our society on the national interest. With respect to Europe and the European balance of power, perhaps something of a consensus has been achieved and institutionalized; although the consensus is periodically challenged and cannot be taken for granted. And we have three times reacted strongly to reestablish, after going slack, what we hoped was an adequate military balance with the Soviet Union—after the invasion of South Korea in June 1950; after the Soviet launching of Sputnik in October 1957; and in the wake of the Soviet invasion of Afghanistan. But, by and large, the behavior of the U.S. in foreign policy in this century has conformed to Dr. Samuel Johnson's dictum: "Depend upon it, Sir, when a man knows he is to be hanged in a fortnight, it concentrates his mind wonderfully." We have oscillated between isolationism, indifference, wishful thinking and complacency, on the one hand, and, on the other, the panic-stricken retrieval of situations already advanced in dangerous deterioration. We recognized our national interest only when we faced real and present danger—a rather dangerous habit in a nuclear age.

That is roughly what Alexis de Tocqueville, writing a century and a half ago, said we would do. And that oscillation explains, I believe, a high proportion—not all—of the tensions between the President and the Congress in foreign policy. By and large—without higher intellect or virtue and with some exceptions—Presidents have perceived the national interest in a steadier way than public opinion or a Congress mandated by the Constitution to be attentive and sensitive to public opinion.

The remedy for this dangerous cyclical behavior, to the extent there is a remedy, clearly lies in a sustained effort by our political leaders to develop a wide bipartisan consensus on the nature of the nation's abiding interests on the world scene—an effort not rendered easier because there is an ideological strand embedded within us which would deny that we, like other nations, have abiding interests.

V

That is about all I have time for tonight except for a final reflection. We can hope that our society evolves a more mature and stable notion of its relation to the rest of the world; and we can all try to contribute to the emergence of a more stable, forehanded consensus. But we shall still need from time to time, I suspect, the exercise by our Presidents of a little noted extra-constitutional dimension of our political life.

The White House is, in a good sense, a haunted house. The family quarters are cheerful and, indeed, modest by standards of other homes of heads of state. All the presidents since John Adams lived there—Adams for only a few months. Lincoln slept and ran the war from what is now known as the Lincoln Bedroom. It is hard for a President in that house to escape a living sense of his predecessors and successors. He knows that his predecessors often left office defeated—and, if not defeated, with the mob howling at their heels, as did President Washington. Often this was because they did what they deeply believed was the right but unpopular thing for the country. Presidents are and should be politicians, and they don't like to be unpopular; but they also wish to be worthy of the best in their predecessors and to be respected by their successors.

From, say, John Adams' determination to avoid war with France at the cost of the possibility of his re-election, down through Harry Truman's firing of Douglas MacArthur and Lyndon Johnson's stoic pursuit of a cautious and unpopular strategy in Southeast Asia to Gerald Ford's response to the *Mayaguez* incident in the midst of a political mood that simply wanted Southeast Asia to disappear from the face of the earth, we have needed that kind of lonely, unilateral

courage by our Presidents. We shall continue to need it.●

AMERICAN GATHERING OF JEWISH HOLOCAUST SURVIVORS NOVEMBER MASS REGISTRATION MONTH

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. WAXMAN. Mr. Speaker, in June 1981, the World Gathering of Jewish Holocaust Survivors was held in Israel. No one who witnessed the ceremonies at Yad Vashem will forget the poignancy of the memorial services which brought together survivors from all parts of the world. United by their experiences and rememberances of lost loved ones, they were joined by dignitaries from throughout the world in paying homage to the victims of Nazi tyranny. Those who viewed the event on television or read the newspaper accounts were similarly moved.

November has been designated as American Gathering of Jewish Holocaust Survivors Month, to mark the beginning of mass registration for the American gathering which will be held in Washington, D.C., in April 1983. An outgrowth of last year's world gathering, it will mark the 40th anniversary of the Warsaw ghetto uprising.

Led by the President of the United States ceremonies will take place at the Lincoln Memorial, at Arlington National Cemetery, and at the site of the planned Holocaust Museum and Memorial. It will also mark the first national meeting of Our Children, the second generation of survivors. The gathering will host delegations from Israel and other countries who have pledged themselves to keep alive forever the memory of the fighters and martyrs of the Holocaust and to remain a unified force in the ongoing battle against anti-Semitism.

The Southern California Council of Post-War Jewish Organizations, Survivors of the Nazi Holocaust has been in the forefront of the national movement for the establishment of the newly formed American Gathering. Approximately 20 percent of all survivors in America reside in southern California.

On the national executive committee, the Southland is represented by Irving Peters of Los Angeles, a national vice president, Fred Diament, and a number of other community leaders. Ben Meed of New York is national president. Elie Wiesel, who also serves as chairman of the U.S. Holocaust Memorial Council, is honorary president.

I ask the Members to join me in recognizing November as American Gathering of Jewish Holocaust Survivors Month, as the mass registration begins for this historic event. ●

STATEMENT OF CONGRESSMAN JACK BROOKS BEFORE THE U.S. HOUSE OF REPRESENTATIVES

HON. JACK BROOKS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. BROOKS. Mr. Speaker, the Texas State Legislature has passed a resolution regarding the importance of maintaining a strong commitment to the Nation's elderly on both the State and Federal levels. The resolution reflects my own views and, I believe, those of other concerned legislators that we not forget the accomplishments and contributions the elderly have made to this great society. Now more than ever, with economic conditions and this administration's budget cuts threatening the very livelihood of these citizens, we must maintain our commitment to providing our senior citizens the support and opportunity to live in comfort and security. I am pleased to insert the resolution into the RECORD for the Members to read.

The resolution follows:

HOUSE CONCURRENT RESOLUTION

Whereas, the number of elderly persons in Texas is growing rapidly; the 1980 census reflects more than 1.9 million Texans age 60 and older, and the total is projected to increase to more than 3 million by the year 2000; and

Whereas, the quality of life of senior citizens is very important, and insofar as possible, the aging should be able to enjoy within their own families and communities a life of fulfillment, health, security, and contentment and should be appreciated as an integral part of society; and

Whereas, the great majority of these persons are able to live full and useful lives. For some, however, advancing age brings increasing dependence on their families, communities, and governments. Older people in this society should be able to participate in the full continuum of community life in order to enhance their physical and mental health; and

Whereas, complex issues require a working partnership among individuals, families, communities, volunteers, private enterprise, and government to plan for the most efficient and effective use of resources from every sector to meet the needs of our elderly population; and

Whereas, being part of the work force is conducive to better mental and physical health, and appropriate opportunities for obtaining financial stability, through employment, public or private subsidies, or other forms of assistance pension plans, should be fostered for the elderly; and

Whereas, senior citizens in Texas have undertaken to help themselves by means of a statewide network of area agencies on aging sponsored by regional councils, local governments, and private nonprofit organizations through programs administered and supported by the Texas Department on Aging; and

Whereas, improper nutrition is recognized as an acute problem among the elderly, with many older persons being unable to afford quality food for well-balanced diets or lacking mobility or incentive to prepare nutritious meals; and

Whereas, proper nutrition is an essential component of good health and is essential for people to live productive, meaningful, and independent lives; now, therefore, be it

Resolved by the Texas House of Representatives, (the Senate concurring), That the 67th Legislature, 3rd Called Session, commend all components of the Texas State Aging Network for their outstanding efforts on behalf of the elderly; and, be it further

Resolved, That the 67th Legislature recommend that meeting the needs of older persons be a continuing legislative commitment; and, be it further

Resolved, That the Texas Legislature hereby respectfully memorialize the Congress of the United States to give priority consideration to providing adequate funding to maintain and strengthen comprehensive and coordinated services for the elderly citizens of our nation, particularly those services providing adequate and proper nutrition; and, be it further

Resolved, That a copy of this resolution be prepared and forwarded to the President of the United States, the President of the Senate and the Speaker of the House of Representatives of the United States Congress, and all members of the Texas delegation to the Congress with the request that this resolution be officially entered in the Congressional Record as a memorial to the Congress of the United States of America.●

IMMIGRATION REFORM AND CONTROL ACT

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. FISH. Mr. Speaker, on Friday, November 12, 1982, the Poughkeepsie Journal published an editorial concerning H.R. 6514, the Immigration Reform and Control Act. The House Judiciary Committee has worked very hard on this legislation, a similar version of which has passed the Senate, and I urge my colleagues to support the committee's efforts to enact this vital immigration measure into law this year. There are many deserving bills waiting to be debated on the floor of the House, but few affect the basic structure of our society as much as H.R. 6514.

I would like to bring the editorial to the attention of my colleagues to demonstrate the importance of the bill and the notice it has received not only in Washington, but in local communities throughout the United States.

The editorial follows:

ALIENS AND THE LAW

Last August, the United States Senate had the good sense to adopt the Immigration Reform and Control Act by the overwhelming, bipartisan vote of 80 to 19. The House of Representatives is scheduled to vote on the bill when Congress reconvenes later this month.

The House bill is essentially the same as the one adopted by the Senate—with one notable exception. That exception—which

addresses welfare benefits available to certain illegal aliens—could severely undermine the bill's effectiveness and could cost American taxpayers billions of dollars. It ought to be dropped from the House bill.

The authors of both versions of the bill recognize that the government has neither the inclination nor the manpower to locate, uproot and deport millions of illegal aliens already living here, Most provisions in both bills are aimed at stopping future illegal immigration by imposing stiff sanctions against employers who knowingly hire illegal aliens.

Both bills permit illegal aliens who have been here for more than five years to apply for permanent resident status, and both provide for temporary status for those who immigrated here in the last five years. Law-abiding immigrants who hold jobs and conform to other standards would eventually be given permanent legal status.

The Senate version of the bill excludes aliens placed on temporary status from receiving aid through such federal welfare programs as food and Medicaid. The bill does provide block grants to states for medical care and other emergency services for these immigrants on a case-by-case basis.

The House bill goes much farther—too far, in fact. It provides federal money for all state and local welfare programs for all immigrants who are granted temporary resident status.

The Justice Department has estimated that the House version of the bill could cost an extra $4 billion over the next three years. In addition, we believe, it would encourage others to immigrate here illegally. Illegal aliens should not automatically be entitled to the same welfare benefits as legal aliens or American citizens.

Before the House votes on the immigration bill, we urge House leaders to amend it to conform with the Senate version.●

TRIBUTE TO CECIL E. MacKINNON

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. KILDEE. Mr. Speaker, Flint, Mich. lost one of its most unforgettable native sons on November 5 with the passing away of Cecil E. MacKinnon. He lived his entire 81 years there, spending much of that time in sharing his delight with life and his sense of fun and neighborliness.

He becomes widely known for his sense of humor, his pride in the history of Flint and his gift of time in helping others. This concern showed itself especially at this time of year when it is customary for the Salvation Army to sponsor a Tree of Lights. He was chairman for 20 years.

Never having lost the child's anticipation for Christmas morning, Cecil MacKinnon worked and urged others to give so that every light on the Tree of Lights could glow. When he saw the light on top of the tree go on, he knew that many children would awaken to a fine Christmas.

He was Flint's Tom Sawyer in many ways: Boy and man. As a redheaded boy singing in the choir while his mother played the organ, he would respond to the sound of horses' hooves, and fire wagon bells, and often disappear from the choir loft to follow. He hung around the fire station until they showed him the door, but the day came when they honored him with a Fire Chief's honorary badge and named him "Fire Buff of the Year."

A teller of tales about the old days, he passed along the colorful events of Flint's early 1900's. He became a recognized historian, one to whom people could go for bits of information, whether they were students writing compositions or city officials in need of reliable data.

He used his longtime knowledge of the city to follow a phase of history usually overlooked—the naming of streets and avenues. He made a study of city directories and collected the small details that enrich local history in hopes of publishing a book on Flint's streets.

Through his interest and efforts, a fine, old marble fountain that once stood in the center of downtown Flint was brought out of retirement and placed in a park. A plaque inscribed with his name is evidence of his contribution.

Honors came, one after another: The Hands of Mercy Award from the Salvation Army, the Liberty Bell Award for community achievement from the Genesee County Bar Association, the Heritage Award from the Genesee County Historical Society, and Florist of the Year Award from others in his own profession.

Cecil MacKinnon will be missed by his family, his friends, and his community. Far into the future, when Flint's Tree of Lights shines brightly, people will think of him when the topmost light begins to glow.●

TAXING UNEMPLOYMENT BENEFITS—AN IDEA WHOSE TIME ALMOST CAME BUT NOW SEEMS TO HAVE WENT

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. BIAGGI. Mr. Speaker, the Thanksgiving holiday was rudely interrupted for millions of Americans when news reports surfaced that the administration was contemplating a new tax on unemployment benefits. The flap has subsided somewhat by virtue of the President's statements disassociating himself from the recommendations of an administration task force which included a new tax on all unemployment benefits as compared to current law which makes benefits tax exempt for those with incomes under $12,000, individual, and $18,000, family.

As a senior member of the House Education and Labor Committee I wish to state my absolute opposition to any taxation of unemployment benefits beyond what is provided for under current law. To subject the unemployed to a tax on their weekly benefits is to make these unfortunate Americans double jeopardy victims of our recessed economy. We cannot overlook the fact that millions of Americans have become unemployed as a result of the failure of the President's economic policies. To then subject their means of existence to a new tax is to compound their victimization.

In practical terms, the average weekly unemployment benefit is less than $115 a week. In many home State of New York for the first 6 months of this year the benefit level was a mere $102.64 a week. At what level would we tax these benefits? What basic item of existence would an unemployed worker or their family have to give up to pay this tax?

Further, one of the main rationales for this proposal was that it would help to provide some $2 billion in new revenues which could be used to fund a new job training program. There are several fallacies associated with this idea not the least of which is the fact that job training is not employment. This administration seems to place great faith in job training initiatives as the means to reduce unemployment. However it is one thing to train people for work, it is something entirely different to actually find employment. The recession we are in is discouraging employers in the private sector from hiring. Further, it should be noted that many of those unemployed today have already been trained and in fact are skilled workers in their own right. Their problem was economic hard times caused their business or factory or industry to scale back their work force. These people do not need new training—they need their old jobs back or to be placed in a new job where their already acquired skills can be used.

I am pleased that this latest administration economic trial balloon was shot down by an outraged public. One assumes that it will not be refloated later but I am confident that if it is Congress will take steps to oppose any such initiative.

As we begin this lameduck session of Congress let us concentrate our resources on getting the tragic double-digit unemployment rate lowered. Let us strive to improve the quality of life for the millions who today are victims of the recession. Let us not compound their miseries with ill-timed and ill-conceived proposals such as the biggest Thanksgiving turkey of 1982—the unemployment benefit tax proposal.●

JULIUS WILE SONS & CO. OPPOSES SHIPPING ACT OF 1982

HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. McGRATH. Mr. Speaker, I have been asked by Harry G. Smith, general traffic manager of Julius Wile Sons & Co., Inc., to correct an apparent misunderstanding of the firm's position on H.R. 4374, the Shipping Act of 1982.

During the September 13 debate on H.R. 4374, a list of firms supporting the legislation was inserted in the RECORD on page H6904. Julius Wile Sons & Co. is listed as supporting the measure when, in fact, it opposed passage.

I insert in the RECORD at this point a letter I received from Mr. Smith on November 2, together with several attachments to that letter.

JULIUS WILE SONS & CO., INC.,
Lake Success, N.Y., November 2, 1982.

Re H.R. 4374.
Hon. RAY MCGRATH,
Congress of the United States,
House of Representatives,
Washington, D.C.

DEAR MR. MCGRATH: The Congressional Record—House dated September 13, 1982, shows that Julius Wile Sons & Co., Inc. supported the above captioned bill.

This is an error and I am attaching copies of my letters and telegrams in opposition to same as follows:

1. Letter to Honorable Drew Lewis, DOT, dated April 27;

2. Telegram to Honorable Peter W. Rodino, Jr., dated April 29;

3. Telegram to Honorable Mario Biaggi dated May 6;

4. Telegrams to Honorable Paul N. McCloskey, William Carney, Carroll Hubbard, Jr., William J. Hughes, Gene Snyder, Edwin Forsythe, Norman Lent, dated May 6;

5. Letter to Honorable Paul N. McCloskey, Jr., dated June 16;

6. Letter to Honorable Paul N. McCloskey, Jr., dated August 10;

7. Letters to Honorable William Carney, Peter W. Rodino, Jr., William J. Hughes, Hamilton Fish, Jr., Mario Biaggi, Edwin B. Forsythe, Norman F. Lent, dated July 16.

I also attach copies of my letters dated July 13 to Senators Alfonse M. D'Amato and Daniel Patrick Moynihan regarding S. 1593, the Senate version of H.R. 5374, urging that this bill not be passed.

In addition, I telephoned your office and voiced my opposition to H.R. 4374 and asked that you vote against it.

Would you please see to it that a correction is made in the RECORD indicating that Julius Wile Sons & Co., Inc. opposed H.R. 4374.

Very truly yours,
JULIUS WILE SONS & CO., INC.,
HARRY G. SMITH,
General Traffic Manager.

APRIL 27, 1982.

Re S. 1593; H.R. 4374.
Hon. DREW LEWIS,
Secretary of Transportation,
Department of Transportation,
Washington, D.C.

DEAR MR. LEWIS: The purpose of this letter is to register our support of S. 1593 and opposition to H.R. 4374 with regard to conferences and shippers' councils.

We feel that open conferences with loyalty contracts and the right of independent action is more than enough for the conference members to insure their survival. We believe closed conferences would enable members to maintain whatever rates suited them in good times and bad legally protected through statute.

Shippers' councils have not been previously permitted in the United States, however, we see ourselves at a distinct disadvantage in negotiating with conferences. We are a small shipper and have a small voice at the bargaining table. We do not feel there would be any negotiating with the conferences but rather they would dictate the rate.

Shippers' councils may also prove to be ineffective in negotiating with the conferences but at least we would be subject to the same ground rules as they and we would be allowed to bargain collectively.

We trust you will take our position into consideration.

Very truly yours,
JULIUS WILE SONS & CO., INC.,
HARRY G. SMITH,
General Traffic Manager.

LAKE SUCCESS, N.Y. *May 6, 1982.*

Re H.R. 4374.
Hon. MARIO BIAGGI, CARROLL HUBBARD, JR., WILLIAM J. HUGHES, GENE SNYDER, EDWIN FORSYTHE, NORMAN LENT, WILLIAM CARNEY,
House of Representatives,
Washington, D.C.
Hand Del.

We believe that the exclusion of shippers' councils in this bill, while granting wide antitrust immunity to the carriers, is unfair and will put us at a distinct disadvantage in negotiating rates and service with them. Provisions to allow shippers' councils should be made part of the bill.

JULIUS WILE SONS & CO., INC.,
HARRY G. SMITH, JR.,
General Traffic Manager.

JUNE 16, 1982.

Re H.R. 4374.
Hon. Paul N. McCloskey, Jr.
Merchant Marine and Fisheries Committee,
Congress of the United States, House of Representatives, Washington, D.C.

DEAR MR. MCCLOSKEY: Thank you for your letter of June 4, with attachments regarding the above and requesting our views.

In brief I would advise that:

1. It stifles competition through expanded anti-trust immunity and permits closed conferences, pooling arrangements, allotment of ports and sailings, regulates the volume and character of cargo, engagement in exclusive, preferential or cooperative working arrangements, enter into other arrangements to control, regulate or prevent competition.

2. It does not provide for shippers' councils which we believe is essential, if we are not to be thrown to the complete mercy of the carriers.

Hopefully you will be successful in amending this bill to permit shippers' councils and bring it more in line with S. 1592 which we find more palatable.

Very truly yours,
JULIUS WILE SONS & CO., INC.,
HARRY G. SMITH, JR.,
General Traffic Manager.●

U.N. PROCLAMATION

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. FRANK. Mr. Speaker, earlier this month my home city of Newton, Mass., commemorated United Nations Day in a ceremony in the city hall. The city issued a proclamation that reaffirmed strong support for the founding principles of the United Nations—international peace, human rights, economic and social cooperation—but also recognized the serious problems that have occurred within the United Nations in recent years.

I support the proclamation made by the city of Newton and I wish to share it with my colleagues. The goals of the United Nations are exemplary. We must give serious thought however, to some of the negative occurrences in the United Nations and consider how we as a nation ought to respond.

The proclamation follows:

PROCLAMATION

Whereas, United Nations Day is designated by the U.N. General Assembly each year to commemorate the founding of the Organization on October 24, 1945; and

Whereas, on this occasion, we join with the peoples of the world in reaffirming our commitment to the principles upon which the U.N. was founded: international peace and security, respect for human rights, and the promotion of social and economic cooperation among nations. United Nations Day also gives us the opportunity to examine our involvement in the world's problems and their solutions; and

Whereas, since the U.N. was founded 37 years ago, the world has changed dramatically, with the addition of more than 100 nations to its membership. In this global community, it is clear that the power to solve the world's problems no longer lies solely in the hands of a few nations. Instead all nations must work together to relieve the suffering of millions, to halt nuclear proliferation, and to promote economic development; and

Whereas, The United Nations recently has become mired in political infighting and has been unable or unwilling to fulfill its role as peacemaker; and has in fact ignored areas of the world in which war and the deprivation of human rights is a daily reality while engaging in diatribes against the United States and its allies for problems caused by other member nations;

Now, therefore, I, Theodore D. Mann, Mayor of the City of Newton, do hereby declare October 24, 1982 as "United Nations Day" and urge all citizens to support the restoration and reaffirmation of the principles and ideals for which the United Nations was created and until which time as that occurs, to consider carefully whether or not

the United Nations, as it is today, merits our continued support.

THE MESSAGE OF THE 1982 ELECTION

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, November 17, 1982, into the CONGRESSIONAL RECORD:

THE MESSAGE OF THE 1982 ELECTION—I

The strongest message of the 1982 election, at least to this politician, is that the voters want the economy straightened out. They want policies which will stop the disastrous rise in unemployment and set the country on the path toward stable, non-inflationary growth.

One way to view the election result is as a grand compromise, with the voters calling for a new political partnership to address the country's economic problems. The preservation of the Senate's Republican majority ensures that the President's domestic objectives will get priority, but the enhanced Democratic House majority opens those objectives to compromise and modification. The ambiguous result certainly improves the competitiveness of American politics.

In many respects, the election amounted to a solid success for the Democrats. By winning seven governorships (despite the loss of California's), the Democrats increased the number of statehouses under their control from 27 to 34. They now have both houses of the legislature in 34 states. They picked up 26 seats in the House, going from 241 to 267, but they were held to no gain in the Senate.

Behind all the numbers, a few facts stand out. The Republicans held the Senate. They lost heavily in the House and even more heavily in the states. In fact, the Democrats' strengthened position in state and local governments may be one of the more important outcomes of the election because of the base it will give the Democrats in 1984. However, neither side felt smug about the result. The Republicans saw that the people continue to like the President, but they also saw that some real doubts about the President's economic program are being openly expressed. The Democrats' win was not as impressive as it might have been. Voters were clearly unhappy—even angry. The recession prompted two of every five of them to say that unemployment was the main problem. Other issues were dwarfed by the question of joblessness. The fact that the Democrats did not do better may mean that the people believe the Democrats have no easy solution to the nation's economic problems.

The Democrats' gains at the state and local levels almost wiped out Republican efforts, underway for several years, to rebuild at the grass roots. Only a few short months ago, the Republicans were viewing 1982 as a realigning election: they planned to add to their margin in the Senate, seize control of the House, and rout the Democrats in a number of states. It is no exaggeration to say that the hopes for a new Republican era, fed by the successes of 1980, have been set back. The President must be assessing the damage done to his economic program. He must also be plotting a strategy to maintain his momentum. He will have to work harder to get his initiatives through Congress in 1983 and 1984.

The President's aura of invincibility has been dispelled by the election. Legislators are now more likely to be independent of him, and considerations of political survival will dictate a new congressional receptivity to changes in economic policy. In the months to come, the challenge for the President will be to forestall a stalemate of government while showing flexibility in grappling with the issues. The challenge for Congress will be to display a willingness to work with the President while mustering the discipline to lift the country out of recession.

The Democrats must now formulate alternatives to the present economic course. In the campaign, they often talked about a "mid-course correction" without really suggesting what they meant. When they do define their alternatives more clearly, they will emphasize the creation of jobs.

Campaign rhetoric always tends toward the dramatic but fortunately the voters are wise enough to discount the politicians' inclination to overstate issues. I do not mean to make light of the very real choices of policy that the voters make in an election. The point is that differences among candidates and parties are sometimes to be found on the margins. Despite the partisan sparring, no sharp shift in policies of taxing and spending is likely even though there will be some adjustment.

The election did not show me an electorate that is committed to an ideology. Instead, I see an electorate that wants results. I believe that the political pendulum has swung back to the broad center. There has been no victory for either the extreme right or the extreme left. The American instinct for moderation has expressed itself once again. Also, I do not think that Americans voted to stay the course, nor do I think that they rejected the President or embraced the Democrats. The election revealed few clear trends: it shed little light on steps to be taken to deal with deficits, unemployment, or social security.

It is apparent that there will have to be some bending on the part of both parties. I hope that the election will force the President and Congress into constructive compromises. These compromises should include a cutback in the President's huge increases in military spending, adjustments in the entitlement programs (including social security), efforts to create jobs, and some modification of the tax cuts to reduce the deficit that now looms ahead. Another area of compromise may be the President's drive for new federalism. With the Democrats controlling two thirds of the statehouses, it is unlikely that governors and state legislators will be ready to take on extra functions without additional sources of revenue.

Political commentators have already said that the election gives us a choice between deadlock and compromise. If that is the choice, the wiser course by far would be to negotiate out our differences in an effort to reach a compromise. The President should extend his hand in bipartisan cooperation now, and the Democrats should take him up on his offer.●

FOREIGN TRADE PRACTICES PUTTING AMERICANS OUT OF WORK

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. HUBBARD. Mr. Speaker, I have received an excellent letter from my good friend and constituent, Mr. B. B. Forristall, of Mayfield, Ky. Bash Forristall has written to me concerning a most important issue, our Nation's international trade policies. Indeed, his comments concerning our foreign trade practices and the unfair competitive edge that face our American workers are timely and worthy of consideration. The Congress must take the appropriate actions to alleviate the burdens facing our American workers. I believe my colleagues will be interested in Mr. Forristall's letter, and I would like to share it with them at this time. The letter follows:

MAYFIELD, KY.
October 26, 1982.

Hon. CARROLL HUBBARD,
2244 Rayburn House Office Building, Washington, D.C.

DEAR CARROLL: This is to confirm our recent conversation, primarily on the subject of U.S. International trade. As International Product Manager for the Mayfield based Ingersoll-Rand Centac Compressor Division, I have become increasingly frustrated when because of the strength of the U.S. dollar, high U.S. interest rates, and the export practices of our major foreign competitors and their parent nations; to protect our market share and income as a multi-national producer of large industrial air compressors, we have been diverting business to a sister operation in Milan, Italy. In the past year to my knowledge at least $2 million worth of complete machine orders have been so diverted which in prior years would have been manufactured in Mayfield. Conservatively estimated this would have meant at least 10 more jobs on the local payroll, not to mention the benefits of their wages to the community.

The enclosed article from the Paducah Sun (Oct. 18) concerning Caterpillar Tractor's loss of foreign market share is just another example of the problems almost all major American machinery manufacturers are faced with today. And its costing a lot of Americans their jobs.

It is not the fault of MNC managers for such policies because their own survival depends on Worldwide results for a nation that grew and prospered from strong export trading policies from colonial days until after W.W. II it is a sad state of affairs, when many of our basic industrial products are no longer economically exportable. We pratically give away some of our state of the art technology for foreign nations to build and sell to whom ever they please, and permit ourselves to be a dumping ground for the products of not only developing nations but also some developed countries. Sure, some of the dumpers get slapped on the wrist now and then, and there is much talk about import limitations on products such as automobiles. These are not solutions. American needs a comprehensive Interna-

tional Export Program that would permit us to export manufactured products on equal terms with our major foreign competitors. That is not to say that we should accept orders below cost as our Japanese competitors will do in slack times. But we should have access to low interest funds and preferential taxation on export products.

There is considerable evidence that many American workers in industries facing strong foreign competition, now recognize they cannot afford to price themselves out of the market, and that product quality is an essential ingredient for success. The severe adversary positions of American labor, management, and government of past years now seems to be mellowing a bit. Our social systems can never be expected to be blessed with underlying harmony that exists between Japanese labor, management, and government; or the strong ethnic pride of the Germans. Except for occasional rhetorical bombasts their bottom line is invariably what is best for our nation.

As for Japan, I should know. I lived and worked with them for two years recently. As individuals I respect them, but as a nation behind many false faces exists a very devious and cunning foe.

With improving labor-management relations and more supportive government export policies, it will certainly put more Americans back to work.

Sincerely yours,

BASH FORRISTALL.●

TO REVIEW FINDINGS OF SLAYINGS IN MIRACLE VALLEY, ARIZ.

HON. GUS SAVAGE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. SAVAGE. Mr. Speaker, I hope that my colleagues who are not already familiar with the situation in Miracle Valley, Ariz., will take a few minutes to read the following statement that I am inserting into the RECORD today.

In this statement, Rev. Jesse L. Jackson explains that he, along with a delegation of ministers from the State of Arizona, intend to review the findings of the slayings that took place there on October 23, in the hopes that, through increased public awareness of this incident, an impartial and full-scale investigation will be ordered.

I wholeheartedly support Reverend Jackson's efforts to restore harmony to this torn Arizona community, and applaud his continuing efforts for justice and peace. I sincerely hope my colleagues will also lend support to this cause.

STATEMENT OF REV. JESSE L. JACKSON AND DELEGATE OF MINISTERS, NOVEMBER 10, 1982 TO REVIEW FINDINGS OF MIRACLE VALLEY SLAYINGS

A. WHY HAS PUSH COME TO ARIZONA?

PUSH has come to Arizona because a respected and concerned group of Ministers and citizens in this State have come together across denominational and political lines and asked for our assistance relative to a problem in Miracle Valley, Arizona. Governor Bruce Babbitt has also asked for our help.

PUSH and our team of ministers will attempt to reduce unnecessary tension where possible. We will also attempt to eliminate unfounded fears and reverse the atmosphere of hysteria by discussing the facts and the issues surrounding the Miracle Valley Church situation in a civil, but straightforward manner. We are willing to mediate, attempt to reconcile and to establish or re-establish lines of communications where that will be helpful and where we can. However, my role is not that of mediator, but of advocate. Fundamentally, I am a human and civil rights advocate.

Thus, we come to Arizona seeking justice and peace, not merely quiet. Quiet is the absence of noise, but a lasting and genuine peace requires the presence of justice.

B. WHAT DO WE HOPE TO ACCOMPLISH?

1. PUSH wants to end the community-church confrontation in Miracle Valley.

2. We want to get a first hand look at the situation in Miracle Valley and the surrounding circumstances.

3. We want to bring greater public attention, awareness, so as to insure that a full-scale impartial investigation into the incident of October 23rd and those leading up to October 23rd are fully investigated by state and federal investigation teams. We also urge that the investigative arm of the press do all it can to reveal all it can about the situation.

4. We want to make a determination of under what circumstances and with what guarantees members of the Miracle Valley church can return to the property that they own and have the human and civil rights of all concerns protected.

5. We want to insure that the Religious liberty and the free practice of one's religion is preserved and protected.

6. We want to insure that the orderly, but fair processes of the judicial order proceed so as to provide "equal protection" and "due process" for all involved.

C. WHAT HAVE WE DONE SO FAR?

1. We have seen television footage of some of the surrounding events at Miracle Valley on Saturday, October 23rd, involving October 23 situation.

2. Several hundred still pictures.

3. We have talked with Pastor Frances Thomas and members of the Miracle Valley Church before and after our visit to Miracle Valley.

4. We have talked with the lawyers representing the two persons who were shot on October 23rd.

5. We have talked with Governor Bruce Babbitt by phone and in person.

6. We have talked with you—William Bradford Reynolds at the Justice Department.

7. We have talked with the leaders of Ministerial Associations around the country.

D. WHAT ARE THE KNOWN FACTS SO FAR?

1. Two black men are dead, two were wounded, two sheriff's police were wounded. Many more church members and officials were injured.

2. Ten blacks are in jail with bail set at $68,500 each—which appears to be excessive.

3. The judge has limited the lawyers fees for the two men who were shot to $7,500 and has excluded transportation expenses from Chicago to Tucson. On Monday, it is our understanding that he will seek to have these lawyers dismissed from the case.

4. The coroner's report is in apparent contradiction with eyewitnesses accounts as well as the report of the mortician who attended to the two bodies i.e., both men were shot in the back not in the front. Gus Tate shot three or four times in the back. Other shot . . . .

E. WHAT IS OUR SCHEDULE OF ACTIVITIES FOR THURSDAY?

1. 8:00 a.m.-9:15 a.m. Breakfast meeting with local ministers. Rev. Warren H. Stewart, pastor, First Institutional Baptist Church, 1141 East Jefferson (602) 258-1998.

2. 9:30 a.m.—Meeting with Governor Babbitt at State Capital followed by a Press Conference. Shared information, pictures. News media projected group as extraneous, religious cult not unlike Jim Jones and People Temple in Guyana. The group led by a charismatic Frances Thomas, not an on live denomination. However, to have read or watched news accounts after shooting, one got impression this was a secluded, religiously fanatical, armed and dangerous group of people.

3. 11:00 a.m.—Depart for Sierra Vista.

4. 1:30 p.m.—Arrive Miracle Valley.

5. 1:30 p.m.—Return to Sierra Vista for flight to Tucson.

6. 2:30 p.m.—Arrive Tucson/Reverend Jackson and Governor Babbitt. Marriott Hotel, 180 West Broadway, Tucson, Ariz. (602) 624-8711.

7. 7:00 p.m.—Meeting with Arizona Baptist Convention. Mt. Calvary Baptist Church, 210 Lester Street, Rev. T. Ellsworth Gantt, pastor.●

POLICY STATEMENT ON NUCLEAR WAR

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. FRANK. Mr. Speaker, the issue of nuclear war remains the most critical issue facing our country today and I am very pleased that the voters of my State, Massachusetts, adopted a nuclear weapons freeze on the November 2 ballot. Many individuals and groups within Massachusetts contributed to the nuclear freeze campaign and one such group is the Massachusetts Health Council. The council adopted a resolution in support of the nuclear weapons freeze and I wish to share that resolution with my colleagues.

The resolution follows:

POLICY STATEMENT OF NUCLEAR WAR

Whereas the Massachusetts Health Council, Inc. believes that the threat of nuclear war is a danger to the health of the citizens of the Commonwealth; and

Whereas the Massachusetts Health Council, Inc. believes that the prevention of nuclear war should be a primary concern of all health care providers and other members of the general public; and

Whereas the Massachusetts Health Council, Inc. believes that a comprehensive freeze by all countries on the testing, production and deployment of nuclear weapons is in the best interest of all mankind; and

Whereas the Massachusetts Health Council, Inc. believes that nuclear weapons should eventually be banned;

Be it resolved, That the Massachusetts Health Council, Inc. recommends that its member organizations and individual members join the Council in speaking out on the dangers and threat of nuclear war, against nuclear weapons and their use by any country including the USSR and that the Massachusetts Health Council, Inc. will inform its state and national elected representatives of its position in favor of increasing the effort to end the risk of nuclear war.●

JAMES WEBB ON VIETNAM VETERANS

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. HYDE. Mr. Speaker, Veterans Day was very special this year, as the Vietnam veteran moved front and center in long-delayed national recognition. A part of this included the dedication of a new and controversial monument on the Washington Mall.

The views I most respect have been expressed by Vietnam veterans such as Tom Carhart and James Webb. Mr. Webb was interviewed by the Washington Times November 12 and his comments deserve thoughtful study by my colleagues.

[From the Washington Times, Nov. 12, 1982]

WEBB SAYS VETS HAVE PRIDE, NEED RESPECT—INTERVIEW

VIETNAM VETERAN AND AUTHOR JAMES WEBB ON THE WAR, THE MEMORIAL AND THE CONTROVERSY

About 250,000 Vietnam veterans are expected to gather here this week to celebrate Veterans Day and to participate in a belated National Salute to Vietnam Veterans. One of the highlights of the five-day event is the American Legion-sponsored dedication Saturday of the controversial Vietnam Veterans Memorial in Constitution Gardens near the Lincoln Memorial.

A principal leader of thought and action behind the memorial is James Webb. In 1979, Webb was the recipient of the American Legion National Commanders Public Relations Award—given to the one person each year who best epitomizes the Legion's view of service to God and country.

Webb graduated from the U.S. Naval Academy in 1968. He served as a Marine rifle platoon and company commander in Vietnam, where he was wounded twice, and was one of the most highly decorated Marines of that war. After earning a law degree at the Georgetown University Law Center, he served as minority counsel to the House Committee on Veterans affairs, and was one of the principal contenders for the position of administrator of veterans affairs when President Reagan took office. He also has taught courses on poetry and the novel at the college level, and has written numerous articles and two books, including the widely acclaimed "Fields of Fire" and "A Sense of Honor." He now is writing full time to finish his third novel, which will be release next year by Doubleday Publishers.

Webb was interviewed yesterday—Veterans Day—by Washington Times Deputy Op-Ed Editor Charlie Wheeler.

Question. Yesterday was Veterans Day. Do you believe such celebrations still have meaning in our society?

Answer. Of course they do. I believe that every indicator shows that the American people hold the men and women who have served their country, particularly during wartime, in the highest esteem. For instance, in the most comprehensive survey done on attitudes of and toward Vietnam veterans—the Harris Survey commissioned by the Veterans Administration and published in June 1980—those surveyed placed Vietnam POWs at 10 on a scale of one to 10, and those who served "in country" at a 9.8. Those who opposed the war were somewhat around a five, and those who went to Canada were down around a three.

And veterans themselves retain a great deal of pride in their service. That same survey revealed that 91 percent of our combat veterans were proud they have served their country, that 74 percent actually enjoyed their time in the military, and that two out of three would do it again, even given the outcome of the war. These are figures from Vietnam. I'm sure figures from other wars would be comparable.

I'd like to emphasize something. This is Veterans Day. We have rightly become concerned about the lack of dignity that was accorded our Vietnam veterans, and I'm delighted to see the attention they are now receiving. But there are about 30 million veterans in this country today, and I feel deeply appreciative to every one of them who served honorably. My father flew bombers in World War II. My father-in-law was one ridge down when they planted the flag on Iwo Jima. They never failed to honor and appreciate what we did in Vietnam. I never saw a generation gap when I came home; I saw a culture gap within my own generation. I honor their service. I'll never forget them. That's what this day is all about.

Question. Tomorrow the controversial Vietnam Veterans Memorial will be dedicated. Vietnam veterans from around the nation are expected to attend and participate in a parade and the dedication itself. Are people going to come? How do the veterans feel about the dedication and these events?

Answer. The problem with the events of this week is that we are asking veterans, and particularly Vietnam veterans, to rally around a negative symbol when they dedicate this memorial. I would rather wait to see the reaction of those who have served when they see the wall before I speak too broadly, but every indication I have had, including my own admitted bias, is that this is not an appropriate symbol of honor and recognition.

Question. I suppose we should clarify for the record that you were involved in the Memorial project, first as an initial member of the National Sponsoring Committee and later as a vocal opponent of the winning design. You speak of indications other than your own feelings. What are they?

Answer. Some of them are purely visceral and subjective, others are more demonstrative. I travel a good deal, and over the past year have talked to hundreds of combat veterans. The reaction is overwhelmingly negative, to the point of tears and unmuted anger. It is as if the black walls are a continual insult, as powerful as the flag-burning demonstrations during the war. That may not be fair, and it may not even be logical. But we forget that art is metaphorical. It creates symbols that people react to. Public art, particularly that which is dedicated to a political event, is unavoidably political in itself. And when someone designs a black gash of earth with the names of the dead tossed upon it in no particularly recognizable manner, the symbolism hits you in the gut. And you get mad.

The more objective things are the Gallup survey done for Ross Perot, which the Memorial Fund participated in preparing, and which has been covered in your newspaper already. It showed overwhelmingly negative feelings. One of the most striking figures is that only 18 percent of the respondents believed that Vietnam veterans would like the Memorial. And this wasn't an insignificant survey—324 former POWs responded. In the $6 million Harris Survey I mentioned earlier, which represents a comprehensive panorama of Vietnam veterans, only 1,176 men were interviewed. The reason a follow-up survey of all Vietnam veterans, rather than the POWs, wasn't done by Perot is that the Memorial Fund agreed to the compromise which allowed a statue and a flag to be placed prominently on the site.

Question. Which isn't being done?

Answer. Which, I hope, will be done. The Fine Arts Commission and the Department of Interior appear to be in a stalemate right now. Perhaps we need an exit poll at the dedication, to gauge once and for all the feelings of the subject class. I hope that will happen. The most important thing isn't my feelings or the Memorial Fund's, or any one individual's. The important thing is to get it right for the people who served. They've been dumped on long enough.

The most incisive comment I've heard came from Al Santoli, a former enlisted soldier, wounded three times—who wrote "Everything We Had." He said, "This isn't a Memorial. It's a place to go and be depressed. Harvard and Yale gave us the war, they avoided fighting it, and now they are trying to tell us what we are supposed to like for a Memorial."

Question. You were recently quoted in Newsweek to the effect that reactions to the Memorial constitute a "Rorschach test for attitudes toward the Vietnam war." Are we ever going to get over Vietnam? What needs to happen in this society before we can move on?

Answer. We'll never "get over" Vietnam any more than we've gotten over the Civil War, or any more than a person gets over a death or a divorce. It will always be there. The most important thing is to try and assimilate it, to try to come to grips with the way it changes us as a society. The first, and most difficult hurdle to overcome, is to recognize that for many people, the loss of the war was not a defeat. It was a victory.

I'll never forget when the movie "Hearts and Minds" won an Academy award for best documentary, its producers rather delightedly read a congratulatory telegram from the Vietnamese Communist delegation in Paris. The people who supported the North Vietnamese effort to subjugate the South have a lot to live with right now, and it must make them extremely uncomfortable. They made a mistake. There was no "pure flame" of revolution in the South. We have to admit that, rather than ignore it.

We blew it in Vietnam, but not in the manner the anti-war movement was suggesting. I am not trying to point a finger. The time for recrimination has passed. But honesty is the first step toward resolution, so let's be honest.

Question. So, who lost the Vietnam war?

Answer. The political apparatus of our country, which first never articulated our mission clearly enough, causing the distress that became the anti-war movement, and second could not keep its fingers out of the day-to-day conduct of the war.

I believe that Lyndon Johnson created a scenario which made the war a disaster, particularly in the way he conducted the air war in the North. We sent pilots on ridiculous targets, creating the illusion that the North Vietnamese could withstand American airpower, while never using our strategic aircraft for their proper purpose until 1972.

On the ground, the United States military was never defeated on the battlefield, even in one major engagement. That's not revisionism, it's the truth. The North Vietnamese themselves have admitted to losing at least 600,000 men. In ratio terms, that's the equivalent of 6 million Americans. We did our job, under enormously difficult conditions, sometimes including the lack of appreciation of our own countrymen. I'm very proud of the men I served under, with and over. Again, that's what this week is about.

Question. Your age group was deeply divided by Vietnam—some say permanently. What do you say to the people who opposed the war?

Answer. This is a multicultural society. On any moral issue we're going to be in a state of abrasion. I have no quarrel with those who dissent on political issues in this country. That freedom is the wonder of this country. But let's be honest about what happened, not so we can decide who was right and who was wrong, but so we can learn and grow. The real bottom line is this: There are things in this world worth dying for, and if you don't believe that, you deserve to live as a slave.●

JEWISH WAR VETERANS ADOPT RESOLUTION CONDEMNING RISE IN ANTISEMITIC VIOLENCE AND VANDALISM

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. BIAGGI. Mr. Speaker, at their 87th annual convention, the Jewish War Veterans adopted an important resolution which merits the close consideration of my colleagues.

The resolution discusses the very disturbing rise in the reported cases of anti-Semitic violence and vandalism in this Nation. It is a problem which has more than doubled over the past 2 years.

In February of 1981, I introduced H.R. 2085, a bill to impose stiff new Federal penalties for acts of religious violence or vandalism as well as those attempts at such acts as well as those intended to infringe upon a person's right to free exercise of religious beliefs. Despite the proliferation of this problem the bill continues to languish in the House Judiciary Committee.

No one level of government should be expected to bear the entire responsibility for solving this problem. On the other side of the coin neither should all levels of government avoid taking action on the problem. A partnership of purpose is needed to end the wanton destruction of sacred houses of worship and religious articles within—a partnership of purpose must be formed to keep religious figures from being assaulted and beaten. This partnership of purpose must be developed within each level of government and done so quickly. In the words of Edmund Burke "All that is necessary for evil to triumph is for good men to do nothing."

At this point in the RECORD I wish to insert a summary of the Jewish War Veterans resolution pertaining to antisemitism.

ANTI-SEMITISM IN THE UNITED STATES

JWV believes that the recent rise of "hate" groups and the increase of vandalism dictate American vigilance against anti-Semitism and other forms of bigotry. JWV reaffirms its commitment to actively confront all "hate" groups and to join with other ethnic, racial and religious groups in the battle to combat anti-Semitism and racism through education, civic and action programs. JWV also supports legislation to increase penalties for religious and ethnic connected vandalism.●

NUCLEAR WASTE LEGISLATION

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. BROYHILL. Mr. Speaker, on September 30, the Washington Post published a column on nuclear waste legislation by Mary McGrory which made rather egregious errors of fact.

To keep the record straight on this important bill, whose consideration resumes today, I am submitting the letter I sent to the Post correcting Ms. McGrory's errors. While our Capital's leading newspaper did not believe the letter merited publication, I am pleased to see it included in the RECORD for my colleagues to judge.

U.S. HOUSE OF REPRESENTATIVES,
COMMITTEE ON ENERGY AND COMMERCE,
Washington, D.C., October 1, 1982.

LETTERS EDITOR,
Washington Post,
Washington, D.C.

DEAR SIR OR MADAM: Mary McGrory's column of September 30 contains serious errors of fact which undermine her ad hominem attack on the nuclear waste legislation pending in the House.

First, she implies that the public would have to bear the burden of financing interim storage of civilian plants' nuclear waste before completion of a permanent repository, by stating "taxpayers" would have to "take over the 40-to-50 year burden. . . ." In fact, the bill provides that interim storage would be entirely financed by the nuclear utility industry so that no Federal tax dollars would be used.

An even more egregious error is Ms. McGrory's assertion that certain language inserted in the Senate bill by Senator McClure would preempt a State from challenging the designation of a permanent waste site in its territory. The phrase quoted is merely a statement of justification for the legislation and is completely separate and apart from the provisions for a State's challenge to the siting of a permanent repository.

In fact, the House legislation provides for full State consultation in each step of the process for the siting and construction of a permanent waste repository, as well as for the use of facilities within a State for interim storage. Most importantly, the bill allows a State to veto the choice of a permanent waste repository, subject to an override by Congress. Curiously, Ms. McGrory's devotion to the principle of States' rights, which heretofore has been kept from her readers, now surfaces in connection with legislation she opposes.

Finally, the "rush to judgment" which Ms. McGrory protests so passionately follows the consideration of nuclear waste legislation since 1976. In 1980, both the House and Senate passed bills, but were unable to resolve their differences before the end of the session. The 1982 House bill, sponsored by Mo Udall, John Dingell, Dick Ottinger, Don Fuqua, Manny Lujan, Marilyn Bouquard, Beverly Byron, Carlos Moorhead and myself, is a consensus developed after 18 months of good faith compromises and action by 5 major Committees representing over 160 Members.

On May 10 of this year, the Post, in its lead editorial, urged the necessity of nuclear waste legislation, stating, "All but the most diehard opponents of nuclear power agree on one thing—the industry desperately needs a waste disposal plan." After the failures of recent years, the Post continued, "It would be a tragedy for Congress to fail again." Ironically, the delay in bringing this year's bill to the Floor in large measure is attributable to the efforts of proponents of legislation to accommodate the interests of all affected parties, most especially State governments. Had Ms. McGrory taken the trouble to study the issue, she could have given her readers some of the hard facts instead of facile emotionalism.

Sincerely,

JAMES T. BROYHILL,
Ranking Minority Member,
Committee on Energy and Commerce.●

TEXTILE WEEK

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. COELHO. Mr. Speaker, during our recent recess, the week of October 17–24 was observed as "Textile Week," a period set aside to recognize the importance of one of our most basic and essential industries.

Even though textiles touch our lives every day with literally thousands of products for consumers, few people realize the economic importance of this industry to our entire Nation.

The textile industry is extremely important to my home State of California, providing 14,000 jobs directly and supporting another 107,000 in the related apparel industry. In addition, 45,000 cotton farmers and more than

6,000 woolgrowers are dependent on the textile industry.

Nationally, the fiber-textile-apparel complex provides some 2 million jobs—1 of every 9 in manufacturing—forming our largest industrial complex.

The United States depends on textile products for clothing, homefurnishings, transportation, industrial products, defense, health care, space exploration, and recreation.

Textiles have helped make ours the highest standard of living in the world. Americans consume in an average year nearly 60 pounds of textiles per person. That is about twice the amount used in Western Europe and as much as 10 times that used in other countries of the world.

Americans spend almost $100 billion for clothing alone.

Other major uses of textile products include towels and sheets and curtains, carpets and upholstery. They also are used extensively for medical dressings and surgical sutures, fish nets and filters. Our Armed Forces use some 25,000 different textile items from rifle slings to bulletproof vests and pontoon bridges and parachutes.

Today, the United States has the most productive textile industry in the world and while productivity in American industry in general has declined in recent years, the textile industry has actually increased its productivity 4 percent a year over the past decade.

Although we sometimes take our textile industry for granted, it is one of our most vital national resources.●

NUCLEAR WAR IN WELLESLEY

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. FRANK. Mr. Speaker, unquestionably the growing movement in the United States today to halt the nuclear arms race is a credit to our Nation's citizens who have taken the lead—ahead of the elected officials in many cases—to show beyond any doubt the terrible implications of a nuclear war. One such example of this effort is the booklet prepared by the Wellesley Committee for a Nuclear Weapons Freeze in Wellesley, Mass. I wish to share large parts of this booklet with my colleagues because it is an example of what concerned citizens can do when they realize that the only solution to the nuclear weapons issue is to prevent a nuclear war.

I commend the following booklet to my colleagues:

NUCLEAR WAR IN WELLESLEY

"One day both sides will have to meet at the conference table with the understanding that the era of armaments has ended, and the human race must conform its actions to this truth or die."

Dwight D. Eisenhower letter—1965.

This booklet has been prepared by: The Wellesley Committee for a Nuclear Weapons Freeze, Post Office Box 2000, Wellesley, Massachusetts 02181.

This Committee is a Wellesley group of about 150 townspeople, non-partisan and non-sectarian, who want to halt the nuclear arms race.

The booklet is about something unpleasant and frightening: nuclear war and the death and destruction of all that you treasure, including our own community. This booklet is in five parts. The first part describes nuclear weapons, how many there are and how powerful. The following part describes what would happen in Wellesley if a single one-megaton bomb were dropped over the Raytheon plant in Waltham. The third part describes the plans for evacuation of people ("crisis relocation") from our area. The fourth section concerns the prevention of nuclear war. The final section tells what you can do.

In preparing this booklet, some material was taken from two similar works, Nuclear War in Vermont and Cambridge and Nuclear Weapons, and from recent government publications. Further information can be obtained from members of the Wellesley Committee for a Nuclear Weapons Freeze steering committee: Bradford Bachrach (235-2161), Don Crawshaw (237-7453), Kitty Gladstone (235-2152), Jerome Grossman, President (235-4678), Alba Jameson (235-3918), Shirley Quinn (235-8463), Abner Shimony (235-8485).

NUCLEAR WEAPONS: HOW MANY? HOW POWERFUL?

Each nuclear warhead is extremely powerful. The explosive power of a bomb or warhead is described by the word "megaton". A one-megaton bomb would have the explosive power of one million (1,000,000) tons of TNT. The bombs which destroyed the Japanese cities of Hiroshima and Nagasaki to end World War II had the explosive power of only 10 to 20 thousand tons of TNT. Therefore, a one-megaton bomb—the size of the kind which could hit us—is 70 times more powerful!

	Hiroshima	Nagasaki
Date/time bomb exploded	Aug. 6, 1945—8:16 a.m.	Aug. 9, 1945—11:02 a.m.
Bomb's explosive power	12.5 kilotons (KT) (12,500 tons of TNT).	22 kilotons (KT) (22,000 tons of TNT).
Distance above ground	1,670 ft	1,640 ft.
Population of city	350,000	280,000.
Persons killed	140,000 up to Dec. 31, 1945. Most died instantly.	74,000 up to Dec. 31, 1945. Most died instantly.
Property damage:		
Area reduced to rubble	5.02 square miles	2.59 square miles.
Total buildings in city	76,000	51,000.
Number destroyed	51,680 or 68 percent	12,750 or 25 percent.
Number seriously damaged	18,240 or 24 percent	5,610 or 11 percent.

"20 million U.S. fatalities represent a level 'compatible with Western values'." (Report in Boston Globe, August 15, 1982, of a statement by Colin Gray, a member of the advisory board for the Arms Control and Disarmament Agency.)

Altogether the United States and the Soviet Union have so many megatons of large weapons that in a war they would produce nearly 1,000,000 times the explosive power used against Hiroshima. This doesn't include all the smaller, so-called tactical nuclear weapons each side has, or the nuclear weapons held by other countries. It means that if a nuclear war were started, by accident or on purpose, by a superpower or another nation or group, the destruction would be beyond anything ever before experienced by the human race.

WHAT A ONE-MEGATON NUCLEAR WEAPON OVER WALTHAM WOULD DO TO WELLESLEY

Suppose a one-megaton bomb were dropped near ground level over the Raytheon plant in Waltham.

0-2 miles: Out to Exit 16 on the Mass. Pike there will be total destruction of buildings with winds up to 410 miles per hour and with 99 percent of the people dead.

2-3 miles: From Exit 16 to Newton-Wellesley Hospital most buildings will be flattened, with winds up to 180 miles per hour. 50 percent dead from the explosion. Another 25 percent dead later from injuries and burns.

3-5 miles: From Newton-Wellesley Hospital to the Hills Congregational Church, most buildings will be damaged beyond repair with winds up to 150 miles per hour and with up to 50 percent of the population dead. There will also be the risk of deafness from ruptured eardrums.

5-10 miles: From Brigham's in Wellesley Hills to beyond Wellesley College, most buildings will be damaged with winds up to 100 miles per hour and 25 percent dead. Anyone in the open would receive at least 2nd degree burns. A reflex glance at the initial flash from as far away as 35 miles from the explosion would probably cause blindness. A fire storm would kill thousands more either directly or indirectly by suffocation, the fire having consumed all the oxygen.

Lethal radiation would be spread throughout the Wellesley area and beyond for a period of days to weeks, depending upon the weather conditions, nature of the bomb and other factors. Death from radiation would be either rapid or delayed several weeks, depending upon the radiation exposure.

WHAT PLANS HAVE BEEN DRAFTED FOR EVACUATING THE WELLESLEY POPULATION?

The town of Wellesley is part of the Greater Boston Risk Area Suburban West region. Relocation instructions have been prepared. Excerpts and summaries are included in this booklet so that you may determine for yourself whether the crisis relocation plan is an appropriate response to the threat of nuclear war.

The Federal Emergency Management Agency (FEMA) stated in its pamphlet Crisis Relocation Planning (October, 1980), "It seems likely that a crisis would not be abrupt . . . that people would have time to see, discuss, and understand the instructions for relocation." According to FEMA plans, it will take two and a half days to evacuate the Boston region.

The FEMA Relocation Instructions state that Wellesley and Weston (combined population 38,474) have been assigned to Milford, N.H. (population 8,685). This host community should be reached by using Route 128 to Route 3 to Everett Turnpike to 101A to 101 to Milford. The map on the next page indicates the host community assignments of some of our neighboring communities. Other communities nearby assigned to Route 128 north are Needham, Newton, Wayland, Waltham and Watertown. Because of the number of vehicles that would be heading away from Boston and the metropolitan risk area, car markers are being prepared for residents to clip out and attach to car windshields with tape or glue.

In the FEMA pamphlet, Relocation Instructions, there is a list of survival supplies. In addition to a two-week stockpile of food, families should have on hand and plan to take tools—especially shovels, picks, ham-

mers—essential in improvising a fallout shelter. "Both the residents of the host areas and the city evacuees will have to work hard for a day or more to construct improvised shelters to protect against fallout. In this case, radiation protection would be cheap as 'dirt'."

Crisis Relocation Planning says that the food supply after a few days "would depend almost entirely on present commercial distributors—the people who feed 220 million Americans today." The effect of a nuclear attack upon the distribution system is not mentioned. Little or nothing is said about the destruction of medical facilities at a time when millions may be severely burned; nor of the unavailability of medicines, including morphine for people in great pain; nor of the contamination of water supplies and destruction of sewage facilities; nor of the likelihood of epidemics. Although the possibility of anti-social behavior by evacuees and hostility towards them by the host communities is not dismissed, the pamphlet assures that "in an emergency, people tend to be jolted out of their normal routines and patterns—and many people go out of their way to help others."

THE ONLY DEFENSE AGAINST A NUCLEAR ATTACK: PREVENTION

Civil defense programs, including massive evacuations and shelter buildings, would diminish the loss of life somewhat in the nuclear war. But the statement that "a reasonably effective crisis location program could result in total survival of 80-90 percent of the population" (Crisis Relocation Planning, p. 5) is groundless. And even this excessively optimistic estimate cannot hide the fact that the nuclear attack would cause unprecedented suffering and probably the complete disruption of the society. The painful truth is that there is no defense against nuclear attack, there is no place to hide.

The only sane defense is prevention of a nuclear war. Moreover, further increase of our nuclear armaments is not an effective means of prevention. As former CIA Deputy Director, Herbert Scoville, said, "The U.S. has always been ahead of the Soviet Union in nuclear weapons technology." There is rough parity between the superpowers, each having the capacity to inflict horrible losses on its opponent even if attacked first. This retaliatory capacity constitutes a deterrent to a first strike by either side. This is the main fact that now prevents a nuclear war. A further escalation of the nuclear arms race will make us less rather than more secure. It would increase tension, making each side fear that the enemy may strike first, thus motivating a first strike in the other direction. Deployment of more and faster weapons, with more reliance on radar and computer systems, would greatly increase the probability that war will begin by accident.

Religious groups, scientists, physicians, public officials, ordinary citizens—men and women from all walks of life—are raising their voices to prevent such a war from starting, either by design or accident, through human or mechanical error. At the 1981 National Conference of Catholic Bishops, Archbishop John R. Roach of Minneapolis said: "On a global scale, the most dangerous moral issue in the public order today is the nuclear arms race. The church in the United States has a special responsibility to address this question. . . . The church needs to say 'no' clearly and decisively to the use of nuclear arms."

Many eminent Catholic, Jewish, and Protestant clergymen have made statements asserting that the nuclear arms race threatens the peace of the world, the continuation of civilization, and the survival of the human race. As a first step to halting this plunge toward disaster, many have endorsed a bilateral, verifiable freeze by the United States and the Soviet Union on further deployment, testing, and production of nuclear weapons.●

A NEED FOR FURTHER REFORM

HON. BILL ARCHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. ARCHER. Mr. Speaker, I would like to share with my colleagues in the House an outstanding editorial which appeared in the December 1982 edition of Venture magazine regarding the Congress recent action liberalizing the treatment of subchapter S corporations:

A NEED FOR FURTHER REFORM

(By Arthur Lipper III)

While I heartily endorse Congress' action to liberalize Subchapter S treatment for corporations, and applaud the Securities & Exchange Commission for sponsorship of its Government-Business Forum on Small Business Capital Formation, further actions are required to encourage the flow of capital into new ventures.

Any consideration of providing investors with favorable tax treatment for investing in new or small businesses must recognize that most of these businesses lose money, at least in the early stages. And it is generally acknowledged that the primary reasons for small business' high failure rate and broad inability to generate substantial profit are a lack of experienced management and the absence of adequate funding. Therefore, the objective must be to create investment incentives for investors who have both the financial resources and the management acumen to offer to small businesses.

I believe the most appropriate means of encouraging professional investors to commit their money and management skills to small businesses, and particularly new ventures, is to amend Subchapter S regulations to permit the negotiated allocation of operating and non-operating losses among various classes of stockholders. This would be similar to that currently possible between general and limited partners. Such an allocation of losses would, in the case of successful companies, result in those companies becoming taxpayers sooner than would be the case without loss allocations, and should therefore not adversely affect overall tax collections.

Were this proposal adopted, a significantly enhanced rationale would exist for professional investors to assist small businesses. Perhaps more importantly, failure rates should materially decline in those instances where professional investors expend their resources in new and smaller ventures than would otherwise be the case.

Many excellent ideas came out of the SEC forum, and it was gratifying to see a governmental body soliciting comments in an open and honest atmosphere. However, the suggestions which came from the forum cannot lie fallow or get buried in some bureaucratic quagmire. I especially encourage the approval of a small business or new venture capital gains tax "rollover" provision—similar to that offered homeowners—and a further reduction in capital gains taxes to encourage professional investments in new ventures. The time has come to genuinely foster capital formation for small and growing businesses through regulatory reform and legislative initiative.●

SENATE JUDICIARY CONSIDERATION OF LEGISLATION TO REVISE THE JUDICIAL SURVIVORS' ANNUITY PROGRAM

HON. HAROLD S. SAWYER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. SAWYER. Mr. Speaker, I would like to bring the attention of the House of Representatives to an issue which seriously affects the Federal judiciary. In 1956, Congress established the judicial survivors' annuity program (JSAP) in order to provide for the payment of substantial annual benefits to the eligible surviving spouses and children of deceased Federal judges and justices.

Unfortunately, the original formula for funding the annuity program was not thoroughly analyzed in 1956 and it subsequently proved to be actuarially unsound. In 1976, Congress successfully acted to revise and stabilize the annuity program, but concern still exists on the Federal bench over this issue.

The 1976 legislation made JSAP actuarially sound but a number of judges feel that, due to salary freezes and inflation, the program will not adequately protect their spouses and children in the event of their death. The serious consequences of this problem cannot be overstated: Ample evidence exists that members of the bar turn down appointments to the Federal bench and several prominent members on the bench have resigned because of inadequate salaries and benefits.

Because this issue affects not only the quality of our judges, but also the quality of our justice, legislation has been introduced in this Congress to attempt to improve judicial survivors' annuities. On September 24, 1982, the Senate Judiciary Committee's Subcommittee on Courts held hearings on this legislation, S. 1403 and S. 1874.

The Honorable James Harvey, a respected judge from the District Court of the United States for the Eastern District of Michigan, testified before the Subcommittee on Courts. Jim is a distinguished former Member of Congress from my home State of Michigan who appeared in the Senate on behalf of the judicial administration division of the American Bar Association. As a sponsor and original cosponsor of the companion legislation in the House of

Representatives, H.R. 3909 and H.R. 4763, I include Judge Harvey's statement before the subcommittee in the CONGRESSIONAL RECORD at this point.

STATEMENT OF HON. JAMES HARVEY, U.S. DISTRICT JUDGE

Mr. Chairman, my name is James Harvey. I have been a United States District Judge in the Eastern District of Michigan for almost nine years. Prior to that time, I served as a member of the U.S. House of Representatives for almost fourteen years, after having practiced law in Michigan for twelve years. I have been a member of the American Bar Association for approximately 25 years, and it is in behalf of that organization, particularly the Judicial Administration Division, that I appear here today.

It is presumptuous of me, Senator Heflin, to tell you about the Judicial Administration Division of the American Bar Association, whom I am authorized to represent. However, it consists of seven conferences, including the National Conference of Federal Judges, of which I am chairman. In the Judicial Administration Division are nearly 7,000 judges from state and federal, trial and appellate courts, as well as administrative law courts, and lawyers with special interest in the Judiciary.

The problem of providing adequate survivors annuities for the Federal Judiciary has been with us for several years. I can recall that during the years I served in Congress, it was necessary on one occasion to pass a special bill to handle the problem faced by the widow of one of the most prominent Justices on the U.S. Supreme Court. It was not, however, until recent years that the increased number of resignations by Federal Judges focused attention on the inadequacy of the survivors annuity program for the U.S. Judiciary. The figures have been cited before. Only seven judges resigned during the 1950's; only eight during the 1960's—but twenty-four resigned in the 1970's; three in 1980 and four in 1981.

It is of great concern to all members of the Bar when we lose the services of a distinguished judge, such as former Judge William H. Mulligan of the Second Circuit Court of Appeals, as well as Judge Philip W. Tone of the Seventh Circuit Court of Appeals, both of whom are with us today.

It is of equally great concern to members of the Bar, also, that we may fail to attract to the Federal bench the exceptionally well-qualified lawyer, for the same reasons that caused Judge Mulligan and Judge Tone to resign, namely an inadequate program of survivors annuities.

I therefore wish to express not only my own personal support, but also the support of the Judicial Administration Division of the American Bar Association for the principles of the legislation embodied in S. 1874 and H.R. 4763, either of which bills will help to remedy the inadequacies of the present system.

We are grateful to Chief Justice Warren Burger, and to Judge Irving R. Kaufman of the Second Circuit Court of Appeals, for the leadership they have shown in this effort.

Mr. Chairman, I ask that the brief statement of support that I have been authorized to make by the Judicial Administration Division of the American Bar Association be included in the record following my remarks. Thank you for this opportunity to appear.

IN BEHALF OF JUDICIAL ADMINISTRATION DIVISION, ABA, IN SUPPORT OF S. 1874 AND H.R. 4763

The Judicial Administration of the American Bar Association wholeheartedly supports the principles of the legislation embodied in S. 1874 and H.R. 4763. We are mindful that there are slight differences between the two bills. However, we are keenly aware of the problems that an inadequate survivors' annuities program has caused within the Federal Judiciary, and we believe that enactment of either S. 1874 or H.R. 4763 would go a long way toward solving these problems. The Judicial Administration Division of the ABA believes that the maintenance of an independent Federal Judiciary is absolutely essential to the future of our Nation. Legislation such as either S. 1874 or H.R. 4763, helps to maintain that independent judiciary by providing a system of survivors annuities that will encourage well-qualified lawyers to accept appointments to positions on the Federal Bench, and will at the same time discourage resignations, of which there have been so many in recent years. For all of these reasons, the Judicial Administration Division supports the enactment of either S. 1874 or H.R. 4763.●

THE 25TH ANNIVERSARY OF THE VALLEY NATIONAL BANK

HON. CARLOS J. MOORHEAD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. MOORHEAD. Mr. Speaker, 25 years ago, the Valley National Bank was founded in Glendale, Calif. In 1957, unlike today, new banks were a rarity, and Valley National was the community's only independent and locally owned banking institution.

One of the first organizers and a major stockholder was Casey Stengel, longtime Glendale resident, baseball immortal, peerless manager of the New York Yankees, and creator of his own unique brand of English known as "Stengelese."

Valley National, or Casey's Bank as it was often called, was a success from the first day when deposits exceeded $1 million. After the first year, they exceeded $5.5 million and within 3 years, the bank had deposits of $10 million.

In 1960, three former Glendale mayors served on the board of directors. They were John Lawson, Sr., Paul L. Burkhard, Sr., and Robert Wian, founder of the nationally known "Bob's Big Boy" hamburger. That same year, the bank opened its first branch office in Toluca Lake.

Today, Valley National has a solid record of success with six full service branches and assets in excess of $138 million.

But the greatest asset of Valley National is its people who have demonstrated an enduring motivation to support their community and country, constantly giving time and energy to those organizations and programs which make a society strong.

Mr. Speaker, I am grateful for the countless contributions made to the people of my district by this very fine organization and I am delighted to join with Clarence Jones, president; Linus Southwick, chairman of the board and founding president; and the board of directors, in celebrating the 25th birthday of Valley National Bank, a community asset of unchallenged value.●

TRIBUTE TO SENATOR ALAN SIEROTY

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. ANDERSON. Mr. Speaker, today I rise to pay tribute to a man who is retiring after 21 years of dedicated public service to California: State Senator Alan Sieroty. On December 13 his friends will gather at a special dinner to honor him. I have had the privilege of working with this man, so I know that his retirement from public office is our loss.

Alan Sieroty was born in Los Angeles in 1930 and attended Beverly Hills High School. He graduated Phi Beta Kappa from Stanford University with a degree in economics and received his law degree from the University of Southern California School of Law. From 1961 through 1965, while I held the office of Lieutenant Governor, Alan served that office, first as administrative assistant, and later as executive secretary. In 1965, he was appointed by Governor Brown to serve as deputy director of the Chile-California program.

Alan Sieroty was elected to the State assembly in November 1966, and was reelected five times. He then successfully ran for the State senate in the March 1977 special election. As State senator, he has served as chairman of the Senate Education Committee, and as a member of the Revenue and Taxation Natural Resources and Wildlife, Finance, and Judiciary Committees. Senator Sieroty is also a member of the States and the Arts Committee of the National Conference of State Legislatures.

Senator Sieroty's whole career has been marked by a concern for the protection of constitutional rights and civil liberties. He has also been a strong voice for both consumer and environmental protection, and is known as the author of the California Coastal Zone Conservation Act, adopted by the voters in 1972 as proposition 20. Senator Sieroty has been committed to insuring a quality public education at all levels. He has consistently supported programs which attack

problems of discrimination, unemployment, poverty and the lack of adequate housing and health facilities, particularly as they affect senior citizens. He has been in the forefront of child care legislation and efforts to remove architectural barriers for the physically handicapped.

For his work Senator Sieroty has received awards and commendations from a large number of organizations, including the Los Angeles Children's Center, Los Angeles Junior Chamber of Commerce, National Rehabilitation Association of Southern California, Stamp Out Smog, California Park and Recreation Society, California Association of the Physically Handicapped, California Trial Lawyers Association, Beverly Hills B'nai B'rith, the city of Los Angeles, Correctional Counselors Association, Easter Seal Society, South Bay Chapter of the American Civil Liberties Union of Southern California, Artists for Economic Action, Artist's Equity, Laurel Children's Center, National Council of Jewish Women, California Art Education, and the California Association for the Education of Young Children.

In 1977 Alan Sieroty was appointed by the president of the American Bar Association to serve on the A.B.A. Commission on Correctional Facilities and Services. He is a member of American, California, and Los Angeles County Bar Associations, and of the World Peace Through World Law Association.

His community activities include participation in the American Civil Liberties Union, American Jewish Committee, American Jewish Congress, Amie Karen Cancer Fund for Children, B'nai B'rith, Friends of the Santa Monica Mountains State Park, the NAACP Legal Defense and Educational Fund, the Alcoholism Council of California, the Thalians, Vista Del Mar Men's Association, Western Center for Law and the Handicapped, and the Venice Family Clinic.

I am proud to know a man whose community has honored him in so many ways. My wife, Lee, and I wish all the best for Alan, and his recent bride, Shelli, in their new life together.●

I BELIEVE IN AMERICA

HON. BILL LOWERY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. LOWERY of California. Mr. Speaker, once in a very great while, I come across something that exemplifies the American dream. Just recently, I heard Miss Dayna Marie Waitley deliver a poem she wrote as part of her successful competition in the Miss San Diego contest. I urge all my colleagues in the House and Senate to take a moment and read her poem. It will, no doubt, inspire you and reaffirm your commitment to a better tomorrow for all Americans.

I BELIEVE IN AMERICA

(By Dayna Marie Waitley)

I believe in America, I always have and always will.
And, you know, I still get a thrill when I see our flag unfurled . . .
As the strongest hope for freedom in this battle-weary world.
Why do I believe in America?
I can protest, I can preach, I can learn, I can teach.
I can earn, and I can reach.
I can travel anywhere, if I can pay the fare.
I can go from rags to riches, or be happy digging ditches
In America, I'm free, to be the me I choose to be!
Where else can you believe what you want?
Worship as you want?
Stay or leave when you want?
And where else can you come from ghettos into greatness,
Like O.J., Sugar Ray, and Dr. J.!
And where else can you write what you want?
Recite what you want?
Go day or night where you want?
Only in America, and I believe in America because we still have a dream
Like when recession ends and inflation ceases.
When our bills are paid and our pay increases.
When our children are safe and free to grow.
And when the other nations can go it alone!
But to believe in America is to believe in ourselves!
That we can ride our own black stallion, or wear that gold madallion!
We can upset Tracy Austin, win a marathon in Boston!
Be a football player, or finish-off Darth Vader!
We can win our race, conquer outer space!
Find world peace, and the treasure that we seek!
We can stay in love, we can rise above!
Reach our highest goal, and be happy in our soul!
So let's grab that dream and then believe it!
Go out and work, and we will achieve it!
Let's love ourselves, but give away all the love we can today!
And close our eyes and truly see the people we'd most like to be!
In America, we're free to be who we choose to be!●

OUTSTANDING ACHIEVEMENTS OF BLUE SPRINGS, MO.

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. SKELTON. Mr. Speaker, It gives me great pleasure to recognize the outstanding achievements of Blue Springs, Mo., a hard-working city in my district which recently became a member of an elite group of Missouri cities. On October 18, 1982, the honorable mayor of Blue Springs, John Michael, accepted the "All Missouri Certified City Award" presented by the Missouri community betterment program. One of only about 20 cities in the State to receive this award, Blue Springs is the only city in Jackson County, as well as statewide in the 25,000 to 50,000 population class, so honored for its high quality of life, citizen involvement, and favorable economic development conditions.

This is an important step for the city of Blue Springs and the State of Missouri as a whole. Cities receiving this honor reap statewide recognition, an edge in attracting business and industry, and increased civic pride which reflects favorably upon all of us.

I would like to also recognize the city of Nevada, Mo., previously a recipient of this award, which received a renewal of this great distinction this year.

I am proud that the people of the Fourth Congressional District have taken such an active role in the development of this outstanding community. Their pride and civic accomplishments should be taken to heart by all as we look for a means to better our everyday lives.●

ZERO HOUR FOR SOCIAL SECURITY

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982
